The annual required contribution (ARC) was determined as part of the February 28, 2010 and February 28, 2011 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010 was 30 years for the General division and 14 years for the Police division. The amortization period as of February 28, 2011 was 30 years for the General division and 19 years for the Police division.

VIII. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (concluded)

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO) (concluded)

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with February 28, 2011 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

IX. POST EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. The County had two COBRA participants at December 31, 2013, and two participants at December 31, 2012.

X. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $7,752 and $7,752, respectively, for the years ended December 31, 2013 and 2012.

XI. CLAIMS COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is not involved in pending litigation as of the audit report date.

B. Compensated Absences

The County provides employees with annual leave. Each employee earns leave based upon his or her term of service with the County earning one day per month for the first ten years, 1.25 days per month for 10-15 years of service, 1.5 days per month for 15-20 years of service, 1.75 days per month for 20–25 years of service, and 2 days per month for over 25 years of service. Annual leave must be used in the year it is earned; however, 100 hours leave may be carried over from year to year for employees with 1–5 years of service, 180 hours for employees with 6-15 years of service, and 240 hours for employees with over 15 years of service. Any unused leave time in excess of these amounts will be forfeited at the end of the calendar year. Annual leave accrual shall commence with the employee's date of employment with Miller County.

In the event an employee becomes ill and requires the use of accrued vacation time along with sick leave, he or she may do so with the understanding that accrued vacation time cannot be used in excess of what is remaining and due given the employees' tenure and the aforementioned schedule. During a scheduled vacation, sick leave shall not be granted. As vacation is granted for a period of recreation, no employee shall be permitted to waive such leave for the purpose of receiving double pay. Upon termination of employment, any employee who has accumulated vacation time shall be paid for unused time at the final regular rate received by such employee. This terminates all prior service with the County. Sick time is not reimbursable upon termination of employment with the County.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

XII. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. Insurance is obtained from commercial insurance companies. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

XII. RISK MANAGEMENT (concluded)

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

XIII. SUBSEQUENT EVENTS

Miller County entered into a line of credit with the Citizen's Bank of Eldon on February 28, 2014 for a maximum principal balance of $460,000 with an interest rate of 2.58% paid on the outstanding principal balance at December 31, 2014. The County has borrowed $119,923.17 of the line as of the audit report date.

The County also entered into a lease agreement with the Central Trust Bank on January 17, 2014, to purchase a Chevrolet C3500 Truck, for a principal balance of $33,310.60 and an annual interest rate of 2.75%. Two annual payments of $17,345.43 are payable starting January 17, 2015.

SUPPLEMENTARY SCHEDULES AND AUDITOR'S REPORT

STATE COMPLIANCE SECTION

SCHEDULE OF STATE FINDINGS

A. For the year ended December 31, 2013, the TIF 3 – Osage National Retail Outlet Fund was deficit budgeted. For the year ended December 31, 2012 the TIF 3 – Osage National Retail Outlet Fund and the Jail Fund were deficit budgeted.

B. For the year ended December 31, 2013, expenditures exceeded those budgeted for the following funds: Law Enforcement Training Fund, 911 Fund, Miller County Collector Tax Maintenance Fund, Jail Fund.

C. For the year ended December 31, 2012, expenditures exceeded those budgeted for the following funds: General Revenue Fund, Law Enforcement Training Fund, Emergency Management Fund, 911 Fund, Capital Improvement Fund, Jail Fund.

D. For the year ended December 31, 2012, the County did not prepare a budget for the following fund: Norman Road/Hand Lane Maintenance NID Fund.

E. For the year ended December 31, 2013, the County's budgets were not properly amended to reflect the available cash balances of the County, resulting in unreconciled differences in the Special Road and Bridge Fund, 911 Fund, Jail Fund.

F. For the year ended December 31, 2012, the County's budgets were not properly amended to reflect the available cash balances of the County, resulting in unreconciled differences in the Emergency Management Fund.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Independent Auditor's Report

To the County Commission
The County of Miller, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the County of Miller ("County") as of and for the years ended December 31, 2013, and 2012, and the related notes to the financial statements, which collectively comprise the County's basic financial statements, and have issued our report thereon dated June 13, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the County's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies. [FS 13/12-01, FS 13/12-02, FS 13/12-03, FS 13/12-04, FS 13/12-05, FS 13/12-06]

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

The County's Response to Findings

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. The County's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM;
AND REPORT ON INTERNAL CONTROL OVER COMPLIANCE

Independent Auditor's Report

To The County Commission
The County of Miller, Missouri

Report on Compliance for Each Major Federal Program

We have audited the County of Miller's ("County") compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the County's major federal programs for the years ended December 31, 2013, and 2012. The County's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the County's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the County's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the County's compliance.

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

Opinion on Each Major Federal Program

In our opinion, the County complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2013, and 2012.

Other Matters

The results of our auditing procedures disclosed an instance of noncompliance, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item SA 13/12-01. Our opinion on each major federal program is not modified with respect to this matter.

The County's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The County's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of the County is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the County's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified a certain deficiency in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as item SA 13/12-01, that we consider to be a significant deficiency.

The County's response to the internal control over compliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The County's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

				-
Total Expenditures of Federal Awards			$ 449,247.37	$ 890,045.00

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each major program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

The schedule includes all federal awards administered by Miller County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

*Federal financial assistanc*e means assistance that non-federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means federal financial assistance and federal cost-reimbursement contracts that non-Federal entities receive directly from federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and, if applicable, noncash awards.

C. Basis of Accounting

The schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

NOTE 2 – SUB-RECIPIENTS

The County did not provide federal awards to sub-recipients during the years ended December 31, 2013, and 2012.

THE COUNTY OF MILLER
TUSCUMBIA, MISSOURI
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
YEARS ENDED DECEMBER 31, 2013 AND 2012

I. SUMMARY OF AUDITOR'S RESULTS

A. Financial Statements

1. Type of auditor's report issued: Unmodified – Regulatory Basis

2. Internal control over financial reporting:

a. Material weakness(es) identified?	2013 ___	Yes	X No
	2012 ___	Yes	X No
b. Significant deficiencies identified?	2013 X	Yes	___ None Reported
	2012 X	Yes	___ None Reported

3. Noncompliance material to financial statements noted?

	2013 ___	Yes	X No
	2012 ___	Yes	X No

B. Federal Awards

1. Internal control over major programs:

a. Material weakness(es) identified?	2013 ___	Yes	X No
	2012 ___	Yes	X No
b. Significant deficiencies identified?	2013 X	Yes	___ None Reported
	2012 X	Yes	___ None Reported

2. Type of auditor's report issued on compliance for major programs:

2013 - Unmodified

2012 - Unmodified

3. Any audit findings disclosed that are required to be reported in accordance with section 510 (a) of *Circular A-133*?

	2013 X	Yes	___ No
	2012 X	Yes	___ No

I. SUMMARY OF AUDITOR'S RESULTS (concluded)

B. Federal Awards (concluded)

4. Identification of major programs:

Year	CFDA Number(s)	Name of Federal Program or Cluster
2013/2012	97.036	Disaster Grants – Public Assistance Grants
2013/2012	20.205	Highway Planning and Construction

5. Dollar threshold used to distinguish between type A and type B programs: $ 300,000

6. Auditee qualified as low-risk auditee? 2013 ___ Yes X No

2012 ___ Yes X No

II. FINANCIAL STATEMENT FINDINGS

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification,* considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County will begin the process of internal control documentation in 2014. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

II. FINANCIAL STATEMENT FINDINGS (continued)

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County will begin the process of internal control documentation in 2014. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

FS 13/12-03 Criteria: The County should maintain sufficient summary schedules and other related documentation for all debt.

Condition: The County does not maintain a debt schedule detailing all debt owed by the County.

Context: During the audit it became evident that the County did not maintain adequate debt schedules to track the County's debt.

Effect: Lack of documentation resulted in the County making a debt payment twice.

Cause: The County did not maintain proper amortization schedules to properly report and budget debt expenditures nor maintain a debt schedule listing.

Recommendation: We recommend that the County obtain sufficient documentation for all debt leases, notes, short-term notes, etc. to properly record and account for expenditures and to also maintain a debt schedule so that debt may be adequately tracked.

II. FINANCIAL STATEMENT FINDINGS (continued)

FS 13/12-03 Views of responsible officials and planned corrective actions: The County was able to provide the auditors will all of the documentation required. Going forward the County will actively track and maintain all of its debt. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

FS 13/12-04 Criteria: Bank reconciliations must be prepared monthly on a timely basis by all County Offices. Bank reconciliations must include a detail of the reconciling items which may include outstanding checks and deposits in transit.

Condition: During our testing, the Sheriff's administrative office was unable to provide us with bank reconciliations for the Adult Detention Center account for the years ended December 31, 2013 and 2012.

Context: This deficiency became apparent through our testing of cash accounts for the County and Sheriff's accounts.

Effect: Not preparing accurate bank reconciliations does not allow for the timely recognition of errors, therefore errors and differences are not able to be corrected in a timely manner.

Cause: Management does not prepare bank reconciliations in sufficient detail to note all outstanding items.

Recommendation: We recommend that management seek appropriate training to prepare bank reconciliations in a manner useful for making future decisions related to the cash balances of the County Accounts.

Views of Responsible Officials and Planned Corrective Actions: The Sheriff's Department is currently preparing monthly bank reconciliations for this account. The County Sheriff's (William Abbot) office phone number is (573)369-2341.

FS 13/12-05 Criteria: Reconciliations must be performed to ensure proper cash handling and cash management for all funds.

Condition: During our testing, we noted that the 911 Fund, Sheriff's Deputy Salary Supplement Fund and Jail Fund had deficit cash balances at December 31, 2013 and December 31, 2012.

Context: This deficiency became apparent through our testing of cash accounts for the County's accounts.

Effect: Not monitoring accurate cash balances can create a negative balance which could hinder the financial reporting process and cause funds to not be maintained properly.

II. FINANCIAL STATEMENT FINDINGS (concluded)

FS 13/12-05 Cause: Management does not maintain proper bank reconciliations to ensure the positive fund balances.

Recommendation: We recommend that management maintain positive fund balances within all governmental funds.

Views of Responsible Officials and Planned Corrective Actions: The Treasurer's and Clerk's office will work to maintain positive fund balances in the future by monitoring fund balances. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905 and the Treasurer's (Phil Lawson) office phone number is (573)369-1920.

FS 13/12-06 Criteria: SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit*: An Amendment to SAS No. 55.

Condition: Lack of sufficient segregation of duties within the Treasurer's office.

Context: During the engagement, we noted that an individual is allowed to receive, record, deposit, as well as write, approve, sign and reconcile expenditures and receipts to the bank statement.

Effect: The design of the internal control over financial reporting could adversely affect the ability to record, process, summarize and report financial data consistent with the assertions of management in the financial statements.

Cause: Size and budget constraints limiting the number of personnel within each of the corresponding departments.

Recommendation: These areas should be reviewed periodically and consideration should be given to improving the segregation of duties.

Views of responsible officials and planned corrective actions: The Treasurer's office will continue to be monitored and additional personnel will be will be added when possible. The Treasurer's (Phil Lawson) office phone number is (573)369-1920.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEARS ENDED DECEMBER 31, 2013 AND 2012

The following findings, recommendations, and questioned costs are the results of the single audit of Miller County, Missouri for the fiscal years ended December 31, 2013 and 2012. Each finding is referenced with a two-digit number representing the fiscal years audited, an "SA" to indicate that it is a single audit finding, and a sequential number. The findings are presented by federal program and are classified according to federal and state department, type of compliance requirement, category of internal control weakness, and category of noncompliance.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEARS ENDED DECEMBER 31, 2013 AND 2012 (continued)

A. Category of Internal Control Weakness (concluded)

If the finding represents a weakness in internal control, one of the following designations will appear:

1. Significant Deficiency: A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

2. Material Weakness: A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

B. Category of Noncompliance Findings

If the finding represents an instance of noncompliance, one of the following designations will appear:

1. Material Noncompliance: A material noncompliance finding is a finding related to a major federal program which discusses conditions representing noncompliance with federal laws, regulations, contracts, or grants, the effects of which have a material effect in relation to a type of compliance requirement or audit objective identified in OMB Circular A-133 *Compliance Supplement*.

2. Questioned Cost Finding: A questioned cost finding is a finding which discusses known or likely questioned costs that are greater than $10,000 for a type of compliance requirement, unless the conditions giving rise to the questioned costs are otherwise reported as a material noncompliance finding.

C. Federal Award Findings and Questioned Costs

SA 13/12-01 Untimely filing of the Schedule of Expenditures of Federal Awards with the Federal Clearinghouse –2011 and 2010 audit

Federal Grantor: U.S. Department of Justice, U.S. Department of Transportation, U.S. Department of Homeland Security and U.S. Department of Housing and Urban Development

Pass-Through Grantor: Department of Public Safety, Highway and Transportation Commission and Office of Secretary of State.

III. FEDERAL AWARD FINDINGS AND QUESTIONED COSTS FOR THE FISCAL YEARS ENDED DECEMBER 31, 2013 AND 2012 (continued)

C. Federal Award Findings and Questioned Costs (concluded)

SA 13/12-01 Federal CFDA Number: All

Program Title: All programs

Award Years: 2011 and 2010

Criteria: The Office of Management and Budget (OMB) Circular A-133, Subpart C, Section 320 requires the County to submit to the Federal Clearinghouse within the earlier of 30 days after receipt of the auditor's report, or nine months after the end of the audit period, unless a longer period is agreed to in advance by the cognizant or oversight agency for audit.

Condition: The 2011-2010 audit report was untimely filed to the Federal Clearinghouse.

Questioned Costs: None

Context: The single audit report was not timely filed with the Federal Clearinghouse.

Effect: Federal Clearinghouse submission deadline was not met.

Cause: The prior year submission was untimely due to the lateness of performing the audit.

Recommendation: We recommend the County become familiar with reporting deadlines as it is ultimately responsible for these deadlines.

Views of responsible officials and planned corrective actions: The County is familiar with the reporting deadlines and will strive to report the submission in a timely manner going forward. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

FS 11/10-01 Criteria: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to the financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of its audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitating the entity's auditor to provide such assistance are at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to the financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: Miller County will look into corrective Action.

Status: The County resolved this finding in the current year.

FS 11/10-02 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (continued)

FS 11/10-02 Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County will look into information regarding internal control.

Status: This finding is repeated in the current year audit as FS 13/12-01.

FS 11/10-03 Criteria: Antifraud programs and controls are the policies and procedures an organization puts in place to ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our engagement, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County will look into risk assessments being adopted per office holder.

Status: This finding is repeated in the current year audit as FS 13/12-02.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (continued)

FS 11/10-04 Criteria: The Collector's annual settlement should be filed on the first Monday in March of 2010 and 2011.

Condition: The Collector's annual settlement was filed on December 16, 2011 for the 2010 year and the settlement for 2011 had not been submitted as of the conclusion of field work.

Context: During discussions with the Collector, we noted the annual settlements were not timely filed.

Effect: Because the annual settlements were not filed according to statute deadlines, the Collector's office is not compliant with reporting requirements.

Cause: There have been balancing issues with Equitech that must be resolved before preparing the annual settlement.

Recommendation: We recommend that the Collector establish procedures to ensure that future settlements are submitted by the required date.

Views of responsible officials and planned corrective actions: The Collector will strive to submit future settlements by the required date and work quickly to resolve any reconciling issues with Equitech on a timely basis.

Status: This finding has been moved to a management comment as it has been deemed less severe than a significant deficiency.

FS 11/10-05 Criteria: The County should maintain sufficient summary schedules and other related documentation for all debt.

Condition: The County does not maintain a debt schedule detailing all debt owed by the County.

Context: As noted in Note III to the financial statements, it became evident that the County did not maintain adequate debt schedules to allow us to test and form the proper disclosures nor were all payment schedules made available to us for testing.

Effect: Lack of documentation may result in inaccurate balances being budgeted for future expenditures and potential overpayment of debt balances.

Cause: The County did not maintain proper amortization schedules to properly report and budget debt expenditures, nor did it maintain a debt schedule listing.

Recommendation: We recommend that the County obtain sufficient documentation for all debt leases, notes, short-term notes, etc. to properly record and account for expenditures and to also maintain a debt schedule so that debt may be adequately tracked.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (continued)

FS 11/10-05 Views of responsible officials and planned corrective actions: The County now has the information and we will work on making it more accessible.

Status: This finding is repeated in the current year as FS 13/12-03.

FS 11/10-06 Criteria: Interfund transfers must be properly tracked and balanced with amounts recorded in the County's general ledger detail.

Condition: The County was unable to provide us with support for interfund transfers that occurred for the period we were engaged to audit.

Context: We were unable to examine interfund transfers due the fact the County was unable to provide us with the proper supporting documentation.

Effect: We are unable to present a presumably mandatory disclosure.

Cause: Management has not prepared documentation for the purpose of tracking and properly recording interfund transfers.

Recommendations: We recommend that the County periodically review interfund transfers and supporting documentation to ensure they are in balance with the amounts recorded in the general ledger.

Views of responsible officials and planned corrective actions: We will work on transfer documentation.

Status: The County resolved this finding in the current year.

FS 11/10-07 Criteria: Bank reconciliations must be prepared monthly on a timely basis by all County Offices. Bank reconciliations must include a detail of the reconciling items which may include outstanding checks and deposits in transit.

Condition: During our testing, the Sheriff's administrative office was unable to provide us with bank reconciliations for the Adult Detention Center account for the years ended December 31, 2011 and 2010.

Context: This deficiency became apparent through our testing of cash accounts for the County and Sheriff's accounts.

Effect: Not preparing accurate bank reconciliations does not allow for the timely recognition of errors, therefore errors and differences are not able to be corrected in a timely manner.

Cause: Management does not prepare bank reconciliations in sufficient detail to note all outstanding items.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (continued)

FS 11/10-07 Recommendation: We recommend that management seek appropriate training to prepare bank reconciliations in a manner useful for making future decisions related to the County's account cash balances.

Views of Responsible Officials and Planned Corrective Actions: The Sheriff's department is currently preparing monthly bank reconciliations for this account.

Status: This finding is repeated in the current year as FS 13/12-04.

FS 11/10-08 Criteria: Analytical testing is used to form an understanding of the financial relationships amongst the County's funds and is performed as a part of the planning phase of the engagement.

Condition: The County was unable to provide the required supporting documentation for the analytical variances selected during our testing.

Context: During our testing, the County did not provide us with required supporting documentation for the variances selected in our analytical testing of the County's funds for the years ended December 31, 2011 and 2010.

Effect: The inability to review the required supporting documentation for the selected analytical variances limited the scope of our testing.

Cause: The County was unable to provide us with adequate support for variances selected in our analytical testing of its funds.

Recommendation: We recommend that management take steps to ensure all supporting schedules and supporting documentation are made readily available during an audit.

Views of Responsible Officials and Planned Corrective Actions: The County will make an effort to provide the adequate information.

Status: The County resolved this finding in the current year.

FS 11/10-09 Criteria: SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit*: An Amendment to SAS No. 55.

Condition: Lack of sufficient segregation of duties within the Sheriff's office.

Context: During the engagement, we noted that an individual is allowed to receive, record, deposit, as well as write, approve, sign and reconcile expenditures and receipts to the bank statement.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS (concluded)

FS 11/10-09 Effect: The design of the internal control over financial reporting could adversely affect the ability to record, process, summarize and report financial data consistent with the assertions of management in the financial statements.

Cause: Size and budget constraints limiting the number of personnel within each of the corresponding departments.

Recommendation: These areas should be reviewed periodically and consideration should be given to improving the segregation of duties.

Views of responsible officials and planned corrective actions: The Sheriff's department is understaffed in all areas and it is not cost beneficial to hire additional personnel at this time. All areas will continue to be monitored and additional personnel will be added when possible.

Status: This finding was resolved by the Sheriff's office in the current year.

II. PRIOR YEAR FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

SA 11/10-01 Incorrect Schedule of Expenditure of Federal Awards

Federal Grantor: U.S Department of Homeland Security
Pass-Through Grantor: Missouri Department of Public Safety
Federal CFDA Number: 97.036
Program Title: Disaster Grants - Public Assistance Grants
Pass Through Entity Identifying Number: 131-99131-00
Award Years: 2011

Criteria: The Office of Management and Budget (OMB) Circular A-133, Subpart C, Section 300(A) requires the County to prepare the Schedule of Expenditures of Federal Awards based on expenditures.

Condition: The 2011 Schedule of Expenditures of Federal Awards inaccurately reported funds received from the Department of Homeland Security rather than funds expended. The amounts of expenditures for these Disaster Grant funds should have been amounts expended during the 2011 year as required by the Office of Management and Budget (OMB) Circular A-133, Subpart C, Section 300(A).

Questioned Costs: None

Context: During our testing of the Disaster Grants – Public Assistance Grants, we noted the Schedule of Expenditures of Federal Awards incorrectly reported receipts instead of expenditures however, corrections were made and the Schedule of Expenditures of Federal Awards is properly reported in this audit report.

II. PRIOR YEAR FEDERAL AWARD FINDINGS AND QUESTIONED COSTS (continued)

SA 11/10-01 Effect: Expenditures were previously understated however, corrections have been made and expenditures are currently properly reported.

Cause: The County improperly reported 2011 Disaster Grants – Public Assistance Grants using receipts instead of expenditures.

Recommendation: We recommend that the County ensure that revenues and expenditures related to federal awards are recorded correctly and in conformity with the cash basis of accounting.

Views of responsible officials and planned corrective actions: The County will properly record expenditures on the Schedule of Expenditures of Federal Awards in the future.

Status: This finding has been resolved by the County in the current year.

SA 11/10-02 Untimely filing of the Schedule of Expenditures of Federal Awards with the Federal Clearinghouse – 2009 and 2008 audit, 2011 and 2010 audit

Federal Grantor: U.S. Department of Justice, U.S. Department of Transportation, General Services Administration, Election Assistance Commission and U.S. Department of Homeland Security and U.S. Department of Housing and Urban Development
Pass-Through Grantor: Department of Public Safety, Highway and Transportation Commission, Office of Secretary of State and Department of Social Services.

Federal CFDA Number: All
Program Title: All programs
Award Years: 2009 and 2008, 2011 and 2010

Criteria: The Office of Management and Budget (OMB) Circular A-133, Subpart C, Section 320 requires the County to submit to the Federal Clearinghouse within the earlier of 30 days after receipt of the auditor's report, or nine months after the end of the audit period, unless a longer period is agreed to in advance by the cognizant or oversight agency for audit.

Condition: The 2009-2008 audit report dated April 9, 2010, and was not submitted to the Federal Clearinghouse until November 9, 2010. The 2011-2010 audit report was also untimely filed to the Federal Clearinghouse.

Questioned Costs: None

Context: During our planning of the current year single audit, we noted that the prior year audit report was not timely filed with the Federal Clearinghouse. The current year audit report was also not timely filed with the Federal Clearinghouse.

II. PRIOR YEAR FEDERAL AWARD FINDINGS AND QUESTIONED COSTS (concluded)

SA 11/10-02 Effect: Federal Clearinghouse submission deadline was not met.

Cause: There was a lack of communication between the County and prior year auditors relating to the submission to the Federal Clearinghouse. The current year submission was untimely due to the lateness of performing the audit.

Recommendation: We recommend the County become familiar with reporting deadlines as it is ultimately responsible for these deadlines.

Views of responsible officials and planned corrective actions: The County is familiar with the reporting deadlines and will strive to report the submission in a timely manner going forward.

Status: This finding is repeated in the current year as SA 13/12-01.

Daniel Jones
& Associates
CERTIFIED PUBLIC ACCOUNTANTS

MEMBERS OF
MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

June 13, 2014

To the Board of Commissioners
County of Miller

In planning and performing our audit of the regulatory based financial statements of the County of Miller (the "County") as of and for the years ended December 31, 2013, and December 31, 2012, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We did not identify any deficiencies in County's internal control that we consider to be material weaknesses.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the County's internal control to be significant deficiencies as noted in section I:

Our comments concerning internal control and other significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Information Required by Professional Standards

The County's management has provided written responses to the findings in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the County Commission, County Office Holders, the Missouri State Auditor and federal agencies and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

DANIEL JONES & ASSOCIATES, P.C.
CERTIFIED PUBLIC ACCOUNTANTS
ARNOLD, MISSOURI

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification,* considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County will begin the process of internal control documentation in 2014. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

FS 13/12-02 Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County will begin the process of internal control documentation in 2014. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

FS 13/12-03 Criteria: The County should maintain sufficient summary schedules and other related documentation for all debt.

Condition: The County does not maintain a debt schedule detailing all debt owed by the County.

Context: During the audit it became evident that the County did not maintain adequate debt schedules to track the County's debt.

Effect: Lack of documentation resulted in the County making a debt payment twice.

Cause: The County did not maintain proper amortization schedules to properly report and budget debt expenditures nor maintain a debt schedule listing.

Recommendation: We recommend that the County obtain sufficient documentation for all debt leases, notes, short-term notes, etc. to properly record and account for expenditures and to also maintain a debt schedule so that debt may be adequately tracked.

Views of responsible officials and planned corrective actions: The County was able to provide the auditors will all of the documentation required. Going forward the County will actively track and maintain all of its debt. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

FS 13/12-04 Criteria: Bank reconciliations must be prepared monthly on a timely basis by all County Offices. Bank reconciliations must include a detail of the reconciling items which may include outstanding checks and deposits in transit.

Condition: During our testing, the Sheriff's administrative office was unable to provide us with bank reconciliations for the Adult Detention Center account for the years ended December 31, 2013 and 2012.

Context: This deficiency became apparent through our testing of cash accounts for the County and Sheriff's accounts.

Effect: Not preparing accurate bank reconciliations does not allow for the timely recognition of errors, therefore errors and differences are not able to be corrected in a timely manner.

Cause: Management does not prepare bank reconciliations in sufficient detail to note all outstanding items.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (continued)

FS 13/12-04 Recommendation: We recommend that management seek appropriate training to prepare bank reconciliations in a manner useful for making future decisions related to the cash balances of the County Accounts.

Views of Responsible Officials and Planned Corrective Actions: The Sheriff's Department is currently preparing monthly bank reconciliations for this account. The County Sheriff's (William Abbot) office phone number is (573)369-2341.

FS 13/12-05 Criteria: Reconciliations must be performed to ensure proper cash handling and cash management for all funds.

Condition: During our testing, we noted that the 911 Fund, Sheriff's Deputy Salary Supplement Fund and Jail Fund had deficit cash balances at December 31, 2013 and December 31, 2012.

Context: This deficiency became apparent through our testing of cash accounts for the County's accounts.

Effect: Not monitoring accurate cash balances can create a negative balance which could hinder the financial reporting process and cause funds to not be maintained properly.

Cause: Management does not maintain proper bank reconciliations to ensure the positive fund balances.

Recommendation: We recommend that management maintain positive fund balances within all governmental funds.

Views of Responsible Officials and Planned Corrective Actions: The Treasurer's and Clerk's office will work to maintain positive fund balances in the future by monitoring fund balances. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905 and the Treasurer's (Phil Lawson) office phone number is (573)369-1920.

FS 13/12-06 Criteria: SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit*: An Amendment to SAS No. 55.

Condition: Lack of sufficient segregation of duties within the Treasurer's office.

Context: During the engagement, we noted that an individual is allowed to receive, record, deposit, as well as write, approve, sign and reconcile expenditures and receipts to the bank statement.

Effect: The design of the internal control over financial reporting could adversely affect the ability to record, process, summarize and report financial data consistent with the assertions of management in the financial statements.

Cause: Size and budget constraints limiting the number of personnel within each of the corresponding departments.

Recommendation: These areas should be reviewed periodically and consideration should be given to improving the segregation of duties.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (concluded)

FS 13/12-06 Views of responsible officials and planned corrective actions: The Treasurer's office will continue to be monitored and additional personnel will be will be added when possible. The Treasurer's (Phil Lawson) office phone number is (573)369-1920.

SA 13/12-01	Federal Grantor:	U.S. Department of Justice, U.S. Department of Transportation, U.S. Department of Homeland Security and U.S. Department of Housing and Urban Development
Other Information	Pass-Through Grantor:	Department of Public Safety, Highway and Transportation Commission and Office of Secretary of State.
Significant Deficiency	Federal CFDA Number:	All
	Program Title:	All Programs

Information on the federal program: Untimely filing of the Schedule of Expenditures of Federal Awards with the Federal Clearinghouse –2011 and 2010 audit

Criteria: The Office of Management and Budget (OMB) Circular A-133, Subpart C, Section 320 requires the County to submit to the Federal Clearinghouse within the earlier of 30 days after receipt of the auditor's report, or nine months after the end of the audit period, unless a longer period is agreed to in advance by the cognizant or oversight agency for audit.

Condition: The 2011-2010 audit report was untimely filed to the Federal Clearinghouse.

Questioned Costs: None

Context: The single audit report was not timely filed with the Federal Clearinghouse.

Effect: Federal Clearinghouse submission deadline was not met.

Cause: The prior year submission was untimely due to the lateness of performing the audit.

Recommendation: We recommend the County become familiar with reporting deadlines as it is ultimately responsible for these deadlines.

Views of responsible officials and planned corrective actions: The County is familiar with the reporting deadlines and will strive to report the submission in a timely manner going forward. The County Clerk's (Clayton Jenkins) office phone number is (573)369-1905.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards and *Government Auditing Standards*

Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, *Government Auditing Standards* and OMB Circular A-133, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated April 21, 2014. Professional standards also require that we communicate to you the following information related to our audit.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (continued)

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County are described in Note I to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2013-2012 fiscal years. We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. Due to the County applying the regulatory basis of accounting, no estimates are made during the preparation of financial statements.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to each opinion unit's financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 13, 2014.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the County's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (concluded)

Other Matters

We were engaged to report on the schedule of expenditures of federal awards which accompany the financial statements but are not Required Supplementary Information. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

We noted during our audit a certain matter that was not considered to be a significant deficiency or material weakness. During our audit, we noted that the Collector is not submitting settlements on a timely basis, which has also been an issue in previous audits. We recommend that the Collector submit annual settlements by the established due date.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Perry County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Perry County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Daniel Jones & Associates, Certified Public Accountants, is attached.

Thomas A. Schweich
State Auditor

INDEPENDENT AUDITOR'S REPORT

To the County Commission
The County of Perry, Missouri

Report on the Financial Statements

We have audited the accompanying financial statements of the County of Perry ("County"), Missouri, which comprise cash and unencumbered cash for each fund as of December 31, 2013, and 2012, and the related statements of cash receipts and disbursements and disbursements-budget and actual for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the regulatory basis of accounting, a financial reporting framework prescribed or permitted by Missouri law as described in Note I of the accompanying financial statements. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note I of the financial statements, the financial statements are prepared on the basis of the financial reporting provisions prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of Missouri.

The effects on the financial statements of the variances between the regulatory basis of accounting described in Note I and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of each fund of the County as of December 31, 2013, and 2012, or changes in financial position or cash flows thereof for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash and unencumbered cash of each fund of the County as of December 31, 2013, and 2012, and their respective cash receipts and disbursements, and budgetary results for the years then ended in accordance with the financial reporting provisions prescribed or permitted by Missouri law described in Note I.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 17, 2014, on our consideration of the County of Perry's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering County of Perry's internal control over financial reporting and compliance.

The accompanying notes to the financial statements are an integral part of this statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Perry, Missouri ("County"), which is governed by a three-member board of commissioners, was established in 1820 by an Act of the Missouri Territory. In addition to the three Commissioners, there are eleven elected Constitutional Officers: County Clerk, Collector, Treasurer, Sheriff, Assessor, Coroner, Circuit Clerk, Recorder, Public Administrator, County Surveyor, and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, transportation, economic development, and social and recreation services.

The financial statements referred to above include only the primary government of Perry County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by Missouri law, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances – All Governmental Funds, a Comparative Statement of Receipts and Disbursements – Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similarly to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other officeholders.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America. Those principles require revenues to be recognized when they become available and measurable or when they are earned, and expenditures or expenses to be recognized when the related liabilities are incurred.

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financial statements would be presented on the accrual basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures. Section 50.740 RSMo prohibits expenditures in excess of the approved budgets.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar years 2013 and 2012, for purposes of taxation, was:

	2013	2012
Real Estate	$ 213,484,690	$ 208,029,704
Personal Property	93,185,057	91,030,902
Railroad and Utilities	15,749,674	15,074,018
	$ 322,419,421	$ 314,134,624

The County Commission approved a $.6601 and $.6601 tax levy per $100 of assessed valuation of tangible taxable property for the calendar years 2013 and 2012, for purpose of County taxation, as follows:

	2013	2012
General Revenue Fund	$ .1800	$ .1800
Special Road and Bridge Fund	.2999	.2999
Mental Health Fund	.0901	.0901
Senate Bill 40 Fund	.0901	.0901
	$ .6601	$ .6601

F. Cash and Investments

The County pools cash and investment resources of various funds in the County Treasurer's office in order to facilitate the management of cash and investments. Cash and investments applicable to a particular fund are readily identifiable. Some county offices also hold cash and investments in their own separate bank accounts as required by state statute. The balance in the pooled cash account is available to meet current operating requirements. Details of these cash balances are presented in Note II.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as “transfers in” by the recipient fund and as “transfers out” by the disbursing fund.

II. CASH AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed as "Cash and Investments" under each fund's caption.

Deposits with maturities greater than three months are considered investments. In addition, cash and investments are separately held by several of the County’s funds. County investments consist of certificates of deposit with local banking institutions.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013, and 2012, the carrying amount of the County's deposits was $2,638,729.50 and $2,856,936.73, and the bank balance was $13,959,848.39 and $12,403,078.86, respectively. As of December 31, 2013, and 2012, the County’s deposits were properly pledged by FDIC insurance and pledged securities.

SUMMARY OF CARRYING VALUES

Carrying values of deposits and investments shown above are included in the financial statements at December 31, 2013, as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investments – Governmental Funds:	
Deposits	$ 2,461,227.20
Investments	177,502.30
Total Governmental Funds	2,638,729.50
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:	
Deposits	12,691,812.95
Investments	-
Total Agency Funds	12,691,812.95
Total Deposits and Investments as of December 31, 2013	$ 15,330,542.45

II. CASH AND INVESTMENTS (concluded)

The carrying values of deposits and investments at December 31, 2012, are as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investments – Governmental Funds:	
Deposits	$ 2,680,932.97
Investments	176,003.76
Total Governmental Funds	2,856,936.73
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:	
Deposits	11,815,744.37
Investments	-
Total Agency Funds	11,815,744.37
Total Deposits and Investments as of December 31, 2012	$ 14,672,681.10

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy does not include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013, and 2012.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial investment credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments. All investments, evidenced by individual securities, are registered in the name of the County or of a type not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has no policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. The County's investments were not exposed to concentration of investment credit risk for the years ended December 31, 2013, and 2012.

III. LONG-TERM DEBT

In 2005, the County issued Leasehold Revenue Bonds Refunding Series 2005 with an original principal balance of $8,785,000 due in annual principal installments ranging from $480,000 to $1,085,000 through May 1, 2017. The interest rate is variable from 3.25% to 4.50%. Interest payments are due semi-annually on May 1 and November 1.

2013

	Balance at December 31, 2012	Amount Borrowed	Amount Repaid	Balance at December 31, 2013	Interest Paid During Year
Series 2005	$ 4,640,000.00	$ -	$ 800,000.00	$ 3,840,000.00	$ 165,477.50
Totals	$ 4,640,000.00	$ -	$ 800,000.00	$ 3,840,000.00	$ 165,477.50

2012

	Balance at December 31, 2011	Amount Borrowed	Amount Repaid	Balance at December 31, 2012	Interest Paid During Year
Series 2005	$ 5,370,000.00	$ -	$ 730,000.00	$ 4,640,000.00	$ 199,502.50
Totals	$ 5,370,000.00	$ -	$ 730,000.00	$ 4,640,000.00	$ 199,502.50

The future payments as of December 31, 2013, are as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2014	$ 850,000.00	$ 132,177.50	$ 982,177.50
2015	920,000.00	99,857.50	1,019,857.50
2016	985,000.00	63,118.75	1,048,118.75
2017	1,085,000.00	21,700.00	1,106,700.00
TOTALS	$ 3,840,000.00	$ 316,853.75	$ 4,156,853.75

III. LONG-TERM DEBT (concluded)

The future payments as of December 31, 2012, are as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2013	$ 800,000.00	$ 165,477.50	$ 965,477.50
2014	850,000.00	132,177.50	982,177.50
2015	920,000.00	99,857.50	1,019,857.50
2016	985,000.00	63,118.75	1,048,118.75
2017	1,085,000.00	21,700.00	1,106,700.00
TOTALS	$ 4,640,000.00	$ 482,331.25	$ 5,122,331.25

IV. CAPITAL LEASES

In 2011, the County entered into a capital lease financing agreement with the Bank of Missouri for a 2011 John Deere 670G. The lease matured on March 20, 2013, with a nominal annual rate of 4.19%. Combined interest and principal payments are paid annually.

In 2011, the County entered into a capital lease financing agreement with the Bank of Missouri for three 2011 Dodge Chargers. The lease matured on March 20, 2013, with a nominal annual rate of 4.19%. Combined interest and principal payments are paid annually.

In 2011, the County entered into a capital lease financing agreement with the Bank of Missouri for a 2012 International 7400 and a 2012 International M2112V. The lease matures on May 25, 2014, with a nominal annual rate of 4.19%. Combined interest and principal payments are paid annually.

2013

	Balance at December 31, 2012	Amount Borrowed	Amount Repaid	Balance at December 31, 2013	Interest Paid During Year
2011 John Deere 670G	$ 62,366.22	$ -	$ 62,366.22	$ -	$ 2,641.79
2011 Dodge Chargers	25,145.52	-	25,145.52	-	1,068.03
International Trucks	129,458.67	-	63,450.48	66,008.19	5,468.90
Totals	$ 216,970.41	$ -	$ 150,962.22	$ 66,008.19	$ 9,178.72

2012

	Balance at December 31, 2011	Amount Borrowed	Amount Repaid	Balance at December 31, 2012	Interest Paid During Year
2011 John Deere 670G	$ 124,200.00	$ -	$ 61,833.78	$ 62,366.22	$ 3,206.50
2011 Dodge Chargers	50,000.00	-	24,854.48	25,145.52	1,373.14
International Trucks	192,500.00	-	63,041.33	129,458.67	5,878.05
Totals	$ 366,700.00	$ -	$ 149,729.59	$ 216,970.41	$ 10,457.69

IV. CAPITAL LEASES (concluded)

The future payments as of December 31, 2013, are as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2014	$ 66,008.19	$ 2,803.63	$ 68,811.82
TOTALS	$ 66,008.19	$ 2,803.63	$ 68,811.82

The future payments as of December 31, 2012, are as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2013	$ 150,962.22	$ 9,178.72	$ 160,140.94
2014	66,008.19	2,803.63	68,811.82
TOTALS	$ 216,970.41	$ 11,982.35	$ 228,952.76

V. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue Fund	$ 135,000.00	$ -	$ 125,000.00	$ 85,359.41
Special Road and Bridge Fund	100,000.00	135,000.00	-	125,000.00
Road and Bridge Sales Tax Fund	-	100,000.00	-	-
Local Park Sales Tax Fund	-	-	85,359.41	-
Prosecuting Attorney Bad Check Fund	5,000.00	-	5,000.00	-
Law Enforcement Restitution Fund	-	5,000.00	-	5,000.00
TOTAL	$ 240,000.00	$ 240,000.00	$ 215,359.41	$ 215,359.41

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Revenue Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

VI. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

A. Plan Description

CERF was established by an act of the Missouri General Assembly effective August 28, 1994. Laws governing the retirement fund are found in Sections 50.1000-50.1300 of the Missouri Revised Statutes (RSMo). The Board of Directors consists of 11 members, 9 of whom are county employee participants. Two members, who have no beneficiary interest in CERF, are appointed by the Governor of Missouri. The Board of Directors has the authority to adopt rules and regulations for administering the system.

CERF is a mandatory cost-sharing multiple employer retirement system for each county in the state of Missouri, except any city not within a county (which excludes the city of St. Louis) and counties of the first classification with a charter form of government. CERF covers county elective or appointive officers or employees whose position requires the actual performance of duties not less than 1,000 hours per year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000, could opt out of the system. CERF is a defined benefit plan providing retirement and death benefits to its members. All benefits vest after 8 years of creditable service. Employees who retire on or after age 62 are entitled to an allowance for life based on the form of payment selected. The normal form of payment is a single life annuity. Optional joint and survivor annuity and 10-year certain and life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55. Annual cost-of-living adjustments, not to exceed 1%, are provided for eligible retirees and survivor annuitants, up to a lifetime maximum of 50% of the initial benefit which the member received upon retirement. Benefit provisions are fixed by state statute and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65101, or by calling 1-573-632-9203.

B. Contributions

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2% of gross compensation. Effective January 1, 2003, participating county employees hired on or after February 25, 2002, are required to make contributions of 4% if they are in a LAGERS county and contributions of 6% if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee.

The contribution rate is set by state statute and may be amended only by action of the Missouri Legislature. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $47,243.08 and $46,741.08, respectively, for the years then ended.

VII. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $2,244 and $2,244, respectively, for the years ended December 31, 2013, and 2012.

VIII. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS)

A. Plan Description

Perry County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and governed by statute section RSMo. 70.600 - 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling 1-800-447-4334.

B. Funding Status

Full-time employees of Perry County do not contribute to the pension plan. The June 30th statutorily required contribution rates are 10.5% (General) and 11.5% (Police) in 2013 and 12.1% (General) and 10.5% (Police) in 2012 of annual covered payroll. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for 2013 and 2012 were as follows:

	2013	2012
Annual required contribution	$ 316,848	$ 304,777
Interest on net pension obligation	2,226	2,121
Adjustment to annual required contribution	(2,125)	(2,492)
Annual pension cost	316,949	304,406
Actual contributions	316,848	302,948
Increase (decrease) in NPO	101	1,458
NPO beginning of year	30,710	29,252
NPO end of year	$ 30,811	$ 30,710

VIII. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (continued)

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

For 2013, the annual required contribution (ARC) was determined as part of the February 28, 2011, and February 29, 2012, annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013, included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011, was 15 years for the General division and 22 years for the Police division. The amortization period as of February 29, 2012, was 21 years for the General division and 21 years for the Police division.

For 2012, the annual required contribution (ARC) was determined as part of the February 28, 2010, and February 28, 2011, annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012, included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010, was 28 years for the General division and 30 years for the Police division. The amortization period as of February 28, 2011, was 15 years for the General division and 22 years for the Police division.

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011, annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

IX. POST-EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. There was one participant in COBRA at December 31, 2013, and one at December 31, 2012, paying respective premiums of $2,365.98 and $5,600.10.

X. CLAIMS, COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is not currently involved in pending litigation as of the audit report date.

B. Compensated Absences

The County provides employees with up to 25 days of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation leave. Vacation days not used by the end of the year are forfeited. Employees in the County earn 8 hours of sick pay for each month worked. Upon termination from county employment, the employee is not compensated for unused sick time.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

XI. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. Insurance is obtained from commercial insurance companies. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool, which is a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

XI. RISK MANAGEMENT (concluded)

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

XII. SUBSEQUENT EVENTS

In March 2014, the Prosecuting Attorney's office entered into an operating lease for a copier requiring 60 monthly payments of $212.

On April 14, 2014, the County issued Lease Refunding Certificates of Participation, Series 2014 to refund the Parks Revenue Bonds with a principal amount of $2,565,000.

SUPPLEMENTARY SCHEDULES AND AUDITOR'S REPORT

STATE COMPLIANCE SECTION

SCHEDULE OF STATE FINDINGS

I. For the year ended December 31, 2013, actual expenditures exceeded those budgeted in the Mental Health Fund, Local Park Sales Tax Fund, Prosecuting Attorney Bad Check Fund and the Law Enforcement Sales Tax Fund.

II. For the year ended December 31, 2012, actual expenditures exceeded those budgeted in the General Revenue Fund, Law Enforcement Training Fund, Recorder's User Fee Fund, Sheriff's Civil Fee Fund, Senior Citizens Sales Tax Fund, and the Local Park Sales Tax Fund.

III. For the year ended December 31, 2013, a budget was not prepared for the Sheriff's Reserve Fund.

IV. For the year ended December 31, 2012, a budget was not prepared for the Sheriff's Reserve Fund.

V. For the year ended December 31, 2012, the Collector's Tax Maintenance Fund budget document was not amended to match actual cash balances.

VI. For the year ended December 31, 2013, the Senate Bill 40 Fund budget document was not amended to match actual cash balances.

MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Independent Auditor's Report

To the County Commission
The County of Perry, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the County of Perry ("County") as of and for the years ended December 31, 2013, and 2012, and the related notes to the financial statements, which collectively comprise the County's basic financial statements, and have issued our report thereon dated June 17, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the County's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and responses that we consider to be significant deficiencies. [FS 13/12-01 and FS 13/12-02]

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

The County's Response to Findings

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and responses. The County's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

June 17, 2014

I. FINANCIAL STATEMENT FINDINGS

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs, the County informed us that internal control documentation had not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Randy Taylor) is in the process of preparing the needed documentation to document their internal control structure in conformity with the COSO framework. The Clerk expects to complete this by the next audit period. The County Clerk's phone number is (573) 547-4242.

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the County's walkthroughs, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs, the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

I. FINANCIAL STATEMENT FINDINGS (concluded)

FS 13/12-02 Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Randy Taylor) is in the process of preparing the needed documentation to document their fraud risk in conformity with the COSO framework. The Clerk expects to complete this by the next audit period. The County Clerk's phone number is (573) 547-4242.

THE COUNTY OF PERRY
PERRYVILLE, MISSOURI
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS AND RESPONSES
YEARS ENDED DECEMBER 31, 2013 AND 2012

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

There were no prior year audit findings related to internal control and compliance since there was not an audit performed for the prior audit period.

To the Board of Commissioners
County of Perry

In planning and performing our audit of the regulatory based financial statements of the County of Perry (the "County") as of and for the years ended December 31, 2013, and December 31, 2012, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We did not identify any deficiencies in County's internal control that we consider to be material weaknesses.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the County's internal control to be significant deficiencies as noted in section I:

Our comments concerning internal control and other significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Information Required by Professional Standards

The County's management has provided written responses to the findings in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the County Commission, County Office Holders, the Missouri State Auditor and federal agencies and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

DANIEL JONES & ASSOCIATES, P.C.
CERTIFIED PUBLIC ACCOUNTANTS

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122 *Statements on Auditing Standards: Clarification and Recodification,* considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs, the County informed us that internal control documentation had not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Randy Taylor) is in the process of preparing the needed documentation to document their internal control structure in conformity with the COSO framework. The Clerk expects to complete this by the next audit period. The County Clerk's phone number is (573) 547-4242.

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the County walkthroughs, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs, the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (Continued)

FS 13/12-02 Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Randy Taylor) is in the process of preparing the needed documentation to document their fraud risk in conformity with the COSO framework. The Clerk expects to complete this by the next audit period. The County Clerk's phone number is (573) 547-4242.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards and *Government Auditing Standards*

Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, *Government Auditing Standards* and OMB Circular A-133, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated May 19, 2014. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County are described in Note I to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2013-2012 fiscal years. We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. Due to the County applying the regulatory basis of accounting, no estimates are made during the preparation of financial statements.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to each opinion unit's financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (concluded)

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 17, 2014.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the County's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

We were engaged to report on the schedule of state findings, schedule of findings and responses and the summary of prior year findings and responses, which accompany the financial statements but are not Required Supplementary Information. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Thirty-Third Judicial Circuit, City of Sikeston Municipal Division

Ticket Accountability

The Sikeston Department of Public Safety and the municipal division do not work together to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly. Of the 55 tickets reviewed for the year ended June 30, 2014, three were missing and one had been entered with an incorrect ticket number in the case management system.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings
Ticket Accountability 4

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Thirty-Third Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the City Council
Sikeston, Missouri

We have audited certain operations of the City of Sikeston Municipal Division of the Thirty-Third Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions and court rules.

3. Evaluate the city's compliance with Section 302.341.2, RSMo, which restricts the amount of fines and court costs that may be retained from traffic violations.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) a deficiency in internal controls, (2) no significant noncompliance with legal provisions and noncompliance with a court rule, and (3) no noncompliance with Section 302.341.2, RSMo. The accompanying Management Advisory Report presents our finding arising from our audit of the City of Sikeston Municipal Division of the Thirty-Third Judicial Circuit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Robyn Vogt, M.Acct., CPA
In-Charge Auditor:	Gina Henley, MBA
Audit Staff:	Marlon McDaniels, M.Acct.

Ticket Accountability

The Sikeston Department of Public Safety (department) and the municipal division do not work together to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

The department tracks the ticket book numbers assigned to each police officer on a log. When tickets are issued, police officers enter the ticket information into a computerized system. After tickets are reviewed by supervisory personnel within the department, the tickets, with the exception of those voided or filed in the Circuit Court, are forwarded to the municipal division to be entered into the case management system and processed. Neither the department nor the municipal division performs procedures to review the numerical sequence of tickets issued or processed to identify missing tickets.

Three tickets were missing out of the 55 tickets reviewed for the year ended June 30, 2014. Upon inquiry, department personnel could not locate any copies of these tickets, and believe these tickets were voided; however, the voided tickets were not retained and attached to the police officer's ticket book as required by department General Order Number 12.4.3. Also, for 1 of the 55 tickets reviewed, the municipal division incorrectly entered the ticket number into the case management system, making it difficult to ensure the ticket had been properly filed with the municipal division. Had the numerical sequence of tickets been accounted for, the missing tickets and the ticket number error may have been detected.

Section VII.D. of the Municipal Court Operating Order Number 1 requires the Court Clerk to work jointly with the department to account for the numerical sequence of all traffic tickets and maintain a record of the disposition of all tickets assigned and issued by the department. Without properly accounting for the numerical sequence and ultimate disposition of tickets issued, the department and the municipal division cannot ensure all tickets issued are properly submitted for processing. A record should be maintained to account for the ultimate disposition of each ticket to decrease the risk of loss, theft, or misuse of funds.

Recommendation

The City of Sikeston Municipal Division work with the Sikeston Department of Public Safety to ensure the numerical sequence and ultimate disposition of all tickets are accounted for properly, and voided tickets are handled in accordance with policy.

Auditee's Response

The City of Sikeston Municipal Division, the Sikeston Department of Public Safety, and the City of Sikeston provided the following written response:

The City of Sikeston Municipal Division will coordinate with the Sikeston Department of Public Safety to implement enhanced procedures to ensure

the numerical sequence and ultimate disposition of tickets are accounted for properly, and voided tickets are handled in accordance with policy.

Beginning September 1, 2014, City of Sikeston Municipal Division staff will compile a report for a 30-day period two months prior (July 2014) showing, in numerical order, the tickets received from the Sikeston Department of Public Safety and entered into the municipal division's Incode software system. Working in cooperation with the Sikeston Department of Public Safety, irregularities in numerical sequence will be identified, missing tickets located, and the findings noted on the monthly report. Said report will remain a part of the municipal division's monthly administrative documentation, and will be referred to, as needed, as successive months' data is reviewed.

The Sikeston Department of Public Safety is currently seeking software vendors for an updated report management system that will improve the tracking of citations. Upon implementation of this new software, the procedures outlined above will be amended to ensure the tickets are accounted for in a proper and efficient manner.

Thank you for bringing this matter to our attention, and working with municipal division and public safety personnel to improve ticket accountability procedures.

Thirty-Third Judicial Circuit
City of Sikeston Municipal Division
Organization and Statistical Information

The City of Sikeston Municipal Division is in the Thirty-Third Judicial Circuit, which consists of Mississippi and Scott Counties. The Honorable David Dolan serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and court costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At June 30, 2014, the municipal division employees were as follows:

Title	Name
Municipal Judge	Franklin Marshall
Court Clerk	Pat Cox
Deputy Court Clerk	Cindy Sturgeon

Financial and Caseload Information

	Year Ended June 30, 2014
Receipts	$335,102

INDEPENDENT AUDITOR'S REPORT

To the County Commission
The County of Shannon, Missouri

Report on the Financial Statements

We have audited the accompanying financial statements of the County of Shannon ("County"), Missouri, which comprise cash and unencumbered cash for each fund as of December 31, 2013 and 2012, and the related statements of cash receipts and disbursements and disbursements-budget and actual for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the regulatory basis of accounting, a financial reporting framework prescribed or permitted by Missouri law as described in Note I of the accompanying financial statements. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note I of the financial statements, the financial statements are prepared on the basis of the financial reporting provisions prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of Missouri.

The effects on the financial statements of the variances between the regulatory basis of accounting described in Note I and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of each fund of the County as of December 31, 2013, and 2012, or changes in financial position or cash flows thereof for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash and unencumbered cash of each fund of the County as of December 31, 2013, and 2012, and their respective cash receipts and disbursements, and budgetary results for the years then ended in accordance with the financial reporting provisions prescribed or permitted by Missouri law described in Note I.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 13, 2014, on our consideration of the County of Shannon's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering County of Shannon's internal control over financial reporting and compliance.

The accompanying notes to the financial statements are an integral part of this financial statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Shannon, Missouri ("County"), which is governed by a three-member board of commissioners, was established in 1841 by an Act of the Missouri Territory. In addition to the three Commissioners, there are nine elected Constitutional Officers: County Clerk, Collector, Treasurer, Sheriff, Assessor, Coroner, Circuit Clerk and ex officio Recorder, Public Administrator and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, transportation, economic development, and social and recreation services.

The financial statements referred to above include only the primary government of the County of Shannon County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by Missouri law, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances – All Governmental Funds, a Comparative Statement of Receipts and Disbursements – Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similarly to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other officeholders.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America. Those principles require revenues to be recognized when they become available and measurable or when they are earned, and expenditures or expenses to be recognized when the related liabilities are incurred.

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financial statements would be presented on the accrual basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures. Section 50.740 RSMo prohibits expenditures in excess of the approved budgets.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar year 2013 and 2012, for purposes of taxation was:

	2013	2012
Real Estate	$ 45,456,890	$ 43,158,410
Personal Property	23,212,929	21,332,333
Railroad and Utilities	1,760,611	1,921,212
	$ 70,430,430	$ 66,411,955

The County Commission approved a $0.6458 and $0.6458 tax levy per $100 of assessed valuation of tangible taxable property for the calendar year 2013 and 2012, for purpose of County taxation, as follows:

	2013	2012
General Revenue Fund	$ .2562	$ .2562
Special Road and Bridge Fund	.2424	.2424
Senate Bill 40 Fund	.0972	.0972
Senior Services Board Fund	.0500	.0500
	$ .6458	$ .6458

F. Cash and Investments

The County pools cash and investment resources of various funds in the County Treasurer's office in order to facilitate the management of cash and investments. Cash and investments applicable to a particular fund are readily identifiable. Some county offices also hold cash and investments in their own separate bank accounts as required by state statute. The balance in the pooled cash account is available to meet current operating requirements. Details of these cash balances are presented in Note II.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as “transfers in” by the recipient fund and as “transfers out” by the disbursing fund.

II. CASH AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed as "Cash and Investments" under each fund's caption.

Deposits with maturities greater than three months are considered investments. In addition, cash and investments are separately held by several of the County’s funds. County investments consist of certificates of deposit with local banking institutions.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013 and 2012, the carrying amount of the County's deposits was $646,754.08 and $790,511.16, and the bank balance was $2,339,783.99 and $2,431,349.37, respectively. As of December 31, 2013 and 2012, the County’s deposits were properly pledged by FDIC insurance and pledged securities.

SUMMARY OF CARRYING VALUES

Carrying values of deposits and investments shown above are included in the financial statements at December 31, 2013, as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investments – Governmental Funds:		
Deposits	$	634,726.99
Investments		12,027.09
Total Governmental Funds		646,754.08
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:		
Deposits		2,166,117.19
Investments		-
Total Agency Funds		2,166,117.19
Total Deposits and Investments as of December 31, 2013	$	2,812,871.27

II. CASH AND INVESTMENTS (concluded)

The carrying values of deposits and investments at December 31, 2012, are as follows:

Included in the following fund financial statement captions:

Statements of Receipts, Disbursements and Changes in Cash and Investments – Governmental Funds:		
Deposits	$	781.940.74
Investments		8,570.42
Total Governmental Funds		790,511.16
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:		
Deposits		1,938,608.01
Investments		-
Total Agency Funds		1,938,608.01
Total Deposits and Investments as of December 31, 2012	$	2,729,119.17

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy does not include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013 and 2012.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments. All investments, evidenced by individual securities, are registered in the name of the County or of a type not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has no policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. The County's investments were not exposed to concentration of investment credit risk for the years ended December 31, 2013, and 2012.

III. CAPITAL LEASES

In 2013, the County entered into a capital lease financing agreement with John Deere for a 6415 Utility Cab Tractor for $30,270. The lease expires on April 29, 2016, with a nominal annual rate of 3.952%. Combined interest and principal payments are paid annually in the amount of $10,897.77.

In 2012, the County entered into a capital lease financing agreement with Caterpillar Financial Services Corporation for a 2012 motor grader for $112,039. The lease expires October 11, 2017, with a nominal annual rate of 3.200%.

In 2010, the County entered into a capital lease financing agreement with Caterpillar Financial Services Corporation for a 2002 motor grader for $43,972. The lease expired April 26, 2012, with a combined principal and interest payment of $23,893.47 annually.

In 2009, the County entered into a capital lease financing agreement with Caterpillar Financial Services Corporation for a Caterpillar wheel loader for $54,939. The lease expired on July 20, 2012, with a nominal interest rate of 7.250%.

In 2011, the County entered into a capital lease land purchase agreement with the Missouri Department of Transportation for a maintenance shed for $25,000. The lease expires April 2015 with principal only payments. There is no interest being paid in the debt with annual principal payments of $5,000.00.

2013

2002 Motor Grader	22,626.85	-	22,626.85	-	1,357.62
Wheel Loader	7,631.35	-	7,631.35	-	553.28
Maintenance Shed	20,000.00	-	5,000.00	15,000.00	-
Totals	$ 50,258.20	$ 112,039.00	$ 35,258.20	$ 127,039.00	$ 1,910.90

III. CAPITAL LEASES (concluded)

As of December 31, 2013, the schedule of future payments of capital leases of the County is as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2014	$ 46,711.76	$ 3,031.46	$ 49,743.22
2015	22,529.92	2,213.30	24,743.22
2016	18,170.22	1,933.00	20,103.22
2017	27,995.20	900.07	28,895.27
TOTALS	$ 115,407.10	$ 8,077.83	$ 123,484.93

As of December 31, 2012, the schedule of future payments of capital leases of the County is as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2013	$ 41,901.90	$ 2,943.55	$ 44,845.45
2014	37,010.20	1,835.25	38,845.45
2015	12,444.97	1,400.48	13,845.45
2016	7,686.73	1,518.72	9,205.45
2017	27,995.20	900.07	28,895.27
TOTALS	$ 127,039.00	$ 8,598.07	$ 135,637.07

IV. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue Fund	$ 16,162.21	$ 31,896.19	$ 31,150.00	$ 16,214.54
Special Road and Bridge Fund	-	-	-	31,150.00
Assessment Fund	31,423.81	-	16,214.23	-
Sheriff Revolving Fund	-	15,796.65	-	-
Sheriff Civil Fee Fund	-	365.56	-	-
Crime Victim Advocate Fund	-	-	25,000.31	-
County Clerk Fund	472.38	-	-	-
L.E.R.F. Fund	-	-	-	25,000.00
TOTAL	$ 48,058.40	$ 48,058.40	$ 72,364.54	$ 72,364.54

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Revenue Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

A. Plan Description

CERF was established by an act of the Missouri General Assembly effective August 28, 1994. Laws governing the retirement fund are found in Sections 50.1000-50.1300 of the Missouri Revised Statutes (RSMo). The Board of Directors consists of 11 members, 9 of whom are county employee participants. Two members, who have no beneficiary interest in CERF, are appointed by the Governor of Missouri. The Board of Directors has the authority to adopt rules and regulations for administering the system.

CERF is a mandatory cost-sharing multiple employer retirement system for each county in the state of Missouri, except any city not within a county (which excludes the City of St. Louis) and counties of the first classification with a charter form of government. CERF covers county elective or appointive officers or employees whose position requires the actual performance of duties not less than 1,000 hours per year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000, could opt out of the system. CERF is a defined benefit plan providing retirement and death benefits to its members. All benefits vest after 8 years of creditable service. Employees who retire on or after age 62 are entitled to an allowance for life based on the form of payment selected.

V. COUNTY EMPLOYEES' RETIREMENT FUND (CERF) (concluded)

A. Plan Description (concluded)

The normal form of payment is a single life annuity. Optional joint and survivor annuity and 10-year certain and life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55. Annual cost-of-living adjustments, not to exceed 1%, are provided for eligible retirees and survivor annuitants, up to a lifetime maximum of 50% of the initial benefit which the member received upon retirement. Benefit provisions are fixed by state statute and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65101, or by calling 1-573-632-9203.

B. Contributions

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2% of gross compensation. Effective January 1, 2003, participating county employees hired on or after February 25, 2002 are required to make contributions of 4% if they are in a LAGERS county and contributions of 6% if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee.

The contribution rate is set by state statute and may be amended only by action of the Missouri Legislature. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of approximately $27,276.16 and $23,429.36, respectively, for the years then ended.

VI. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $2,057 and $2,431, respectively, for the years ended December 31, 2013 and 2012.

VII. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS)

A. Plan Description

Shannon County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

VII. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (continued)

A. Plan Description (Concluded)

LAGERS was created and governed by statute section RSMo. 70.600 - 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling 1-800-447-4334.

B. Funding Status

Full-time employees of Shannon County contribute 4% to the pension plan. The June 30th statutorily required contribution rates are 0.2% (General) and 1.9% in 2013 and 1.5% in 2012 for (Police) of annual covered payroll. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for 2013 and 2012 were as follows:

	2013	2012
Annual required contribution	$ 3,333	$ 3,108
Interest on net pension obligation	0	0
Adjustment to annual required contribution	0	0
Annual pension cost	3,333	3,108
Actual contributions	3,333	3,108
Increase (decrease) in NPO	0	0
NPO beginning of year	0	0
NPO end of year	$ 0	$ 0

For 2013 the annual required contribution (ARC) was determined as part of the February 28, 2011 and February 29, 2012 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization

VII. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (CONTINUED)

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO) (Continued)

period as of February 28, 2011, was 30 years for the General division and 16 years for the Police division. The amortization period as of February 29, 2012, was 30 years for the General division and 15 years for the Police division.

For 2012 the annual required contribution (ARC) was determined as part of the February 28, 2010, and February 28, 2011, annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012, included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy Table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010, was 30 years for the General division and 15 years for the Police division. The amortization period as of February 28, 2011, was 30 years for the General division and 16 years for the Police division.

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011, annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

VIII. POST-EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. There were no participants for COBRA at December 31, 2013 and no participants at December 31, 2012.

IX. CLAIMS, COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is not currently involved in pending litigation as of the audit report date.

B. Compensated Absences

The County provides employees with up to three weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation leave. Vacation days not used by the end of the year are forfeited.

IX. CLAIMS, COMMITMENTS AND CONTINGENCIES (concluded)

B. Compensated Absences (concluded)

The County provides employees four hours of paid sick leave per month. Sick leave may not accumulate from year to year. Upon termination from county employment, an employee is not reimbursed for unused sick leave.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

X. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. Insurance is obtained from commercial insurance companies. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool, which is a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

XII. SUBSEQUENT EVENTS

There are no subsequent events to report up to the date of the audit report.

SUPPLEMENTARY SCHEDULES AND AUDITOR'S REPORT

STATE COMPLIANCE SECTION

SCHEDULE OF STATE FINDINGS

I. For the year ended December 31, 2013, actual expenditures exceeded those budgeted in the Assessment Fund, Sheriff Revolving Fund, L.E.F. Fund, and the Senate Bill 40 Fund.

II. For the year ended December 31, 2012, actual expenditures exceeded those budgeted in the Special Road and Bridge Fund, Sheriff Revolving Fund, L.E.R.F. Fund, and the F.I.T. Fund.

INTERNAL CONTROL & COMPLIANCE SECTION

MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Independent Auditor's Report

To the County Commission
The County of Shannon, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the County of Shannon ("County") as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise the County's basic financial statements, and have issued our report thereon dated June 13, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the County's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and responses that we consider to be significant deficiencies. [FS 13/12-01, FS 13/12-02, FS 13/12-03, and FS 13/12-04]

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

The County's Response to Findings

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and responses. The County's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

June 13, 2014

I. FINANCIAL STATEMENT FINDINGS

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122 *Statements on Auditing Standards: Clarification and Recodification*, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs, the County informed us that internal control documentation had not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk's (Shelly McAfee) office has informed us that the County will attempt to prepare the SAS 122 documentation of internal control for the next audit period. The Clerk's office phone number is 573-226-3414.

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the County's walkthroughs, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs, the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

I. FINANCIAL STATEMENT FINDINGS (continued)

FS 13/12-02 Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk's (Shelly McAfee) office has informed us that the County will attempt to prepare the SAS 122 documentation of fraud risk for the next audit period. The Clerk's office phone number is 573-226-3414.

FS 13/12-03 Criteria: Bank reconciliations must be prepared monthly on a timely basis by the Prosecuting Attorney's office.

Condition: We noted that there were no bank reconciliations for the Prosecuting Attorney's office.

Context: This deficiency became apparent through our testing of the Prosecuting Attorney's cash accounts and the related reconciliations.

Effect: Errors may go undetected if proper controls are not in place to review cash transactions.

Cause: Management does not place adequate emphasis upon reviewing cash transactions and preparing accurate reconciliations.

Recommendation: We recommend that the Prosecuting Attorney's office prepare monthly bank reconciliations and adjustments to the cash accounts.

Views of Responsible Officials and Planned Corrective Actions: The Prosecuting Attorney's (Jodie Brumble) office will consider the auditor's recommendation and attempt to begin reconciling bank statements in a timely manner in the 2014 fiscal year. The Prosecuting Attorney's office phone number is 573-226-3714.

FS 13/12-04 Criteria: During our review of the Quickbooks, we were unable to tie the Clerk's Quickbooks to the Treasurer's settlement statement in 2012.

Condition: The Quickbooks general ledger is not accurately reflecting the County's financial position.

Context: During testing of cash the general ledger within Quickbooks was not matching the Treasurer's settlement sheet.

Effect: The County is not property recording cash receipts and disbursements within the financial statements which could lead to incorrectly stated financial statments.

Cause: The County is not properly recording financial data within the Quickbooks General Ledger.

I. FINANCIAL STATEMENT FINDINGS (concluded)

FS 13/12-04 Recommendation: We recommend that the County's Quickbooks be reconciled and maintained in such a way that the settlement statement, budget and Quickbooks reports all reconcile.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk's (Shelly McAfee) office has informed us that they will seek outside help and training in order to get the Quickbooks general ledger to match the settlement statement and budgets. The Clerk's office phone number is 573-226-3414.

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

There were no prior year audit findings related to internal control and compliance since there was not an audit performed for the prior audit period.

Daniel Jones
& Associates
CERTIFIED PUBLIC ACCOUNTANTS

MEMBERS OF
MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

June 13, 2014

To the Board of Commissioners
County of Shannon

In planning and performing our audit of the regulatory based financial statements of the County of Shannon (the "County") as of and for the years ended December 31, 2013, and December 31, 2012, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We did not identify any deficiencies in County's internal control that we consider to be material weaknesses.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the County's internal control to be significant deficiencies as noted in section I:

Our comments concerning internal control and other significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Information Required by Professional Standards

The County's management has provided written responses to the findings in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the County Commission, County Office Holders, the Missouri State Auditor and federal agencies and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

FS 13/12-01

Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122 *Statements on Auditing Standards: Clarification and Recodification,* considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs, the County informed us that internal control documentation had not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk's (Shelly McAfee) office has informed us that the County will attempt to prepare the SAS 122 documentation of internal control for the next audit period. The Clerk's office phone number is 573-226-3414.

FS 13/12-02

Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the County walkthroughs, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs, the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (Continued)

FS 13/12-02 Views of Responsible Officials and Planned Corrective Actions: The County Clerk's (Shelly McAfee) office has informed us that the County will attempt to prepare the SAS 122 documentation of fraud risk for the next audit period. The Clerk's office phone number is 573-226-3414.

FS 13/12-03 Criteria: Bank reconciliations must be prepared monthly on a timely basis by the Prosecuting Attorney's office.

Condition: We noted that there were no bank reconciliations for the Prosecuting Attorney's office.

Context: This deficiency became apparent through our testing of the Prosecuting Attorney's cash accounts and the related reconciliations.

Effect: Errors may go undetected if proper controls are not in place to review cash transactions.

Cause: Management does not place adequate emphasis upon reviewing cash transactions and preparing accurate reconciliations.

Recommendation: We recommend that the Prosecuting Attorney's office prepare monthly bank reconciliations and adjustments to the cash accounts.

Views of Responsible Officials and Planned Corrective Actions: The Prosecuting Attorney's (Jodie Brumble) office will consider the auditor's recommendation and attempt to begin reconciling bank statements in a timely manner in the 2014 fiscal year. The Prosecuting Attorney's office phone number is 573-226-3714

FS 13/12-04 Criteria: During our review of the Quickbooks, we were unable to tie the Clerk's Quickbooks to the Treasurer's settlement statement in 2012.

Condition: The Quickbooks general ledger is not accurately reflecting the financial position of the County.

Context: During testing of cash, the general ledger within Quickbooks was not matching the Treasurer's settlement.

Effect: The County is not property recording cash receipts and disbursements within the financial statements, which could lead to incorrectly stated financial statements.

Cause: The County is not properly recording financial data within the Quickbooks General Ledger.

Recommendation: We recommend that the County's Quickbooks be reconciled and maintained in such a way that the settlement statement, budget and Quickbooks reports all reconcile.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk's (Shelly McAfee) office has informed us that they will seek outside help and training in order to get the Quickbooks general ledger to match the settlement statement and budgets. The Clerk's office phone number is 573-226-3414.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards and *Government Auditing Standards*

Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, *Government Auditing Standards* and OMB Circular A-133, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated April 7, 2014. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County are described in Note I to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2013-2012 fiscal years. We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. Due to the County applying the regulatory basis of accounting, no estimates are made during the preparation of financial statements.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to each opinion unit's financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 13, 2014.

II. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (Concluded)

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the County's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

We were engaged to report on the schedule of state findings, schedule of findings and responses and the summary of prior year findings and responses, which accompany the financial statements but are not Required Supplementary Information. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves

We noted during our audit certain matters that were not considered to be significant deficiencies or material weaknesses. Several county offices have limited numbers of staff which inherently increases the risk of misstatement. Office holders appear to have mitigating controls in place to lower these risks to an acceptable level but the commission does need to be aware of these risks and offices need to remain vigilant in deterring the potential for erroneous or fraudulent activity.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Andrew County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Andrew County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Andrew County, Missouri

We have audited the accompanying financial statements of Andrew County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Andrew County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements

referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Andrew County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

As explained in Note 12 to the financial statements, the Andrew County Public Benefit Corporation was not included in our audit report for the year ended December 31, 2012.

In our opinion, except for the above paragraph, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Andrew County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Matters

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Andrew County, Missouri's basic financial statements. The schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is also not a required part of the basic financial statements.

The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated July 9, 2014, on our consideration of Andrew County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Andrew County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Organized in 1841, the county of Andrew was named after the Andrew Jackson Davis. Andrew County is a county-organized, third-class county and is part of the Fifth Judicial Circuit. The county seat is Savannah. Andrew County's government is composed of a three-member county commission and the following separately elected Constitutional Officers: Assessor, County Clerk, Circuit Clerk, Recorder, Coroner, Prosecuting Attorney, Public Administrator, Sheriff, Treasurer and Collector.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Andrew County, Missouri, the Andrew County Senior Citizens Services Board, and the Andrew County Senate Bill 40 Board.

Andrew County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Andrew County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Andrew County's legal entity. The Andrew County Senior Citizens Services Board and Senate Bill 40 Board are controlled by separate boards and are also included under the control of Andrew County.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Andrew County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Andrew County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Andrew County adopts a budget for each governmental fund.

On or before the second Monday in January, each elected official and department director will transmit to the County Commission and County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The Law Enforcement Training Fund and Sheriff's Civil Account Fund had expenses exceeding their respective budgets for 2012. Also, the Deputy Sheriff Salary Supplemental Fund was deficit budgeted for both 2013 and 2012, and the County did not prepare a budget for the Orchard Estates, NID Fund in 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property, included within Andrew County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation was:

	2013	2012
Real Estate	165,525,070	157,702,990
Personal Property	47,976,590	47,396,810
Railroad and Utilities	21,679,603	16,999,165
	$ 235,181,263	$ 222,098,965

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
General Revenue	$ 0.1987	$ 0.1920
Special Road and Bridge	0.4965	0.4964
Johnson Grass Board	0.0098	0.0100
Senior Citizens Services Board	0.0279	0.0286
Senate Bill 40 Board	0.0791	0.0810

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds, other than the funds of the Aggregate Cemetery Trust Fund, are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Andrew County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Andrew County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents". Also included are the balances of the Aggregate Cemetery Trust Fund.

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013 and 2012, the carrying amounts of the County's deposits, excluding cash and investments of the Aggregate Cemetery Trust Fund, were $2,317,737 and $2,838,987, respectively, and the bank balances were $2,790,647 and $3,645,155, respectively. At. December 31, 2013 & 2012, 100% of Andrew County's deposits were covered by the Federal Deposit Insurance Corporation (FDIC), were collateralized, or covered by a line of credit held by the County or by its agent in the County's name.

The carrying values of deposits and investments below above are included in the financial statements at December 31, 2013, as follows:

Deposits	$	2,407,969
Investments		2,809,077
Restricted Cash		-
Total Deposits and Investments as of December 31, 2013	$	5,217,046

The carrying values of deposits and investments shown below are included in the financial statements at December 31, 2012, as follows:

Deposits	$	2,853,124
Investments		2,580,228
Restricted Cash		-
Total Deposits and Investments as of December 31, 2012	$	5,433,352

Investments – The Aggregate Cemetery Trust Fund holds cash deposits and investments allowed by the Cemetery Trust Agreement. The terms of the trust agreement authorize investments in United States Government securities and stocks currently traded on the New York Stock Exchange. A court opinion docketed in 2001 authorized the County Commission to buy, sell, or trade stocks and bonds as long as the shares of original stock making up the corpus of the trust were maintained.

Note 2 - Deposits and Investments (continued)

As of December 31, 2013, the Aggregate Cemetery Trust Fund had the following cash deposits and investments:

		Investment Maturity (in Years)			
Investment Type	Fair Value	No Maturity	1-5	6-10	More Than 10
U.S. Government Securities	$ 749,994	$ -	$ 749,994	$ -	$ -
U.S. Government Bonds	16,853	-	-	-	16,853

Corporate Bonds	23,634	-	23,634	-	-
Cash and Certificates of Deposits	764,565	231,035	533,530	-	-
	$ 2,809,077	$ 1,485,066	$ 1,307,158	$ -	$ 16,853

As of December 31, 2012, the Aggregate Cemetery Trust Fund had the following cash deposits and investments:

		Investment Maturity (in Years)			
Investment Type	Fair Value	No Maturity	1-5	6-10	More Than 10
U.S. Government Securities	$ 769,710	$ -	$ 769,710	$ -	$ -
U.S. Government Bonds	48,786	-	-	-	48,786
Stocks and Mutual Funds	990,973	990,973	-	-	-
Corporate Bonds	41,197	-	-	25,039	16,158
Cash and Certificates of Deposits	729,562	199,782	529,780	-	-
	$ 2,580,228	$ 1,190,755	$ 1,299,490	$ 25,039	$ 64,944

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Andrew County's investment policy does not include custodial credit risk requirements. Andrew County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013 and 2012.

Custodial Credit Risk - Investments

Custodial credit risk is the risk that, if the counterparty to an investment transaction fails, Andrew County will not be able to recover the investment's value, or the collateral securities that are in an outside party's possession. The County's investments at December 31, 2013 and 2012 were not exposed to custodial credit risk because they were held by the County's custodial bank in the Cemetery Trust's name.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Andrew County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Note 2 - Deposits and Investments (continued)

Concentration of Investment Credit Risk

Concentration of credit risk is required to be disclosed by Andrew County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Andrew County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. More than 5 percent of the Aggregate Cemetery's investments are in Pfizer stock. This investment accounts for 6 percent of the Aggregate Cemetery Trust Fund's total investments at December 31, 2013.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue Fund	$ 149,448	$ 620,000	$ 114,535	$ 459,000
Special Road and Bridge Fund	-	120,823	-	111,500
Law Enforcement Fund	620,000	-	459,000	-
Capital Improvement Fund	-	8,625	-	3,035
Collector's Tax Maintenance Fund	-	20,000	-	-
Total	$ 769,448	$ 769,448	$ 573,535	$ 573,535

Note 4 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for county officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for county employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO, 65102, or by calling 1-877-632-2373.

Note 4 - County Employees' Retirement Fund (CERF) (continued)

Funding Policy

In accordance with state statutes, the plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 contribute 0% of their annual salary, while employees hired after February 2002 are required to contribute 4% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $56,010 and $44,792, respectively, for the years then ended.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS)

Plan Description

Andrew County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multi-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and governed by statutes section RSMo 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling (800) 447-4334.

Funding Status

Full-time employees of Andrew County do not contribute to the pension plan. The June 30th statutorily required contribution rates are 15.4% (General) and 12.9% (Police) of annual covered payroll for the year ended December 31, 2013. The June 30th statutorily required contribution rates are 16.3% (General) and 11.9% (Police) of annual covered payroll for the year ended December 31, 2012. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2013 was as follows:

	2013
Annual required contribution	$ 259,809
Interest on net pension obligation	3,295
Adjustment to required contribution	(2,903)
Annual pension cost	260,201
Actual contributions	253,054
Increase (decrease) in NPO	7,147
NPO beginning of year	45,452
NPO end of year	$ 52,599

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

The annual required contribution (ARC) was determined as part of the February 28, 2011 and February 29, 2012 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011 was 20 years for the General division and 30 years for the police division. The amortization period of February 29, 2012 was 22 years for the General division and 30 years for the Police division.

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2011	$ 238,152	91.3%	$ 33,024
2012	256,074	95.1%	45,452
2013	260,201	97.3%	52,599

Required Supplementary Information - Schedule of Funding Progress

2/29/2012	2,892,690	3,262,774	370,084	89%	1,634,371	23%
2/28/2013	3,306,290	3,575,160	268,870	92%	1,611,263	17%

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2012 was as follows:

	2012
Annual required contribution	$ 255,931
Interest on net pension obligation	2,394
Adjustment to required contribution	(2,251)
Annual pension cost	256,074
Actual contributions	243,646
Increase (decrease) in NPO	12,428
NPO beginning of year	33,024
NPO end of year	$ 45,452

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

The annual required contribution (ARC) was determined as part of the February 28, 2010 and February 28, 2011 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010 was 30 years for the General division and 30 years for the police division. The amortization period of February 28, 2011 was 20 years for the General division and 30 years for the Police division.

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2010	$ 212,122	94.2%	$ 12,303
2011	238,152	91.3%	33,024
2012	256,074	95.1%	45,452

Required Supplementary Information - Schedule of Funding Progress

Actuarial Valuation Date	(a) Actuarial Value of Assets	(b) Entry Age Actuarial Accrued Liability	(b-a) Unfunded Accrued Liability (UAL)	(a/b) Funded Ratio	(c) Annual Covered Payroll	[(b-a)/c] UAL as a Percentage of Covered Payroll
2/28/2010	$ 2,219,150	$ 2,753,111	$ 533,961	81%	$ 1,523,359	35%
2/28/2011	2,617,955	3,104,801	486,846	84%	1,532,867	32%
2/29/2012	2,892,690	3,262,774	370,084	89%	1,634,371	23%

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

Note 6- Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Andrew County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System. Once remitted, the State of Missouri is responsible for administration of this plan. Andrew County has contributed $0 and $935, respectively, for the years ended December 31, 2013 and 2012.

Note 7 - Post-Employment Benefits

Andrew County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Andrew County.

Note 8 - Claims, Commitments and Contingencies

Compensated Absences

The County provides full time employees with up to 60 days of sick time -- to accrue at one day per complete calendar month of employment. Upon termination, the employee will not be compensated for any unused sick time. Vacation time will accrue at the rate of one-half day to one and one half days per month depending on length of employment, up to two weeks rollover balance. Upon termination the employee may choose time taken as early separation or to be compensated on last payroll check for balance of unused vacation time limited to two weeks. Comp time will accrue at a rate of one and one half time actual hours worked based on federal wage and hour regulations, up to 180 hours rollover balance. Upon termination the employee may choose time taken as early separation or to be compensated on last payroll check for balance of unused comp time limited to 180 hours.

Federal and State Assisted Programs

The County receives proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned. Such audits could result in refund of grant monies to the grantor agencies. Management believes that any required refunds will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Note 9 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.700 RSMo). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make specific assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Injured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

Note 10 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure financial statements. Such events have been evaluated through July 9, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 11 - Long Term Debt

In December 2006, the County issued $108,000 in general obligation bonds for the Chinnereth Estates Neighborhood Improvement District. The bonds bear interest at 4.125% and were scheduled to be paid in annual payments ranging from $10,000 to $13,000 per year. The final payment is scheduled for March 1, 2017. Payments are made using special assessment tax monies collected for the NID in the prior year. The balance outstanding as of December 31, 2013 is $50,000. The schedule of remaining payments and interest is listed below:

Balance 12/31/2011	Additions	Retirements	Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013
$ 72,000	$ -	$ 11,000	$ 61,000	$ -	$ 11,000	$ 50,000

Year Ending December 31	Principal	Interest	Total
2014	$ 12,000	$ 1,815	$ 13,815
2015	12,000	1,320	13,320
2016	13,000	804	13,804
2017	13,000	268	13,268
	$ 50,000	$ 4,207	$ 54,207

In May 1997, the County issued $195,000 in general obligation bonds for the John Glenn Neighborhood Improvement District. The bonds bear interest at 6.0% and were scheduled to be paid in annual payments ranging from $10,000 to $13,000 per year. The final payment is scheduled for May 1, 2015. Payments are made using special assessment tax monies collected for the NID in the prior year. The balance outstanding as of December 31, 2013 is $27,000. The schedule of remaining payments and interest is listed below:

Balance 12/31/2011	Additions	Retirements	Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013
$ 52,000	$ -	$ 12,000	$ 40,000	$ -	$ 13,000	$ 27,000

Year Ending December 31	Principal	Interest	Total
2014	$ 14,000	$ 1,200	$ 15,200
2015	13,000	390	13,390
	$ 27,000	$ 1,590	$ 28,590

In 2001, the County issued $121,000 in general obligation bonds for the Gore Road Neighborhood Improvement District. The bonds bear interest at from 4.5% to 5.25% and were scheduled to be paid in annual payments ranging from $3,000 to $10,000. The final payment is scheduled for March 1, 2020. Payments are made using special assessment tax monies collected for the NID in the prior year. The balance outstanding as of December 31, 2013 is $65,000.

Balance 12/31/2011	Additions	Retirements	Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013
$ 75,000	$ -	$ 5,000	$ 70,000	$ -	$ 5,000	$ 65,000

Note 11 - Long Term Debt (continued)

The schedule of remaining payments and interest is listed below:

Year Ending December 31	Principal	Interest	Total
2014	$ 5,000	$ 3,251	$ 8,251
2015	10,000	2,876	12,876
2016	10,000	2,363	12,363
2017	10,000	1,838	11,838
2018	10,000	1,313	11,313
2019-2020	20,000	1,051	21,051
	$ 65,000	$ 12,692	$ 77,692

In October 2002, the County issued $108,450 in general obligation bonds for the Victoria Hills Neighborhood Improvement District. The bonds bear interest at 4.125% and were scheduled to be paid in annual payments ranging from $5,525 to $13,410. The final payment was scheduled for March 1, 2013. Payments are made using special assessment tax monies collected for the NID in the prior year. The balance outstanding as of December 31, 2013 is $0.

Balance 12/31/2011	Additions	Retirements	Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013
$ 26,301	$ -	$ 12,891	$ 13,410	$ -	$ 13,410	$ -

In October 2013, the County issued $110,000 in general obligation bonds for the Orchard Estates Neighborhood Improvement District. The bonds bear interest at 4% and are scheduled to be paid in annual payments of $5,000. The final payment is scheduled for April 1, 2033. Payments are made using special assessment tax monies collected for the NID in the prior year. The schedule of remaining payments and interest is listed below:

Balance 12/31/2011	Additions	Retirements	Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013
$ -	$ -	$ -	$ -	$ 110,000	$ -	$ 110,000

Year Ending December 31	Principal	Interest	Total
2014	$ 5,000	$ 4,300	$ 9,300
2015	5,000	4,100	9,100
2016	5,000	3,900	8,900
2017	5,000	3,700	8,700
2018	5,000	3,500	8,500
2019-2023	25,000	14,500	39,500
2024-2028	25,000	9,500	34,500
2029-2033	35,000	4,100	39,100
	$ 110,000	$ 47,600	$ 157,600

Note 11 - Long Term Debt (continued)

The Andrew County Public Benefit Corporation is obligated to the USDA Rural Development Agency for two notes. The first note was issued in 2012 for $5,200,000, bearing interest at 4% and is scheduled to be repaid in 40 annual payments of $265,564 ending September 2051. The second note was issued in 2012 for $700,000, bearing interest at 4.25% and is scheduled to be repaid in 40 annual payments of $37,065 ending September 2051. The building of the judicial center is pledged as collateral for the two notes. The schedule of remaining payments and interest is listed below:

Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013	Interest Paid
$ 5,900,000	$ -	$ 60,437	$ 5,839,563	$ 242,192

Year Ending December 31	Principal	Interest	Total
2014	$ 62,916	239,713	$ 302,629
2015	65,497	237,132	302,629
2016	68,185	234,444	302,629
2017	70,983	231,646	302,629
2018	73,896	228,733	302,629
2019-2023	417,530	1,095,615	1,513,145
2024-2028	510,527	1,002,618	1,513,145
2029-2033	624,247	888,898	1,513,145
2034-2038	763,311	749,834	1,513,145
2039-2043	933,369	579,776	1,513,145
2044-2048	1,141,332	371,813	1,513,145
2049-2052	1,107,770	102,746	1,210,516
	$ 5,839,563	$ 5,962,968	$ 11,802,531

Note 12 - Change in Reporting Entity

In 2012 the County was not required to include the Andrew County Public Benefit Corporation (ACPBC) in the audited financial statements due to the ACPBC being separately audited. The ACPBC is included in the audited financial statements for 2013. The effect of the aforementioned change in reporting entity increased cash balance as of January 1, 2013 by $56,794. A copy of the 2012 audit report for the Andrew County Public Benefit Corporation may be obtained by writing to the Andrew County Treasurer, P.O. Box 122, Savannah, MO 64485 or by calling (816) 324-3614.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Andrew County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Andrew County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Andrew County, Missouri's basic financial statements and have issued our report thereon dated July 9, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Andrew County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Andrew County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Andrew County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies: 13/12-2 and 13/12-3.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Andrew County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an

opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and questioned costs as item 13/12-1.

Andrew County, Missouri's Response to Findings

Andrew County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. Andrew County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133

To the County Commission and
Officeholders of Andrew County, Missouri

Report on Compliance for Each Major Federal Program

We have audited Andrew County, Missouri's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Andrew County, Missouri's major federal programs for the years ended December 31, 2013 and 2012. Andrew County, Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Andrew County, Missouri's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Andrew County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Andrew County, Missouri's compliance.

Opinion on Each Major Federal Program

In our opinion, Andrew County, Missouri, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2013 and 2012.

Other Matters

The results of our auditing procedures disclosed an instance of noncompliance, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item 13/12-4. Our opinion on each major federal program is not modified with respect to these matters.

Andrew County, Missouri's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Andrew

County, Missouri's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of Andrew County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Andrew County, Missouri's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Andrew County, Missouri's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

Notes to Schedule of Expenditures of Federal Awards
For the years ended December 31, 2013 & 2012

Note 1 - Summary of Significant Accounting Policies

Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of *OMB Circular A-133* . This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Andrew County, Missouri.

Basis of Presentation

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented on the cash basis of accounting. The information in this schedule is presented in accordance with the requirements of *OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations.* Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the financial statements.

Note 2 - Subrecipients

The County did not pass through any federal funds for the years ended December 31, 2013 and 2012, respectively.

Auditee qualified as low-risk auditee?		Yes	X	No

The County of Andrew
Savannah, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2013 & 2012

Section 2 - Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted two funds with actual expenditures that exceeded the budgeted expenditures, one fund that was deficit budgeted, and one fund which no budget was prepared.

Effect: Missouri statutes requires Counties to prepare an annual budget and expenditures are not to exceed the budget. Due to exceeding budget in certain funds the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget for all funds, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: This was an oversight of the County Clerk, the 2012 budget was amended and the Law Enforcement Training Fund and the Sheriff's Civil Account Fund did not get changed. The Deputy Sheriff Salary Supplemental Fund showed a deficit because the County has to pay the deputies from this fund and wait for reimbursement from the State, we will always be at least one payment behind; in the future we will budget more for revenues so the fund will have a positive balance.

13/12-2 ***Condition:*** Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: Clerk will prepare internal controls policy.

Section 2 - Financial Statement Findings (continued)

13/12-3 ***Condition:*** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate audit risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: Clerk will prepare fraud risk management assessment.

Section 3 - Federal Award Findings and Questioned Cost

13/12-4

Federal Grantor:	All Programs
Pass-Through Grantor:	All Programs
Federal CFDA Number:	All Programs
Program Title:	All Programs

Condition: The Schedule of Expenditures of Federal Awards (SEFA) contained errors.

Criteria: OMB Circular A-133 requires auditees to prepare an accurate SEFA containing awards expended, CFDA title and number, award number, name of the Federal agency, and name of the pass-through entity.

Cause: Management was unaware of the reporting requirements related to the Schedule of Expenditures of Federal Awards.

Effect: Federal expenditures reported on the SEFA were incorrect.

Recommendation: We recommend that management develop internal controls over reporting and consult with outside accountants when needed to ensure an accurate SEFA is prepared.

Management's Response: Clerk will take note of this error and will make sure the right figures are reported on the SEFA in the future.

The County of Andrew
Savannah, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Andrew County, Missouri, on the applicable findings in the prior audit report issued for the year ended December 31, 2010.

Prior Year Financial Statement Findings

10-1 ACCOUNTING FOR TRANSFERS

Condition: The financial statements of the County as presented in the annual budget document present transfers between fund. However, a $77,630 transfer from the special road and bridge fund to the general fund was treated as a receipt in the general fund and a disbursement in the special road and bridge fund. A $20,000 transfer from the collectors' tax maintenance fund to the general fund was included as a receipt instead of a transfer.

Criteria: Paragraph 6.12 of *Government Auditing Standards* states, "A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, detect, or correct errors in assertions made by management on a timely basis. A deficiency in design exists when (1) a control necessary to meet the control objective is missing or (2) an existing control is not properly designed so that, even if the control operates as designed, the control objective is not met."

Effect: The County's financial statements and annual budget document did not properly present transfers between funds.

Cause: Transfers were not recorded correctly in the County's accounting system.

Recommendation: We recommend the County review the accounting for transfers between funds and ensure the transfers are accounted for appropriately.

Response: The issue has been corrected. The County will now treat transfers between funds as transfers rather than receipts and new accounts have been established for the transfers.

Status: Management has corrected this issue.

10-2 DUPLICATE CHECK ISSUED AND NOT VOIDED IN A TIMELY MANNER

Condition: A duplicate check for $17,670 was issued August 26, 2010. The check was listed as an outstanding check on bank account reconciliations until December, 2011. The check was voided in December, 2011.

Criteria: Paragraph 6.12 of *Government Auditing Standards* states, "A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, detect, or correct errors in assertions made by management on a timely basis. A deficiency in design exists when (1) a control necessary to meet the control objective is missing or (2) an existing control is not properly designed so that, even if the control operates as designed, the control objective is not met."

Effect: The County's accounting records were incorrect for the years ended December 31, 2010 and 2011. Special road and bridge fund disbursements for the year ended December 31, 2010, were overstated by $17,670. Special road and bridge disbursements for the year ended December 31, 2011, were understated by $17,670. County bank reconciliations were incorrect for the period of August, 2010, through December, 2011.

10-2 (cont.)

Cause: An outstanding check was not investigated in a timely manner by the County.

Recommendation: We recommend the County review the outstanding check list on a monthly basis and investigate any unusual or old outstanding reconciling items.

Response: The County will review the outstanding check list in a timely manner.

Status: Management has corrected this issue.

10-3 EXPENDITURES IN EXCESS OF BUDGETED AMOUNTS

Condition: As described in Note 1H, disbursements were in excess of budgeted amounts for the John Glenn Road NID Fund for the year ended December 31, 2010. The County's internal control over financial reporting did not detect that actual disbursements exceeded the budgeted disbursements.

Criteria: As described in *Government Auditing Standards*, as issued by the Comptroller General of the United States, section 5.11, a deficiency in internal control over financial reporting exists when the deficiency "adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles."

Effect: The County made disbursements in excess of the authorized budget and was not in compliance with Section 67.040, RSMo.

Cause: The County did not monitor and amend the budget for the one fund.

Recommendation: We recommend the County review the budgets and monitor disbursement to prevent disbursements in excess of budgeted amounts in the future.

Response: The County agrees with the finding.

Status: Management has not corrected this issue and the finding is repeated as finding 13/12-1.

10-4 SHERIFF ACCOUNT DEPOSITS

Condition: Receipts are not deposited timely in the Sheriff's accounts. Receipts are received throughout the month by the Sheriff's department. One account in December, 2010, showed five deposits with a total amount of $7,192 deposited on December 20, 2010. The account's only other deposits, in the total amount of $1,024, were on December 6, 2010.

Criteria: As described in *Government Auditing Standards*, as issued by the Comptroller General of the United States, section 5.11, a deficiency in internal control over financial reporting exists when the deficiency "adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles."

10-4 (cont.) ***Effect:*** Failure to deposit monies in a timely manner increases the risk that errors or irregularities will not be detected in a timely manner.

Cause: The Sheriff's department did not deposit receipts on a timely basis.

Recommendation: We recommend that the Sheriff's office deposit receipts on a timely basis.

Response: The Sheriff will make every attempt to deposit funds under his control three times per week.

Status: Management has corrected this issue.

10-5 SHERIFF DEPARTMENT LIABILITIES

Condition: Monthly lists of liabilities are not prepared for the commissary/inmate account, and consequently, liabilities are not reconciled with cash balances.

Criteria: As described in *Government Auditing Standards*, as issued by the Comptroller General of the United States, section 5.11, a deficiency in internal control over financial reporting exists when the deficiency "adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles."

Effect: Failure to reconcile liabilities to the cash balance increases the risk that errors or irregularities will not be detected in a timely manner.

Cause: The Sheriff's department did not monthly reconcile a list of liabilities to the cash balance.

Recommendation: We recommend that the Sheriff's department prepare a monthly list of liabilities and reconcile that list to the commissary/inmate account.

Response: The Sheriff's department installed a computer program to track inmate liabilities in January, 2011.

Status: Management has corrected this issue.

10-6 EXPENDITURES IN EXCESS OF BUDGETED AMOUNTS

Condition: As described in Note 1H, disbursements were in excess of budgeted amounts for the John Glenn Road NID Fund for the year ended December 31, 2010.

Criteria: Section 67,040, RSMo., sets forth that, after any political subdivision has approved the budget for any year, the political subdivision shall not increase the total amount authorized for expenditure from any fund, unless the governing body adopts a resolution setting forth the facts and reasons making the increase necessary and approves or adopts an order, motion, resolution or ordinance to authorize the expenditures.

Effect: The County made disbursements in excess of the authorized budget and was not in compliance with Section 67.040, RSMo.

Cause: The County did not monitor and amend the budget for the one fund.

10-6 (cont.) ***Recommendation:*** We recommend the County review the budgets and monitor disbursement to prevent disbursements in excess of budgeted amounts in the future.

Response: The County agrees with the finding.

Status: Management has not corrected this issue and the finding is repeated as finding 13/12-1.

Prior Year Federal Award Findings and Questioned Cost

10-7 SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS NOT PREPARED ACCURATELY

Condition: Andrew County, Missouri, (the County) prepared a schedule of expenditures of federal awards (SEFA) that was not accurate. Disbursements of $24,902 under the Emergency Watershed Levee Program were not included in the SEFA. Disbursements listed by the County for disaster grants were $255,329. Actual disbursements on the disaster grants program were $456,967.

Criteria: Paragraph 300(a) of *Office of Management and Budget (OMB) Circular A-133* states that the auditee shall identify all federal awards expended and the federal programs under which they were received. Paragraph 300(d) of *OMB Circular A-133* states that an auditee shall prepare financial statements including the schedule of expenditures of federal awards in accordance with the circular.

Effect: The County was not in compliance with *OMB Circular A-133.*

Cause: The SEFA was not accurately prepared.

Recommendation: We recommend the County prepare the SEFA accurately and develop a monitoring system to ensure all expenditures of federal funds are included in the SEFA.

Response: An incorrect amount was reported by the Emergency Management Director to the County Clerk's office and the Emergency Watershed Levee Program payments were mistakenly omitted from the County's SEFA. The County agrees with the finding.

Status: Management has not corrected this issue and the finding is repeated as finding 13/12-4.

10-8 FAILURE TO TIMELY FILE DATA COLLECTION FORM AND REPORTING PACKAGE

Condition: The County did not file the data collection form and reporting package within nine months after the end of the fiscal year.

Criteria: Paragraph 320(a) of *OMB Circular A-133* states, "the data collection form and the reporting package as described in *OMB Circular A-133* shall be filed within the earlier of thirty days after receipt of the auditor's report or nine months after the end of the audit period."

Cause: The County did not contract for an audit until August 6, 2012, which prevented the audit from being conducted and preparation of the data collection form and reporting package in a timely manner. The County did not have a system of internal control in place to detect the filing deadline for the data collection form and reporting package.

Effect: Failure to timely file the data collection form and reporting package results in the County not complying with the requirements of *OMB Circular A-133.*

Recommendation: We recommend completion of all financially related documentation in a timely manner so the audit can be completed on a timely basis. We also recommend the establishment of a checklist or other reminder system to ensure that all information is filed on a timely basis.

Response: The County agrees with the finding.

Status: Management has corrected this issue.

10-9 FEDERAL DISBURSEMENTS NOT MADE WITHIN THE REQUIRED TIME PERIOD

Condition: One $135,158 advance of federal funds from the Missouri Department of Transportation was not disbursed to the project contracts until one month after receipt by the County.

Criteria: Treasury regulations at 31 CFR part 205 state that recipients of federal funds must follow procedures to minimize the time elapsing between the transfer of funds and disbursement to the recipient. The State of Missouri Department of Transportation has determined three business days to be the period of time for recipients to disburse money under the Off-System Bridge Replacement and Rehabilitation Program.

Effect: The County was not in compliance with cash management requirements of treasury regulations at 31 CRF part 205.

Cause: An email notification from the State of Missouri Department of Transportation of the electronic funds transfer to the County was sent to another entity rather than the County. The County did not discover the receipt of funds until reviewing their bank records approximately one month later.

Recommendation: We recommend the County work with State officials in determining an appropriate notification system for the electronic transfer of funds to the County.

Response: The County agrees with the finding and is working with the state to ensure timely notification is received in the future.

Status: Management has corrected this issue.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Audrain County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Audrain County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Audrain County, Missouri

We have audited the accompanying financial statements of Audrain County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Audrain County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Audrain County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Audrain County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Matters

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Audrain County, Missouri's basic financial statements. The schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is also not a required part of the basic financial statements.

The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 26, 2014, on our consideration of Audrain County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Audrain County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

The County of Audrain, Missouri (the "County"), which is governed by an elected three-member board of commissioners, was established in 1836 by an Act of the Missouri Territory. In addition to the three board members, there are ten elected Constitutional Officers: Assessor, Circuit Clerk, County Clerk, Collector of Revenue, Coroner, Prosecuting Attorney, Public Administrator, Recorder of Deeds, Sheriff, and Treasurer.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Audrain County, Missouri.

Audrain County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Audrain County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Audrain County's legal entity. The financial statements do not include financial data for the County's legally separate component unit, which accounting principles generally accepted in the United States of America, as applicable to the regulatory basis of accounting, require to be reported with the financial data of the County. The Senate Bill 40 Board is separately audited by an independent certified public accountant, and therefore, is not included in this audit report. Copies of the Senate Bill 40 Board's audit report may be obtained by writing to Audrain County Developmental Disability Services, 222 East Jackson, Mexico, MO 65265 or by calling (573) 581-8210.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Audrain County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Audrain County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Audrain County adopts a budget for each governmental fund.

On or before January 15th, each elected official and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for his or her office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is made available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit, we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The Inmate Security Fund had expenses exceeding the budget in 2013. Also, the County did not prepare a budget for the Federal Forfeiture Fund for 2012, the Election Fund for 2013 and 2012, and the Community Development Block Grant Fund for 2013 and 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property included within Audrain County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation, was as follows:

	2013	2012
Real Estate	$ 199,147,700	$ 190,921,430
Personal Property	78,936,926	73,314,170
Railroad and Utilities	84,685,189	90,216,685
	$ 362,769,815	$ 354,452,285

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
General Revenue Fund	$ 0.2406	$ 0.2180
Special Road and Bridge Fund	0.3021	0.3015

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Audrain County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Audrain County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. As of December 31, 2013, 100% of Audrain County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2013, as follows:

	Bank Balances	Carrying Value
Deposits	$ 320,088	$ 5,383,738
Investments	767,563	767,563
Restricted Cash	-	-
Total Deposits and Investments as of December 31, 2013	$ 1,087,651	$ 6,151,301

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2012, as follows:

	Bank Balances	Carrying Value
Deposits	$ 709,121	$ 5,181,427
Investments	765,589	765,589
Restricted Cash	-	-
Total Deposits and Investments as of December 31, 2012	$ 1,474,710	$ 5,947,016

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Audrain County's investment policy does not include custodial credit risk requirements. Audrain County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013 and 2012.

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Audrain County or its agent but not in the government's name. Audrain County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Audrain County or of a type that are not exposed to custodial credit risk.

Note 2 - Deposits and Investments (continued)

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Audrain County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by Audrain County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Audrain County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. Audrain County's deposits were not exposed to concentration of investment credit risk for the years ended December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 were as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue	$ 110,000	$ 1,020,000	$ 110,000	$ 1,110,000
Special Road and Bridge	-	70,000	-	70,000
Bridge Trust	-	40,000	-	40,000
Law Enforcement Sales Tax	1,020,000	-	1,110,000	-
Total	$ 1,130,000	$ 1,130,000	$ 1,220,000	$ 1,220,000

Note 4 - Long-Term Debt

Bond Indebtedness:

In 2010, the County issued Series 2010 Missouri Public Facilities Corporation Leasehold Revenue Refunding Bonds (Audrain County, Missouri Law Enforcement and Correctional Facility Project) in the amount of $2,380,000. Interest rates are variable ranging between 1.15% and 3.70% with the bonds maturing on March 1, 2017. Bond principal and interest payments are recorded in the Law Enforcement Bond Fund. These bonds are held by the Commerce Trust Company.

Debt	Balance at Jan. 1, 2013	Amount Borrowed	Amount Repaid	Balance at Dec. 31, 2013	Interest Paid During Year
Series 2010 Bonds	2,065,000	-	(390,000)	1,675,000	58,182
Total	$ 2,065,000	$ -	$ (390,000)	$ 1,675,000	$ 58,182

Note 4 - Long-Term Debt (continued)

	$ 700,000	$ 62,382	$ 762,382

Capital leases do not include $1,400,000 for a lease-purchase agreement entered into in February 2009 with a local bank in Audrain County for the acquisition, construction and installation of an emergency operations and communications center and related facilities and equipment for the Emergency 911 Board. The Board, with the County Commission as co-signer, entered into a commercial loan agreement with the bank to lease the land and building to the County Commission and the County Commission to sublease to the Board. The loan is payable in monthly payments of $14,897 through February 2019 with interest payable at 5.00%. The Emergency 911 Board is the primary debtor responsible for these payments.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS)

Plan Description

Audrain County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multi-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and governed by statutes section RSMo 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling (800) 447-4334.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Funding Status

Full-time employees of Audrain County do not contribute to the pension plan. The June 30th statutorily required contribution rates are 7.4% (General) and 6.6% (Police) of annual covered payroll for the year ended December 31, 2013. The June 30th statutorily required contribution rates are 7.6% (General) and 5.6% (Police) of annual covered payroll for the year ended December 31, 2012. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2013 was as follows:

	2013
Annual required contribution	$ 180,561
Interest on net pension obligation	-
Adjustment to required contribution	-
Annual pension cost	180,561
Actual contributions	180,561
Increase (decrease) in NPO	-
NPO beginning of year	-
NPO end of year	$ -

The annual required contribution (ARC) was determined as part of the February 28, 2011 and February 29, 2012 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011 was 7 years for the General division and 12 years for the police division. The amortization period of February 29, 2012 was 14 years for the General division and 12 years for the Police division.

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2011	$ 130,933	100.0%	$ -

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

Note 6 - County Employees' Retirement Fund (CERF)

Plan Description

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for county officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for county employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65102, or by calling 1-877-632-2373.

Note 6 - County Employees' Retirement Fund (CERF) (continued)

Funding Policy

In accordance with state statutes, the plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 contribute 0% of their annual salary, while employees hired after February 2002 are required to contribute 4% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $81,807 and $77,094, respectively, for the years then ended.

Note 7 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Audrain County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System. Once remitted, the State of Missouri is responsible for administration of this plan. Audrain County has contributed $2,244 and $2,244, respectively, for the years ended December 31, 2013 and 2012.

Note 8 - Post-Employment Benefits

Audrain County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Audrain County.

Note 9 - Claims, Commitments and Contingencies

Litigation

Audrain County is involved in pending litigation as of December 31, 2013. The extent of the liability, if any, cannot be determined at this time.

Compensated Absences

The County provides employees with up to 20 days of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation and overtime, if applicable. Vacation time can be accumulated up to a maximum of 200 hours of which only 40 hours may be carried over each calendar year. Full-time employees may accumulate sick leave up to a maximum of 480 hours; however, no compensation is made upon separation of employment. These have not been subjected to auditing procedures.

Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Note 10 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is also a member of the Missouri Association of Counties Self-Injured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

Note 11 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through June 26, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Audrain County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Audrain County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Audrain County, Missouri's basic financial statements and have issued our report thereon dated June 26, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Audrain County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Audrain County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Audrain County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies: 13/12-2, 13/12-3, 13/12-4, & 13/12-5.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Audrain County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an

opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and questioned costs as item 13/12-1.

Audrain County, Missouri's Response to Findings

Audrain County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. Audrain County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133

To the County Commission and
Officeholders of Audrain County, Missouri

Report on Compliance for Each Major Federal Program

We have audited Audrain County, Missouri's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Audrain County, Missouri's major federal programs for the years ended December 31, 2013 and 2012. Audrain County, Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Audrain County, Missouri's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Audrain County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Audrain County, Missouri's compliance.

Opinion on Each Major Federal Program

In our opinion, Audrain County, Missouri, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended December 31, 2013 and 2012.

Other Matters

The results of our auditing procedures disclosed an instance of noncompliance, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item 13/12-6. Our opinion on each major federal program is not modified with respect to these matters.

Audrain County, Missouri's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Audrain

County, Missouri's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of Audrain County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Audrain County, Missouri's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Audrain County, Missouri's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

The County of Audrain
Mexico, Missouri
Notes to Schedule of Expenditures of Federal Awards
For the years ended December 31, 2013 & 2012

Note 1 - Summary of Significant Accounting Policies

Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of *OMB Circular A-133*. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Audrain County, Missouri.

Basis of Presentation

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented on the cash basis of accounting. The information in this schedule is presented in accordance with the requirements of *OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the financial statements.

Note 2 - Subrecipients

The County passed through $39,524 and $70,976 of federal funds related to the Community Development Block Grants (CFDA# 14.228) to another organization for the years ended December 31, 2013 and 2012, respectively.

The County of Audrain
Mexico, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2013 & 2012

Section 1 - Summary of Auditor's Results

Financial Statements

Type of auditor's report issued	Unmodified Regulatory Basis			
Internal control over financial reporting:				
Material weakness(es) identified?		Yes	X	No
Significant deficiencies identified that are not considered to be material weaknesses?	X	Yes		None Reported
Any noncompliance material to financial statements noted?	X	Yes		No

Federal Awards

Internal control over major programs:				
Material weakness(es) identified?		Yes	X	No
Significant deficiencies identified not considered to be material weaknesses?	X	Yes		None Reported
Type of auditor's report issued on compliance for major programs:	Unmodified			
Any audit findings disclosed that are required to be reported in accordance with section 510 (a) of Circular A-133?	X	Yes		No

Identification of Major Programs:

CFDA Number	Name of Federal Program or Cluster
14.228	Community Development Block Grants
20.205	Highway Planning and Construction

Dollar threshold used to distinguish between type A and type B programs:	$ 300,000			
Auditee qualified as low-risk auditee?		Yes	X	No

Section 2 - Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted one fund with actual expenditures that exceeded the budgeted expenditures and three funds for which no budget was prepared.

Effect: Missouri statutes requires Counties to prepare an annual budget and expenditures are not to exceed the budget. Due to exceeding budget or not preparing a budget in certain funds, the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget for all funds, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: A budget was prepared for Federal Forfeiture in 2013 and 2014 and we will continue to prepare a budget for this fund. The CDBG Fund and Election Fund are pass thru funds. The CDBG Fund is no longer open and it is not anticipated the county will have this grant funding anytime in the near future. The Election Fund is set up per RSMo 115.077(3) and is a pass-through fund. Preparing budgets for these funds would inflate revenues and expenditures. It is management's opinion that preparing budgets for these funds is unnecessary.

13/12-2 ***Condition:*** During our audit, we noted that cash and fund balance was not being accurately tracked within the accounting system. The County is however, tracking cash and fund balance on spreadsheets outside the accounting system.

Effect: If cash and fund balance is not accurate within the accounting system, it is possible that revenue and expenses are not accurate. This may lead to management making decisions based on inaccurate information.

Cause: This has been an ongoing issue since the initial setup of the accounting system and has never been corrected.

Recommendation: We recommend management work with the software vendor to correct issues related to the fund and account structure within the accounting system to allow for accurate tracking of cash and fund balance within the accounting system.

Management's Response: The Treasurer has been in contact with the vendor to correct these issues and they are working on a correction. We do feel, however, that there has always been an accurate tracking of cash by the treasurer's manual account books. At no time did the audit team make an effort to visit with the Treasurer to review her account books, as all other past auditors have done.

13/12-3 ***Condition:*** Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal control.

Section 2 - Financial Statement Findings (continued)

13/12-3 (cont.) ***Recommendation:*** We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: Management is currently reviewing an internal control policy and will consider putting a policy in place.

13/12-4 ***Condition:*** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate fraud risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze, and manage these risks.

Management's Response: Management is currently reviewing an internal control policy which includes a fraud risk assessment, and will consider putting a policy in place.

13/12-5 ***Condition:*** The County did not record in their general ledger federal pass-through funds for the Community Development Block Grant Fund in the amounts of $39,524 and $70,976 for the years 2013 and 2012, respectively. Also, revenues and expenditures for the Federal Forfeiture Fund and Law Enforcement Bond Fund were not recorded in the general ledger properly.

Effect: Failure to record all revenues and expenditures makes it difficult to track federal pass-through funds and leads to inaccurate financial reporting.

Cause: The County signed the pass-through grant checks and forwarded them to the subrecipients without recording in the general ledger.

Recommendation: We recommend the County deposit all pass-through grants and record them in the general ledger. When the grant monies are passed on to a subrecipient, an expense would then be recorded. We also recommend all monies be receipted for tracking purposes. Currently, such a system does not permit the preparation of accurate and reliable financial statements. Without adequate financial records, management's decisions may be based on incomplete and/or inaccurate information during the year.

Management's Response: As stated in 13/12-2 we are currently working with our software vendor to correct the problems in the General Ledger. The pass-through checks were receipted in and disbursed to the subrecipients. This was recorded in the General Ledger and the manual fund books. At no time were these checks endorsed and sent on without properly receipting and disbursing them through the system.

Section 3 - Federal Award Findings and Questioned Cost

13/12-6

Federal Grantor:	All Programs
Pass-Through Grantor:	All Programs
Federal CFDA Number:	All Programs
Program Title:	All Programs

Condition: The Schedule of Expenditures of Federal Awards (SEFA) contained errors.

Criteria: OMB Circular A-133 requires auditees to prepare an accurate SEFA containing awards expended, CFDA title and number, award number, name of the Federal agency, and name of the pass-through entity.

Cause: Management was unaware of the reporting requirements related to the Schedule of Expenditures of Federal Awards.

Effect: Federal expenditures reported on the SEFA were incorrect.

Recommendation: We recommend that management develop internal controls over reporting and consult with outside accountants when needed to ensure an accurate SEFA is prepared.

Management's Response: The county clerk will strive to obtain all necessary information to correctly report information on the SEFA. Management will not seek outside accountants and incur costs.

The County of Audrain
Mexico, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Audrain County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2011.

Prior Year Financial Statement Findings

11/10-1 ***Criteria:*** Strong internal controls over financial statements require that monthly bank reconciliations be accurately performed to ensure the bank accounts properly reconcile to the County's fund balances.

Condition: The County Treasurer has not performed proper monthly bank reconciliations to agree reconciled cash balances to various funds maintained under her control. Bank reconciliations performed during the audit at December 31, 2011 showed unreconciled differences between the bank accounts and various county funds which could not be properly identified during July for $(136,114.26); August $9; September $100.53; October $100.53; November $100.53 and December $100.53. The reconciliations showed less monies available in the bank accounts than what was shown in the total book balances for these various funds except for the month of July which showed more monies available in the bank accounts. Also, the Collector's Tax Maintenance fund budget balance was $400 less than the actual cash balance.

Context: During our audit of cash, we noted that proper reconciliations were not being prepared for the months of July-December 2011 and the Collector's Tax Maintenance fund cash balances did not tie to the budget.

Effect: The cash balances of various county funds are not accurately stated.

Cause: The County Treasurer's office has bank reconciliations with unreconciled differences.

Recommendation: The County Treasurer should properly prepare monthly bank reconciliations between the bank accounts and the appropriate county funds to ensure no differences exist. Any differences noted should be located and corrected immediately.

Views of responsible officials and planned corrective actions: Regarding the difference in the fund and budget balance in the Collector's Tax Maintenance Fund, the County Clerk compiled the budget before the Treasurer finished the yearly settlement. The error with the fund was discovered and corrected. The financial statement reflected the correct amount. The difference with the cash balance in the month of July 2011 was due to the County switching financial institutions on July 1. The Treasurer will work to reconcile all other differences.

Status: Management has corrected this issue.

11/10-2 ***Criteria:*** Section 50.550, RSMo, requires that budget documents be prepared for all county funds.

Condition: The County Commission did not prepare or require a budget document to be prepared for the Federal Forfeiture Fund maintained by the County Treasurer with funds received and disbursed on behalf of the County Sheriff.

Context: During our audit, we noted that no budget was prepared for the Federal Forfeiture Fund.

Recommendation: The County Commission and County Clerk should require a budget document from the County Sheriff for the Federal Forfeiture Fund.

Prior Year Financial Statement Findings (continued)

11/10-2 (cont.) ***Views of responsible officials and planned corrective actions:*** In the future, the county will prepare a budget for the Federal Forfeiture Fund.

Status: Management has not corrected this issue and the finding is repeated in the current year as 13/12-1.

11/10-3 ***Criteria:*** Strong internal controls over financial reporting require that all revenues and expenditures be accurately recorded.

Condition: The County did not record in their general ledger pass-through emergency shelter grants in the amounts of $9,180 and $9,000 for the years 2011 and 2010, respectively. This also was the case for the homeless prevention and rapid rehousing grant in the amounts of $24,898.84 and $50,342.50 for the years 2011 and 2010, respectively. It was also noted that the Recorder's office was not completing receipts for all monies received in that office.

Context: During our audit of the schedule of expenditures of federal awards, it was noted that the County did not record pass-through grants in the general ledger. We also noted a lack of completing receipts in the Recorder's office during our walk through.

Effect: Failure to record pass-through grants and receipts understates the County's revenues and expenditures and makes it difficult to track for federal reporting purposes and financial reporting purposes in general.

Cause: The County signed the pass-through grant checks and forwarded them to the subrecipients without recording in the general ledger. The Recorder does not receipt all monies received in that office.

Recommendation: We recommend the County deposit all pass-through grants and record them in the general ledger. When the grant monies are passed on to a subrecipient, an expense would then be recorded. We also recommend all monies be receipted for tracking purposes. Currently, such a system does not permit the preparation of accurate and reliable financial statements. The importance of a good accounting system cannot be overemphasized. Without adequate financial records, management is basing its decision on incomplete and/or inaccurate information during the year, and excessive time is spent at year end in preparing and auditing the financial statements.

Views of responsible officials and planned corrective actions: In order to track the pass through grants, the County will receipt and disburse them through the general ledger.

Status: Management has not corrected this issue and the finding is repeated in the current year as 13/12-5.

11/10-4 ***Criteria:*** Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Prior Year Financial Statement Findings (continued)

11/10-4 (cont.)

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to the financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of its audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to the financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of responsible officials and planned corrective actions: The County Clerk does prepare the financial statement as required by State statute; and as required by statute has the financial statements published in the newspaper. As far as I know state statute does not require the County to prepare financial statements under SAS rules. The County is willing to review this recommendation with the auditor. The County questions if county governments of its size are required to comply with SAS standards.

Status: This is no longer considered a significant deficiency.

11/10-5

Criteria: Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Prior Year Financial Statement Findings (continued)

Views of responsible officials and planned corrective actions: The County is willing to review this recommendation with the auditor.

Status: Management has not corrected this issue and the finding is repeated in the current year as 13/12-3.

11/10-6 ***Criteria:*** Antifraud programs and controls are the policies and procedures an organization puts in place by an organization to ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual financial statement. The County was not aware of the SAS requirements and questions if county governments of its size are required to comply with SAS standards. We will take this under advisement.

Status: Management has not corrected this issue and the finding is repeated as finding 13/12-4.

11/10-7 ***Criteria:*** SAS No. 109, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement and SAS No. 110, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained which supersede SAS No. 55, Consideration of Internal Control in a Financial Statement Audit.

Condition: Lack of sufficient segregation of duties.

Context: During our testing of internal controls, we noted a lack of segregation of duties in the areas of receipts and disbursements in the Recorder, Collector, Sheriff and Treasurer's offices.

Prior Year Financial Statement Findings (continued)

11/10-7 (cont.)

Effect: The design of the internal control over financial reporting could adversely affect the ability to record, process, summarize and report financial data consistent with the assertions of management in the financial statements.

Cause: Size and budget constraints limiting the number of personnel within these offices.

Recommendation: These areas should be reviewed periodically and consideration given to the improving of segregation of duties.

Views of responsible officials and planned corrective actions: The County is currently following all state statutes regarding segregation of duties. Budget restraints make it impossible to add additional personnel when work load does not require.

Recorder's Response: I have one full time and one part time employee in my office. My full time or myself do daily deposits while we all share the duties of recording, receipting money, and taking care of our customers. It is very important to me that we all can do these jobs as at times I am gone to training, meetings, etc. I know my office is able to continue as usual. I do the month end books myself the first day of the month while my employees are working with customers and doing daily recordings. I only write checks once a month to the same payees every month. I zero out the account every month with these same payees

Treasurer's Response: My office works closely with the County Clerk's Office. We balance monthly and I perform settlement every six months as required by statute. Due to budget constraints it is not feasible to have a full time employee in my office.

Status: This is no longer considered a significant deficiency.

Section 3 - Federal Award Findings and Questioned Cost

None

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Barry County, Missouri

We have audited the accompanying financial statements of Barry County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Barry County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Barry County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Barry County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Matters

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Barry County, Missouri's basic financial statements. The schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is also not a required part of the basic financial statements.

The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated July 11, 2014, on our consideration of Barry County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Barry County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Organized in 1835, the county of Barry was named after United States Postmaster General, William Taylor Barry. It is a third-class county, and the county seat is Cassville. Barry County's government is composed of a three-member county commission and the following separately elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk/Ex-Officio Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Barry County, Missouri, the Barry County Senior Citizens Service Board, and the Barry County Senate Bill 40 Board.

Barry County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Barry County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Barry County's legal entity. The Barry County Senior Citizens Service Board and Senate Bill 40 Board are controlled by separate boards and are also included under the control of Barry County.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Barry County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Barry County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Barry County adopts a budget for each governmental fund.

On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit, we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The following funds had actual expenditures that exceeded the budgeted expenditures: Sheriff Special Enforcement Fund in 2012, Forest Reserve Fund in 2013 and 2012, and Deputy Sheriff Salary Supplementation Fund in 2012. We noted the following funds without a prepared budget: Flood Control Fund in 2013 and 2012 and Emergency Reserve Fund in 2013 and 2012. Also, the Collector's Tax Maintenance Fund is budgeted at a deficit in 2013 and 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property, included within Barry County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation was as follows:

	2013	2012
Real Estate	$ 328,803,624	$ 322,507,286
Personal Property	111,487,723	110,770,022
Railroad and Utilities	16,359,306	16,130,544
	$ 456,650,653	$ 449,407,852

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
Senate Bill 40 Board	$ 0.0700	$ 0.0700
Senior Citizens Service Board	0.0500	0.0500

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Barry County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Barry County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. As of December 31, 2013, 100% of Barry County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2013, as follows:

	Bank Balances	Carrying Value
Deposits	$ 2,822,039	$ 2,593,128
Investments	775,535	775,535
Restricted Cash	-	-
Total Deposits and Investments as of December 31, 2013	$ 3,597,574	$ 3,368,663

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2012, as follows:

	Bank Balances	Carrying Value
Deposits	$ 2,382,057	$ 2,366,774
Investments	772,837	772,837
Restricted Cash	-	-
Total Deposits and Investments as of December 31, 2012	$ 3,154,894	$ 3,139,611

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Barry County's investment policy does not include custodial credit risk requirements. Barry County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013 and 2012.

Note 2 - Deposits and Investments (continued)

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Barry County or its agent but not in the government's name. Barry County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Barry County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Barry County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by Barry County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Barry County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. Barry County's deposits were not exposed to concentration of investment credit risk for the years ended December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue	$ 25,300	$ 105,000	$ 52,000	$ 105,200
Prosecuting Attorney Administrative Handling Cost	-	16,300	-	22,000
Emergency Reserve	105,000	-	105,200	-
Collector's Tax Maintenance	-	9,000	-	30,000
Total	$ 130,300	$ 130,300	$ 157,200	$ 157,200

Note 4 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65102, or by calling 1-877-632-2373.

Funding Policy

In accordance with Missouri state statutes, the Plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 are required to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $70,893 and $74,754, respectively, for the years then ended.

Note 5 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Barry County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System. Once remitted, the State of Missouri is responsible for administration of this plan. Barry County has contributed $7,752 and $7,752, respectively, for the years ended December 31, 2013 and 2012.

Note 6 - Other Retirement Plan

Barry County has a voluntary 401(a) plan administered by Great West which is paid by a deduction from employees' salary. These contributions qualify under the Internal Revenue Code and are tax exempt. Employee contributions collected and remitted by the County for the years ended December 31, 2013 and 2012 were $11,110 and $12,200, respectively.

Note 7 - Post-Employment Benefits

Barry County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Barry County.

Note 8 - Claims, Commitments and Contingencies

Compensated Absences

The County provides employees with up to three weeks of vacation, depending on length of service. Any remaining unused vacation is not reimbursed upon termination of employment. Sick leave is accrued at 0.5 days per month with a total maximum number of 30 days accrued. Employees can be reimbursed for up to half of any unused sick time upon termination of employment. These have not been subjected to auditing procedures.

Federal and State Assisted Programs

The County receives proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned. Such audits could result in refund of grant monies to the grantor agencies. Management believes that any required refunds will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Other Commitments

The County entered into a short-term promissory note with Security Bank of Southwest Missouri for county jail improvements. The note was for $47,697 due December 31, 2012 with interest payable at 3.25%. This balance was paid in full as of December 31, 2012. Interest expense for the note for the year ended December 31, 2012 was $138.

Note 9 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.700 RSMo). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make specific assessments. Members are jointly and severally liable for all claims against the risk pool.

Note 10 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through July 11, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Barry County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Barry County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Barry County, Missouri's basic financial statements and have issued our report thereon dated July 11, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Barry County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Barry County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Barry County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies: 13/12-2 and 13/12-3.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Barry County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an

opinion. The results of our tests disclosed an instance of noncompliance or other matter that is required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and questioned costs as item 13/12-1.

Barry County, Missouri's Response to Findings

Barry County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. Barry County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133

To the County Commission and
Officeholders of Barry County, Missouri

Report on Compliance for Each Major Federal Program

We have audited Barry County, Missouri's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Barry County, Missouri's major federal programs for the years ended December 31, 2013 and 2012. Barry County, Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Barry County, Missouri's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Barry County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Barry County, Missouri's compliance.

Opinion on Each Major Federal Program

In our opinion, Barry County, Missouri, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2013 and 2012.

Other Matters

The results of our auditing procedures disclosed an instance of noncompliance, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item 13/12-4. Our opinion on each major federal program is not modified with respect to these matters.

Barry County, Missouri's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Barry County,

Missouri's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of Barry County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Barry County, Missouri's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Barry County, Missouri's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

Notes to Schedule of Expenditures of Federal Awards
For the years ended December 31, 2013 & 2012

Note 1 - Summary of Significant Accounting Policies

Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of *OMB Circular A-133*. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Barry County, Missouri.

Basis of Presentation

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented on the cash basis of accounting. The information in this schedule is presented in accordance with the requirements of *OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the financial statements.

Note 2 - Subrecipients

The County passed through $209,412 and $241,893 of federal funds related to the Schools and Roads - Grants to States (CFDA# 10.665) to local schools and road districts for the years ended December 31, 2013 and 2012, respectively.

The County passed through $31,059 and $28,223 of federal funds related to the Payments to States in Lieu of Real Estate Taxes (CFDA# 12.112) to local schools and road districts for the years ended December 31, 2013 and 2012, respectively.

The County passed through $0 and $109,189 of federal funds related to the Edward Byrne Memorial Justice Assistance Grant (CFDA# 16.738) to the Southwest Missouri Drug Task Force for the years ended December 31, 2013 and 2012, respectively.

The County passed through $0 and $45,921 of federal funds related to the ARRA - Eward Byrne Memorial Justice Assistance Grant (JAG) Program/Grants to States and Territories (CFDA# 16.803) to the Southwest Missouri Drug Task Force for the years ended December 31, 2013 and 2012, respectively.

The County of Barry
Cassville, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2013 & 2012

Section 1 - Summary of Auditor's Results

Financial Statements

Type of auditor's report issued	Unmodified Regulatory Basis

15.226	Payments in Lieu of Taxes

Dollar threshold used to distinguish between type A and type B programs:	$ 300,000			
Auditee qualified as low-risk auditee?		Yes	X	No

Section 2 - Financial Statement Findings

13/12 - 1 **Condition:** During our audit, we noted the following funds with actual expenditures that exceeded the budgeted expenditures: Sheriff Special Enforcement Fund in 2012, Forest Reserve Fund in 2013 and 2012, and Deputy Sheriff Salary Supplementation Fund in 2012. We noted the following funds without a prepared budget: Flood Control Fund in 2013 and 2012 and Emergency Reserve Fund in 2013 and 2012. Also, the Collector's Tax Maintenance Fund is budgeted at a deficit in 2013 and 2012.

Effect: Missouri statutes requires Counties to prepare an annual budget and expenditures are not to exceed the budget. Due to exceeding budget in certain funds and budgeting a deficit in another, the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget for all funds, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: We do not prepare a budget for Forest Reserve Fund receipts for Title I funds and Mineral Rights or Flood Control Fund receipts because these monies are not kept by the County; we pass all funds through to the school districts and road districts. However, knowing that these monies need to be included in our expenditures of federal awards, we will take them into account on the budget for future years.

We did not take into account an entire year of receipts and expenditures when preparing a budget for the Deputy Sheriff Salary Supplementation Fund in 2012, and we have corrected this issue in 2013 in order to be in compliance. The Sheriff Special Enforcement Fund exceeded budget in 2012 due to a purchase of bulletproof vests; we are aware of this oversight and have remedied the problem.

In regards to the Collector's Tax Maintenance Fund, we did not account for outstanding checks in our beginning and ending cash balances when preparing the budgeted expenditures for 2013 and 2012. This problem will be corrected in the future.

Due to the nature of the Emergency Reserve Fund, we have not prepared a budget since it merely acts as a fund reserve for the County. We will take this finding into consideration when preparing future budgets.

13/12 - 2 **Condition:** Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: We have prepared a documented set of internal controls and adopted the policy as of January 2014.

Section 2 - Financial Statement Findings (continued)

13/12 - 3 **Condition:** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate fraud risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: We have prepared a formal fraud risk assessment document and adopted the policies and procedures within the document in May 2014.

Section 3 - Federal Award Findings and Questioned Costs

13/12 - 4

Federal Grantor:	All Programs
Pass-Through Grantor:	All Programs
Federal CFDA Number:	All Programs
Program Title:	All Programs

Condition: The Schedule of Expenditures of Federal Awards (SEFA) contained errors.

Effect: *OMB Circular A-133* requires auditees to prepare an accruate SEFA containing awards expended, CFDA title and number, award number, name of the Federal agency, and name of the pass-through entity.

Cause: Management did not follow reporting requirements related to the Schedule of Expenditures of Federal Awards.

Recommendation: We recommend management develop internal controls over reporting and consult with outside accountants, if possible, to ensure an accruate SEFA is prepared.

Management's Response: All SEFA errors will be corrected now that we are aware of the need to include Title I, Mineral Receipts, Flood Control and any other monies for which we serve as a pass-through entity only.

The County of Barry
Cassville, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Barry County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2010.

Prior Year Financial Statement Findings

10/09 - 1 **Criteria**: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, under Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency. SAS No. 115 supersedes SAS No. 112.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to the financial statements.

Context: During discussions with management, we noted that we will be assisting the County with the preparation of their audited financial statements and footnotes.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: Management did not prepare the financial statements or the notes to financial statements.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views to responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual financial statements. The County will pursue remedy for SAS 115 compliance if it is determined that it is required for a county of this size.

Status: This is no longer considered a significant deficiency.

10/09 - 2 **Criteria**: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Prior Year Financial Statement Findings (continued)

10/09 - 2 (cont.) **Recommendation**: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County is currently complying with all state statutes relating to the preparation of the financial statements with the preparation of the County's annual budget document and annual financial statements. Each official has their own internal controls within their office.

Status: Management has not corrected this issue, therefore, this finding is repeated as finding 13/12 - 2.

10/09 - 3 **Criteria**: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The Commission will encourage all elected officials to review and document antifraud risk assessments.

Status: Management has not corrected this issue, therefore, this finding is repeated as finding 13/12 - 3.

10/09 - 4 **Criteria**: SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* , as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit, an amendment to SAS No. 55.*

Condition: Lack of segregation of duties in the Recorder's Office.

Context: During our audit, we noted a single employee has the ability to initiate, record, reconcile and monitor a single transaction.

Effect: A single employee has the ability to initiate, record, reconcile and monitor a single transaction. Lack of segregation of duties and monitoring means that errors or other problems, such as theft of cash, might not be recognized and resolved on a timely basis.

Prior Year Financial Statement Findings (continued)

10/09 - 4 (cont.)

Cause: Lack of staff.

Recommendation: Hire another employee to segregate duties or find other ways to monitor transaction of employees.

Views of responsible officials and planned corrective actions: We will review the cost versus benefit of adding additional staff to alleviate the segregation of duties issue. Monitoring employee work will be implemented immediately.

Status: This is no longer considered a significant deficiency.

10/09 - 5

Criteria: Monthly reconciliation of bank accounts.

Condition: Bank account reconciliations are not being properly prepared in the Recorder's Office, Collector's Office and the Drug Task Force Office.

Context: During our audit, we noted that the reconciliation of the Recorder's accounts are not being properly reconciled on a monthly basis due to including checks written in the following month of the month being reconciled for 2009 and 2010, the Collector's escrow account for 2010 and the JAG account for 2010.

Effect: Lack of proper reconciliation and monitoring of accounts may lead to errors that may not be found in a timely manner.

Cause: The Recorder's, Collector's and Drug Task Force account reconciliations are not being properly prepared.

Recommendation: We recommend that these offices properly reconcile their accounts on a monthly basis and monitor the reconciliations to be sure they are being properly prepared. These reconciliations will ensure meaningful and accurate financial statements.

Views of responsible officials and planned corrective actions: We agree with the finding and will implement the recommendation immediately.

Status: Management has corrected this issue.

Prior Year Federal Award Findings (continued)

SA 10/09 - 1

All Programs

Information on the federal programs: The schedule of expenditures of federal awards contained errors.

Criteria: Section 310(b) of *Circular A-133, Audits of States, Local Governments and Non-Profit Organizations,* requires the County to prepare a SEFA for the period covered by the County's financial statements.

Questioned Costs: Not Applicable.

The County of Barry
Cassville, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

Prior Year Federal Award Findings

SA 10/09 - 1 (cont.)

Context: During our audit of the schedule of expenditures of federal awards, we noted numerous errors in the amounts reported on the schedule. Amounts reported were not supported by the documentation provided. Some of these errors were due to using revenue instead of expenditures while others were just errors.

Effect: Without an accurate and complete SEFA, federal financial activity may not be audited and reported in accordance with federal audit requirements which could result in future reductions of federal funds.

Cause: The County did not implement prior year corrective action plans

Recommendation: We recommend that County officials receive training in preparing the schedule of expenditures of federal awards.

Views of responsible officials and planned corrective actions: The County Clerk will work with all agencies receiving federal money to prepare an accurate schedule of expenditures of federal awards.

Status: Management has not corrected this issue, therefore, this finding is repeated as finding 13/12 - 4.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Dent County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Dent County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Dent County, Missouri

We have audited the accompanying financial statements of Dent County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Dent County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Dent County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Dent County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Matters

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Dent County, Missouri's basic financial statements. The schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is also not a required part of the basic financial statements.

The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated July 9, 2014, on our consideration of Dent County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Dent County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Organized in 1851, the county of Dent was named after state representative and pioneer settler, Lewis Dent, and is home to a large area of the Mark Twain National Forest. Dent County is a county-organized, third-class county and is part of the Forty-Second Judicial Circuit. The county seat is Salem. Dent County's government is composed of a three-member county commission and the following separately elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Dent County, Missouri, the Dent County Senior Citizens Services Board, and the Dent County Senate Bill 40 Board.

Dent County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Dent County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Dent County's legal entity. The Dent County Senior Citizens Services Board and Senate Bill 40 Board are controlled by separate boards and are also included under the control of Dent County.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Dent County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Dent County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Dent County adopts a budget for each governmental fund.

On or before January 15th, each elected official and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit, we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The Senior Citizens Service Board Fund had expenses exceeding their respective budgets for 2013 and 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property, included within Dent County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation, was as follows:

	2013	2012
Real Estate	$ 111,308,810	$ 111,181,950
Personal Property	37,634,350	37,938,720
Railroad and Utilities	5,058,764	5,336,745
	$ 154,001,924	$ 154,457,415

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
General Revenue Fund	$ 0.0350	$ 0.0350
Special Road and Bridge Fund	0.2550	0.2550
Senate Bill 40 Board Fund	0.1500	0.1500
Senior Citizens Service Board Fund	0.0467	0.0466

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Dent County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Dent County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013 and 2012, the carrying amount of Dent County's deposits was $2,801,946 and $2,669,340, respectively, and the bank balance was $2,985,926 and $2,800,648, respectively. As of December 31, 2013, 100% of Dent County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The carrying values of deposits and investments shown below are included in the financial statements at December 31, 2013, as follows:

Deposits	$ 2,801,946
Investments	-
Restricted Cash	-
Total Deposits and Investments as of December 31, 2013	$ 2,801,946

The carrying values of deposits and investments shown below are included in the financial statements at December 31, 2012, as follows:

Deposits	$ 2,669,340
Investments	-
Restricted Cash	-
Total Deposits and Investments as of December 31, 2012	$ 2,669,340

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Dent County's investment policy does not include custodial credit risk requirements. Dent County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013 and 2012.

Note 2 - Deposits and Investments (continued)

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Dent County or its agent but not in the government's name. Dent County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Dent County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Dent County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by Dent County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Dent County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. Dent County's deposits were not exposed to concentration of investment credit risk for the years ended December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out

Total	$ 215,618	$ 215,618	$ 90,438	$ 90,438

Note 4 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for county officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for county employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65102, or by calling 1-877-632-2373.

Funding Policy

In accordance with state statutes, the plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 are required to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $67,982 and $64,879, respectively, for the years then ended.

Note 5 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Dent County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System. Once remitted, the State of Missouri is responsible for administration of this plan. Dent County has contributed $7,752 and $7,752, respectively, for the years ended December 31, 2013 and 2012.

Note 6 - Post-Employment Benefits

Dent County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Dent County.

Note 7 - Claims, Commitments and Contingencies

Compensated Absences

The County provides employees with up to three weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused compensatory time. These have not been subjected to auditing procedures.

Federal and State Assisted Programs

The County receives proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned. Such audits could result in refund of grant monies to the grantor agencies. Management believes that any required refunds will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Note 8 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.700 RSMo). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make specific assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Injured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

Note 9 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through July 9, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 10 - Long-Term Debt

In April of 2009, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2008 Freightliner M2 truck at a cost of $48,500. The agreement requires annual payments of $12,897 ending June 1, 2012, which includes interest of 3.95%. This lease was paid off in 2012.

In April of 2009, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2007 Sterling Model LT 9511 dump truck at a cost of $79,836. The agreement requires annual payments of $21,254 ending June 1, 2012, which includes interest of 3.95%. This lease was paid off in 2012.

In April of 2009, the County entered into a cancelable lease purchase agreement to finance the purchase of a second 2007 Sterling Model LT 9511 dump truck at a cost of $79,836. The agreement requires annual payments of $21,254 ending June 1, 2012, which includes interest of 3.95%. This lease was paid off in 2012.

In March of 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of a Caterpillar 924H Wheel loader at a cost of $69,004. The agreement requires annual payments of $18,989 ending March 11, 2014, which includes interest of 3.95%.

In October of 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2007 Chevy Tahoe at a cost of $21,500. The agreement requires annual payments of $7,167 in 2010 and $7,495 the following years, ending in March 2012, which includes interest of 3.04%. This lease was paid off in 2012.

In September of 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2010 John Deere 672G Motor Grader at a cost of $95,526. The agreement requires annual payments of $21,098 ending October 25, 2015, which includes interest of 3.40%.

In September of 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of a second 2010 John Deere 672G Motor Grader at a cost of $95,526. The agreement requires annual payments of $21,098 ending October 25, 2015, which includes interest of 3.40%.

In August of 2011, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2011 Caterpillar Backhoe at a cost of $87,668. The agreement requires annual payments of $19,227 ending August 8, 2016, which includes interest of 3.15%.

In November of 2011, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2011 John Deere 672 Motor Grader at a cost of $120,187. The Agreement requires annual payments of $26,359 ending November 28, 2016 which includes interest of 3.15%.

In November of 2011, the County entered into a cancelable lease purchase agreement to finance the purchase of a second 2011 John Deere 672 Motor Grader at a cost of $120,187. The Agreement requires annual payments of $26,359 ending November 28, 2016 which includes interest of 3.15%.

In December of 2012, the County entered into a cancelable lease purchase agreement to finance the purchase of a patrol vehicle at a cost of $25,191. The agreement requires annual payments of $8,642 ending March 1, 2015, which includes interest of 2.44%.

In April of 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of two 2013 120M2 AWD Graders at a cost of $190,156. The agreement requires annual payments of $40,860 ending April 8, 2018, which includes interest of 2.44%.

Note 10 - Long -Term Debt (continued)

In May of 2014, the County entered into a cancelable lease purchase agreement to finance the purchase of two 2014 Ford Explorers at a cost of $55,947. The agreement requires annual payments of $19,045 ending in 2016, which includes interest of 2.12%.

As of June 2014, the County was in the process of entering into a cancelable lease purchase agreement to finance the purchase of a John Deere 6105M Tractor/Brush Cutter at a cost of $90,398. The agreement requires annual payments of $23,955 ending in 2018, which includes interest of 2.37%.

Although the agreements provide cancellation of the leases if the County should fail to appropriate funds at the annual renewal dates, the County does not foresee exercising its option to cancel.

The following is the changes in long-term debt for the year ended December 31, 2013:

Capital Lease Obligations	Balance December 31, 2012	Additions	Retirements	Balance December 31, 2013	Interest Paid

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Dent County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Dent County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Dent County, Missouri's basic financial statements and have issued our report thereon dated July 9, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Dent County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Dent County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Dent County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies: 13/12-2 and 13/12-3.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Dent County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The

results of our tests disclosed an instance of noncompliance or other matter that is required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and questioned costs as item 13/12-1.

Dent County, Missouri's Response to Findings

Dent County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. Dent County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133

To the County Commission and
Officeholders of Dent County, Missouri

Report on Compliance for Each Major Federal Program

We have audited Dent County, Missouri's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Dent County, Missouri's major federal programs for the years ended December 31, 2013 and 2012. Dent County, Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Dent County, Missouri's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Dent County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Dent County, Missouri's compliance.

Opinion on Each Major Federal Program

In our opinion, Dent County, Missouri, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2013 and 2012.

Other Matters

The results of our auditing procedures disclosed an instance of noncompliance, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item 13/12-4. Our opinion on each major federal program is not modified with respect to these matters.

Dent County, Missouri's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Dent County,

Missouri's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of Dent County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Dent County, Missouri's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Dent County, Missouri's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

The County of Dent
Salem, Missouri
Notes to Schedule of Expenditures of Federal Awards
For the years ended December 31, 2013 & 2012

Note 1 - Summary of Significant Accounting Policies

Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of *OMB Circular A-133*. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Dent County, Missouri.

Basis of Presentation

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented on the cash basis of accounting. The information in this schedule is presented in accordance with the requirements of *OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the financial statements.

Note 2 - Subrecipients

The County passed through $236,342 and $241,315 of federal funds related to the Schools and Roads - Grants to States (CFDA# 10.665) to local schools for the years ended December 31, 2013 and 2012, respectively.

The County of Dent
Salem, Missouri
Schedule of Findings and Questioned Costs

Identification of Major Programs:

CFDA Number	Name of Federal Program or Cluster
10.665	Schools and Roads - Grants to States

Dollar threshold used to distinguish between type A and type B programs:	$ 300,000			
Auditee qualified as low-risk auditee?		Yes	X	No

Section 2 - Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted one fund with actual expenditures that exceeded the budgeted expenditures.

Effect: Missouri statutes requires Counties to prepare an annual budget and expenditures are not to exceed the budget. Due to exceeding budget in certain funds the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget for all funds, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: The County Commission, County Treasurer and County Clerk will review all funds throughout the year and make all necessary budget amendments as necessary in accordance with the Mo Revised Statutes.

13/12-2 ***Condition:*** Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The County Commission and County Clerk will attempt to document the County's internal controls as recommended.

13/12-3 ***Condition:*** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate audit risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The County Commission and County Clerk will attempt to develop and implement formal fraud risk assessment procedures.

Section 3 - Federal Award Findings and Questioned Costs

13/12-4

Federal Grantor:	All Programs
Pass-Through Grantor:	All Programs
Federal CFDA Number:	All Programs
Program Title:	All Programs

Condition: The Schedule of Expenditures of Federal Awards (SEFA) contained errors.

Criteria: OMB Circular A-133 requires auditees to prepare an accurate SEFA containing awards expended, CFDA title and number, award number, name of the Federal agency, and name of the pass-through entity.

Cause: Management was unaware of the reporting requirements related to the Schedule of Expenditures of Federal Awards.

Effect: Federal expenditures reported on the SEFA were incorrect.

Recommendation: We recommend that management develop internal controls over reporting and consult with outside accountants when needed to ensure an accurate SEFA is prepared.

Management's Response: The County Clerk prepares the SEFA and will prepare each year in compliance with *OMB Circular A-133.*

The County of Dent
Salem, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Dent County, Missouri, on the applicable findings in the prior audit report issued for the year ended December 31, 2010.

Prior Year Financial Statement Findings

2010-01 ***Condition:*** Two individuals perform conflicting duties in the accounts receivable/revenue, accounts payable/purchases and payroll cycles and some accounts are manually maintained with little or no oversight.

Criteria: Internal controls should be in place that provide reasonable assurance that access/authorization, recording and monitoring duties are adequately separated.

Cause: The current internal control structure and number of personnel available to perform these functions does not adequately separate the recording function from the access/authorization and monitoring duties.

Effect: Without effective internal controls, transactions could be inappropriately recorded without being detected.

Recommendation: Duties should be assigned to ensure that individuals perform duties that are properly segregated and manually maintained accounts are reviewed periodically.

Views of responsible officials and planned corrective actions: Management will continue to weigh the cost versus benefit of obtaining resources to further segregate duties.

Status: We do not consider this a significant deficiency.

2010-02 ***Condition:*** Current grant procedures do not separate all grant revenues and expenditures within the accounting system, nor do they ensure that all monitoring reports are filed as required.

Criteria: Effective grant monitoring procedures include noting grant expenditures within the accounting system and making sure necessary reports are timely filed.

Cause: Current internal procedures did not provide for review of grant revenues and expenditures in total to ensure that all grant requirements were met.

Effect: Noncompliance with grant agreements and potential for unreimbursed expenditures.

Recommendation: Responsible parties should work together to ensure that all incurred costs are tracked separately within the accounting software, billed routinely and that compliance requirements under grant awards are completed timely and sufficiently documented.

Views of responsible officials and planned corrective actions: Management will evaluate the procedures in this area and address the procedure changes needed.

Status: Management has corrected this issue.

Prior Year Federal Award Findings and Questioned Cost

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Andrew County

Public Administrator Controls and Procedures	The Public Administrator did not obtain or retain adequate supporting documentation for some disbursements from individual ward bank accounts. The Public Administrator did not adequately review the financial activity of some wards, resulting in non-sufficient funds and overdraft fees, and did not make one ward's rent payments timely. For 9 of the 37 wards we reviewed, the Public Administrator's case files were missing receipts, invoices, and bank statements. The Public Administrator did not timely perform bank reconciliations for some wards and did not file annual settlements for some wards for up to 4 years. On the wards' annual settlements, the Public Administrator failed to include $3,000 of tools and equipment, automobiles, and a burial plan. The Associate Circuit Court, Probate Division did not follow up on annual settlements not filed by the required date, and the Associate Circuit Court, Probate Division review did not detect any of the described errors. The Public Administrator did not timely take action to close the estates of deceased wards, and one case remained open almost 7 years after the assets were distributed and the bank accounts closed.
Sheriff Controls and Procedures	As noted in our prior audit report, Sheriff's office personnel do not deposit fee receipts intact or timely and do not prepare a monthly list of liabilities to reconcile to the cash balance for the Sheriff's fee account. At our request, office personnel prepared a list of liabilities, and the reconciled book balance exceeded the list of liabilities by $286, but the Sheriff's office was unable to determine to whom the excess funds were owed.
Prosecuting Attorney Receipt Procedures	The Prosecuting Attorney's office does not issue receipts for some monies received, so office personnel cannot document the amounts received from defendants or transmitted to the court. In addition, the Prosecuting Attorney's office does not always restrictively endorse money orders received upon receipt.
Computer Controls	The County Commission does not require that computer passwords be periodically changed, and there are no security controls in place to lock a computer after a specified number of incorrect logon attempts.
Property Tax System	As noted in our 2 prior audit reports, neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Clerk does not maintain records summarizing property tax transactions and changes, and there is no evidence that the County Clerk or the County Commission verify the County Collector's annual settlements.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 13

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Andrew County

We have audited certain operations of Andrew County in fulfillment of our duties under Section 29.230, RSMo. In addition, Nichols, Stopp & VanHoy, LLC, Certified Public Accountants, was engaged to audit the financial statements of Andrew County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Andrew County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Lori Melton, M.Acct., CPA
In-Charge Auditor:	Patrick M. Pullins, M.Acct., CISA
Audit Staff:	Amanda Messick
	John R. Ebling
	Nancy McDowell

1. Public Administrator Controls and Procedures

There are significant deficiencies with the Public Administrator's accounting controls and procedures.

During the year ended December 31, 2013, the Public Administrator served as the court appointed personal representative for 37 individuals (wards) and decedent estates of the Associate Circuit Court, Probate Division.

Unless otherwise specified, references to Public Administrator relate to the former Public Administrator who resigned effective February 28, 2014. The current Public Administrator took office in March 2014. Recommendations are directed to the current Public Administrator since she is in a position to work with the Associate Circuit Court, Probate Division and implement changes.

1.1 Disbursements

Documentation retained by the Public Administrator to support disbursements was not complete or adequate. Additionally, the Public Administrator did not monitor account balances, causing wards to incur unnecessary bank fees and paid some disbursements late.

Documentation

The Public Administrator did not obtain or retain adequate supporting documentation for some disbursements from individual ward bank accounts during the year ended December 31, 2013.

- A check for $400 was written from one ward's account to a bank on October 29, 2013, with "money order" indicated in the memo section. The description on the annual settlement indicated this money order was used for rent. The December 2013 rent payment was reduced by $400, but no supporting documentation was available to ensure the money order was used for rent and was the reason the rent payment for December was reduced. Also, on October 29, 2013, two checks for $400 each were written from a second ward's account to a bank with "money order" in the memo section. The description on the annual settlement indicated one money order was for a service provider; however, the service provider had already been paid for that month. The other description on the annual settlement was only "money order" and probate division personnel, the current Public Administrator, and records could not explain how this money was used. On February 5, 2014, $600 was withdrawn from the second ward's account. The description on the annual settlement indicated the Public Administrator used this money to purchase a money order for burial expenses; however, there was no documentation of a burial plan for this ward. The current Public Administrator was able to confirm the existence of a burial plan for this ward, but was not able to verify the money order was credited to the burial plan. The Probate Clerk indicated she did not see any documentation supporting these money orders when reviewing the annual settlements. With no documentation of how these monies were used, there is no assurance these funds were spent appropriately.

- Checks totaling $3,790 were issued to two wards for personal expenses during the year ended December 31, 2013; however, the wards did not sign a receipt indicating monies had been received from the Public Administrator.

To ensure payments are valid and proper and reduce the risk of loss, theft, or misuse of funds, the Public Administrator should maintain adequate supporting documentation for all disbursements.

Monitoring

The Public Administrator did not adequately review the financial activity of some wards or make ward's rent payments timely.

The Public Administrator did not adequately monitor ward account balances. Three wards were charged non-sufficient funds and overdraft fees by the bank totaling $456. Of these fees, $420 was refunded by the bank or reimbursed by the Public Administrator. However, the fees could have been avoided if the Public Administrator had properly monitored account balances.

The Public Administrator did not pay one ward's rent payments for the months of August and September 2013 until November 2013. Payment of each month's rent occurred approximately 2 months after the due date for the remainder of the year.

Part of the Public Administrator's function is to serve in a fiduciary role for individuals who cannot provide adequate oversight of their own finances. The failure to adequately monitor the financial activity, including account balances, of wards increases the risk that loss, theft, or misuse of funds could go undetected. The Public Administrator should monitor ward account balances and pay all bills timely to avoid unnecessary bank charges.

1.2 Ward documentation

The Public Administrator did not retain complete case files for all wards.

For 9 of the 37 wards reviewed, the Public Administrator case files did not contain complete financial information or documentation to support the financial activity that occurred in the wards' accounts. Missing documentation included receipts, invoices, and bank statements.

Failing to maintain complete case files for all wards significantly increases the risk that loss, theft, or misuse of funds could occur undetected. Record retention is necessary to ensure the validity of transactions and provide an audit trail. Section 109.270, RSMo, states all records made or received by officials in the course of their public duties are public property and are not to be disposed of except as provided by law.

1.3 Bank reconciliations

The Public Administrator did not perform timely bank reconciliations for some wards. For 3 wards we noted the following concerns.

- The May 24, 2013, bank statement was not reconciled until July 30, 2013. The bank statements for periods ending July through December 2013 for this same ward were not reconciled until January 19, 2014.

- The November 7, 2013, bank statement for another ward was not reconciled until January 19, 2014.

- The bank reconciliations for the May 20, June 20, and August 20, 2013, bank statements were not reconciled until October 16, 2013, for a third ward. No documentation was retained to indicate the bank reconciliation for the July 20, 2013, bank statement was completed. The reconciliation for the November 21, 2013, bank statement was not completed until January 21, 2014.

Monthly bank reconciliations are necessary to ensure the bank activity and accounting records are in agreement, and to identify errors timely.

1.4 Annual settlements

The Public Administrator does not always file annual settlements timely in compliance with state law, and assets purchased during the annual settlement period did not appear on the asset list section of the annual settlement.

Timely filing

Annual settlements were not filed for some wards with the court for up to 4 years. The Public Administrator is scheduled to submit most annual settlements at December 31. Due to the Public Administrator's planned resignation in February 2014, the Associate Circuit Judge agreed to allow the Public Administrator to file final settlements for the 14 months ending in February 2014, for all of her open cases. However, some of the settlements submitted were for longer than 14 months. Annual settlements filed in February 2014 included a settlement for the period December 29, 2009, through February 9, 2014; one settlement was from December 16, 2011, through February 18, 2014; and another settlement was from December 22, 2011, through February 24, 2014. Also, another settlement filed on February 11, 2014, was for the period of December 20, 2011, to December 20, 2012, and a subsequent settlement for the period of December 20, 2012, to February 21, 2014, was filed for this ward on March 10, 2014.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Timely settlements are necessary for the court to properly oversee the administration of cases and reduce the possibility that loss, theft, or misuse of funds will go undetected.

Ward assets

The assets included in the wards' annual settlements were not accurate. Examples of assets excluded from the annual settlements include $3,000 of tools and equipment, automobiles, and a burial plan.

To ensure the financial activity of the wards is accurately and completely reported to the court, all assets should be reflected on the annual settlements.

Probate Division review

The Associate Circuit Court, Probate Division review of annual settlements filed by the Public Administrator did not detect any of the issues identified above. In addition, the Associate Circuit Court, Probate Division did not follow up on annual settlements not filed by the required date. Failure to adequately review settlements and ensure they are filed timely increases the risk that loss, theft, or misuse of funds could go undetected.

1.5 Closing estates

The Public Administrator did not take timely action to close the estates of deceased wards.

Court records indicate a final settlement was not filed for one ward who passed away in October 2003. Due to litigation involving the estate, the estate was not ready to be finally settled until March 2007. An interim settlement was filed in March 2007, indicating the remaining assets of the estate totaled approximately $37,000. A judicial order was entered at that time to disburse the remaining assets of the estate, close the estate's bank accounts, and to close the estate after the filing of the final documents and reports. Although the assets were distributed and the bank accounts closed, the final settlement was not filed and the case remained open. After we asked about this case remaining open almost 7 years after the last activity, the court administratively closed the case in March 2014, even though a final settlement was never filed by the Public Administrator.

Court and Public Administrator records indicate the Public Administrator is responsible for at least six other cases in which the ward is deceased. These cases should all be reviewed to determine if the case is active or should be closed.

Recommendations

The Public Administrator:

1.1 Support disbursements with adequate documentation, monitor financial activity to ensure sufficient funds are available for disbursements to avoid unnecessary bank charges, and make rent payments timely.

1.2 Retain adequate documentation for each ward.

1.3 Prepare bank reconciliations on a monthly basis for all accounts.

1.4 File annual settlements timely. The Public Administrator should also ensure annual settlements are complete and accurate. In addition, the Associate Circuit Court, Probate Division should establish procedures to ensure annual settlements filed with the court are submitted timely and review the settlements appropriately.

1.5 Ensure estates pertaining to deceased individuals are closed timely.

Auditee's Response

The Public Administrator provided the following responses:

The current Public Administrator agrees with the recommendations. The current Public Administrator took office in March 2014 and took over the bank accounts of wards on March 25, 2014. Since this date, steps have been taken to implement each recommendation as detailed below.

1.1 This recommendation has been fully implemented.

1.2 Documentation is currently being maintained for the wards under the current Public Administrator's care.

1.3 Monthly bank reconciliations are being prepared for the wards under the current Public Administrator's care.

1.4 The current Public Administrator plans to file complete and accurate annual settlements when they are due.

1.5 These estates were not turned over to the current Public Administrator. The Associate Circuit Judge, Probate Division, is working to ensure the closure of these cases. However, the current Public Administrator is taking action to close out three cases for wards that have passed away since she took office.

The Circuit Clerk provided the following response:

1.4 An additional employee has recently been hired to help with the workload in the Probate Division. The staff in the Probate Division will work with the Public Administrator to identify the dates each settlement is due and will monitor this in the future.

2. Sheriff Controls and Procedures

Procedures related to receipts and deposits need improvement. Sheriff's office personnel do not prepare monthly lists of liabilities to reconcile to the available cash balances.

Sheriff fee receipts totaled approximately $187,000 and inmate commissary receipts totaled approximately $60,000 during the year ended December 31, 2013.

2.1 Receipting and depositing

Sheriff's office personnel do not deposit fee receipts intact or timely. A deposit on January 2, 2014, included receipts from December 18 and 19, 2013, which should have been included in an earlier deposit made on December 27, 2013. In addition, checks for inmate commissary accounts are not restrictively endorsed immediately upon receipt.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. To adequately safeguard receipts and reduce this risk, procedures should ensure all receipts are deposited in a timely manner.

2.2 Liabilities

Sheriff's office personnel do not prepare a monthly list of liabilities to reconcile to the cash balance for the Sheriff's fee account. At our request, a list of liabilities was prepared as of March 31, 2014, which totaled $14,372. The March 31, 2014, reconciled book balance of $14,658 exceeded the list of liabilities by $286. The Sheriff's office was unable to determine to whom the excess funds were owed.

To ensure records are in balance, identify errors timely, and ensure sufficient cash is available for payment of amounts due; liabilities should be identified monthly and reconciled to cash balances. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed. Various statutory provisions address the disposal of unidentified monies.

Similar conditions previously reported

Similar conditions were noted in our prior audit report.

Recommendations

The Sheriff:

2.1 Ensure receipts are deposited intact and timely. In addition, the Sheriff should ensure checks are restrictively endorsed immediately upon receipt.

2.2 Ensure a list of liabilities is prepared monthly and compared to the available cash balance. Differences should be promptly investigated. After sufficient efforts are made to resolve discrepancies, any remaining unidentified monies should be disposed of in accordance with state law.

Auditee's Response

The Sheriff provided the following responses:

2.1 The Sheriff agrees with the recommendation. These errors occurred as the result of staff turnover and temporary staff performing these duties. Staff has been made aware of proper receipting and

depositing procedures and the recommendation has been implemented.

2.2 The Sheriff agrees with the recommendation and has begun preparing a monthly list of liabilities to compare to the cash balance. The Sheriff will work with the County Treasurer to determine the proper disposition of the remaining unidentified monies, in accordance with state law.

3. Prosecuting Attorney Receipt Procedures

The Prosecuting Attorney does not have adequate controls over receipts. During the year ended December 31, 2013, the Prosecuting Attorney's office receipted approximately $149,000 for bad check and court-ordered restitution monies. The Prosecuting Attorney also handles amended tickets, but does not maintain a record of these monies.

The Prosecuting Attorney does not issue receipts for some monies received. Individuals charged with certain moving violations are allowed to plead their case to a non-moving violation in return for paying a higher fine. The Prosecuting Attorney receives these fines and court costs payments and transmits the fines and court costs to the court with the amended ticket. The Prosecuting Attorney does not issue a receipt slip to the individual who submitted the plea, nor does the Prosecuting Attorney obtain a receipt from the court documenting the amount of fines and court costs transmitted. Instead the court issues a receipt slip (typically by mail) directly to the individual who made the payment. As a result, the Prosecuting Attorney has no documentation of the amount received from the defendant or transmitted to the court. In addition, money orders received for bad check and court-ordered restitution are not always restrictively endorsed immediately upon receipt.

Failure to implement adequate receipting and transmitting procedures increases the risk that loss, theft, or misuse of monies received will go undetected. To adequately safeguard receipts and reduce this risk, procedures should ensure receipt slips are written for all monies received and all receipts are restrictively endorsed upon receipt.

Recommendation

The Prosecuting Attorney should issue receipt slips for all monies received and ensure that all receipts are restrictively endorsed upon receipt.

Auditee's Response

The Prosecuting Attorney provided the following response:

The Prosecuting Attorney agrees with the recommendation and has implemented procedures to correct these concerns.

4. Computer Controls

Controls over county computers are not sufficient to prevent unauthorized access by requiring password changes and restricting logon attempts. As a

result, county records are not adequately protected and are susceptible to unauthorized access.

4.1 Password controls

The County Commission has not established adequate password controls to reduce the risk of unauthorized access to computers and data. Passwords are not required to be changed on a periodic basis.

Passwords are required to authenticate access to computers. The security of a computer password is dependent upon keeping passwords confidential. However, since passwords do not have to be periodically changed, there is less assurance passwords are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

4.2 Security controls

Security controls are not in place to lock a computer after a specified number of incorrect logon attempts. Logon attempt controls lock the capability to access a computer after a specified number of consecutive invalid logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendations

The County Commission:

4.1 Require unique passwords for each employee that are confidential and periodically changed to prevent unauthorized access to the county's computers and data.

4.2 Require each county computer to have security controls in place to lock the computer after a specified number of incorrect logon attempts.

Auditee's Response

The County Commission provided the following response:

The county has contacted our computer service provider and is in the process of correcting these issues.

5. Property Tax System

As similarly noted in our prior 2 audit reports, neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector, who processed property tax monies of approximately $15.2 million during the year ended February 28, 2014.

The County Clerk does not maintain an account book or other records summarizing property tax transactions and changes. In addition, no evidence was provided to indicate procedures are performed by the County Clerk or the County Commission to verify the County Collector's annual settlements. As a result, errors and irregularities could go undetected and there is an increased risk of loss, theft, or misuse of property tax monies going undetected.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. An account book or other records that summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector are accounted for properly and could also be used by the County Clerk and County Commission to verify the County Collector's annual settlements. Such procedures are intended to establish some checks and balances related to the collection of property taxes.

Recommendation

The County Clerk maintain a complete and accurate account book with the County Collector. In addition, the County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

Auditee's Response

The County Clerk and County Commission provided the following response:

The County Clerk agrees with the recommendation and now has the ability to obtain reports from the property tax system, which she is using as her account book. The County Clerk is using these reports to ensure the accuracy and completeness of the monthly reports of collections and disbursements submitted by the County Collector and to ensure property tax additions and abatements made by the County Collector were approved by the County Commission. The County Clerk and County Commission will review monthly changes to tax records for accuracy and completeness. The County Clerk plans to use these monthly reports to review the accuracy and completeness of the County Collector's annual settlement.

Andrew County
Organization and Statistical Information

Andrew County is a county-organized, third-class county. The county seat is Savannah.

Andrew County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 66 full-time employees and 19 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board, the Senior Citizen Services Board, and five neighborhood improvement districts.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Larry L. Atkins, Presiding Commissioner	$	29,870
Greg Wall, Associate Commissioner (1)		7,503
John Rotterman, Associate Commissioner (1)		17,151
Darryl Howard, Associate Commissioner		27,870
Rosa Lea Lancey, Recorder of Deeds		41,500
Cyndee Merritt, County Clerk		41,980
Steven Stevenson, Prosecuting Attorney		51,480
Bryan Atkins, Sheriff		46,480
Cindy Esely, County Treasurer		41,980
Douglas Johnson, County Coroner		14,480
Karen Keller, Public Administrator		20,000
Phillip Rogers, County Collector (2), year ended February 28,	46,124	
Ronald Christmas, County Assessor, year ended August 31,		41,980
F. Shane Terhune, County Surveyor (3)		

(1) John Rotterman served until July 2013. Greg Wall was appointed by the Governor in September 2013 to serve until January 2015.
(2) Includes $4,144 of commissions earned for collecting city property taxes.
(3) Compensation on a fee basis.

Financing Arrangements

The county entered into a lease contract with the Andrew County Public Benefit Corporation (ACPBC) in September 2011. The terms of the contract call for the ACPBC to provide funding for the construction of a Sheriff's office and jail facility and for the county to lease the facility from the ACPBC for lease payments equal to the amount due to retire the ACPBC's indebtedness and administrative costs. To fund construction of the facility, the ACPBC obtained two loans from the United States Department of Agriculture totaling $5.9 million in September 2011. Construction was completed in November 2012. The remaining principal outstanding at December 31, 2013, was $5,765,930. Interest remaining to be paid over the life of the agreement totals $5,431,343.

The county has 5 Neighborhood Improvement Districts. The county issued general obligation bonds to finance the projects and levied special assessments on property located in the districts to pay the debt principal and interest. As of December 31, 2013, the bonds had been paid off for 1 of the 5 districts. The remaining principal outstanding for the bonds of the other 4 districts as of December 31, 2013, was $252,000. Interest remaining to be paid over the life of the agreements totals $66,095.

Thomas A. Schweich

Missouri State Auditor

Gasconade County

September 2014

Report No. 2014-081

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Gasconade County

Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney's office lacks procedures to ensure restitution collected by the office for certain court cases is forwarded to the Circuit Clerk's office. The Prosecuting Attorney's office deposited and disbursed a receipt that should have been forwarded to the Circuit Clerk's office and did not notify the Circuit Clerk's office of the receipt causing that office's restitution balance on the case to be inaccurate. As similarly noted in our prior audit report, receipt slips are not issued immediately for some monies received. In addition, the Prosecuting Attorney's office did not always timely deposit receipts.
Sheriff Controls and Procedures	The Sheriff does not review fuel usage logs for reasonableness, and the logs are not used to reconcile to fuel purchased, making it difficult to ensure vehicles are properly utilized, vendors are not paid for improper amounts, and fuel is not stolen or misused.
Public Administrator's Annual Settlements	The Public Administrator does not timely file annual settlements, and 19 of the 23 (83 percent) settlements we reviewed were filed after the due date, including one settlement that was filed approximately 10 months after the due date.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 7

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Gasconade County

We have audited certain operations of Gasconade County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Gasconade County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Gasconade County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Robyn Vogt, M.Acct., CPA
In-Charge Auditor:	Tina Disney, M.Acct.
Audit Staff:	Erica Schroer, MBA
	Dustin T. Davis

1. Prosecuting Attorney Controls and Procedures

Improvement is needed over accounting controls and procedures in the Prosecuting Attorney's office. The Prosecuting Attorney's office collected bad check restitution and fees and court-ordered restitution totaling approximately $135,000 for the year ended December 31, 2013.

1.1 Restitution

Procedures are not adequate to ensure restitution collected by the Prosecuting Attorney's office for certain court cases is forwarded to the Circuit Clerk's office. Per discussions with both offices, the Circuit Clerk's office should collect restitution on court cases filed prior to 2010, and the Prosecuting Attorney's office should collect restitution on court cases filed in 2010 and after. If payments are made to the Prosecuting Attorney's office in error on court cases filed prior to 2010, these payments are to be forwarded to the Circuit Clerk's office for processing.

Our review of 10 restitution receipts collected by the Prosecuting Attorney's office identified a $220 payment in June 2013, on a case filed prior to 2010. This receipt was deposited and disbursed by the Prosecuting Attorney's office in error, when the receipt should have been forwarded to the Circuit Clerk's office. In addition, the Prosecuting Attorney's office did not notify the Circuit Clerk's office about this payment causing that office's restitution balance on the case to be inaccurate. After we discussed this issue with the Circuit Clerk's office, the restitution balance was corrected.

The Prosecuting Attorney should work with the Circuit Clerk to ensure the proper amounts are collected on restitution court cases, and to ensure all restitution collected by the Prosecuting Attorney's office on court cases filed prior to 2010 is forwarded to the Circuit Clerk's office.

1.2 Receipting and depositing

As similarly noted in our prior audit report, receipt slips are not issued immediately for some monies received. In addition, monies received are not always timely deposited. For example, a $134 receipt was deposited into the Prosecuting Attorney's bank account on November 27, 2013; however, a receipt slip for these monies was not issued until December 3, 2013. Additionally, receipts collected between December 4 and December 9, 2013, totaling $301, were not deposited until December 16, 2013, and receipts collected on December 19 and December 20, 2013, totaling $470, were not deposited until December 31, 2013.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

Recommendations

The Prosecuting Attorney:

1.1 Work with the Circuit Clerk's office to ensure restitution amounts are properly recorded and processed. Any restitution collected on court cases filed prior to 2010 should be forwarded to the Circuit Clerk's office for processing.

1.2 Issue receipt slips for all monies received immediately upon receipt, and timely deposit all monies received.

Auditee's Response

The Prosecuting Attorney provided the following responses:

1.1 We will work with the Circuit Clerk's office to ensure all restitution is properly recorded and processed. All restitution on cases prior to 2010 will be closed out by the Circuit Clerk's office.

1.2 For individuals who bring monies to the office, we will issue receipt slips immediately upon receipt. For monies mailed in, we will issue receipt slips within 24 hours. Also, we will ensure monies are deposited at least weekly, if not more often depending on the amount of monies on hand.

2. Sheriff Controls and Procedures

The Sheriff does not review fuel usage logs for reasonableness and the logs are not used to reconcile to fuel purchased. The Sheriff's office spent approximately $66,000 for fuel during the year ended December 31, 2013, for the 24 Sheriff's office vehicles.

Procedures for maintaining and reviewing fuel usage logs and reconciling the information to fuel purchased and related records are necessary to ensure vehicles are properly utilized, prevent paying vendors for improper amounts, and decrease the risk of theft or misuse of fuel occurring without detection. Logs should provide sufficient details to enable the Sheriff to effectively monitor vehicle fuel costs.

Recommendation

The Sheriff establish procedures to maintain adequate records to effectively monitor vehicle and fuel use. In addition, fuel use should be reconciled to fuel purchases, and any significant discrepancies should be investigated.

Auditee's Response

The Sheriff provided the following written response:

Effective June 2014, each deputy now keeps a fuel record (log) and turns this log into the Sheriff's office every 28 days. The Sheriff can now total the number of gallons used each 28 day period and compare it to the fuel bills received from our supplier. (The supplier fills the bulk fuel tank every 10 days at the Sheriff's office sub-station.) Any fuel charged on a credit card is kept track of separately by gallons used. The Sheriff's office is also looking

into installing a camera to monitor all vehicles that use the gas pump at our sub-station, providing it is cost effective.

3. Public Administrator's Annual Settlements

The Public Administrator does not timely file annual settlements. We reviewed settlements filed for 23 of the 41 wards or estates and noted annual and final settlements for 19 of the 23 wards or estates were filed after the Probate Clerk's due date, including one final settlement that was filed approximately 10 months after the due date. The Probate Clerk sends a past due notice to the Public Administrator after a settlement is a month past due. Despite this procedure, settlements have been filed late.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Timely settlements are necessary for the court to properly oversee the administration of cases and reduce the possibility that loss, theft, or misuse of funds will go undetected.

Recommendation

The Public Administrator ensure annual settlements are filed timely.

Auditee's Response

The Public Administrator provided the following written response:

Though the findings of the auditors are true, I have found that meeting the physical needs of the individuals I serve must be a priority. Both the paperwork and the individual are important. These people (35+) that Gasconade County serves are often without friends or family. I find that the responsibilities of caring for them consumes some of the time necessary for making reports. The County Commissioners have allowed this office to have part-time assistance. We hope that working together we will be able to catch up the annual reports and provide them in a timely manner without sacrificing the personal needs of the wards entrusted to my care.

Gasconade County
Organization and Statistical Information

Gasconade County is a county-organized, third-class county. The county seat is Hermann.

Gasconade County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 49 full-time employees and 14 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board and the Community Mental Health Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Nicholas H. Baxter, Presiding Commissioner	$	29,390
Larry Miskel, Associate Commissioner		27,390
Jerry D. Lairmore, Associate Commissioner		27,390
Joyce Gabathuler, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Lesa Lietzow, County Clerk		41,500
Ada Brehe-Kreuger, Prosecuting Attorney		51,000
Randy Esphorst, Sheriff		46,000
Joey R. Gross, County Treasurer		41,500
Benjamin D. Grosse, County Coroner		14,000
Fay Owsley, Public Administrator		25,000
Shawn Schlottach, County Collector (2), year ended February 28,	51,714	
Joseph M. Mundwiller, County Assessor, year ended August 31,		41,500
Paul Dopuch, County Surveyor (3)		3,000

(1) Compensation is paid by the state.
(2) Includes $10,214 of commissions earned for collecting city property taxes.
(3) Compensation on a fee basis.

Financing Arrangements

The county has entered into a lease-purchase agreement for vehicles for the Sheriff's office. Principal and interest payments are made from the Sheriff's

Law Enforcement Civil Fee Fund. The final payment for the lease-purchase is scheduled to occur in 2016. The remaining principal outstanding at December 31, 2013, was $42,999. Interest remaining to be paid over the life of the agreement totals $3,442.

The county has entered into a lease-purchase agreement for vehicles for the Sheriff's office. Principal and interest payments are made from the General Revenue Fund. The final payment for the lease-purchase is scheduled to occur in 2014. The remaining principal outstanding at December 31, 2013, was $18,727. Interest remaining to be paid over the life of the agreement totals $584.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Iron County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Iron County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Daniel Jones & Associates, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission
The County of Iron, Missouri

Report on the Financial Statements

We have audited the accompanying financial statements of the County of Iron ("County"), Missouri, which comprise cash and unencumbered cash for each fund as of December 31, 2013, and 2012, and the related statements of cash receipts and disbursements and disbursements-budget and actual for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the regulatory basis of accounting, a financial reporting framework prescribed or permitted by Missouri law as described in Note I of the accompanying financial statements. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note I of the financial statements, the financial statements are prepared on the basis of the financial reporting provisions prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of Missouri.

The effects on the financial statements of the variances between the regulatory basis of accounting described in Note I and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of each fund of the County as of December 31, 2013, and 2012, or changes in financial position or cash flows thereof for the years then ended.

Basis for Qualified Opinion on Regulatory Basis of Accounting

The Senate Bill 40 Board was unable to provide bank reconciliations and some bank statements for their accounts. Because of this, we were unable to determine the book or bank cash balance. Since we were unable to determine the cash balance of the Senate Bill 40 accounts, we used the balances from their budget reports for the years ended December 31, 2013, and December 31, 2012, respectively.

Qualified Opinion on Regulatory Basis of Accounting

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion on Regulatory Basis of Accounting paragraph, the financial statements referred to above present fairly, in all material respects, the cash and unencumbered cash of each fund of the County as of December 31, 2013, and 2012, and their respective cash receipts and disbursements, and budgetary results for the years then ended in accordance with the financial reporting provisions prescribed or permitted by Missouri law described in Note I.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 26, 2014, on our consideration of the County of Iron's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering County of Iron's internal control over financial reporting and compliance.

The accompanying notes to the financial statements are an integral part of this financial statement.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The County of Iron, Missouri ("County"), which is governed by a three-member board of commissioners, was established in 1857 by an Act of the Missouri Territory. In addition to the three Commissioners, there are ten elected Constitutional Officers: County Clerk, Collector, Treasurer, Sheriff, Assessor, Coroner, Circuit Clerk, Recorder of Deeds, Public Administrator and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

A. Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of the County.

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, transportation, economic development, and social and recreation services.

The financial statements referred to above include only the primary government of the County of Iron, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that comprise the County's legal entity.

B. Basis of Presentation

The financial statements are presented using accounting practices prescribed or permitted by Missouri law, which include a Statement of Receipts, Disbursements and Changes in Cash and Investment Balances – All Governmental Funds, a Comparative Statement of Receipts and Disbursements – Budget and Actual – All Governmental Funds, and a Statement of Assets and Liabilities Arising from Cash Transactions – Agency Funds.

Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts. The following fund types are used by the County:

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Basis of Presentation (concluded)

Governmental Fund Types

Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds. The measurement focus is upon determination of and changes in financial position rather than upon net income.

Fiduciary Fund Types

Agency – Agency funds are used to account for assets held by the County in a trustee capacity as an agent of individuals, private organizations, other funds or other governmental units. Agency funds are accounted for and reported similarly to the governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. These funds account for activities of collections for other taxing units by the Collector of Revenue and other officeholders.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements.

The financial statements are prepared on the regulatory basis of accounting. This basis of accounting recognizes amounts when received or disbursed in cash and differs from accounting principles generally accepted in the United States of America. Those principles require revenues to be recognized when they become available and measurable when they are earned, and expenditures or expenses to be recognized when the related liabilities are incurred.

As a result of using this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financial statements would be presented on the accrual basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

D. Budget and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County adopts a budget for each governmental fund.

2. On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures. Section 50.740 RSMo prohibits expenditures in excess of the approved budgets.

4. A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

5. Prior to February 1, the budget is legally enacted by a vote of the County Commission.

6. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget information in the financial statements.

   Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

7. Budgets are prepared and adopted on the cash basis of accounting.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)

E. Property Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within the County's boundaries for the calendar years 2013 and 2012, for purposes of taxation was:

	2013	2012
Real Estate	$ 140,413,480	$ 124,904,210
Personal Property	34,469,480	31,268,720
Railroad and Utilities	36,670,950	33,958,882
	$ 211,553,910	$ 190,131,812

The County Commission approved a $0.3623 and $0.3849 tax levy per $100 of assessed valuation of tangible taxable property for the calendar years 2013 and 2012, for purpose of County taxation, as follows:

	2013	2012
General Revenue Fund	$ .2777	$ .2950
Senate Bill 40 Fund	.0846	.0899
	$ .3623	$ .3849

F. Cash

The County pools cash resources of various funds in the County Treasurer's office in order to facilitate the management of cash. Cash applicable to a particular fund is readily identifiable. Some county offices also hold cash in their own separate bank accounts as required by state statute. The balance in the pooled cash account is available to meet current operating requirements. Details of these cash balances are presented in Note II.

G. Interfund Transactions

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables, if applicable, are eliminated due to reporting the financial statements on the regulatory basis of accounting.

Legally required transfers are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund.

II. CASH

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund type's portion of this pool is displayed as "Cash" under each fund's caption.

Deposits with maturities greater than three months are considered investments. In addition, cash is separately held by several of the County's funds.

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013, and 2012, the carrying amounts of the County's deposits were $1,070,582.30 and $814,808.48, and the bank balances were $4,270,719.25 and $2,565,834.73, respectively. As of December 31, 2013, and 2012, the County's deposits were properly pledged by FDIC insurance and pledged securities.

SUMMARY OF CARRYING VALUES

Carrying values of deposits shown above are included in the financial statements at December 31, 2013, as follows:

Included in the following fund financial statement captions:	
Statements of Receipts, Disbursements and Changes in Cash – Governmental Funds:	
Deposits	$ 1,070,582.30
Total Governmental Funds	1,070,582.30
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:	
Deposits	9,220,152.29
Total Agency Funds	9,220,152.29
Total Deposits as of December 31, 2013	$ 10,290,734.59

The carrying values of deposits at December 31, 2012, are as follows:

Included in the following fund financial statement captions:	
Statements of Receipts, Disbursements and Changes in Cash – Governmental Funds:	
Deposits	$ 814,808.48
Total Governmental Funds	814,808.48
Statement of Assets and Liabilities Arising From Cash Transactions – Agency Funds:	
Deposits	7,190,044.78
Total Agency Funds	7,190,044.78
Total Deposits as of December 31, 2012	$ 8,004,853.26

II. CASH (concluded)

Custodial Credit Risk – Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The County's investment policy does not include custodial credit risk requirements. The County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013, and 2012.

Custodial Credit Risk – Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party who sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments. All investments, evidenced by individual securities, are registered in the name of the County or of a type not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U.S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has no policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. The County's investments were not exposed to concentration of investment credit risk for the years ended December 31, 2013, and 2012.

III. CAPITAL LEASES

In 2010, the County entered into a capital lease agreement with Caterpillar Financial Services for a Backhoe and a Loader for $208,201. The lease expires April 23, 2015, with a nominal annual rate of 4.150%. Combined interest and principal payments are paid annually in the amount of $46,964.47.

In 2013, the County entered into a capital lease agreement with John Deere for two MotorGraders for $250,168. The lease expires January 2019 with a nominal annual rate of 1.884%. Combined interest and principal payments are paid annually in the amount of $52,949.92.

III. CAPITAL LEASES (continued)

In 2013, the County entered into a capital lease agreement with Diversified Lending Inc. for accounting software for $39,738. The lease expires February 2016 with an interest rate of 6.316%. Combined interest and principal payments are paid annually in the amount of $10,704.79.

The schedule of debt payments for capital leases are as follows:

2013

	Balance at December 31, 2012	Amount Borrowed	Amount Repaid	Balance at December 31, 2013	Interest Paid During Year
Backhoe and Loader	$ 129,962.30	$ -	$ 41,571.04	$ 88,391.26	$ 5,393.43
2 MotorGraders	-	250,168.00	-	250,168.00	-
Accounting Software	-	39,738.00	10,016.26	29,721.74	983.74
Totals	$ 129,962.30	$ 289,906.00	$ 51,587.30	$ 368,281.00	$ 6,377.17

2012

	Balance at December 31, 2011	Amount Borrowed	Amount Repaid	Balance at December 31, 2012	Interest Paid During Year
Backhoe and Loader	$ 169,876.87	$ -	$ 39,914.57	$ 129,962.30	$ 7,049.90
Totals	$ 169,876.87	$ -	$ 39,914.57	$ 129,962.30	$ 7,049.90

The schedule of future payments of capital leases of the County as of December 31, 2013, is as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2014	$ 53,529.21	$ 4,160.05	$ 57,689.26
2015	102,595.57	8,025.61	110,621.18
2016	59,159.44	4,495.27	63,654.71
2017	50,041.69	2,908.23	52,949.92
2018	50,992.90	1,957.02	52,949.92
2019	51,962.19	987.73	52,949.92
TOTALS	$ 368,281.00	$ 22,533.91	$ 390,814.91

III. CAPITAL LEASES (concluded)

The schedule of future payments of capital leases of the County as of December 31, 2012, is as follows:

Fiscal Year Ending December 31,	Principal	Interest	Total
2013	$ 41,571.04	$ 5,393.43	$ 46,964.47
2014	43,296.23	3,668.24	46,964.47
2015	45,095.03	1,871.44	46,966.47
TOTALS	$ 129,962.30	$ 10,933.11	$ 140,895.41

IV. LONG-TERM DEBT

In 2007, the County entered into an U.S. Department of Agriculture Rural Development loan with the USDA to finance the design, acquisition, and construction costs of a hospital building to be used by the County and the County Hospital Board with an original principal amount of $7,000,000. The interest rate on these loans was 4.125%. The building and the accompanying debt were released to the Hospital Board, making this loan paid in full.

In 2007, the County entered into an U.S. Department of Agriculture Rural Development loan with the USDA to finance the design, acquisition, and construction costs of a hospital building to be used by the County and the County Hospital Board with an original principal amount of $500,000. The interest rate on these loans was 4.125%. The building and the accompanying debt were released to the Hospital Board, making this loan paid in full.

Line of Credit – This line of credit can be used for whatever purpose the County sees fit. Currently, the line of credit is used to fund a portion of the General Revenue Fund expenditures until the tax revenue is received in the following January. The Line of Credit matures annually, but the line is renewed each year. The interest rate is variable according to the prime rate published in the Wall Street Journal. There is no future payment schedule required for this debt.

V. OPERATING LEASES

In 2013, the County Recorder entered into an operating lease agreement with General Electric Capital Corporation for the use of a copy machine. The term of the lease is 39 months ending March 2016 and consists of monthly payments. Payments of $1,788 were paid to General Electric Capital Corporation by the County during the year ended December 31, 2013.

The future payments of the operating lease as of December 31, 2013, is as follows:

Fiscal Year Ending December 31,	Payment
2014	$ 1,788.00
2015	1,788.00
2016	447.00
TOTAL	$ 4,023.00

VI. INTERFUND TRANSFERS

Transfers between funds for the years ended December 31, 2013, and 2012 are as follows:

	2013		2012	
	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue Fund	$ 65,000.00	$ 12,401.00	$ 80,000.00	$ 9,358.00
Special Road and Bridge Fund	-	65,000.00	-	80,000.00
Assessment Fund	12,401.00	-	9,358.00	-
Election Services Fund	-	-	3,767.98	-
Special Election Fund	-	-	-	3,767.98
TOTAL	$ 77,401.00	$ 77,401.00	$ 93,125.98	$ 93,125.98

Transfers are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Revenue Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

VII. COUNTY EMPLOYEES' RETIREMENT FUND (CERF)

A. Plan Description

CERF was established by an act of the Missouri General Assembly effective August 28, 1994. Laws governing the retirement fund are found in Sections 50.1000-50.1300 of the Missouri Revised Statutes (RSMo). The Board of Directors consists of 11 members, 9 of whom are county employee participants. Two members, who have no beneficiary interest in CERF, are appointed by the Governor of Missouri. The Board of Directors has the authority to adopt rules and regulations for administering the system.

CERF is a mandatory cost-sharing multiple employer retirement system for each county in the State of Missouri, except any City not within a county (which excludes the City of St. Louis) and counties of the first classification with a charter form of government. CERF covers county elective or appointive officers or employees whose position requires the actual performance of duties not less than 1,000 hours per year; including employees of circuit courts located in a first class, non-charter county which is not participating in the Local Government Employees Retirement System (LAGERS); and does not cover circuit clerks, deputy circuit clerks, county prosecuting attorneys, and county sheriffs. Until January 1, 2000, employees hired before January 1, 2000, could opt out of the system. CERF is a defined benefit plan providing retirement and death benefits to its members. All benefits vest after 8 years of creditable service. Employees who retire on or after age 62 are entitled to an allowance for life based on the form of payment selected. The normal form of payment is a single life annuity. Optional joint and survivor annuity and 10-year certain and life annuity payments are also offered to members in order to provide benefits to a named survivor annuitant after their death. Employees who have a minimum of 8 years of creditable service may retire with an early retirement benefit and receive a reduced allowance after attaining age 55. Annual cost-of-living adjustments, not to exceed 1%, are provided for eligible retirees and survivor annuitants, up to a lifetime maximum of 50% of the initial benefit which the member receives upon retirement. Benefit provisions are fixed by state statute and may be amended only by action of the Missouri Legislature. Administrative expenses for the operation of CERF are paid out of the funds of the system.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65101, or by calling 1-573-632-9203.

B. Contributions

Prior to January 1, 2003, participating county employees, except for those who participated in LAGERS, were required to make contributions equal to 2% of gross compensation. Effective January 1, 2003, participating county employees hired on or after February 25, 2002, are required to make contributions of 4% if they are in a LAGERS county and contributions of 6% if they are in a non-LAGERS county. If an employee leaves covered employment before attaining 8 years of creditable service, accumulated employee contributions are refunded to the employee.

The contribution rate is set by state statute and may be amended only by action of the Missouri Legislature. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of approximately $47,060.34 and $46,024.35, respectively, for the years then ended.

VIII. PROSECUTING ATTORNEY RETIREMENT FUND

In accordance with state statute Chapter 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed $2,244 and $2,244, respectively, for the years ended December 31, 2013, and 2012.

IX. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS)

A. Plan Description

Iron County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and governed by statute section RSMo. 70.600 - 70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling 1-800-447-4334.

B. Funding Status

Full-time employees of Iron County contribute 4% of their gross pay to the pension plan. The June 30th statutorily required contribution rates are 0.2% (General) and 0.2% (Police) of annual covered payroll. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for 2013 and 2012 were as follows:

	2013	2012
Annual required contribution	$ 2,325	$ 5,255
Interest on net pension obligation	0	0
Adjustment to annual required contribution	0	0
Annual pension cost	2,325	5,255
Actual contributions	2,325	5,255
Increase (decrease) in NPO	0	0
NPO beginning of year	0	0
NPO end of year	$ 0	$ 0

IX. LOCAL GOVERNMENT EMPLOYEES RETIREMENT SYSTEM (LAGERS) (continued)

C. Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

For 2013, the annual required contribution (ARC) was determined as part of the February 28, 2011, and February 29, 2012, annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013, included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011, was 15 years for the General division and 14 years for the Police division. The amortization period as of February 29, 2012, was 15 years for the General division and 16 years for the Police division.

For 2012, the annual required contribution (ARC) was determined as part of the February 28, 2010, and February 28, 2011, annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012, included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010, was 12 years for the General division and 8 years for the Police division. The amortization period as of February 28, 2011, was 15 years for the General division and 14 years for the Police division.

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011, annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

X. POST-EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County. There were 2 participants for COBRA at December 31, 2013, and 4 participants at December 31, 2012.

XI. CLAIMS, COMMITMENTS AND CONTINGENCIES

A. Litigation

The County is not currently involved in pending litigation as of the audit report date.

B. Compensated Absences

The County provides employees with annual leave. Each employee is entitled to five days annual leave after one year of employment, is entitled to ten days annual leave after two years of employment and fifteen days after ten years of employment. Annual leave may not be accumulated in excess of 30 days. Sick time is accrued at ½ day for each full month employed, which may accumulate up to 60 days. An employee is not reimbursed for unused sick time upon termination of employment. Employees are entitled up to three days leave for a death in the immediate family. These have not been subjected to auditing procedures.

C. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as inappropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

XII. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. Insurance is obtained from commercial insurance companies. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool, which is a corporate and political body created pursuant to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

XIII. SUBSEQUENT EVENTS

There are no subsequent events to report up to the date of the audit report.

SUPPLEMENTARY SCHEDULES AND AUDITOR'S REPORT

STATE COMPLIANCE SECTION

SCHEDULE OF STATE FINDINGS

I. For the year ended December 31, 2013, actual expenditures exceeded those budgeted in the Tax Maintenance Fund and Grants Fund.

II. For the year ended December 31, 2012, actual expenditures exceeded those budgeted in the Tax Maintenance Fund.

III. For the years ended December 31, 2013 and 2012, there was not a budget presented for the Special Election Fund.

INTERNAL CONTROL AND COMPLIANCE SECTION

CERTIFIED PUBLIC ACCOUNTANTS

MEMBERS OF
MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Independent Auditor's Report

To the County Commission
The County of Iron, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the County of Iron ("County") as of and for the years ended December 31, 2013, and 2012, and the related notes to the financial statements, which collectively comprise the County's basic financial statements, and have issued our report thereon dated June 26, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the County's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying schedule of findings and responses, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiency described in the accompanying schedule of findings and responses to be a material weakness. [FS 13/12-03]

3510 JEFFCO BOULEVARD • SUITE 200 • ARNOLD, MISSOURI 63010-3999 • 636-464-1330 • FAX 636-464-3076

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies described in the accompanying schedule of findings and responses to be significant deficiencies. [FS 13/12-01, FS 13/12-02]

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

The County's Response to Findings

The County's responses to the findings identified in our audit are described in the accompanying schedule of findings and responses. The County's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

I. FINANCIAL STATEMENT FINDINGS

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs, the County informed us that internal control documentation had not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Virginia Queen) will attempt to prepare the SAS 122 documentation for internal controls before the next audit period. The Clerk's office phone number is 573-546-2912.

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the County's walkthroughs, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs, the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

I. FINANCIAL STATEMENT FINDINGS (continued)

FS 13/12-02 Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Virginia Queen) will attempt to prepare the SAS 122 documentation for fraud risk assessment before the next audit period. The Clerk's office phone number is 573-546-2912.

FS 13/12-03 Criteria: Formal bank reconciliations must be prepared monthly on a timely basis by the Senate Bill 40's office, they must also keep track of all bank accounts and investments.

Condition: We noted that bank reconciliations were not being documented, though the general ledger was being reviewed and reconciled to the bank statements that were available, and that CD's were not being tracked or even known about at times. We noted that the Senate Bill 40 was missing bank statements and account information.

Context: This deficiency became apparent through our testing of the Senate Bill 40's cash accounts.

Effect: Errors may go undetected if proper controls are not in place to review cash transactions.

Cause: Management does not place adequate emphasis upon reviewing cash transactions and preparing accurate reconciliations.

Recommendation: We recommend that the Senate Bill 40 board prepare monthly bank reconciliations and adjustments to the cash accounts along with tracking all CD's and bank accounts. We also recommend obtaining and keeping all bank statement information.

Views of Responsible Officials and Planned Corrective Actions: This will be taken under advisement in the future. The Treasurer of the Senate Bill 40 Board is Joan Duncan and her office number is (573) 915-8979.

THE COUNTY OF IRON
IRONTON, MISSOURI
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS AND RESPONSES
YEARS ENDED DECEMBER 31, 2013 AND 2012

I. PRIOR YEAR FINANCIAL STATEMENT FINDINGS

There were no prior year audit findings related to internal control and compliance since there was not an audit performed for the prior audit period.

Daniel Jones
& Associates
CERTIFIED PUBLIC ACCOUNTANTS

MEMBERS OF
MISSOURI SOCIETY OF CPA'S
AMERICAN INSTITUTE OF CPA'S

June 26, 2014

To the Board of Commissioners
County of Iron

In planning and performing our audit of the regulatory based financial statements of the County of Iron (the "County") as of and for the years ended December 31, 2013, and December 31, 2012, in accordance with auditing standards generally accepted in the United States of America, we considered the County's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control. Accordingly, we do not express an opinion on the effectiveness of the County's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in the County's internal control to be material weaknesses as noted in section II.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the County's internal control to be significant deficiencies as noted in section I:

Our comments concerning internal control and other significant matters are presented as follows:

I. Deficiencies Considered to be Significant
II. Deficiency Considered to be a Material Weakness
III. Information Required by Professional Standards

The County's management has provided written responses to the findings in this report that were identified in our audit. These responses have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of the County Commission, County Office Holders, the Missouri State Auditor and federal agencies and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Daniel Jones & Associates

ARNOLD, MISSOURI

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT

FS 13/12-01 Criteria: Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit,* which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification,* considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs, the County informed us that internal control documentation had not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Virginia Queen) will attempt to prepare the SAS 122 documentation for internal controls before the next audit period. The Clerk's office phone number is 573-546-2912.

FS 13/12-02 Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the County's walkthroughs, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs, the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

.

I. DEFICIENCIES CONSIDERED TO BE SIGNIFICANT (concluded)

FS 13/12-02 Views of Responsible Officials and Planned Corrective Actions: The County Clerk (Virginia Queen) will attempt to prepare the SAS 122 documentation for fraud risk assessment before the next audit period. The Clerk's office phone number is 573-546-2912.

II. DEFICIENCY CONSIDERED TO BE A MATERIAL WEAKNESS

FS 13/12-03 Criteria: Formal bank reconciliations must be prepared monthly on a timely basis by the Senate Bill 40's office, they must also keep track of all bank accounts and investments.

Condition: We noted that bank reconciliations were not being documented, though the general ledger was being reviewed and reconciled to the bank statements that were available, and that CD's were not being tracked or even known about at times. We noted that the Senate Bill 40 was missing bank statements and account information.

Context: This deficiency became apparent through our testing of the Senate Bill 40's cash accounts.

Effect: Errors may go undetected if proper controls are not in place to review cash transactions.

Cause: Management does not place adequate emphasis upon reviewing cash transactions and preparing accurate reconciliations.

Recommendation: We recommend that the Senate Bill 40 board prepare monthly bank reconciliations and adjustments to the cash accounts along with tracking all CD's and bank accounts. We also recommend obtaining and keeping all bank statement information.

Views of Responsible Officials and Planned Corrective Actions: This will be taken under advisement in the future. The Treasurer of the Senate Bill 40 Board is Joan Duncan and her office number is (573) 915-8979.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS

Our Responsibilities under U.S. Generally Accepted Auditing Standards and *Government Auditing Standards*

Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards and *Government Auditing Standards*, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated June 2, 2014. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the County are described in Note I to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2013-2012 fiscal years. We noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (continued)

Significant Audit Findings (concluded)

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. Due to the County applying the regulatory basis of accounting, no estimates are made during the preparation of financial statements.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to each opinion unit's financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 26, 2014.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the County's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

III. INFORMATION REQUIRED BY PROFESSIONAL STANDARDS (concluded)

Other Matters

We were engaged to report on the schedule of state findings, schedule of findings and responses and the summary of prior year findings and responses, which accompany the financial statements but are not Required Supplementary Information. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

We noted during our audit certain matters that were not considered to be significant deficiencies or material weaknesses. Several county offices have limited numbers of staff which inherently increases the risk of misstatement. Office holders appear to have mitigating controls in place to lower these risks to an acceptable level but the commission does need to be aware of these risks and offices need to remain vigilant in deterring the potential for erroneous or fraudulent activity.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Adair County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Adair County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Adair County, Missouri

We have audited the accompanying financial statements of Adair County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Adair County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Adair County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Adair County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Matters

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Adair County, Missouri's basic financial statements. The schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is also not a required part of the basic financial statements.

The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 26, 2014, on our consideration of Adair County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Adair County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Adair County, Missouri, which is governed by a three-member board of commissioners, was established in 1841 by an Act of the Missouri Territory. In addition to the three Commissioners, there are ten elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator, and Prosecuting Attorney.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Adair County, Missouri.

Adair County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Adair County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Adair County's legal entity. The financial statements do not include financial data for the County's legally separate component unit, which accounting principles generally accepted in the United States of America, as applicable to the regulatory basis of accounting, require to be reported with the financial data of the County. The Adair County Senate Bill 40 Board has issued separately audited financial statements. For information on this component unit, please contact the Adair County Senate Bill 40 Board by calling (660) 665-9400 (or write to 1107 Country Club Drive, Kirksville, MO 63501).

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Adair County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Adair County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Adair County adopts a budget for each governmental fund.

On or before January 15th, each elected official and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for his or her office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year, as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The County did not prepare a budget for the Election Services Fund in 2013 and 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property included within Adair County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation, was:

	2013	2012
Real Estate	$ 184,256,870	$ 182,095,970
Personal Property	58,171,641	54,698,057
Railroad and Utilities	26,584,095	24,778,802
	$ 269,012,606	$ 261,572,829

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
Special Road and Bridge Fund	0.2752	0.2752

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Adair County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Adair County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013 and 2012, the carrying amount of Adair County's deposits was $3,777,197 and $3,438,782 and the bank balance was $5,019,029 and $4,576,505, respectively. As of December 31, 2013, 100% of Adair County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The carrying values of deposits and investments shown below are included in the financial statements at December 31, 2013, as follows:

Deposits	$ 3,777,197
Investments	-
Restricted Cash	-
Total Deposits and Investments as of December 31, 2013	$ 3,777,197

The carrying values of deposits and investments shown below are included in the financial statements at December 31, 2012, as follows:

Deposits	$ 3,438,782
Investments	-
Restricted Cash	-
Total Deposits and Investments as of December 31, 2012	$ 3,438,782

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Adair County's investment policy does include custodial credit risk requirements. Adair County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013 and 2012.

Note 2 - Deposits and Investments (continued)

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Adair County or its agent but not in the government's name. Adair County does have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Adair County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Adair County does have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by Adair County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Adair County has a policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. Adair County's deposits were not exposed to concentration of investment credit risk for the years ended December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue Fund	$ 6,325	$ 85,000	$ -	$ 50,000
Law Enforcement Services Fund	-	699,289	-	795,500
Law Enforcement General Fund	699,289	-	745,500	-
Assessment Fund	85,000	-	50,000	-
Emergency 911 Fund	-	-	50,000	-
Collector Tax Fund	-	6,325	-	-
Juvenile Justice Fund*	-	166,315	-	147,444
Juvenile Grant Operations Fund*	149,544	-	120,444	-
Prosecuting Attorney Administrative Fund	16,771	-	27,000	-
Total	$ 956,929	$ 956,929	$ 992,944	$ 992,944

* The auditors were not engaged to audit the Juvenile Justice Fund and the Juvenile Grant Operations Fund; therefore, these funds were not audited.

Note 4 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for county employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65102, or by calling 1-877-632-2373.

Funding Policy

In accordance with state statutes, the plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002, contribute 0% of their annual salary, while employees hired after February 2002 are required to contribute 4% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $30,551 and $30,448, respectively, for the years then ended.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS)

Plan Description

Adair County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multi-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and governed by statutes section RSMo 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling (800) 447-4334.

Funding Status

Full-time employees of Adair County do not contribute to the pension plan. The June 30th statutorily required contribution rates are 12.4% (General) and 14.5% (Police) of annual covered payroll for the year ended December 31, 2013. The June 30th statutorily required contribution rates are 12.8% (General) and 14.3% (Police) of annual covered payroll for the year ended December 31, 2012. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2013 was as follows:

	2013
Annual required contribution	$ 304,309
Interest on net pension obligation	-
Adjustment to required contribution	-
Annual pension cost	304,309
Actual contributions	304,309
Increase (decrease) in NPO	-
NPO beginning of year	-
NPO end of year	$ -

The annual required contribution (ARC) was determined as part of the February 28, 2011 and February 29, 2012 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011 was 16 years for the General division and 16 years for the police division. The amortization period of February 29, 2012 was 24 years for the General division and 17 years for the Police division.

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2011	$ 271,209	100.0%	$ -
2012	310,605	100.0%	-

* After benefit changes

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

Note 6 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Adair County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System. Once remitted, the State of Missouri is responsible for administration of this plan. Adair County has contributed $7,752 and $7,106, respectively, for the years ended December 31, 2013 and 2012.

Note 7 - Post-Employment Benefits

Adair County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Adair County.

Note 8 - Claims, Commitments and Contingencies

Litigation

Adair County is involved in pending litigation as of December 31, 2013. The extent of the liability, if any, cannot be determined at this time.

Compensated Absences

The County provides employees with up to five weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation and overtime, if applicable but not sick time. These have not been subjected to auditing procedures.

Note 8 - Claims, Commitments and Contingencies (continued)

Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Note 9 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Chapter 537.700 RSMo). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make specific assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Injured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

Note 10 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through June 26, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 11 - Long-Term Debt

During June of 2000, the County entered into a lease purchase agreement in the amount of $1,975,000 for a term of 20 years at an interest rate of 6.245% for the purpose of constructing a juvenile justice center. In June of 2011, the County amended the lease purchase agreement to obtain a lower interest rate of 3.900%. This amended lease purchase is for a term of nine years with an annual lease payment of $151,085 and one balloon payment of $75,000 at the end of the lease.

As of December 31, 2013, the unpaid principal balance of the lease purchase was $985,104. The future payments for the lease purchase agreement of the juvenile justice center are as follows:

Note 11 - Long-Term Debt (continued)

Balance 12/31/2012	Additions	Retirements	Balance 12/31/2013	Interest Paid
$ 1,096,356	$ -	$ 111,252	$ 985,104	$ 39,833

Year Ending December 31	Principal	Interest	Total
2014	$ 115,591	$ 35,494	$ 151,085
2015	120,099	30,986	151,085
2016	124,711	26,374	151,085
2017	129,646	21,439	151,085
2018	134,703	16,382	151,085
2019-2020	360,354	16,815	377,169
	$ 985,104	$ 147,490	$ 1,132,594

As of December 31, 2012, the unpaid principal balance of the lease purchase was $1,096,356. The future payments for the lease purchase agreement of the juvenile justice center are as follows:

Balance 12/31/2011	Additions	Retirements	Balance 12/31/2012	Interest Paid
$ 1,203,316	$ -	$ 106,960	$ 1,096,356	$ 44,125

Year Ending December 31	Principal	Interest	Total
2013	$ 111,252	$ 39,833	$ 151,085
2014	115,591	35,494	151,085
2015	120,099	30,986	151,085
2016	124,711	26,374	151,085
2017	129,646	21,439	151,085
2018-2020	495,057	33,197	528,254
	$ 1,096,356	$ 187,323	$ 1,283,679

Note 12 - Operating Leases

The County entered into an operating lease for the Public Defender's office as of June 1, 2010. This lease is effective from June 1, 2010, through May 31, 2017, with quarterly payments of $2,336. During the years ended December 31, 2013 and 2012, the County made payments totaling $9,344 and $9,344.

2013 Future Minimum Payments for Operating Lease:

Year Ending December 31	Amount
2014	$ 9,344
2015	9,344
2016	9,344
2017	4,672
	$ 32,704

Note 12 - Operating Leases (continued)

2012 Future Minimum Payments for Operating Lease:

Year Ending December 31	Amount
2013	$ 9,344
2014	9,344
2015	9,344
2016	9,344
2017	4,672
	$ 42,048

Note 13 - Prior Period Adjustment

January 1, 2012 cash has been restated to include the E-911 Emergency Fund and Election Services Fund, and to remove the Overplus Tax Fund, Unclaimed Fees Fund, Deputy Sheriff Supplemental Fund, Juvenile Justice Fund, and Juvenile Grant Operations Fund.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Adair County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Adair County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Adair County, Missouri's basic financial statements and have issued our report thereon dated June 26, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Adair County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Adair County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Adair County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify a deficiency in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be a significant deficiency: 13/12-2.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Adair County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an

opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and questioned costs as item 13/12-1.

Adair County, Missouri's Response to Findings

Adair County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. Adair County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133

To the County Commission and
Officeholders of Adair County, Missouri

Report on Compliance for Each Major Federal Program

We have audited Adair County, Missouri's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Adair County, Missouri's major federal programs for the years ended December 31, 2013 and 2012. Adair County, Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Adair County, Missouri's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Adair County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Adair County, Missouri's compliance.

Opinion on Each Major Federal Program

In our opinion, Adair County, Missouri, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the years ended December 31, 2013 and 2012.

Report on Internal Control Over Compliance

Management of Adair County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Adair County, Missouri's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing

an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Adair County, Missouri's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

Notes to Schedule of Expenditures of Federal Awards
For the years ended December 31, 2013 & 2012

Note 1 - Summary of Significant Accounting Policies

Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of *OMB Circular A-133*. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Adair County, Missouri.

Basis of Presentation

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented on the cash basis of accounting. The information in this schedule is presented in accordance with the requirements of *OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the financial statements.

Note 2 - Subrecipients

The County passed through $88,258 and $264,267 of federal funds related to the Edward Byrne Memorial Justice Assistance Grants and ARRA - Eward Byrne Memorial Justice Assistance Grant (CFDA# 16.738 & 16.803) to another agency for the years ended December 31, 2013 & 2012, respectively.

The County of Adair
Kirksville, Missouri

CFDA Number	Name of Federal Program or Cluster
20.205	Highway Planning and Construction

Dollar threshold used to distinguish between type A and type B programs:	$ 300,000			
Auditee qualified as low-risk auditee?		Yes	X	No

Section 2 - Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted the County did not prepare a budget for the Election Services Fund.

Effect: Missouri statutes require Counties to prepare an annual budget and expenditures are not to exceed the budget. Because the County did not prepare a budget in a fund, the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: The Adair County Clerk's office will take into consideration compiling a budget for the Election Services Fund.

13/12-2 ***Condition:*** During our audit, we noted the County was not recording all cash receipts in the proper period.

Effect: If cash receipts are not recorded in the proper period, revenue and ending cash/fund balance will be reported inaccurately in the financial statements.

Cause: The Treasurer was receipting ACH deposits in the wrong period, and was unaware of the effect on the financial statements.

Recommendation: We recommend that the County adopt a year-end closing process to ensure all revenue is being recorded in the proper period.

Management's Response: The Adair County Treasurer has always receipted ACH's when the bank statement is reconciled. This practice has always been accepted by the state auditor's office as we reflect those receipts in the following month and list each ACH as outstanding items on the monthly bank reconciliation reports and balance to the monthly bank statements. This information is received in the Treasurer's office after the end of the month and the Treasurer's office has always taken the stand that we will not back date or pre date any documents. Since this is our policy, we date the receipts when we have all the information through the bank statements to verify the ACH's and track down which fund they are to be deposited into and from which state agency that they were issued. Bank statements are provided to the county after the close of each month. As this method is acceptable by the state auditor's office we will continue to do so, but we will make every attempt to track down monies that are deposited in December and issue receipts before the last working day in December so those monies will be recorded in the same calendar year.

Section 3 - Federal Award Findings and Questioned Cost

None

The County of Adair
Kirksville, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Adair County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2011.

Prior Year Financial Statement Findings

FS 11/10-1 ***Criteria:*** Auditors may continue to assist clients with the preparation of the financial statements now and in the future. According to Statement on Auditing Standards (SAS) No. 115, which was amended by SAS No. 112, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, conditions necessitating the entity's auditor to provide such assistance is at least indicative of a significant deficiency.

Condition: During the current year, auditors of the County assisted with the preparation of the financial statements and the notes to financial statements.

Context: During the audit planning phase of the audit the client informed us that we would be preparing the audited financials.

Effect: Auditors may continue to assist clients with the preparation of the financial statements now and in the future. However, SAS 115 indicates that conditions necessitate the entity's auditor to provide such assistance is at least indicative of a significant deficiency in internal control over financial reporting.

Cause: The County did not prepare the appropriate documentation.

Recommendation: Due to the changing standards, the County may wish to consider alternatives available that would eliminate this situation.

Views of Responsible Officials and Planned Corrective Actions: The County will consider implementing corrective action in future years.

Status: Management has corrected this issue.

FS 11/10-2 ***Criteria:*** Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit, which is effective for periods ending on or after December 15, 2009, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During walkthroughs the County informed us that internal control documentation had not been prepared.

Effect: The new SAS 115 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Due to the short time frame for the implementation of the new SAS requirements, the County did not prepare the required documentation.

FS 11/10-2 (Cont.)

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of Responsible Officials and Planned Corrective Actions: The County has developed internal controls and accounting documentation to cover the Budget, Accounts Payable, Payroll, Receipts, General Ledger, Grant Procedures, Financial Statements, and a Risk Management Committee.

Status: Management has corrected this issue.

FS 11/10-3

Criteria: Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During the walkthroughs of the County, we noted there is no formal fraud risk assessment in place.

Context: During walkthroughs the County informed us that the necessary risk assessment documentation had not been prepared.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identified risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of Responsible Officials and Planned Corrective Actions: The County is in the process of implementing a Risk Management Committee.

Status: Management has corrected this issue.

FS 11/10-4 ***Criteria:*** Bank reconciliations must be prepared on a timely basis.

Condition: Bank reconciliations were not made available by the Prosecuting Attorney's office.

Context: During our testing of the Prosecuting Attorney's office we were not provided documentation that cash accounts were being accounted for and therefore reconciliation was not being performed.

Effect: Effective internal controls are not in place to deter misstatements from occurring in a timely manner.

Cause: The Prosecuting Attorney's office was unaware of the necessity of this activity being performed.

Recommendation: We recommend that the Prosecuting Attorney's office prepare a running report of the activity of their bank accounts as checks and deposits are written and received in order to prepare a meaningful and accurate reconciliation.

Views of Responsible Officials and Planned Corrective Actions: The Prosecuting Attorney's office disagrees with said finding. Our office does not accept cash under any circumstances. Furthermore, we provided the auditors with several documents outlining our procedures. Our office receives money orders and cashier checks daily. Each day, those payments are entered into our bad check/restitution system electronically. Deposits of those payments are made to victims of crimes. Each month as the bank statements are provided, both Dana Buster and myself reconcile the account statement from the bank, with the statement provided by our bad check/restitution program to monitor that all payments are being handled appropriately. We also review to see if there are any outstanding checks in the account that need to be followed up on. These monthly reconciliations along with all deposit slips, program receipts were provided to the auditors. However, they informed me this would be a finding because I do not maintain a separate ledger of these same items and because I cannot give them the account balance on any given day. I first have to say that I do not see the need to duplicate the efforts that we are already doing. Secondly, our office does not have the human resources to duplicate these efforts. We are strained to ensure that we have the proper checks in place and adding additional work, I fear, will create problems with our ability to complete the jobs we were elected to do. As to the daily balance issue, I recall talking with our auditor and asked if it was normal for a daily reconciliation to take place. He, Matt Norrid, indicated that daily is not normal, but monthly is. This is because it is unclear as to what checks have cleared for that day without going online and looking. Banks provide us a monthly statement. While I agree that a ledger will provide it all to the auditors in a neat little package, I will continue to disagree with their assessment that we are not reconciling nor did we provide them with the needed documents. I will not duplicate the work in our office unless the Adair County Commission finds a way to provide me with the necessary manpower to accomplish this work that needs to be completed that is not duplicative.

Status: Management has corrected this issue.

The County of Adair
Kirksville, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

Section 3 - Federal Award Findings and Questioned Cost

SA 11/10-1	Federal Grantor:	All Programs
	Pass-Through Grantor:	All Programs
	Federal CFDA Number:	All Programs
	Program Title:	All Programs

Information on the federal program: The Schedule of Expenditures of Federal Awards contained errors.

Criteria: OMB Circular A-133 requires the auditee to prepare the Schedule of Federal Expenditures and Awards.

Condition: Through auditing procedures, we were able to correct and support the amounts reported on the Schedule of Expenditures of Federal Awards (SEFA). Prior to these corrections, the Schedule of Expenditures of Federal Awards (SEFA) was prepared with incorrect financial information.

Questioned Costs: Not applicable

Context: During the audit of federal programs we discovered a number of errors related to the Schedule of Expenditures of Federal Awards (SEFA).

Effect: No control monitoring or control over federal expenditures reporting, as required by Governmental Accounting and Financial Reporting Standards.

Cause: Adequate emphasis was not placed on the preparation of the Schedule of Expenditures of Federal Awards (SEFA).

Recommendation: The County should implement procedures to ensure that the SEFA is prepared in accordance with federal requirements. The County should continue in its efforts to establish an accounting system that will capture grant transactions in a manner sufficient to readily report the necessary information required on the SEFA. The cost center listing that identifies federal expenditures should be defined and cross matched in a table that is updated monthly by a designee of the County Clerk's Office.

Views of responsible officials and planned corrective actions: The County will ensure that the Schedule of Expenditures of Federal Awards (SEFA) is correct.

Status: Management has corrected this issue.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Atchison County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Atchison County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

To the County Commission and
Officeholders of Atchison County, Missouri

We have audited the accompanying financial statements of Atchison County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Atchison County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Atchison County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Atchison County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated August 5, 2014, on our consideration of Atchison County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Atchison County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Organized in 1845, the county of Atchison was named after United States Senator, David Rice Atchison. Atchison County is a county-organized, third-class county, and the county seat is Rock Port. Atchison County's government is composed of a three-member county commission and the following separately elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk/Ex-Officio Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Atchison County, Missouri, the Atchison County Senior Citizens Service Board, and the Atchison County Senate Bill 40 Board.

Atchison County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Atchison County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Atchison County's legal entity. The Atchison County Senior Citizens Service Board and Senate Bill 40 Board are controlled by separate boards and are also included under the control of Atchison County.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Atchison County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Atchison County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Atchison County adopts a budget for each governmental fund.

On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget included estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The County did not prepare a budget for the Multi-Purpose Election Fund for 2013 and 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1, of the following year.

The assessed valuation of the tangible taxable property, included within Atchison County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation was as follows:

	2013	2012
Real Estate	$ 73,613,420	$ 72,971,122
Personal Property	31,168,535	29,695,059
Railroad and Utilities	18,503,095	15,376,034
	$ 123,285,050	$ 118,042,215

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
General Revenue Fund	$ 0.4984	$ 0.5000
Special Road and Bridge Fund	0.4984	0.5000
Senate Bill 40 Board Fund	0.0997	0.1000
Senior Citizens Service Fund	0.0498	0.0500

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Atchison County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Atchison County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. As of December 31, 2013, 100% of Atchison County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2013, as follows:

	Bank Balances	Carrying Value
Deposits	$ 1,996,168	$ 1,611,491
Investments	-	-
Restricted Cash	-	-
Total Deposits and Investments as of December 31, 2013	$ 1,996,168	$ 1,611,491

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2012, as follows:

	Bank Balances	Carrying Value
Deposits	$ 1,740,881	$ 1,879,354
Investments	-	-
Restricted Cash	-	-
Total Deposits and Investments as of December 31, 2012	$ 1,740,881	$ 1,879,354

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Atchison County's investment policy does not include custodial credit risk requirements. Atchison County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013, and 2012.

Note 2 - Deposits and Investments (continued)

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Atchison County or its agent but not in the government's name. Atchison County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Atchison County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Atchison County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of credit risk is required to be disclosed by Atchison County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Atchison County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. Atchison County's deposits were not exposed to concentration of investment credit risk for the years ended December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out

Note 4 - Missouri Local Government Employees Retirement System (LAGERS)

Plan Description

Atchison County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multi-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

LAGERS was created and governed by statutes section RSMo 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling (800) 447-4334.

Funding Status

Full-time employees of Atchison County do not contribute to the pension plan. The June 30th statutorily required contribution rates are 6.2% (General) and 0.2% (Police) of annual covered payroll for the year ended December 31, 2013. The June 30th statutorily required contribution rates are 5.2% (General) and 1.1% (Police) of annual covered payroll for the year ended December 31, 2012. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2013 was as follows:

	2013
Annual required contribution	$ 85,588
Interest on net pension obligation	622
Adjustment to required contribution	(655)
Annual pension cost	85,555
Actual contributions	76,944
Increase (decrease) in NPO	8,611
NPO beginning of year	8,581
NPO end of year	$ 17,192

Note 4 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The annual required contribution (ARC) was determined as part of the February 28, 2011 and February 29, 2012 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011 was 30 years for the General division and 15 years for the police division. The amortization period of February 29, 2012 was 19 years for the General division and 18 years for the Police division.

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2011	$ 50,101	100.0%	$ -
2012	72,110	88.1%	8,581
2013	85,555	89.9%	17,192

Required Supplementary Information - Schedule of Funding Progress

Actuarial Valuation Date	(a) Actuarial Value of Assets	(b) Entry Age Actuarial Accrued Liability	(b-a) Unfunded Accrued Liability (UAL)	(a/b) Funded Ratio	(c) Annual Covered Payroll	[(b-a)/c] UAL as a Percentage of Covered Payroll
2/28/2011	$ 1,962,369	$ 1,861,724	$ (100,645)	105%	$ 1,486,722	
2/29/2012	2,161,192	1,985,073	(176,119)	109%	1,459,140	
2/28/2013	2,463,462	2,178,278	(285,184)	113%	1,511,400	

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2012 was as follows:

	2012
Annual required contribution	$ 72,110
Interest on net pension obligation	-
Adjustment to required contribution	-
Annual pension cost	72,110
Actual contributions	63,529
Increase (decrease) in NPO	8,581
NPO beginning of year	-
NPO end of year	$ 8,581

Note 4 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

The annual required contribution (ARC) was determined as part of the February 28, 2010 and February 28, 2011 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010 was 1 year for the General division and 15 years for the police division. The amortization period of February 28, 2011 was 30 years for the General division and 15 years for the Police division.

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2010	$ 35,998	100.0%	$ -
2011	50,101	100.0%	-
2012	72,110	88.1%	8,581

Required Supplementary Information - Schedule of Funding Progress

Actuarial Valuation Date	(a) Actuarial Value of Assets	(b) Entry Age Actuarial Accrued Liability	(b-a) Unfunded Accrued Liability (UAL)	(a/b) Funded Ratio	(c) Annual Covered Payroll	[(b-a)/c] UAL as a Percentage of Covered Payroll
2/28/2010	$ 1,817,614	$ 1,682,152	$ (135,462)	108%	$ 1,458,113	
2/28/2011	1,962,369	1,861,724	(100,645)	105%	1,486,722	
2/29/2012	2,161,192	1,985,073	(176,119)	109%	1,459,140	

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

Note 5 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for county employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65102, or by calling 1-877-632-2373.

Funding Policy

In accordance with state statutes, the plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 contribute 0% of their annual salary, while employees hired after February 2002 are required to contribute 4% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $33,116 and $30,259, respectively, for the years then ended.

Note 6 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Atchison County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. Atchison County has contributed $2,244 and $2,244, respectively, for the years ended December 31, 2013 and 2012.

Note 7 - Post-Employment Benefits

Atchison County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Atchison County.

Note 8 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through August 5, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 9 - Claims, Commitments and Contingencies

Compensated Absences

The County provides employees with up to five weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation and overtime up to 30 days. The County provides sick leave to employees at an accrual rate of one day per month up to 180 days. Upon termination from county employment (minimum of 10 years service), an employee is reimbursed for one half of accrued sick leave up to 30 days. These have not been subjected to auditing procedures.

Federal and State Assisted Programs

The County receives proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned. Such audits could result in refund of grant monies to the grantor agencies. Management believes that any required refunds will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Landfill

The County owns a solid waste disposal area and is obligated in the amount of $389,628 to the Missouri Department of Natural Resources upon failure to close and/or provide post-closure care of the solid waste disposal area. At December 31, 2013, the County is not aware of any current obligation, however, any future obligations or liabilities related to the solid waste disposal area are unknown.

Note 10 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is also a member of the Missouri Association of Counties Self-Injured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to $2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

Note 11 - Long-Term Debt

In May of 2010, the County entered into a lease purchase agreement to finance the purchase of two 2010 John Deere 672G Motor Graders at a cost of $412,000. The agreement requires annual payments of $91,263 ending May 15, 2015, which includes interest of 3.45%.

Capital Lease Obligations	Balance December 31, 2012	Additions	Retirements	Balance December 31, 2013	Interest Paid
2010 John Deere Graders	$ 260,852	$ -	$ 83,972	$ 176,880	$ 7,291

Capital Lease Obligations	Balance December 31, 2011	Additions	Retirements	Balance December 31, 2012	Interest Paid
2010 John Deere Graders	$ 341,982	$ -	$ 81,130	$ 260,852	$ 10,133

The following is the 2013 future minimum payments for the operating lease:

Year Ending December 31,	Principal	Interest	Total
2014	$ 86,916	$ 4,347	$ 91,263
2015	89,964	1,299	91,263
	$ 176,880	$ 5,646	$ 182,526

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Atchison County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Atchison County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Atchison County, Missouri's basic financial statements and have issued our report thereon dated August 5, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Atchison County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Atchison County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Atchison County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and responses that we consider to be significant deficiencies: 13/12-2 and 13/12-3.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Atchison County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of

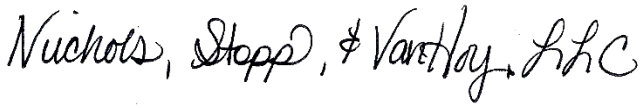
noncompliance or other matter that is required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and responses as item: 13/12-1.

Atchison County, Missouri's Response to Findings

Atchison County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and responses. Atchison County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.



Creve Coeur, Missouri
August 5, 2014

The County of Atchison
Rock Port, Missouri
Schedule of Findings Responses
For the years ended December 31, 2013 & 2012

Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted the County did not prepare a budget for the Multi-Purpose Election Fund for 2013 and 2012.

Effect: Missouri statutes require Counties to prepare an annual budget and expenditures are not to exceed the budget. Because the County did not prepare a budget in a fund, the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: The Multi-Purpose Election Fund is a pass through Fund used to track the revenue and expenditures for other political subdivisions election costs. This fund is within our general accounting detail and a budget is prepared with our software. It has not been shown in our state budget, because it was my understanding through prior audits that it did not need to be since it was not county funds. A budget will be prepared for this fund in the future.

13/12-2 ***Condition:*** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate fraud risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze, and manage these risks.

Management's Response: We do provide risk assessment annually during our budget process with each department and elected official; it has just not been documented in the minutes. We will provide documentation in written form in the future.

13/12-3 ***Condition:*** During our audit, we noted that the County prints and signs checks in the accounting software in order to initiate transfers between funds. These checks are signed by all authorized signatories for formal approval of interfund transfers, however, they remain in County possession and are never submitted to the bank for processing.

Effect: The County has several checks with proper authorization that have not been voided. There is a risk that any of these checks could be erroneously or fraudulently submitted to the bank for payment.

Cause: The County's process for interfund transfers does not include the actual deposit or voiding of the authorized checks.

Financial Statement Findings (continued)

13/12-3 (cont.) ***Recommendation:*** We recommend the County mark all checks generated for interfund transfers as voided to ensure they cannot be processed by the bank for any erroneous or fraudulent payment.

Management's Response: This is a process we have used for approval of interfund transfers for years. It leaves a better paper trail if any questions or concerns arise. We have already purchased a stamp that is used in place of the signatures. The stamp reads "VOID IN HOUSE CHECK".

The County of Atchison
Rock Port, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Atchison County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2009.

Prior Year Financial Statement Findings

09.1 ***Condition:*** The County has not adopted an investment policy as required by State Statutes. The County has no investments, however an investment policy addresses topics such as collateralization of deposits, strategy with respect to investment of public funds, and other areas, and thus such a policy would be beneficial and also required for the County. Section 110.270, RSMo 2007, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo 2007, requires political subdivisions with authority to invest in instruments other than depository accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation.

Recommendation: We recommend the County Commission adopt an investment policy and review compliance with this policy at least annually. Sample policies currently in place at other Missouri counties could be adopted to meet the County's requirements. Alternatively, guidelines for developing an investment policy may be found at organizations such as the Missouri State Auditor's Office, the Government Finance Officers' Association, which offers a publication entitled GFOA's New Model Investment Policy, and on the internet, where examples of investment policies for many counties may be found.

County Response: The County Commission will review policies in place at other Missouri counties and find one that can be adopted to meet the County's needs.

Auditor's Evaluation: The County's planned corrective action is responsive to the recommendation.

Status: Management has corrected this issue.

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Clinton County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Clinton County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

To the County Commission and
Officeholders of Clinton County, Missouri

We have audited the accompanying financial statements of Clinton County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Clinton County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Clinton County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Clinton County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated August 4, 2014, on our consideration of Clinton County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Clinton County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Organized in 1833, the county of Clinton was named after Governor DeWitt Clinton of New York. Clinton County is a county-organized, third-class county and is part of the Forty-Third Judicial Circuit. The county seat is Plattsburg. Clinton County's government is composed of a three-member county commission and the following separately elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk/Ex-Officio Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Clinton County, Missouri, and the Clinton County Senate Bill 40 Board.

Clinton County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Clinton County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Clinton County's legal entity. The Clinton County Senate Bill 40 Board is controlled by a separate board and is also included under the control of Clinton County.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Clinton County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Clinton County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Clinton County adopts a budget for each governmental fund.

On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget included estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The Recorder User Fee Fund had expenses exceeding budget for 2013 and 2012. Also, the County did not prepare a 2013 and 2012 budget for the Special Election Fund.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property included within Clinton County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation, was as follows:

	2013	2012
Real Estate	$ 196,934,890	$ 193,789,990
Personal Property	49,130,320	47,266,560
Railroad and Utilities	36,081,025	33,854,536
	$ 282,146,235	$ 274,911,086

Special Road and Bridge Fund assessed valuation was $184,719,955 and $179,102,451 for the calendar year 2013 and 2012, respectively.

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
General Revenue Fund	$ 0.2875	$ 0.2400
Special Road and Bridge Fund*	0.6246	0.6246
Senate Bill 40 Board Fund	0.0905	0.0905

* Special Road and Bridge Fund tax levy includes both the tax levy for Special Road and Bridge and Common Road District.

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Clinton County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Clinton County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013 and 2012, the carrying amount of Clinton County's deposits was $2,030,120 and $1,678,752 and the bank balance was $2,310,313 and $1,966,515, respectively. As of December 31, 2013, 100% of Clinton County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2013, as follows:

Deposits	$ 2,030,120
Investments	-
Restricted Cash	-
Total Deposits and Investments as of December 31, 2013	$ 2,030,120

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2012, as follows:

Deposits	$ 1,678,752
Investments	-
Restricted Cash	-
Total Deposits and Investments as of December 31, 2012	$ 1,678,752

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Clinton County's investment policy does not include custodial credit risk requirements. Clinton County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013, and 2012.

Note 2 - Deposits and Investments (continued)

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Clinton County or its agent but not in the government's name. Clinton County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Clinton County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Clinton County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by Clinton County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Clinton County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities. Clinton County's deposits were not exposed to concentration of investment credit risk for the years ended in December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue	$ 53,750	$ -	$ 130,261	$ -
Capital Improvement	-	130,533	-	128,803
Special Road and Bridge	111,783	25,000	103,542	25,000
Collector's Tax Maintenance	-	10,000	-	-
Emergency Management	-	-	-	80,000
Sheriff's Revolving	-	-	-	7,000
Sheriff Supplement Grant	-	-	7,000	-
Prosecuting Attorney Victims of Crime Advocate	-	-	3,500	-
Law Enforcement Restitution	-	-	-	3,500
Total	$ 165,533	$ 165,533	$ 244,303	$ 244,303

Note 4 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employees' Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65102, or by calling 1-877-632-2373.

Funding Policy

In accordance with State Statutes, the Plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 are required to contribute 0% of their annual salary, while employees hired after February 2002 are required to contribute 4% of their salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $47,344 and $49,099, respectively, for the years then ended.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS)

Plan Description

Clinton County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multi-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

LAGERS was created and governed by statutes section RSMo 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and it is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, MO 65102 or by calling (800) 447-4334.

Funding Status

Full-time employees of Clinton County contribute 4% of their gross pay to the pension plan. The June 30th statutorily required contribution rates are 4.5% (General) and 5.8% (Police) of annual covered payroll for the year ended December 31, 2013. The June 30th statutorily required contribution rates are 5.3%. (General) and 5.6% (Police) of annual covered payroll for the year ended December 31, 2012. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute.

Annual Pension Cost (APC) and Net Pension Obligation (NPO)

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2013 was as follows:

	2013
Annual required contribution	$ 85,506
Interest on net pension obligation	867
Adjustment to required contribution	(1,154)
Annual pension cost	85,219
Actual contributions	85,506
Increase (decrease) in NPO	(287)
NPO beginning of year	11,959
NPO end of year	$ 11,672

The annual required contribution (ARC) was determined as part of the February 28, 2011 and February 29, 2012 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 28, 2013 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2011 was 15 years for the General division and 15 years for the police division. The amortization period of February 29, 2012 was 12 years for the General division and 14 years for the Police division.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2011	$ 97,810	94.0%	$ 12,160
2012	93,378	100.2%	11,959
2013	85,219	100.3%	11,672

Required Supplementary Information - Schedule of Funding Progress

Actuarial Valuation Date	(a) Actuarial Value of Assets	(b) Entry Age Actuarial Accrued Liability	(b-a) Unfunded Accrued Liability (UAL)	(a/b) Funded Ratio	(c) Annual Covered Payroll	[(b-a)/c] UAL as a Percentage of Covered Payroll
2/28/2011	$ 2,223,392	$ 2,531,720	$ 308,328	88%	$ 1,962,821	16%
2/29/2012	2,251,413	2,382,181	130,768	95%	1,554,397	8%
2/28/2013	2,580,963	2,557,447	(23,516)	101%	1,714,157	

The subdivision's annual pension cost and net pension obligation for the year ended December 31, 2012 was as follows:

	2012
Annual required contribution	$ 93,579
Interest on net pension obligation	882
Adjustment to required contribution	(1,083)
Annual pension cost	93,378
Actual contributions	93,579
Increase (decrease) in NPO	(201)
NPO beginning of year	12,160
NPO end of year	$ 11,959

The annual required contribution (ARC) was determined as part of the February 28, 2010 and February 28, 2011 annual actuarial valuations using the entry age actuarial cost method. The actuarial assumptions as of February 29, 2012 included: (a) a rate of return on the investment of present and future assets of 7.25% per year, compounded annually, (b) projected salary increases of 3.5% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 6.0% per year, depending on age and division, attributable to seniority/merit, (d) pre-retirement mortality based on 75% of the RP-2000 Combined Healthy table set back 0 years for men and 0 years for women and (e) post-retirement mortality based on 105% of the 1994 Group Annuity Mortality table set back 0 years for men and 0 years for women. The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on an open basis. The amortization period as of February 28, 2010 was 17 years for the General division and 14 years for the police division. The amortization period of February 28, 2011 was 15 years for the General division and 15 years for the Police division.

Note 5 - Missouri Local Government Employees Retirement System (LAGERS) (continued)

Annual Pension Cost (APC) and Net Pension Obligation (NPO) (continued)

Three-Year Trend Information

Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
2010	$ 82,001	92.3%	$ 6,314
2011	97,810	94.0%	12,160
2012	93,378	100.2%	11,959

Required Supplementary Information - Schedule of Funding Progress

Actuarial Valuation Date	(a) Actuarial Value of Assets	(b) Entry Age Actuarial Accrued Liability	(b-a) Unfunded Accrued Liability (UAL)	(a/b) Funded Ratio	(c) Annual Covered Payroll	[(b-a)/c] UAL as a Percentage of Covered Payroll
2/28/2010	$ 2,033,232	$ 2,334,419	$ 301,187	87%	$ 1,889,324	16%
2/28/2011	2,223,392	2,531,720	308,328	88%	1,962,821	16%
2/29/2012	2,251,413	2,382,181	130,768	95%	1,554,397	8%

Note: The above assets and actuarial accrued liability do not include the assets and present value of benefits associated with the Benefit Reserve Fund and the Casualty Reserve Fund. The actuarial assumptions were changed in conjunction with the February 28, 2011 annual actuarial valuations. For a complete description of the actuarial assumptions used in the annual valuations, please contact the LAGERS office in Jefferson City.

Note 6 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Clinton County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System. Once remitted, the State of Missouri is responsible for administration of this plan. Clinton County has contributed $2,244 and $1,870, respectively, for the years ended December 31, 2013 and 2012.

Note 7 - Post-Employment Benefits

Clinton County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Clinton County.

Note 8 - Claims, Commitments and Contingencies

Litigation

Clinton County is involved in pending litigation as of December 31, 2013. The extent of the liability, if any, cannot be determined at this time.

Compensated Absences

The County provides employees with up to four weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation and overtime, if applicable. These have not been subjected to auditing procedures.

Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Note 9 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuance to state statute (Chapter 537.70 RSMo. 1986). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make specific assessments. Members are jointly and severally liable for all claims against the risk pool.

Note 10 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through August 4, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 11 - Long-Term Debt

Capital Lease Obligations

In 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of five 2013 Ford Interceptors at a cost of $126,363. The agreement requires monthly payments of $3,699 ending April 1, 2016 which includes interest of 3.5%.

Note 11 - Long-Term Debt (continued)

In 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of 2013 Chevy Silverado at a cost of $30,775. The agreement requires annual payments of $10,908 ending March 1, 2016, which includes interest of 3.5%.

In 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of 2011 John Deere 672G Motor Grader at a cost of $180,000. The agreement requires two annual payments of $94,505 beginning February 21, 2015 and ending February 21, 2016, which includes interest of 2.8%.

In 2011, the County entered into a cancelable lease purchase agreement to finance the purchase of 2011 Dodge 2500 Crew Cab at a cost of $22,255. The agreement requires monthly payments of $662 ending May 2, 2014, which includes interest of 4.5%.

In 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2010 Ford Explorer at a cost of $22,200. The agreement requires monthly payments of $660 ending May 7, 2013, which includes interest of 4.5%. This lease was paid off in 2013.

In 2010, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2010 Dodge Charger at a cost of $21,791. The agreement requires monthly payments of $648 ending March 31, 2013, which includes interest of 4.5%. This lease was paid off in 2013.

Although the agreements provide cancellation of the leases if the County should fail to appropriate funds at the annual renewal dates, the County does not foresee exercising its option to cancel.

The following is the changes in capital lease obligations for the year ended December 31, 2013:

Capital Lease Obligations	Balance December 31, 2012	Additions	Retirements	Balance December 31, 2013	Interest Paid
5 2013 Ford Interceptor SUVs	$ -	$ 126,362	$ 27,123	$ 99,239	$ 2,472
2013 Chevy Silverado Crew Cab	-	30,775	-	30,775	-
2011 John Deere 672 Grader	-	180,000	-	180,000	-
2011 Dodge Crew Cab Truck	10,886	-	7,612	3,274	334
2010 Ford Explorer	3,265	-	3,265	-	37
2010 Dodge Charger	1,931	-	1,931	-	14
	$ 16,082	$ 337,137	$ 39,931	$ 313,288	$ 2,857

The following is the changes in capital lease obligations for the year ended December 31, 2012:

Capital Lease Obligations	Balance December 31, 2011	Additions	Retirements	Balance December 31, 2012	Interest Paid
2011 Dodge Crew Cab Truck	$ 18,161	$ -	$ 7,275	$ 10,886	$ 670
2010 Ford Explorer	10,857	-	7,592	3,265	334
2010 Dodge Charger	9,440	-	7,509	1,931	272
	$ 38,458	$ -	$ 22,376	$ 16,082	$ 1,276

Note 11 -Long-Term Debt (continued)

The following is the 2013 future minimum payments for all capital leases:

Year Ending December 31,	Principal	Interest	Total
2014	$ 54,908	$ 3,706	$ 58,614
2015	139,180	10,627	149,807
2016	119,200	916	120,116
	$ 313,288	$ 15,249	$ 328,537

Department of Natural Resources Loan

The County entered into a loan with the Missouri Department of Natural Resources (DNR) on November 6, 2008, for $183,820 to finance various energy savings projects. The loan will be repaid with semi-annual payments of $9,664 through August 1, 2020, and one payment of $1,377 on February 1, 2021, which includes interest of 4.15%.

The following is the change in the DNR loan for the year ended December 31, 2013:

	Balance December 31, 2012	Additions	Retirements	Balance December 31, 2013	Interest Paid
DNR Loan	$ 131,403	-	14,018	$ 117,385	$ 5,310

The following is the change in the DNR loan for the year ended December 31, 2012:

	Balance December 31, 2011	Additions	Retirements	Balance December 31, 2012	Interest Paid
DNR Loan	$ 144,857	-	13,454	$ 131,403	$ 5,874

The following is the 2013 future minimum payments for the DNR loan:

Year Ending December 31,	Principal	Interest	Total
2014	$ 14,606	$ 4,721	$ 19,327
2015	15,218	4,109	19,327
2016	15,856	3,471	19,327
2017	16,521	2,806	19,327
2018	17,213	2,114	19,327
2019-2021	37,971	2,060	40,031
	$ 117,385	$ 19,281	$ 136,666

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Clinton County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Clinton County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Clinton County, Missouri's basic financial statements and have issued our report thereon dated August 4, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Clinton County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Clinton County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Clinton County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and responses that we consider to be significant deficiencies: 13/12-2, 13/12-3, 13/12-4, and 13/12-5.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Clinton County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance or other matter

that is required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and responses as item: 13/12-1.

Clinton County, Missouri's Response to Findings

Clinton County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and responses. Clinton County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Nichols, Stopp, & VanHoy, LLC

Creve Coeur, Missouri
August 4, 2014

The County of Clinton
Plattsburg, Missouri
Schedule of Findings and Responses
For the years ended December 31, 2013 & 2012

Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted one fund with actual expenditures that exceeded the budgeted expenditures and one fund for which a budget was not prepared.

Effect: Missouri statutes requires Counties to prepare an annual budget and expenditures are not to exceed the budget. Due to exceeding budget in certain funds the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget for all funds, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: The Special Election Fund will be budgeted for 2014 and following years.

On the Recorder User Fee Fund issue, the Office Holder in charge of it (Molly Livingston, Circuit Clerk & Recorder) was informed & instructed to keep a close eye on her budget and if any new money came in, she should amend her budget in order to be able to spend any more from it.

13/12-2 ***Condition:*** Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal control.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The Commission has taken this under advisement.

13/12-3 ***Condition:*** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate fraud risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze, and manage these risks.

Management's Response: The Commission has taken this under advisement.

13/12-4 ***Condition:*** During our audit, we noted the Collector's Office was not making timely deposits of cash receipts into the Collector's bank account.

Effect: Lack of timely deposits can lead to errors due to loss of cash receipts or other information needed to properly record and reconcile cash receipts. Also, the County loses out on potential interest income if deposits are not made in a timely manner.

Cause: The Collector was not making deposits of cash receipts in a timely manner.

Recommendation: We recommend that the County Collector's Office make deposits of cash receipts on a daily basis. If not made daily, the County should set a maximum dollar amount to be held before making a deposit.

Management's Response: Under the direction of the former Clinton County Collector, Sharon K. Cockrum, this was an apparent issue. Since her retirement on May 30, 2014, I, the new Governor Appointed Collector, Shelly King, have resolved this issue by making deposits in a timely matter.

13/12-5 ***Condition:*** During our audit, we noted the Collector's Office was not reconciling the cash registers on a daily basis.

Effect: Lack of a daily reconciliation process can lead to the loss of information needed to reconcile cash receipts due to error or theft.

Cause: The Collector was not reconciling cash registers daily.

Recommendation: We recommend that the County Collector's Office use a separate cash register for each individual who accepts cash. On at least a daily basis, each cash register should be reconciled by a minimum of two individuals.

Management's Response: Under the direction of the former Clinton County Collector, Sharon K. Cockrum, this was an apparent issue. Since her retirement on May 30, 2014, I, the new Governor Appointed Collector, Shelly King, have resolved this issue by having all daily drawers balanced by two different people on a daily basis.

The County of Clinton
Plattsburg, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Clinton County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2009.

Prior Year Financial Statement Findings

09-1 ***Condition:*** Because of a limited number of available personnel, it is not always possible to adequately segregate certain incompatible duties so that no one employee has access to both physical assets and the related accounting records, or to all phases of a transaction

Criteria: Duties should be segregated so that no one employee has access to both physical assets and the related accounting records, or to all phases of a transaction.

Effect: Risk is present that errors or irregularities in amounts that would be material to the basic financial statements may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Recommendation: We realize that because of limited resources and personnel, management may not be able to achieve a proper segregation of duties; however, our professional standards require that we bring this lack of segregation of duties to your attention in this report.

Response: The limited number of available personnel prohibits segregation of incompatible duties.

Status: This in no longer considered a material weakness.

09-2 ***Condition:*** The County's Treasurer is responsible for the maintenance of the cash and investment accounts of the County. Part of this maintenance includes the necessary and vital control of performing monthly reconciliations of all cash and investment accounts to the general ledger. During 2008 and 2009, cash was not properly reconciled on a monthly basis. In addition, the reconciliations provided at year-end were performed manually rather than within the County's centralized accounting system.

Criteria: The County Treasurer should perform monthly reconciliations of cash and investments from bank statements to the general ledger.

Effect: Due to the absence of monthly bank reconciliations by the County Treasurer, the reported year-end cash balances included unreconciled amounts of $10,742 and $10,824 at December 31, 2008 and 2009, respectively.

Recommendation: The County Treasurer recognize the importance of cash and investment reconciliations in the internal control processes of County operations and begin preparing proper monthly reconciliations within the County's centralized accounting system.

Response: The County understands the necessity of performing monthly bank reconciliations and will ensure that they are performed in the future.

Status: Management has corrected this issue.

Thomas A. Schweich

Missouri State Auditor

REVENUE

Bolivar Contract License Office

September 2014

Report No. 2014-086

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Bolivar Contract License Office

Background

The Department of Revenue (DOR) has appointed 178 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law, which became effective in 2009, the State Auditor may audit contract license offices.

Sales Tax Transactions

Contract license offices collect sales and use taxes based upon the purchase price of the vehicle being titled, less any applicable credits. DOR procedures require the offices to retain documentation to support the net purchase price and requires office staff to use a DOR approved source to determine the estimated fair market value if the documentation is not sufficient or the purchase price is questionably low. License office personnel did not retain sufficient documentation to support the purchase price for 2 of 47 (4%) transactions reviewed. For 2 of the 37 (5 percent) transactions reviewed that had addresses in the DOR computerized system, license office staff charged a lower (outside city limits) tax rate rather the city tax rate listed for the address in the system.

Prepayment Void Transactions

Prepayment void transactions occur when transactions are voided before payment is made, such as when the customer lacks sufficient funds or the entry has incorrect information. DOR procedures require a supervisory review of voided transactions and customer acknowledgement if a new transaction is not completed or is for a lesser amount. The license office manager did not document approval for 2 of 10 (20 percent) prepayment void transactions that occurred between January 7 and January 10, 2014, and license office personnel did not obtain a customer acknowledgement for 1 of these 2 transactions.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 7

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John R. Mollenkamp, Acting Director
Department of Revenue
Jefferson City, Missouri
and
T & J Stark Enterprises, LLC, Contract Agent
Bolivar Contract License Office
Bolivar, Missouri

We have audited certain operations maintained and established by the Bolivar Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

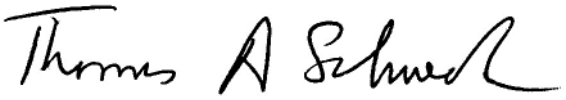
Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) no significant noncompliance with contractual or statutory provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the Bolivar Contract License Office.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Corey McComas, M. Acct., CPA
Audit Staff:	Joshua Shope, M. Acct.

1. Sales Tax Transactions

The license office does not always retain adequate documentation to support purchase price amounts on vehicle sales tax transactions, and the license office does not always charge the correct sales tax rate.

Contract license offices collect sales and use taxes from taxpayers who are titling a vehicle. These taxes are based on the purchase price of the vehicle less any applicable credits, such as for selling or trading in another vehicle. Department of Revenue (DOR) official procedures require the retention of documentation to support the net purchase price for all sales and use tax transactions. If the documentation is not sufficient to support the purchase price or the purchase price is questionably low, DOR official procedures require the license office staff to use a DOR approved source to determine the estimated fair market value. If the estimated fair market value is not similar to the price claimed by the taxpayer, a notarized bill of sale from the seller is required or the estimated fair market value must be used by the license office staff to calculate sales tax due.

License office personnel determine the sales tax rate to be charged based on the taxpayer's address. Most addresses are listed in the DOR's computerized system, which recommends a tax rate for each transaction based on the address. If the system is unable to provide a tax rate, DOR official procedures require the clerk to ask the taxpayer if he or she lives within city limits and then confirm this declaration. Ways to confirm the declaration include a property tax receipt or letter from the tax jurisdiction.

We reviewed sales and use tax transactions processed in the license office from January 6 to January 8, 2014, and noted the following concerns:

Purchase prices

License office personnel did not retain sufficient documentation to support the purchase price for 2 of 47 transactions (4 percent) reviewed. For these 2 transactions, the purchase price used was questionably low, but license office staff did not obtain a notarized bill of sale to support the purchase price. We obtained the estimated fair market values from DOR personnel and determined the reported purchase prices for the 2 transactions totaled $10,149 lower than the estimated fair market values, resulting in a $526 reduction in taxes collected.

When we brought these transactions to the DOR's attention, the DOR sent additional tax due letters to the 2 taxpayers. One taxpayer provided a notarized bill of sale to support the purchase price, which should have been obtained by the license office staff at the time of the transaction. For the other transaction, the DOR sent the taxpayer an additional tax due letter indicating the taxpayer owed an additional $64. As of August 1, 2014, the DOR has not received a response. The DOR will eventually suspend the registration if the taxpayer does not contact the DOR.

Sales tax rates

For 2 of the 37 (5 percent) transactions reviewed that had addresses in the DOR computerized system, license office staff charged lower tax rates than required. In both instances, license office staff charged the taxpayer tax rates that were outside the city limits, when the city sales tax rate should have been included based on the address in the DOR system. These transactions resulted in a $663 reduction in local taxes collected.

When we brought these transactions to the DOR's attention, DOR staff determined the suggested tax rate in the DOR's computerize system was incorrect for one of the transactions, and the license office staff had actually charged the correct sales tax rate. However, since the DOR system had suggested another tax rate, the license office staff should have documented why the suggested tax rate was not used. For the second transaction, the taxpayer, who under paid by $603, submitted an initial payment of $150 and agreed to pay the remaining balance in 5 equal monthly installments.

Conclusions

To ensure the purchase price is accurate and the proper tax rates are charged, the license office should comply with DOR procedures requiring adequate documentation of purchase price and verification of the taxpayer's address in the computerized system.

During February 2012, the DOR's Compliance and Investigation Bureau performed a review of the license office and noted similar concerns with motor vehicle sales tax transaction processing. The concerns included a tax exemption inappropriately applied, a purchase price credit inaccurately applied, an incorrectly recorded purchase price, and an unsupported credit amount.

Recommendation

The license office ensure compliance with DOR procedures requiring adequate documentation to support the purchase price for vehicle sales and use tax transactions. In addition, the license office should ensure the correct sales tax rate for the taxpayer's address is charged.

We also recommend the DOR conduct a follow-up review of the license office to ensure the license office has implemented corrective action.

Auditee's Response

The license office provided the following written response:

Purchase Prices: We agree with the auditor's recommendations to provide documentation to support the purchase price for vehicle sales and use tax transactions. The auditor's recommendation will be implemented. Our license office clerks have been instructed to charge tax amounts according to fair market value or to send the customer back to the seller for a notarized bill of sale. Management will continue to monitor and provide training on this procedure.

Sales Tax Rates: We agree with the auditor's recommendations to ensure the correct sales tax rate for the taxpayer's address. The auditor's recommendation will be implemented. Our license office clerks have been instructed to never choose "none" as a reason for over-riding the system. In addition, any tax rate that is over-ridden will be documented in the system, a letter from the governing authority, or taxpayer's receipt. Management will continue to monitor and provide training on this procedure.

The DOR provided the following written response:

The Department will assign a field coordinator to conduct a follow-up and also request our Compliance and Investigations Bureau to do a follow-up internal audit.

2. Prepayment Void Transactions

The license office manager did not document approval for 2 of 10 (20 percent) prepayment void transactions that occurred from January 7 to January 10, 2014. In addition, license office personnel did not obtain customer acknowledgment for 1 of these 2 transactions.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include when customers lack sufficient funds to pay for the transaction, and entries with incorrect information.

DOR official procedures require a supervisory review of voided transactions, and customer acknowledgement of a void transaction if a new one is not completed or is for a lesser amount. In addition, supervisory review and customer acknowledgement help ensure a transaction was voided for a valid reason.

Recommendation

The license office ensure all prepayment void transactions are reviewed and approved by office management, and are supported by customer acknowledgment, when applicable.

Auditee's Response

The license office provided the following written response:

We agree with the auditor's recommendations for management to review and initial approved prepayment voids. The auditor's recommendations will be implemented. Management will check voids to follow correct procedure on void reports and over-ride reports. Our license office clerks have been instructed to obtain the customer's signature on voids when there is a lesser amount due on the correction or if the transaction is not reprocessed. Management will continue to monitor and provide training to clerks on prepayment voids.

Department of Revenue
Bolivar Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 178 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

The contract license offices are awarded through a competitive bidding process, as required by Section 136.055.2, RSMo. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Prior to August 2013, contracts typically ran for a year, with three 1-year renewal periods. Starting in August 2013, contracts are typically for a period of 4 years. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell a wide-range of standard, personalized, and specialty license plates that are classified into five major categories: passenger, truck, trailer, motorcycle, and bus. In addition, the contract license offices issue five basic types of driver licenses: Intermediate License (GDL); Class F (Operator); Class E (For-Hire); Class A, B, and C (Commercial); and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program, World War I memorial fund, and/or blindness awareness fund. Customers may also register with the selective services, add endorsements or restrictions to licenses, and register to vote.

The contract agents do not receive compensation from the DOR, but receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

The Bolivar Contract License office was awarded to T & J Stark Enterprises, LLC in July 2009. In November 2013, due to the expiration of the 2009 contract, the DOR again solicited bids for the Bolivar Contract License Office. The office was again awarded to T & J Stark Enterprises, LLC, effective February 6, 2014.

For the year ended June 30, 2014, the office collected and remitted to the DOR $5,035,724, and retained processing fees totaling $161,072. Additionally, as part of the bidding process, the office agreed to return 0.5 percent of its processing fees to the state under both the current and prior contracts. For the year ended June 30, 2014, the office returned to the state processing fees totaling $803.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Branson Contract License Office

Background	The Department of Revenue (DOR) has appointed 178 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices.
Prepayment Void Transactions	Prepayment void transactions occur when transactions are voided before payment is made, such as when the customer lacks sufficient funds or the entry has incorrect information. DOR procedures require a supervisory review of voided transactions, but the office manager did not document approval for 2 of 10 (20 percent) void transactions that occurred from March 10 to March 13, 2014.
Accounting Controls and Procedures	The license office did not always accurately record the method of payment (cash, check, or credit card) and did not reconcile the composition of monies received to deposits. The composition of receipts did not match the composition of deposits for 5 deposits reviewed, and 3 of 12 manual receipt slips (25%) did not include the method of payment.
Contract Compliance	License office staff did not properly maintain the inventory records for 3 of 25 items reviewed. We found 3 items that were not listed in the inventory records, and a total of 5 items could not be located during the last two semi-annual inventories, for which the DOR required a $114 reimbursement.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John R. Mollenkamp, Acting Director
Department of Revenue
Jefferson City, Missouri
and
Koester & Koester, LLC, Contract Agent
Branson Contract License Office
Branson, Missouri

We have audited certain operations maintained and established by the Branson Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls and (2) noncompliance with a contractual provision.

The accompanying Management Advisory Report presents our findings arising from our audit of the Branson Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Corey McComas, M. Acct., CPA
Audit Staff:	Joshua Shope, M. Acct.

Department of Revenue
Branson Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

The license office manager did not document approval for 2 of 10 (20 percent) prepayment void transactions that occurred from March 10 to March 13, 2014.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include when customers lack sufficient funds to pay for the transaction, and entries with incorrect information.

Department of Revenue (DOR) official procedures require a supervisory review of voided transactions. In addition, a supervisory review of voided transactions helps ensure transactions were voided for valid reasons.

Recommendation

The license office ensure all prepayment void transactions are reviewed and approved by office management.

Auditee's Response

We agree with the Auditor's recommendation. Office policy is when cashiers have prepayment voids, to take paperwork to management to be reviewed and signed off before next transaction has started.

2. Accounting Controls and Procedures

The license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2014, the office collected and remitted to the DOR approximately $7.3 million in taxes and fees.

The license office did not always accurately record the method of payment (cash, check, or credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the composition of deposits did not agree to the composition of receipts recorded for the three deposits made from March 10 to March 12, 2014, and the May 9 and May 12, 2014, deposits. A review of these deposits identified cash payments recorded as check payments, check payments recorded as credit card and/or cash payments, and credit card payments recorded as check and/or cash payments. In addition, 3 of 12 manual receipt slips issued for driving record purchases and fees collected for the reinstatement of driving privileges did not include the method of payment. The license office must issue manual receipt slips for these transactions because they are processed outside of the computerized system.

DOR official procedures for license offices provide the composition of monies received should be reconciled to the accounting records and to deposits. Any differences identified as part of this work should be reviewed to ensure proper handling of monies received.

Recommendation

The license office ensure the correct method of payment is recorded in the accounting records and the composition of monies received is reconciled to

the accounting records and to deposits, and differences identified from the reconciliation process are appropriately reviewed. In addition, the license office should ensure the method of payment is recorded on manual receipt slips.

Auditee's Response

We agree with the Auditor's recommendation. Spoke with staff to make sure clerks check payment method before finalizing, if error occurs make sure clerk lists correct payment method and reason why on trips receipt.

3. Contract Compliance

The license office does not always accurately update perpetual inventory records, as required by the DOR agent contract. According to office management, the office tries to maintain a 30-day stock of inventory items such as license plates, tabs, decals, and permits.

License office staff did not properly maintain the inventory records for 3 of 25 items reviewed. We found 3 items that were not listed in the inventory records. Also, during the last two semi-annual inventories, a total of 5 items could not be located. As a result, the DOR required the office to reimburse the DOR $114 for the missing items.

The license office increases the risk of undetected theft and/or impropriety when inventory records are not updated accurately and on a timely basis. In addition, the DOR agent contract requires the license office to maintain up-to-date perpetual inventory records.

Recommendation

The license office maintain accurate perpetual inventory records, as required by the DOR agent contract.

Auditee's Response

We agree with the Auditor's recommendation. Office policy is to maintain inventory book daily, review pages to make sure inventory is correctly removed and totals are in order.

Department of Revenue
Branson Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 178 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

The contract license offices are awarded through a competitive bidding process, as required by Section 136.055.2, RSMo. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Prior to August 2013, contracts typically ran for a year, with three 1-year renewal periods. Starting in August 2013, contracts are typically for a period of 4 years. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell a wide-range of standard, personalized, and specialty license plates that are classified into five major categories: passenger, truck, trailer, motorcycle, and bus. In addition, the contract license offices issue five basic types of driver licenses: Intermediate License (GDL); Class F (Operator); Class E (For-Hire); Class A, B, and C (Commercial); and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program, World War I memorial fund, and/or blindness awareness fund. Customers may also register with the selective services, add endorsements or restrictions to licenses, and register to vote.

The contract agents do not receive compensation from the DOR, but receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In December 2011, the DOR solicited bids for the Branson Contract License Office. The office was awarded to Koester & Koester, LLC, effective January 19, 2012.

For the year ended June 30, 2014, the office collected and remitted to the DOR $7,345,472, and retained processing fees totaling $203,588. Additionally, as part of the bidding process, the office agreed to return 4 percent of its processing fees to the state. For the year ended June 30, 2014, the office returned to the state processing fees totaling $8,236.

CITIZENS SUMMARY

Findings in the audit of the Creve Coeur Contract License Office

Background	The Department of Revenue (DOR) has appointed 178 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law, which became effective in 2009, the State Auditor may audit contract license offices.
Prepayment Void Transactions	Prepayment void transactions occur when transactions are voided before payment is made, such as when the customer lacks sufficient funds or the entry has incorrect information. DOR procedures require customer acknowledgement if a new transaction is not completed or is for a lesser amount, but office staff did not obtain customer acknowledgement for 2 of 5 (40 percent) such transactions between January 7 and January 10, 2014.
Contract Compliance	License office staff did not properly maintain the inventory records for 3 of 50 inventory items reviewed. We found 2 items that were not listed in the inventory records, and 1 item that was on site but had been incorrectly recorded on the inventory records.
No Fee Identification Log	No fee IDs are issued at no cost to the ID holder to replace previously purchased IDs that printed illegibly or contained a misspelled name. Our review found 2 of the 17 no fee IDs issued between January 22 and March 27, 2014, were not listed on the office log, as required by the DOR.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 6

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John R. Mollenkamp, Acting Director
Department of Revenue
Jefferson City, Missouri
and
License Office Services, LLC, Contract Agent
Creve Coeur Contract License Office
Creve Coeur, Missouri

We have audited certain operations maintained and established by the Creve Coeur Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with a contractual provision.

The accompanying Management Advisory Report presents our findings arising from our audit of the Creve Coeur Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Corey McComas, M. Acct., CPA
Audit Staff:	Joshua Shope, M. Acct.

Department of Revenue
Creve Coeur Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

License office staff did not obtain customer acknowledgment documentation for 2 of 5 (40 percent) applicable prepayment void transactions that occurred from January 7 to January 10, 2014.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include when customers lack sufficient funds to pay for the transaction, and entries with incorrect information.

Department of Revenue (DOR) official procedures require customer acknowledgement of a void transaction if a new one is not completed or is for a lesser amount. In addition, obtaining customer acknowledgment helps ensure a transaction was voided for a valid reason.

Recommendations

The license office ensure applicable prepayment void transactions are supported by customer acknowledgment.

Auditee's Response

The Creve Coeur License Office staff will read and sign the Department of Revenue's policy regarding the prepayment void process. Management will continue to review all prepayment voids daily and log the reason for the void on the void report.

2. Contract Compliance

The license office does not always accurately update perpetual inventory records, as required by the DOR agent contract. According to office management, the office tries to maintain a 15-day stock of inventory items such as license plates, tabs, decals, and permits.

License office staff did not properly maintain the inventory records for 3 of 50 inventory items reviewed. We found 2 items that were not listed in the inventory records. In addition, 1 item that was listed in the inventory records could not be located. The item was a license plate that the license office staff later determined was listed under an incorrect month in the inventory records, and was not actually missing from the physical inventory.

The license office increases the risk of undetected theft and/or impropriety when inventory records are not updated accurately and on a timely basis. In addition, the DOR agent contract requires the license office to maintain up-to-date perpetual inventory records.

Recommendations

The license office maintain accurate perpetual inventory records, as required by the DOR agent contract.

Auditee's Response

The Creve Coeur License Office will maintain accurate perpetual inventory records on a daily basis. We will continue to record daily inventory as sold as per the daily inventory sheet from the TRIPS computer system. We will

also log into the inventory book all inventory items that are received in a correct manner.

3. No Fee Identification Log

The license office does not record some Identifications (IDs) issued for no fees on the office log, as required by the DOR.

No fee IDs are issued at no cost to the ID holder to replace IDs previously purchased for reasons such as an ID printing illegibly or having a misspelled name. Our review of no fee IDs issued in the license office between January 22, 2014, and March 27, 2014, noted 2 of the 17 no fee IDs issued during that period were not listed on the log maintained by the office. The license office is required by the DOR to maintain the log to document the reason for the no fee ID issuance. DOR personnel also use the logs to review for accurate processing of ID transactions and to ensure the reasons for issuing no fee IDs are reasonable.

Maintaining an accurate and complete ID log is needed to demonstrate the proper issuance of no fee IDs.

Recommendations

The license office ensure all no fee ID transactions are properly recorded on the office log.

Auditee's Response

Regarding maintaining a log for the driver's license transactions where fees are waived for customers who may have had some type of discrepancy on their license, our office staff will continue to maintain a log of fees that were waived.

Department of Revenue
Creve Coeur Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 178 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

The contract license offices are awarded through a competitive bidding process, as required by Section 136.055.2, RSMo. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Prior to August 2013, contracts typically ran for a year, with three 1-year renewal periods. Starting in August 2013, contracts are typically for a period of 4 years. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell a wide-range of standard, personalized, and specialty license plates that are classified into five major categories: passenger, truck, trailer, motorcycle, and bus. In addition, the contract license offices issue five basic types of driver licenses: Intermediate License (GDL); Class F (Operator); Class E (For-Hire); Class A, B, and C (Commercial); and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program, World War I memorial fund, and/or blindness awareness fund. Customers may also register with the selective services, add endorsements or restrictions to licenses, and register to vote.

The contract agents do not receive compensation from the DOR, but receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

In August 2012, the DOR solicited bids for the Creve Coeur Contract License Office. The office was awarded to License Office Services, LLC, effective April 19, 2013.

For the year ended June 30, 2014, the office collected and remitted to the DOR $12,271,072 and retained processing fees totaling $228,675. Under the terms of the contract, the office was not required to return a percentage of its processing fees to the state.

Personnel

Doniphan Contract License Office

September 2014

Report No. 2014-089

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Doniphan Contract License Office

Background

The Department of Revenue (DOR) has appointed 178 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law which became effective in 2009, the State Auditor may audit contract license offices.

Prepayment Void Transactions

Prepayment void transactions occur when transactions are voided before payment is made, such as when the customer lacks sufficient funds or the entry has incorrect information. DOR procedures require customer acknowledgement if a new transaction is not completed or is for a lesser amount, but office staff did not obtain customer acknowledgement for 6 of 10 (60 percent) such transactions between January 6 and January 16, 2014.

No Fee Identification Log

No fee IDs are issued at no cost to the ID holder to replace previously purchased IDs that printed illegibly or contained a misspelled name. Our review found 3 of the 17 no fee IDs issued between July 3, 2013, and February 6, 2014, were not listed on the office log, as required by the DOR.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John R. Mollenkamp, Acting Director
Department of Revenue
Jefferson City, Missouri
and
John Young, Contract Agent
Doniphan Contract License Office
Doniphan, Missouri

We have audited certain operations maintained and established by the Doniphan Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) no significant noncompliance with contractual or statutory provisions.

The accompanying Management Advisory Report presents our findings arising from our audit of the Doniphan Contract License Office.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Corey McComas, M. Acct., CPA
Audit Staff:	Joshua Shope, M. Acct.

Department of Revenue
Doniphan Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

License office staff did not obtain customer acknowledgment documentation for 6 of 10 (60 percent) applicable prepayment void transactions that occurred from January 6 to January 16, 2014.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include when customers lack sufficient funds to pay for the transaction, and entries with incorrect information.

Department of Revenue (DOR) official procedures require customer acknowledgement of a void transaction if a new one is not completed or is for a lesser amount. In addition, obtaining customer acknowledgment helps ensure a transaction was voided for a valid reason.

Recommendation

The license office ensure applicable prepayment void transactions are supported by customer acknowledgment.

Auditee's Response

All license office personnel will make sure that all prepayment void transactions will be signed by the customer and initialed by the office manager.

2. No Fee Identification Log

The license office does not record some Identifications (IDs) issued for no fees on the office log, as required by the DOR.

No fee IDs are issued at no cost to the ID holder to replace IDs previously purchased for reasons such as an ID printing illegibly or having a misspelled name. Our review of no fee IDs issued in the license office between July 3, 2013, and February 6, 2014, noted 3 of the 17 no fee IDs issued during that period were not listed on the log maintained by the office. The license office is required by the DOR to maintain the log to document the reason for the no fee ID issuance. DOR personnel also use the logs to review for accurate processing of ID transactions and to ensure the reasons for issuing no fee IDs are reasonable.

Maintaining an accurate and complete ID log is needed to demonstrate the proper issuance of no fee IDs.

Recommendation

The license office ensure all no fee ID transactions are properly recorded on the office log.

Auditee's Response

The license office will maintain an accurate and complete ID log for all no fee ID transactions.

Department of Revenue
Doniphan Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 178 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

The contract license offices are awarded through a competitive bidding process, as required by Section 136.055.2, RSMo. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Prior to August 2013, contracts typically ran for a year, with three 1-year renewal periods. Starting in August 2013, contracts are typically for a period of 4 years. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell a wide-range of standard, personalized, and specialty license plates that are classified into five major categories: passenger, truck, trailer, motorcycle, and bus. In addition, the contract license offices issue five basic types of driver licenses: Intermediate License (GDL); Class F (Operator); Class E (For-Hire); Class A, B, and C (Commercial); and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program, World War I memorial fund, and/or blindness awareness fund. Customers may also register with the selective services, add endorsements or restrictions to licenses, and register to vote.

The contract agents do not receive compensation from the DOR, but receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

The Doniphan Contract License Office contact was awarded to John Young in April 2009 through a competitive bid process. In August 2013, due to expiration of the 2009 contract, the DOR again solicited bids for the Doniphan Contract License Office. The office was again awarded to John Young, effective November 8, 2013.

For the year ended June 30, 2014, the office collected and remitted to the DOR $3,104,806, and retained processing fees totaling $97,247. Additionally, as part of the bidding process, the office agreed to return 0.5 percent[1] of its processing fees to the state under the current contract. For the year ended June 30, 2014, the office returned to the state processing fees totaling $310.

Personnel

At June 30, 2014, key office personnel were as follows:

John Young, Contract Manager
Jessica Moore, Office Manager

[1] Under the terms of the prior contract, the office was not required to return a percentage of its processing fees to the state.

CITIZENS SUMMARY

Findings in the audit of the Sugar Creek Contract License Office

Background	The Department of Revenue (DOR) has appointed 178 contract agents to operate contract license offices. These offices issue driver licenses; titles for motor vehicles, trailers, and marine craft; and license plates. Contract agents are compensated through transaction-based processing fees. Under a state law, which became effective in 2009, the State Auditor may audit contract license offices.
Prepayment Void Transactions	Prepayment void transactions occur when transactions are voided before payment is made, such as when the customer lacks sufficient funds or the entry has incorrect information. DOR procedures require customer acknowledgement if a new transaction is not completed or is for a lesser amount, but office staff did not obtain customer acknowledgement for 2 of 8 (25 percent) such transactions between March 10 and March 12, 2014.
Accounting Controls and Procedures	The license office did not always accurately record the method of payment (cash, check, or credit card) and did not reconcile the composition of monies received to deposits. The composition of receipts did not match the composition of deposits for 5 deposits reviewed, 4 checks on hand were not restrictively endorsed, and 6 manual receipt slips did not include the method of payment.
Contract Compliance	License office staff did not properly maintain the inventory records for 3 of 25 items reviewed. We found 3 items that were not listed in the inventory records. In addition, a total of 9 items could not be located during the last two semi-annual inventories, for which the DOR required a $166 reimbursement.
No Fee Identification Log	No fee IDs are issued at no cost to the ID holder to replace previously purchased IDs that printed illegibly or contained a misspelled name. Our review found 2 of the 19 no fee IDs issued between January 15 and April 21, 2014, were not listed on the office log, as required by the DOR.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Sugar Creek, Missouri

We have audited certain operations maintained and established by the Sugar Creek Contract License Office, as provided by Section 136.055, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objectives of our audit were to:

1. Evaluate the office's internal controls related to the handling of various fee and tax transactions.

2. Evaluate the office's compliance with certain contractual and statutory provisions.

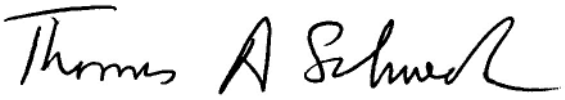
Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the Department of Revenue's management and was not subjected to the procedures applied in our audit of the contract office.

For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with a contractual provision.

The accompanying Management Advisory Report presents our findings arising from our audit of the Sugar Creek Contract License Office.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Corey McComas, M. Acct., CPA
Audit Staff:	Joshua Shope, M. Acct.

Department of Revenue
Sugar Creek Contract License Office
Management Advisory Report - State Auditor's Findings

1. Prepayment Void Transactions

License office staff did not obtain customer acknowledgment documentation for 2 of 8 (25 percent) applicable prepayment void transactions that occurred from March 10 to March 12, 2014.

A prepayment void transaction occurs when a transaction is entered in the Titling and Registration Intranet Processing System but is voided before payment is made. Valid reasons for prepayment void transactions include when customers lack sufficient funds to pay for the transaction, and entries with incorrect information.

Department of Revenue (DOR) official procedures require customer acknowledgement of a void transaction if a new one is not completed or is for a lesser amount. In addition, obtaining customer acknowledgment helps ensure a transaction was voided for a valid reason.

During February 2012, the DOR's Compliance and Investigation Bureau performed a review of the license office and noted the same concerns with prepayment void procedures.

Recommendation

The license office ensure applicable prepayment void transactions are supported by customer acknowledgment of the void.

Auditee's Response

We have gone over the procedure for prepayment voids with every clerk and made sure that everyone understands the importance of doing these correctly. We are now getting signatures on every prepayment void along with reasons for the void indicated on every prepayment void transaction. Continued problems with adherence to this procedure is grounds for termination.

2. Accounting Controls and Procedures

The license office needs to improve controls and procedures over monies collected. For the year ended June 30, 2014, the office collected and remitted to the DOR approximately $10.3 million in taxes and fees.

The license office did not always accurately record the method of payment (cash, check, or credit card) in the accounting records and did not reconcile the composition of monies received to deposits. For example, the composition of deposits did not agree to the composition of receipts recorded for the three deposits made from March 10 to March 12, 2014, and for the April 25 and April 28, 2014, deposits. A review of these deposits identified cash and credit card payments recorded as check payments, check payments recorded as credit card payments, and check and credit card payments recorded as cash payments. In addition, 4 checks on hand during our cash count conducted on April 28, 2014, were not restrictively endorsed and 6 manual receipt slips issued for driving record purchases and fees collected for the reinstatement of driving privileges did not include the method of payment. The license office must issue manual receipt slips for

these transactions because they are processed outside of the computerized system.

DOR official procedures for license offices indicate the composition of monies received should be reconciled to the accounting records and to deposits. Any differences identified as part of this work should be reviewed to ensure proper handling of monies received. In addition, to adequately safeguard receipts, DOR official procedures indicate that checks should be immediately endorsed when received.

During February 2012, the DOR's Compliance and Investigation Bureau performed a review of the license office and noted the same concerns with method of payment recording errors and a lack of timely endorsement of checks.

Recommendation

The license office ensure the correct method of payment is recorded in the accounting records and the composition of monies received is reconciled to the accounting records and to deposits, and differences identified from the reconciliation process are appropriately reviewed. In addition, the license office should ensure the method of payment is recorded on all manual receipt slips, and checks are restrictively endorsed immediately upon receipt.

Auditee's Response

The manger has met with every clerk and discussed the importance of making sure that the correct method of payment is entered for every transaction. If the check was not correctly restrictively endorsed with the printer they are to immediately stamp the back of the check with the DOR deposit stamp and write the transaction number on the back of the check. The manager continuously monitors these and ensures the correct forms of payment are being entered. The manager or assistant manager assists with counting down the drawers at the end of every shift, if a transaction was ran incorrectly it is immediately corrected and brought to the clerk's attention. Continued miscounting or incorrect payment entries is a violation of policy and is grounds for docking a clerk's quarterly performance bonus.

3. Contract Compliance

The license office does not always accurately update perpetual inventory records, as required by the DOR agent contract. According to office management, the office tries to maintain a 30-day stock of inventory items such as license plates, tabs, decals, and permits.

License office staff did not properly maintain the inventory records for 3 of 25 items reviewed. We found 3 items that were not listed in the inventory records. Also, during the last two semi-annual inventories, a total of 9 items could not be located. As a result, the DOR required the office to reimburse the DOR $166 for the missing items.

The license office increases the risk of undetected theft and/or impropriety when inventory records are not updated accurately and on a timely basis. In addition, the DOR agent contract requires the license office to maintain up-to-date perpetual inventory records.

Recommendation

The license office maintain accurate perpetual inventory records, as required by the DOR agent contract.

Auditee's Response

Perpetual inventory records have been maintained on a daily basis. Every day when the perpetual inventory is done we determine any missing or skipped inventory and immediately locate the inventory. The last semiannual inventory that was done in July had no missing inventory and was a perfect report. Any missing inventory is grounds for docking a manager's quarterly performance bonus.

4. No Fee Identification Log

The license office does not record some Identifications (IDs) issued for no fees on the office log, as required by the DOR.

No fee IDs are issued at no cost to the ID holder to replace IDs previously purchased for reasons such as an ID printing illegibly or having a misspelled name. Our review of no fee IDs issued in the license office between January 15, 2014, and April 21, 2014, noted 2 of the 19 no fee IDs issued during that period were not listed on the log maintained by the office. The license office is required by the DOR to maintain the log to document the reason for the no fee ID issuance. DOR personnel also use the logs to review for accurate processing of ID transactions and to ensure the reasons for issuing no fee IDs are reasonable.

Maintaining an accurate and complete ID log is needed to demonstrate the proper issuance of no fee IDs.

Recommendation

The license office ensure all no fee ID transactions are properly recorded on the office log.

Auditee's Response

We implemented a new procedure that the manager and/or assistant manager will not conduct the override until the manager/assistant manager records the no fee transaction on the no fee log. This procedure keeps the manager accountable for every no fee transaction processed in the office. Any missing no fee transactions that are not logged lead to deductions of a manager's quarterly performance bonus.

Department of Revenue
Sugar Creek Contract License Office
Organization and Statistical Information

Pursuant to Section 136.030(2), the Department of Revenue (DOR) has the authority and responsibility for the collection of motor vehicle registration fees, driver license fees, motor vehicle sales and use tax, and all other taxes. Pursuant to Section 136.055, RSMo, the director of the DOR has appointed 178 contract agents to operate contract license offices. This section also provides that the state auditor may audit the contract license offices. The DOR, License Office Bureau, under the management of the Motor Vehicle and Driver Licensing Division, is responsible for administering contract license offices throughout the state.

The contract license offices are awarded through a competitive bidding process, as required by Section 136.055.2, RSMo. This bidding process must give priority to organizations and entities that are exempt from taxation (not-for-profit) under the Internal Revenue Code, and political subdivisions such as municipalities, counties, and fire protection districts. Prior to August 2013, contracts typically ran for a year, with three 1-year renewal periods. Starting in August 2013, contracts are typically for a period of 4 years. The contract may be canceled at the discretion of the DOR.

The contract license offices issue titles for all Missouri motor vehicles, trailers, and marine craft; and issue and sell a wide-range of standard, personalized, and specialty license plates that are classified into five major categories: passenger, truck, trailer, motorcycle, and bus. In addition, the contract license offices issue five basic types of driver licenses: Intermediate License (GDL); Class F (Operator); Class E (For-Hire); Class A, B, and C (Commercial); and Class M (Motorcycle). The licensing process also includes allowing customers to contribute to the organ donor program, World War I memorial fund, and/or blindness awareness fund. Customers may also register with the selective services, add endorsements or restrictions to licenses, and register to vote.

The contract agents do not receive compensation from the DOR, but receive the following fees, allowed by Section 136.055.1, RSMo, from customers for each type of transaction processed by the office.

Agent Fees

Transaction Type	Fee
License renewal	$3.50 one year
	$7.00 two years
Transfer of registration	$3.50
Application or transfer of title	$2.50
Driver, operator or chauffeur license	$2.50 three years or less
	$5.00 exceeding three years
Notice of lien	$2.50

The Sugar Creek Contract License Office contact was awarded to Paul J. Wrabec Co., Inc., in June 2009 through a competitive bid process. In November 2013, due to expiration of the 2009 contract, the DOR again solicited bids for the Sugar Creek Contract License Office. The office was again awarded to Paul J. Wrabec Co., Inc., effective January 6, 2014.

For the year ended June 30, 2014, the office collected and remitted to the DOR $10,337,960, and retained processing fees totaling $277,606. Additionally, as part of the bidding process, the office agreed to return 1 percent[1] of its processing fees to the state from January 2014 through June 30, 2014. For the remaining 4 years of the contract the office agreed to return 1.2 percent, 1.3 percent, 1.4 percent, and 1.5 percent for the years ended June 30, 2015, 2016, 2017, and 2018, respectively. For the year ended June 30, 2014, the office returned to the state processing fees totaling $8,291.

Personnel

At June 30, 2014, key office personnel were as follows:

Cyril J. Wrabec, Contract Manager
Jennifer Pool, Office Manager

[1] Under the terms of the prior contract, the office was required to return 5 percent during the year ended June 30, 2014, until the new contract became effective in January 2014.

Thomas A. Schweich

Missouri State Auditor

City of Leeton

September 2014

Report No. 2014-091

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Leeton

Accounting Controls and Procedures	The Board of Aldermen has not segregated duties or provided adequate reviews of the work performed by the former City Clerk. The former City Clerk did not timely deposit monies received, did not issue receipt slips for some monies received, did not use official prenumbered receipt slips, and did not always designate the composition of receipts on receipt slips. The former City Clerk did not maintain book balances for 7 bank accounts and bank reconciliations were not performed for these accounts. The city could consolidate some of its 11 bank accounts to reduce record keeping and the potential for service charges. At the end of 2013, the city was holding $52,700 of gross receipt taxes that should have been turned over to the Unclaimed Property Fund held by the State Treasurer. Only one signature is required for disbursements from the City Collector account, and the Mayor, Mayor Pro-Tem, and City Superintendent have access to city funds but are not covered by a bond.
Restricted Revenues	The former City Clerk commingled restricted monies with general purpose monies rather than accounting for them in separate funds, so the city could not determine what portion of the General Fund represents restricted monies and could not demonstrate disbursements were made as allowed by law, ballot, and/or ordinance. The former City Clerk allocated personnel salaries between funds but failed to allocate some corresponding personnel costs, such as health insurance and taxes. In addition, the city lacked documentation to support its allocation of workers compensation and property and liability insurance between the General, Water, and Sewer Funds for 2013.
Water and Sewer System Controls and Procedures	The former City Clerk adjusted off penalties for 3 customers for reasons not allowed by city ordinances and also made changes to a school district account and a fire district account so penalties were not assessed for late payments. The former City Clerk did not monitor delinquent utility accounts, and as of March 2014, city records showed 303 active and inactive accounts (totaling $19,791) were over 60 days delinquent, including 188 (totaling approximately $13,000) that were more than 5 years old. The former City Clerk did not follow the city's ordinances regarding late penalties and shutoff procedures and allowed some customers to make partial payments for utilities without the Board of Aldermen's approval. The former City Clerk did not adequately follow-up on bad checks received and did not prepare a monthly list of utility deposits on hand to reconcile to the bank account. The city does not have a meter on its bulk water dispenser, so it cannot reconcile bulk water sales to monies received. The city does not obtain annual audits of its Water and Sewer Funds as required by state law.
Payroll	The city paid significant overtime, including $30,554 to the former City Superintendent and $8,636 to the former City Clerk, and it overpaid the former City Clerk for 52 hours of vacation leave ($684) and the former City Superintendent for 62 hours of vacation leave ($1,001). The city paid incentive payments in 2012 to city employees and a contract laborer, in apparent violation of the Missouri Constitution, and it has not updated its compensation ordinances since 1984.

Disbursements	The Board of Aldermen does not retain a list of bills approved, does not document its approval of individual invoices, and does not approve some non-payroll disbursements prior to payment. The city does not have a formal bidding policy and did not solicit bids for any goods or services purchased during 2012 and 2013, and the Board of Aldermen does not adequately monitor its activities for conflicts of interest. The city paid $1,000 to Mayor Gary King's repair business without soliciting bids and paid Alderman Binder's son for contract labor with no documentation of Board approval. The city has not clearly determined Alderman Binder's son's employment classification and did issue 1099-MISC forms to applicable contractors. City personnel did not reconcile vending machine sales to purchases to ensure all monies and beverages were accounted for, and the city lost $1,776 on the sale of beverages because it was not charging enough. The city paid $900 in credit card service costs and transaction fees in 2013 but few utility customers paid their bills with credit cards, making it questionable whether the city should continue to accept credit card payments. The city does not always enter into written contracts or retain and update contracts, and it does not review and evaluate the reasonableness of vehicle usage and does not reconcile fuel usage to billings.
Sunshine Law	The Board of Aldermen's open meeting minutes did not always record a roll call vote to enter into closed session and did not always document the reason for closing the meeting, as required by the Sunshine Law.
Budgets	City budgets do not include all elements required by law and are not accurate. In addition, the City Clerk reported more labor costs than actually incurred for the Water Fund and Sewer Fund and recorded some checks as 2013 disbursements that were not signed until 2014.
Capital Assets	The city does not maintain records for its capital assets, does not tag assets for specific identification, and does not conduct an annual physical inventory, leaving city assets susceptible to loss, theft, or misuse.

In the areas audited, the overall performance of this entity was **Poor**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 22

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Leeton, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Leeton. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Leeton.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Michelle Crawford, M. Acct., CIA
Audit Staff:	Tracy Schnakenberg

1. Accounting Controls and Procedures

There are numerous weaknesses with accounting controls and procedures. The former City Clerk resigned July 11, 2014, and is referred to as City Clerk throughout this audit report. The former City Superintendent resigned July 31, 2014, and is referred to as City Superintendent throughout this report.

1.1 Segregation of duties

The Board of Aldermen has not segregated duties or provided for adequate review of the work performed by the City Clerk. The City Clerk is responsible for receiving, recording, and depositing monies; reconciling bank accounts; preparing invoices for payment; and preparing, signing and distributing checks. Additionally, the City Clerk is responsible for utility billings and payroll related duties. Many of these duties would normally be performed by a City Treasurer and City Collector; however, the city does not have individuals serving in these positions.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city, the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these offices, by the same person at the same time would be incompatible. If segregating duties is not possible, timely supervisory reviews by the Board should be performed and documented.

1.2 Receipting, recording, and depositing procedures

The city's procedures for receipting, recording, and depositing are poor. As a result, there is no assurance all monies collected are properly receipted, recorded, or deposited.

The City Clerk does not issue receipt slips for most non-utility monies received. When receipt slips are issued, the city uses generic prenumbered receipt slips rather than official prenumbered receipt slips. In addition, the method of payment (cash, check, or money order) of non-utility receipts is not always designated on receipt slips. As a result, a reconciliation of the composition of receipts to deposits cannot be performed.

The City Clerk does not deposit monies collected (utility and non-utility receipts) timely or intact. The City Clerk does not prepare or make a deposit until receiving the 60th utility payment since the last deposit. As a result, utility receipts are still on hand after deposits are made. We reviewed April 2013 deposits and identified numerous instances of utility payments received being deposited up to a week after the receipt date and payments received on the same day being deposited on separate days. These delays were due to the 60th payment procedure.

Issuing official prenumbered receipt slips for all monies received, ensuring the method of payment is documented, depositing all receipts intact and timely, and reconciling the composition of receipts to deposits decreases the

risk that loss, theft, or misuse of monies received will occur and go undetected.

1.3 Bank accounts

The City Clerk did not maintain book balances for 7 bank accounts, and bank reconciliations were not performed for these accounts. The city has 11 accounts at various banks (checking and savings).

- The city maintains a book balance for 4 of its accounts using check-writing software, but a book balance is not maintained for the City Collector account, water and sewer reserve accounts, or any of the cemetery savings and CD accounts. In addition, bank reconciliations are not performed for these accounts. Book balances are necessary to reconcile bank accounts and adequately monitor account balances. Monthly bank reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and errors or discrepancies are detected and corrected timely.

- One of the cemetery saving accounts incurred $270 in service charges and only accrued $6 in interest during 2013. The large number of bank accounts requires additional record keeping. Except for separate accounts required by ordinance or law, some of the remaining bank accounts and CDs could be consolidated to help simplify city records and reduce the number of accounts that must be monitored and controlled. In addition, consolidation of accounts may reduce the likelihood of bank service charges resulting from low account balances or inactivity.

1.4 Gross receipt taxes

The city was notified by a wireless telephone company in October 2007 that the telephone company would be distributing gross receipt taxes as part of a legal settlement. Because the city had not placed a gross receipt tax on the ballot for citizens to approve, it was not eligible to retain the monies. City officials indicated the city began receiving gross receipt taxes from wireless telephone companies during 2008. The city attempted to return the monies, but the wireless telephone companies returned the tax payments to the city. The city has deposited the taxes into an interest bearing savings account since November 2008, and has not disbursed any of these monies. This account had a balance of approximately $52,700 at December 31, 2013. The city had not taken sufficient actions to determine the proper disposition of these funds, given its lack of authority to retain them. At our suggestion, city officials consulted with their legal counsel regarding the handling of these monies, and he recommended 3 options for the handling of these monies. The options included returning the monies to the phone companies, retaining the monies after the 5 year statute of limitations has elapsed, or turning the monies over to the state as unclaimed property. Our review indicates the appropriate disposition recommended would be turning these monies over to the Unclaimed Property Fund held by the State Treasurer in accordance with Section 447.532, RSMo.

The Board placed the collection of this gross receipt tax issue on the August 4, 2014, ballot and it passed; therefore, the city will be eligible to retain future collections of gross receipt taxes.

1.5 Check signers

The Board does not have adequate controls over the City Collector bank account and disbursements. While dual signatures are required on all other city accounts, only one signature is required on the City Collector account. The City Collector account is used for depositing utility payments; utility deposits; and business license, building permit, and animal license fees. The City Clerk transfers monies from the City Collector account quarterly by preparing and signing checks to the General Fund, Water Fund, and Sewer Fund accounts, leaving only utility deposits in the City Collector account. Ideally the first signature should be that of the check preparer and the second signature should be that of a Board member to show review and approval of the disbursement. To ensure adequate controls over bank accounts and disbursements, at least one Board member should sign all checks.

1.6 Bond coverage

Although the Mayor and Mayor Pro-Tem are authorized signors on the city bank accounts, they are not covered by a bond. In addition, the City Superintendent occasionally collects utility payments and is also not covered by a bond. Failure to properly bond individuals who have access to funds exposes the city to risk of loss.

Recommendations

The Board of Aldermen:

1.1 Consider appointing separate individuals to the position of City Clerk, City Collector, and City Treasurer to adequately segregate duties. If this is not possible, the Board should perform and document review of the City Clerk's work.

1.2 Require official prenumbered receipt slips be issued for all monies received. The Board should also ensure that all money is deposited intact and timely and the composition of receipts is reconciled to the composition of deposits.

1.3 Ensure bank reconciliations are performed each month and any differences are investigated, and maintain a book balance for all accounts. Further, consider consolidating bank accounts to simplify records and reduce service charges incurred.

1.4 Dispose of gross receipt taxes and the associated interest accumulated prior to August 2014 in accordance with state law.

1.5 Require at least one member of the Board to sign all checks.

1.6 Maintain bond coverage for all officials with access to city assets and allow only bonded employees to collect payments.

Auditee's Response

The Board of Aldermen provided the following written responses:

1.1 The Board has hired a City Treasurer. The Board will continue to provide closer oversight of the City Clerk and City Treasurer and will periodically perform documented reviews of their work.

1.2 A new pre-numbered receipt process was implemented for all collections, as well as daily deposits. Beginning July 10, 2014, the city is issuing prenumbered receipt slips for all monies, and the Board is reviewing to ensure all monies are deposited intact and the composition of receipts is being reconciled to the composition of deposits.

1.3 The Board agrees with the recommendation and will consolidate bank accounts. The Board will ensure that bank account reconciliations are performed monthly and that differences are investigated, and a book balance and/or check register balance will be maintained monthly.

1.4 The public vote on the gross receipt tax passed. An ordinance will be adopted and past and current collections of these monies will be placed in the General Fund.

1.5 The Mayor and Mayor Pro Tem will sign all checks. If the Mayor or Mayor Pro Tem is not available, another Alderman has been designated as an alternate.

1.6 The Board agrees with and will implement this recommendation.

Auditor's Comment

1.4 While the Board's response indicates the city intends to keep past gross tax receipts received from wireless telephone companies despite not having an ordinance allowing the city to do so, Section 447.532, RSMo, states unclaimed intangible personal property shall be turned over to the State Treasurer. The August 2014 voter approval makes the city eligible for future gross receipt taxes, but is not retroactive.

2. Restricted Revenues

The city has not established adequate procedures to ensure restricted monies are expended only for intended purposes and salaries and other disbursements are properly allocated among funds.

2.1 Tracking and recording restricted revenues

The City Clerk is not properly tracking and recording various restricted monies. State motor vehicle-related revenues, Police Officer Standards

Training (POST) fees, Law Enforcement Training (LET) fees, Capital Improvement Sales Tax (CIST) monies, and Law Enforcement Sales Tax (LEST) monies are comingled with general purpose monies rather than being accounted for in separate funds. The City Clerk deposits all these monies into the General Fund, and while the receipts of these restricted monies are tracked separately within the General Fund, the disbursements and balances of these restricted monies are not. As a result, the city cannot determine what portion of the General Fund represents restricted monies. Also, the city cannot demonstrate disbursements were made as allowed by law, ballot, and/or ordinance.

Article IV, Section 30(a), Missouri Constitution, requires motor vehicle-related revenues apportioned by the state to be spent for street-related purposes. Section 488.5336.2, RSMo, requires POST and LET fees to be used for the training of law enforcement officers. By city ordinance, the CIST is to be used for the retirement of debt or capital improvement. The LEST ballot restricts the use of these monies to law enforcement equipment and personnel costs. Receipts and disbursements associated with restricted monies should be recorded in a fund or funds established to account for their usage and ensure compliance with state laws.

2.2 Allocation of salaries and disbursements

The City Clerk failed to allocate some costs between various funds and documentation does not exist to support the allocation of some disbursements among city funds.

The City Clerk allocated personnel salaries between funds, but failed to allocate some corresponding personnel costs, such as health insurance and taxes totaling $18,659, to all impacted funds in 2013, thereby unnecessarily using General Fund resources to cover costs that could legitimately be paid from other funds. Our review of General Fund disbursements determined that bulk fuel and contract labor were used for street and utility projects; cleaning services for city hall benefited several departments including police and utilities; and attorney services covered issues pertaining to several departments. These goods and services totaling $7,175 were paid entirely from the General Fund in 2013, although it appears a portion of these costs could be allocated to other funds.

Additionally, the city had no documentation to support the allocation of workers compensation and property and liability insurance totaling $14,228 between the General, Water, and Sewer Funds for 2013.

It is essential the city properly allocate disbursements among funds, to accurately determine the results of operations of specific activities, thus enabling the city to establish the level of taxation and/or user fees necessary to meet operational costs.

Recommendations

The Board of Aldermen:

2.1 Determine the amount of restricted monies in the General Fund and establish separate funds or a separate accounting of these monies.

2.2 Ensure payroll costs and shared costs are properly allocated to the applicable city funds and allocations are supported by adequate documentation.

Auditee's Response

The Board of Aldermen provided the following written responses:

2.1 The Board agrees with and will implement this recommendation.

2.2 The Board agrees with the recommendation. A new payroll software system will be used to allocate payroll costs, and the Board will ensure applicable costs are allocated to city funds as appropriate and retain supporting documentation.

3. Water and Sewer System Controls and Procedures

Significant weaknesses exist in control procedures over providing water and sewer services. The city provides water and sewer services to approximately 270 customers and collected approximately $90,000 in water and sewer fees during the year ended December 31, 2013.

3.1 Adjustments

The Board does not review and approve adjustments and changes made to customer accounts by the City Clerk, and the utility duties performed by the City Clerk are not adequately segregated (see MAR finding number 1).

The City Clerk made adjustments to customer accounts not allowed by ordinance. City ordinances allow for adjustments to be made to customer accounts for water leaks, if certain steps are followed, and for a misread of a meter. Our review of adjustments made during April, July, September, and November 2013 identified 3 customer accounts had penalties removed for reasons not covered by city ordinances. The City Clerk also made changes to a local school district account and a local fire district account so that penalties would not be assessed for late payments. There is no documentation the Board approved waiving penalties for the school or fire district, and the fire district made several late payments during 2013. The failure to perform independent reviews and adhere to city ordinance increases the risk that unsupported or unauthorized changes can be made to the utility system.

Adjustments to customer account balances should be verified and approved by a person independent of the postings of such transactions to ensure they are legitimate. In addition, a report of adjustments should be presented to the Board for review.

3.2 Delinquent accounts

The City Clerk is not monitoring delinquent utility accounts, and the Board has not developed policies and procedures for pursuing delinquent accounts and monitoring utility account balances. Accounts are considered delinquent after a full payment is not received by the 10th of the month following billing. At our request the city generated a report of delinquent accounts (active and inactive) as of March 2014, that indicated 303 accounts, totaling $19,791, were over 60 days delinquent, including 188 accounts (totaling approximately $13,000) more than 5 years old. The Board does not have a process to periodically review this report and evaluate the likelihood of collection, and never removes accounts from its system. As a result, many of the delinquent accounts listed are old and are likely uncollectible and the value of the report is diminished.

To help maximize utility revenues, policies and procedures should be developed to ensure adequate steps are taken to collect delinquent accounts and to monitor delinquent balances.

3.3 Late penalties and shutoff procedures

The City Clerk is not following the city's ordinance regarding late penalties and shutoff procedures. Ordinance 294 states that a utility bill will be considered delinquent if not paid by the 10th of the month following billing and an additional payment of 20 percent of the amount of the past due water bill will be charged. If payment is not made by the 20th of the month following billing, in addition to the 20 percent penalty, water service will be disconnected, and a $40 fee will be charged to restore water service. We reviewed 4 customer accounts with balances past due for 90 days as of March 3, 2014, and only 1 of those accounts had the water service shut off.

It is not good public policy to make exceptions to city ordinances, and failing to enforce city ordinances related to utility services does not provide equitable treatment of all utility users and reduces the incentive for customers to make timely payments.

3.4 Partial payments

The City Clerk allows some customers to make partial payments for utilities without the Board's approval. The City Clerk indicated she has customers sign a hardship agreement to document a payment plan; however, signed hardship agreements were not available for partial payments reviewed, and the City Clerk is not tracking which customers are currently on a payment plan. In addition, the Board was not aware of the use of hardship agreements and did not approve payment plans. The city does not have a policy addressing partial payments.

To ensure all customers are treated in a fair and equitable manner, a formal policy should be established documenting the process to determine when payment plans are allowed, how the payment amount is established, and the approval process for these plans. A signed payment agreement is necessary to indicate the intent of the customer to pay the outstanding balance and assist in monitoring and collecting amounts due.

3.5 Non-sufficient funds checks

Procedures regarding bad checks received for utility payments are insufficient. The City Clerk sends a letter notifying the customer of the bad check, but makes no other follow-up efforts if this first attempt is unsuccessful. The City Clerk also does not adjust monthly utility bills to include amounts due for previous payments made with bad checks. The city charges $20 for each bad check to cover bank fees, but does not ensure amounts collected offset bank fees. In addition, bad check fees assessed by the city are not supported by a city ordinance or policy.

Policies are needed to address bad check procedures in order to recover unpaid monies and ensure customer account balances are proper. In addition, the assessment of bad check fees should be supported by ordinance.

3.6 Utility deposits

The City Clerk does not prepare a monthly list of utility deposits on hand and reconcile the list to a deposit reconciliation report or the balance in the City Collector bank account. The city collects a $40 deposit from new water and sewer customers and deposits the monies in the City Collector bank account. At our request, the City Clerk prepared a list of deposits held as of December 31, 2013. The list totaled $6,770 and agreed to the deposit reconciliation report maintained in the system. The City Clerk identified an additional $613 of refunds due to customers pertaining to the period 1996 through 2012 not listed on the reconciliation report, for total identified liabilities of $7,383. However, the reconciled bank balance was $7,233, indicating a $150 shortage. The shortage may relate to bad check fees that come out of this account, but once recouped from the customer are transferred to the water or sewer account.

A complete and accurate listing of customer utility deposits and periodic reconciliation to the bank balance and reconciliation report is necessary to ensure sufficient funds are available for potential utility deposit liabilities and provide a record of monies held for individual customers. Such reconciliations would allow for prompt detection of discrepancies.

3.7 Bulk water sales

The city does not have a meter on the bulk water dispenser and cannot reconcile bulk water sales to monies received. According to city personnel, water is dispensed in 43 second increments (approximately 100 gallons) for 25 cents, and monies are collected from the dispenser change box monthly. The bulk dispenser is not metered, and the city uses the total dollar amount collected to determine total gallons of water pumped.

To improve accountability over the bulk water sales dispenser, the city should meter the dispenser and reconcile money collected to water dispensed to determine if all bulk water revenues are deposited. Without proper reconciliation procedures, there is less assurance bulk water revenue is accounted for properly and transmitted to the bank.

3.8 Audits

The city does not obtain annual audits of its Water and Sewer Funds. Section 250.150, RSMo, requires the city to obtain annual audits of the combined water and sewer system. In addition to being required by state law, annual audits of these funds help ensure monies are properly handled and financial transactions are properly recorded.

Recommendations

The Board of Aldermen:

3.1 Require someone independent of the utility system review and approve all adjustments, and ensure supporting documentation is retained. In addition, ensure that adjustments are only made in accordance with city ordinances.

3.2 Establish policies and procedures regarding the collection of delinquent accounts.

3.3 Ensure utility ordinances for late fees and service shut off are followed.

3.4 Establish a policy that documents procedures and requirements for allowing customers to pay outstanding balances over a period of time. In addition, the Board should review payment agreements and ensure signed agreements are in place for all partial pay arrangements.

3.5 Ensure procedures are in place for the collection of bad checks and adopt an ordinance regarding bad check fees.

3.6 Maintain adequate records of customer deposits held and periodically reconcile these deposits to the deposit reconciliation report and bank account balance.

3.7 Meter the bulk water dispenser and develop reconciliation procedures to ensure revenue from the bulk water sales machine is properly accounted for and deposited.

3.8 Obtain annual audits of Water and Sewer Funds as required by state law.

Auditee's Response

The Board of Aldermen provided the following written responses:

3.1, 3.2
3.4,&
3.5 *A review is forthcoming of all accounts and future adjustments. The issues related to the collection of delinquent accounts, late fees,*

payment plans, bad check collection, and reconciliations will all be covered in a new or updated ordinance.

The Board will ensure documentation is retained supporting such adjustments including citing the cause. In addition, the Board will ensure that adjustments are only made in accordance with city ordinances. The Board will review ordinances for compliance.

The Board will approve all written agreements, payment plans, and obtain signed written payment agreements.

3.3 The Board will ensure utility ordinances are followed and all accounts are set up to charge late penalties and reconnect fees.

3.6 The Board will maintain adequate records of all customer deposits held by the city and periodically reconcile these deposits to the deposit reconciliation report and the related bank account. The Board is reviewing the affected ordinance and seeking legal advice pertaining to the handling of water deposits.

3.7 A meter will be installed at the bulk water dispenser, providing the Board a means to account for and reconcile the water usage and monies collected.

3.8 The Board agrees with and will implement this recommendation.

4. Payroll

The Board does not adequately monitor employee overtime or leave balances, and has not established employee salaries by ordinance. In addition, the city has made improper incentive payments in past years.

4.1 Overtime

The city paid significant overtime during 2012 and the first quarter of 2013 that was not approved by the Board or Mayor. City policy states that overtime is to be kept to a minimum and in June 2013, the Board updated the policy to require overtime to be authorized by the Board or Mayor prior to it being incurred. The city paid $30,554 in overtime to the City Superintendent and $8,636 in overtime to the City Clerk during the 2 years ended December 31, 2013. The City Superintendent's annual salary is $33,592 and the City Clerk's annual salary is $27,373. The City Superintendent reported overtime of 810 hours for 2012 and 451 hours for 2013 (averaging more than 15 hours per week in 2012 and 8 hours per week in 2013). The City Clerk reported overtime of 291 hours for 2012 and 146.5 hours for 2013.

Board members indicated overtime was excessive during 2012 and the first quarter of 2013; however, the Board did not have a process for reviewing and approving timesheets and did not address the overtime issue until 2013.

Additionally, some overtime was recorded on timesheets, but the timesheets were not always signed by the employee or an approving official as required by city policy. In addition, non-working time, such as vacation, sick and holidays, was included as hours worked when calculating overtime, which is not in accordance with city policy and not required by the Fair Labor Standards Act of 1938 (FLSA).

During 2013, the Board did not document approval of payroll payments made to employees totaling $100,000 and payments made to a contract laborer totaling $712.

To limit overtime costs, the city should complete a thorough review of overtime and ensure compliance with established policy. Policies regarding nonworking time should be followed to ensure the city is not paying more overtime than required. In addition, the Board should approve all payroll payments.

4.2 Leave and final paychecks

The Board is not tracking leave balances for city employees. Vacation and sick leave hours are allowed to be carried over annually with a maximum balance established in the personnel policy. Vacation leave is paid out when an employee terminates employment. As a result of not tracking leave, there was no documentation to support the final amounts paid to the former City Clerk and former City Superintendent for vacation leave upon their termination.

The City Clerk resigned on June 25, 2014. The City Clerk used accumulated leave so that her actual final day of work (June 27, 2014), preceded her effective termination date (July 11, 2014). On June 27, 2014, the City Clerk prepared her own 3 final paychecks (one check for the period June 16 through June 30, 2014, one check for the period July 1 through July 11, 2014, and one check for accumulated vacation leave). The Mayor signed and approved the City Clerk's timesheets, and the City Clerk and Mayor signed the final paychecks. The Board did not approve the final paychecks prior to payment.

We recalculated the final amounts paid to the City Clerk for vacation leave based on the assumption the City Clerk began 2014 with the maximum carryover balance of vacation leave allowed by city policy (160 hours), and adjusted these hours for leave earned and taken between January 1, 2014, and July 11, 2014, according to City Clerk's timesheets. Our calculations determined the city overpaid the City Clerk for 52 hours of vacation leave ($684).

The City Superintendent resigned on July 17, 2014, effective July 31, 2014. We recalculated the final amount paid to the City Superintendent for vacation leave based on the assumption the City Superintendent began 2014 with the maximum carryover balance of vacation leave allowed by city policy (160 hours) and adjusted these hours for leave earned and taken

between January 1, 2014, and July 31, 2014, according to the City Superintendent's timesheets. Our calculation determined the city overpaid the City Superintendent for 62 hours of vacation leave ($1,001).

Without leave records, the Board cannot ensure employee leave usage and balances are accurate. Leave records also aid in determining final compensation for employees leaving city employment. To ensure employees are treated equitably and are properly compensated, strict compliance with personnel policies is necessary, and the Board should review final paychecks.

4.3 Incentive payments

The city paid incentive payments ranging from $90 to $150 in 2012 and prior years to city employees and a contract laborer. There was no supporting documentation or approval for these payments. In addition, these payments did not have payroll taxes withheld, and were not included on the employees' W-2 forms or contractor's Form 1099-Misc. These incentive payments appear to represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39, Missouri Constitution, and Attorney General's Opinion No. 72, 1955 to Pray, which states, ". . . a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered." In addition, the failure to properly report and withhold taxes could result in penalty and interest charges assessed against the city.

4.4 Salary ordinance

The city has not updated its ordinances to establish the compensation of employees since 1984. Section 79.270, RSMo, authorizes the Board to fix the compensation of employees by ordinance.

Recommendations

The Board of Aldermen:

4.1 Ensure adequate reviews of time records and payroll payments are performed and proper monitoring of overtime to ensure overtime is necessary and approved. In addition, ensure compliance with the city's overtime policy and the FLSA.

4.2 Ensure employee leave balances are properly tracked and monitored. In addition, ensure future final paychecks are supported by proper documentation, are in compliance with city personnel policies, are reviewed and approved by the Board prior to payment, and seek reimbursement of the overpayments.

4.3 Discontinue granting incentive payments to employees and contract laborers and ensure all employee compensation is properly taxed and reported to the Internal Revenue Service.

4.4 Update the city ordinance that establishes the compensation of employees.

Auditee's Response

The Board of Aldermen provided the following written responses:

4.1 A review is in progress, and procedures will be set in place to ensure adequate reviews of time records are performed, and compliance with city policy and the FLSA, and all payroll is currently being approved by the Board

4.2 A vacation and sick time tracker will be included in the new payroll software to ensure accrual, usage, and balances are tracked. The Board will also ensure all future final paychecks are reviewed and approved prior to final payout, and the Board will review the final payouts to past employees to determine if reimbursement should be sought. The Board will ensure future final paychecks are supported by proper documentation and in compliance with city personnel policies.

4.3 Incentive pay was discontinued in December 2013. In the future, the Board will ensure all compensation is properly taxed and reported to the IRS.

4.4 A review of the city's ordinance will be conducted, and the ordinance will be adjusted, changed, rescinded, and/or a new ordinance created to reflect compensation of all city employees.

5. Disbursements

Controls and procedures over city disbursements are in need of improvement.

5.1 Approval process and oversight

The Board does not retain a list of bills approved, does not document its approval of individual invoices, and does not approve some non-payroll disbursements prior to payment. For example, we reviewed the period between the October 7, 2013, board meeting and the November 12, 2013, board meeting and identified payments totaling $16,000 for non-payroll disbursements occurred prior to November board meeting. In addition, the city does not require invoices to be marked paid or otherwise canceled, and the receipt of goods or services is not documented prior to payment.

To safeguard against possible loss or misuse of funds, the Board should approve all disbursements and review supporting documentation, bank information, and canceled checks. Board approval of disbursements should be documented in a listing and by signature or initials on monthly reports. Canceling invoices and other supporting documentation reduces the likelihood of duplicate payments, and requiring acknowledgement of receipt of goods or services prior to payment helps ensure the city actually received all items.

5.2 Procurement procedures

The city does not have a formal bidding policy and did not solicit bids for any goods or services purchased during the 2 years ended December 31, 2013. Significant purchases not bid included insurance ($25,433), a sewer pump ($9,650), repair services ($4,050), attorney services ($3,325), cleaning services ($2,400), and a water pump ($2,021).

Formal bidding procedures for major purchases or services provide a framework for economic management of city resources and help ensure the city receives fair value by contracting with the lowest or best bidders. Competitive bidding also helps ensure all parties are given an equal opportunity to participate in city business.

5.3 Conflicts of interest

The Board does not adequately monitor its activities for conflicts of interest. The city paid approximately $1,000 to Mayor Gary King's repair business in 2012 without soliciting bids. In addition, Alderman Binder's son was paid $712 in 2013 as a contract laborer with no documentation of Board approval.

Board members serve in a fiduciary capacity and have an obligation to the public to avoid the appearance of impropriety. Personal interests in business matters of the city could create actual or the appearance of conflicts of interest and a lack of independence could harm public confidence in the Board and reduce its effectiveness. Sections 105.454 and 105.458, RSMo, prohibit financial transactions between the city and elected officials that involve more than $500 per transaction or $5,000 per annum, unless there has been public notice to solicit proposals and competitive bidding, provided the bid or offer accepted is the lowest received.

5.4 Employment classification and 1099-MISC form

The city has not clearly determined the employment classification of Alderman Binder's son (who performs labor on an as needed basis for the city). The city did not withhold payroll taxes or issue applicable year-end tax forms for payments to him totaling $712 during 2013 and $1,382 during 2012. In addition, in 2013 and 2012, the city paid $2,400 each year to an individual for cleaning services and did not issue a 1099-MISC form.

Procedures are necessary to ensure individuals providing services are properly classified as employees or contract labor. Proper classification of employees and contract labor is necessary to ensure compliance with various state and federal laws and regulations. Individuals classified as employees should be paid through the city's payroll system, while individuals classified as contractors should receive a 1099-MISC form.

5.5 Vending machine

City personnel did not reconcile vending machine sales to purchases to ensure all monies and beverages were accounted for, and beverage prices charged did not cover the product costs. The city paid 2 beverage vendors $10,359 from January 2012 through February 2013. The city purchased 8,976 bottles of beverages which were sold at $1 per bottle; however, total

collections/deposits of beverage sales totaled only $8,583, a shortage of $393. In addition, the city realized a loss of $1,776 on the beverages sold.

To safeguard against possible loss, theft or misuse of product, the city should reconcile sales to purchases on a periodic basis. Ensuring the price charged covers the cost of items being sold would ensure the city does not unnecessarily lose money.

5.6 Credit card payments

The city accepts utility bill payments by credit card; however, few bills are paid by credit card and card users are not charged a convenience fee to offset card transaction fees assessed. Credit card service costs and transaction fees in 2013 totaled approximately $900, but the city only received revenues from card payments of approximately $1,500. Considering the limited usage, city officials should evaluate continued acceptance of credit card payments or look into a less costly credit card processing option. If credit card payments continue to be accepted, city officials should consider assessing a convenience fee to offset the card transaction fees. In addition, absorbing the credit card transactions fees is a possible violation of Article VI, Section 23, Missouri Constitution, which prohibits the granting of public funds to individuals.

5.7 Written contracts

The city does not always enter into written contracts or retain and update contracts. The city approved hiring the former City Superintendent on a contract basis to perform water and sewer testing services on July 31, 2014. A formal written contract for these services was not prepared, and the only documentation of the agreement was an index card listing rates of pay for testing on weekdays and weekends. In addition, the city does not have a written contract for cleaning services or for funds given to a local civic organization. The contract with the city's attorney also has not been updated since 2000, and the city did not retain a copy of the contract.

Clear and detailed written contracts are necessary to ensure all parties are aware of their duties and responsibilities, and prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. In addition, in order to monitor compliance with contract terms, copies should be retained.

5.8 Fuel and vehicles

The city does not have procedures to review and evaluate the reasonableness of vehicle usage and does not reconcile fuel usage to billings. The city spent approximately $700 in bulk fuel and approximately $2,400 in fuel at gas stations in 2013. Maintaining and reviewing vehicle usage logs and comparing usage to fuel purchases is necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improperly billed amounts, and decrease the risk of theft or misuse of fuel occurring without detection.

Recommendations

The Board of Aldermen:

5.1 Ensure all invoices are reviewed and approved by appropriate officials prior to payment and ensure approval of disbursements is documented. In addition, the Board should ensure invoices are marked paid to prevent duplicate payments and require documentation of receipt of goods and/or services prior to payment of invoices.

5.2 Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for bids selected.

5.3 Comply with state law regarding transactions with businesses owned by city officials, and ensure such arrangements are properly handled and documented. In addition, the Board should closely examine city transactions to identify and avoid the appearance of or actual conflicts of interest, and ensure members avoid participation in decisions or other situations that could result in the appearance of or actual conflict of interest.

5.4 Implement procedures to ensure individuals hired are properly classified as employees or contractors and they are issued applicable year-end tax forms as required by law.

5.5 Ensure that monies from the sales of goods are properly accounted for and purchases are reconciled to sales periodically. Goods should be priced to ensure revenues cover costs.

5.6 Consider discontinuing accepting credit card payments or changing to a less costly credit card processing option. If credit card payments continue, consider assessing a convenience fee.

5.7 Enter into written contracts defining services provided and benefits received and retain copies of all written contracts.

5.8 Establish adequate records and procedures to effectively monitor vehicle and fuel use.

Auditee's Response

The Board of Aldermen provided the following written response:

5.1-8 The Board agrees with and will implement these recommendations.

6. Sunshine Law

The Board did not always comply with the Sunshine Law. Open meeting minutes did not always record a roll call vote of the Board members to enter into closed session and did not always document the reason for closing the

meeting. Section 610.022, RSMo, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting, including reference to a specific section of the law, shall be voted on during an open meeting. These reasons and the corresponding votes to close the meeting should be documented in the open minutes to demonstrate compliance with statutory provisions.

Recommendation

The Board of Aldermen ensure open meeting minutes properly disclose the votes and reasons for closing a meeting.

Auditee's Response

The Board of Aldermen provided the following written response:

The Board agrees with and will implement this recommendation.

7. Budgets

City budgets do not include all elements required by law and are not accurate, and some budgeted receipts and disbursements were overstated.

Budgetary requirements

The Board approved budgets for the years ended December 31, 2013, and 2012, that did not include a budget message, budgeted amounts for the 2 preceding years, and beginning and ending actual and estimated cash balances. City budgets only include actual amounts for the prior 4 years and budgeted receipts and disbursements for the upcoming year.

Budget accuracy

Information contained in the budgets prepared by the City Clerk was not accurate. The Water Fund and Sewer Fund budgets list labor as a disbursement, however, these labor costs were already included in the General Fund budget. In addition, the 2013 actual amounts recorded as transfers in to the General Fund and transfers out of other city funds on the 2014 budget were not correct. The City Clerk also prepared checks that were dated December 31, 2013, to reimburse the General Fund for expenses paid from other funds, and these checks were not signed until the beginning of 2014. Some of these checks were recorded as actual disbursements of 2013 in the 2014 budget, while other checks were recorded as disbursements in the accounting system for 2014.

Sections 67.010 to 67.080, RSMo, establish requirements for the format of the annual operating budget. In addition to meeting statutory requirements, an accurate budget can serve as a useful management tool by establishing specific financial expectations for each area of city operations and provides a means to effectively monitor actual receipts and disbursements by periodically comparing budgeted to actual amounts and prior year information.

Recommendation

The Board of Aldermen prepare budgets that are accurate and in compliance with state law.

Auditee's Response

The Board of Aldermen provided the following written response:

The Board agrees with and will implement this recommendation.

8. Capital Assets

The city does not maintain records for its capital assets including buildings, utility system infrastructure, equipment, and other property. Additionally, assets are not tagged for specific identification, and an annual physical inventory is not performed. City-owned capital assets including land, buildings, equipment, and other property are valued at approximately $836,000 on the city's insurance listing.

Adequate capital asset records and procedures are necessary to provide controls over city property; safeguard city assets that are susceptible to loss, theft, or misuse; and provide a basis for proper financial reporting and insurance coverage.

Recommendation

The Board of Aldermen ensure property records are maintained that include all pertinent information for each asset such as tag number, description, cost, acquisition date, location and subsequent disposition. The Board should also properly tag, number, or otherwise identify all applicable city property and conduct and document an annual physical inventory.

Auditee's Response

The Board of Aldermen provided the following written response:

The Board agrees with and will implement this recommendation.

City of Leeton
Organization and Statistical Information

The City of Leeton is located in Johnson County. The city was incorporated in 1946 and is currently a fourth-class city. The city employed two full-time employees (City Clerk and City Superintendent) and three part-time law enforcement officers on December 31, 2013.

City operations include utility services (water and sewer), law enforcement services, and a cemetery.

Mayor and Board of Aldermen

The city government consists of a mayor and four-member board of aldermen. The members are elected for 2-year terms. The Mayor is elected for a 2-year term, presides over the Board of Aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at December 31, 2013, are identified below. The Mayor is paid $60 annually and the Board of Aldermen members are paid $24 annually. The compensation of these officials is established by ordinance.

Gary King, Mayor
Steve Binder, Mayor Pro-Tem
Loretta Burford, Alderwoman
Robin Miller, Alderwoman
Tom Wissinger, Alderman

Financial Activity

A summary of the city's financial activity for the year ended December 31, 2013, follows:

City of Leeton
Schedule of Receipts, Disbursements, and Changes in Cash Balances
Year Ended December 31, 2013

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Survey of Public Employee Retirement Systems in Missouri

Background

The financial condition and long-term sustainability of public employee retirement plans has been a recent topic of discussion nationwide. This survey provides information and reports key data of Missouri public employee defined benefit (DB) retirement plans that help indicate financial condition of the plans.

Our survey focuses on public employee DB retirement plans, due to the risks to the sponsoring governments and ongoing liabilities associated with such plans. A typical DB plan guarantees monthly payments to eligible members, beginning upon retirement. Benefits are calculated based on a formula that considers employees' salaries, length of service, and a multiplier. Generally, a large portion of contributions are paid by the sponsoring government. DB plans use an actuarial valuation process to determine the actuarial value of plans' liabilities, assets, and related annual required contributions.

As of December 31, 2012, there were 89 DB plans in Missouri, covering approximately 546,000 members. These plans reported actuarial assets totaling approximately $57 billion and actuarial accrued liabilities totaling approximately $73 billion. Ninety-four percent of all employees participating in public employee DB retirement plans in Missouri are members of the 15 plans selected for additional analysis in our report.

Survey Results

There are several key indicators of plan financial condition. These indicators should not be viewed individually, but in combination with other indicators along with a plan's actuarial assumptions and policies. In addition, the indicators should not be reviewed at a single point in time, but trends in the indicators should be reviewed over an extended period. Our review of various indicators found the financial condition of Missouri plans varied widely, with some indicating very good financial condition and others indicating very poor financial condition. Many plans have experienced worsened financial condition in recent years, primarily due to economic and financial market downturns associated with the recession from 2007 to 2009.

The most often cited indicator of plan financial condition is the funded ratio. In simple terms, the funded ratio is the percentage of the present value of future retirement benefit payments previously earned by employees (actuarial accrued liabilities) that are covered by plan assets as of a specific date. The aggregate funded ratio of Missouri plans has decreased from 83 percent to 78 percent between 2003 and 2012, but is higher than aggregate funded ratios reported at the national level. In 2012, 40 of the 89 Missouri plans (covering 67 percent of statewide members) had funded ratios of 80 percent or higher, which is down from 47 such plans in 2003. Aggregate unfunded actuarial accrued liabilities for the Missouri plans has nearly doubled in the past 10 years, from $8.18 billion in 2003 to $16.02 billion in 2012.

Actual contributions paid as a percentage of the annual required contribution (ARC) calculated by the plan's actuary measures an employer's commitment to achieving the plan's overall funding goals. In aggregate, Missouri plans received 94 percent of ARC in 2012. However, 34 plans (covering 33 percent of statewide members) received less than 100 percent of the ARC in 2012. The failure of sponsoring governments to fully fund the ARC makes it difficult for the plans to reach financial goals.

ARC as a percentage of covered payroll (also referred to as contribution rate) can indicate the stress the required contribution level could assert on the government's budget and operations. The aggregate ARC as a percentage of covered payroll in 2012 for the 15 selected plans was 14.18 percent, an increase from 9.70 percent in 2003.

Investment income often provides the largest portion of DB plan assets. Another key indicator is a comparison of long-term annualized market rates to assumed rates of investment return. Several of the 15 selected plans underperformed their assumed rates of return for the 10-year period ended in 2012. However, of the 10 largest plans, which cover 92 percent of statewide members, only 1 plan underperformed the investment return assumptions on both the 10-year and longer-term basis.

Other key indicators of financial condition include ARC as a percentage of the sponsoring government's budget and unfunded actuarial accrued liability as a percentage of covered payroll.

The financial condition of the 89 Missouri public employee DB plans is impacted by various external factors and decisions made by the plans' governing boards and sponsoring governments. Key influences of financial condition identified and discussed in this survey include economic conditions and investment performance, benefit structure, board governance, investment policy, contribution and funding policies, and selection of actuarial assumptions and methods. Because the interaction of factors that impact a plan's financial condition can vary among DB plans, it is difficult to compare the plans.

Our survey identified various key practices DB plans should follow to support adequate financial condition. Many of these practices have been implemented by Missouri plans, including the 15 selected plans. Governing boards and sponsoring governments of many of the largest and statewide plans in Missouri have taken measures to strengthen financial condition. However, it will take time before the effect of such changes become fully evident.

The appendixes to this survey present key background, financial, and actuarial data for each of the 89 Missouri public employee DB plans.

Because of the compound nature of this report, no overall rating is provided.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

Retirement benefits are often a significant component of public employee compensation, and are utilized by governments to recruit and retain employees. As a result, governments often incur significant liabilities associated with retirement benefits and must contribute significant resources to retirement plans. Due to the importance of maintaining good financial condition of retirement plans for state and local government employees, we have surveyed and gathered information regarding Missouri public employee defined benefit retirement plans. The information was obtained from publicly available plan documents, a database compiled by the General Assembly's Joint Committee on Public Employee Retirement from information submitted by the retirement plans, and from our direct solicitation of information from certain plans. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on the accuracy of the information. Our survey objective was to identify, obtain, and report key data of Missouri public employee defined benefit retirement plans that influence and indicate the financial condition of the plans.

Missouri state and local governments sponsored 89 defined benefit retirement plans, covering approximately 546,000 members, as of December 31, 2012. These plans reported actuarial assets totaling approximately $57 billion and actuarial liabilities totaling approximately $73 billion, resulting in a combined unfunded liability of approximately $16 billion as of plan years ended during the year ended December 31, 2012. In total, these plans were 78 percent funded during this period.

Our survey of data supporting the identified key indicators of financial condition for Missouri's 89 public employee defined benefit retirement plans noted the financial condition of these plans varies significantly. Numerous external and internal factors, including the economy and financial decisions, impact plan financial condition. The financial condition of the plans has been significantly impacted by the 2007 to 2009 recession. Decisions impacting retirement plans are made by various parties including sponsoring governments, plans' governing boards, and plans' management staff. Our survey of data determined plan decisions vary. It is essential that the various parties make sound financial decisions to maintain good financial condition. When plan liabilities are not appropriately managed, costs to the sponsoring governments to fund those liabilities could increase significantly and/or retirement benefits promised to employees could be jeopardized.

It is difficult to conclusively assess the financial condition of retirement plans or evaluate the impact of individual management decisions because of the complexity of the various factors, and there appears to be no agreed-upon national or statewide benchmarks or criteria related to these areas. In fact, there is often disagreement on what should be considered sufficient or adequate. The aggregate funded ratio of

Missouri defined benefit plans has decreased from 83 percent to 78 percent between 2003 and 2012; however, Missouri plans' aggregate 2012 funded ratio is higher than identified national averages of 73 percent to 74 percent. Officials from several plans indicated investment returns in 2013 and 2014 have been strong. These returns have likely positively impacted the plans' funded ratios. During 2012, contributions to Missouri plans totaled $2.65 billion, with $1.78 billion from the sponsoring governments and $870 million from employees. In aggregate, Missouri plans received 94 percent of actuarially required contributions (ARC) in 2012, higher than the national average of 80 percent. However, 34 plans (38 percent of Missouri plans), covering 33 percent of total members, received less than 100 percent of the ARC in 2012. The failure of sponsoring governments to fully fund 100 percent of the ARC makes it difficult for the plans to reach financial goals.

Governing boards and sponsoring governments of many of the largest and statewide plans in Missouri have taken measures to strengthen the plans' financial condition. Such measures include lengthening vesting periods, increasing retirement ages, reforming benefits and benefit formulas, restricting or reducing retiree cost of living adjustment payments, and increasing employee contribution requirements. In addition, many of these plans have changed actuarial assumptions and investment policies. However, it will take time before the effect of such changes become fully evident.

The financial condition and long-term sustainability of Missouri public employee defined benefit retirement plans deserves careful consideration and requires the design of policies that target the plans' long-term sustainability. The intent of this survey is to make key retirement plan information available for evaluation and consideration.

Survey of Public Employee Retirement Systems in Missouri Introduction

Background

In recent years, the financial condition and long-term sustainability of public employee retirement plans nationwide has been the topic of much discussion and concern as actuarial funding levels have decreased and required government contributions have increased. The poor financial condition of several large public employee retirement plans across the country has been widely publicized and the long-term sustainability of those plans questioned. Similar to plans in many states, changes have been made to various public employee retirement plans in Missouri to help control costs and improve long-term financial condition. This survey provides information that will assist in understanding defined benefit (DB) retirement plans and identifies and reports key data of Missouri public employee DB retirement plans that help indicate financial condition of the plans.

Plans incur liabilities for payment of retirement benefits. While investment earnings provide a large portion of the required funding, for most plans significant costs associated with benefits are also paid by taxpayers. Thus, the need exists for retirement plans to follow sound financial practices and assure taxpayers that commitments for future benefits will not cause undue financial burden on the sponsoring government and taxpayers.

Our survey focuses on public employee DB retirement plans due to the risks to the sponsoring governments and ongoing liabilities associated with such plans. The majority of Missouri public employee retirement plans are DB plans or a combination of both DB and defined contribution plans. Some plans cover members who are not eligible for Social Security benefits, making plan benefits a larger portion of those members' retirement assets. As of December 31, 2012, there were 130 public employee retirement plans in Missouri. Of these plans, 89 were DB plans (11 of which also provided a defined contribution plan) and 41 were defined contribution plans. Three of these 89 plans cover only state employees and 86 primarily cover local government employees. Selected data of the 89 plans is included at Appendix B and Appendix C.

DB plans guarantee members a specified lifetime benefit upon retirement; typically defined in a formula that considers various factors such as salary and years of service. Members' vested benefits are typically not portable to other plans. Investment and life expectancy risks associated with DB plans are borne by the plan sponsor. Because benefits are guaranteed for the member's lifetime, DB plan members have greater assurance of the adequacy of retirement incomes.

Defined contribution plans do not guarantee members a specified benefit. Instead, the benefit is normally based on the employer/employee contributions accumulated in the members' accounts plus or minus investment gains and losses. When terminating employment, members may elect to transfer vested benefits to other qualified defined contribution plans.

Since an employee's benefits are based on what was actually contributed and accumulated earnings, defined contribution plans do not require the actuarially based funding that is necessary for DB plans. Investment and life expectancy risks associated with defined contribution plans are borne by the plan members. In addition, disability and survivor benefits are generally not provided. Defined contribution plan members have less assurance of the adequacy of retirement income and the possibility of outliving the balance of the member's account.

Authorization

Authorization for Missouri public employee DB retirement plans is provided in the Missouri Constitution and various state statutes. When authorized, state and local governments may establish pension plans to provide retirement benefits to government officers and employees. State law authorizes statewide retirement plans for certain employees of the state, counties, courts, and school districts. In addition, a statewide multiple employer retirement plan is authorized for local political subdivisions which are not separately provided for in other state laws. State law also authorizes local retirement plans for employees of cities, counties, police departments, fire departments, and school districts with large populations; and for fire protection districts and certain other political subdivisions. Article VI, Section 25 of the Constitution and Chapter 105, RSMo, govern all public pension plans in Missouri.

Certain plans are considered "statutory" plans in which the plan governance is outlined in statutes and plan modifications must be approved by the General Assembly. The remaining plans are governed locally by the sponsoring government. In Missouri, 15 DB plans have been statutorily created and 74 have been locally created, such as by ordinance. Appendix A, Chart 1 and Appendix C provide references to the state laws applicable to Missouri public employee DB plans.

Joint Committee on Public Employee Retirement

The Joint Committee on Public Employee Retirement (JCPER) consists of six senators appointed by the President Pro Tem of the Senate, and six members of the House of Representatives, appointed by the Speaker of the House. Governed by Chapters 21 and 105, RSMo, the committee is required to:

- Make a continuing study and analysis of all state and local government retirement systems and report annually to the General Assembly.
- Devise a standard reporting system to obtain data on each public employee retirement system that will provide information on each system's financial and actuarial status at least biennially.
- Determine from its study and analysis the need for changes in statutory law.
- Make any other recommendations to the General Assembly necessary to provide adequate retirement benefits to state and local government employees within the ability of taxpayers to support their future costs.

Missouri public employee retirement plans are required to provide quarterly investment information and copies of audited annual financial statements within 6 months of the plans' fiscal year end to the JCPER. The JCPER is required to submit an annual report of the committee's activities and an analysis of the retirement plans to the legislature by January 15th of each year.

To facilitate the annual report, the JCPER solicits information from the plans annually. Plan personnel enter plan information in an on-line survey system maintained by the JCPER. Examples of information reported are plan type and background; governing board membership; member eligibility, benefits, contributions, and vesting; financial data including assets, operating liabilities, investment market values, investment advisors, and advisory fees; and actuarial information including methods used and assumptions made, required contributions, covered payroll, actuarial value of assets, and actuarial value of accrued pension liabilities. In recent years, the JCPER has increased the amount of data requested from the plans. Once received, the JCPER analyzes and performs a limited review of the data for accuracy, then compiles the information and submits the required annual report to the General Assembly. JCPER annual reports and other information regarding Missouri public employee retirement plans are located on the JCPER web site.[1]

Scope and Methodology

Our survey includes key data of Missouri public employee DB retirement plans that indicate financial condition of the plans. Key plan data was obtained from the JCPER for all Missouri public employee DB retirement plans and from publicly available documents for some plans. Additional information from the 15 largest and/or statewide plans was obtained using a separate questionnaire.

Similar to national data, available statewide data is not always current because plan data comes from annual financial reports prepared up to 6 months after fiscal year end, plans have varying fiscal year ends, and the collection of the data is time consuming.

We sent questionnaires requesting additional information to all plans having membership over 5,000, and all plans with statewide coverage. There were 12 plans with membership exceeding 5,000 (including 7 large statewide plans) and 3 additional smaller statewide plans, for a combined total of 15 plans selected to receive questionnaires. Eleven of the 15 selected plans are statutorily created. In total, these plans covered approximately 94 percent of total plan membership and 93 percent of total plan assets, for the plan years ended during the year ended December 31, 2011. The 15 DB plans selected

[1] <http://www.jcper.org/>

were County Employees' Retirement Fund, Kansas City Employees' Retirement System, Kansas City Public School Retirement System, Local Government Employees' Retirement System, Missouri Department of Transportation & Highway Patrol Employees' Retirement System, Missouri State Employees' Retirement System - Judicial Plan, Missouri State Employees' Retirement System - MSEP, Prosecuting Attorneys' & Circuit Attorneys' Retirement System, Public Education Employees' Retirement System, Public School Retirement System, Sheriff's Retirement System, St. Louis County Employees' Retirement Plan, St. Louis Employees' Retirement System, St. Louis Public School Retirement System, and University of Missouri Retirement, Disability & Death Benefit Plan. Information gathered for each of the 15 selected plans is presented in Appendix A.

To determine which plan data should be considered "key" for identifying plan financial condition, we performed various procedures. We reviewed applicable state laws and published literature specifically on DB plan practices and factors that have significant impact on financial condition. We identified and reviewed documentation of best practices recommended by recognized authoritative associations related to public retirement plans and governments. We also interviewed JCPER personnel and four actuarial professionals or groups of professionals knowledgeable of or active in public retirement plan actuarial practice, actuarial education, and/or public policy.

We obtained DB plan data from the JCPER database created by the on-line survey process for the plan years ended during the 10 years ended December 31, 2011. At the time we were performing the bulk of our initial data collection and analysis (March through November 2013), the most current data available for all plans was through plan year 2011. At that time, only some plans had begun reporting plan year 2012 data; however, other plans had not yet reported, and the JCPER had not reviewed reported plan data, for that plan year. To obtain data for the plan year 2012 for the 15 selected plans, we worked with the JCPER to expedite the plan reporting and JCPER review of plan data for that year. Later, after all plan year 2012 data became available, we downloaded certain limited data for that plan year for all DB plans.

The data downloaded from the JCPER had several limitations. Some of the key data was not available from the JCPER. Therefore, we obtained that data, for the 15 selected plans only, through a separate State Auditor's office survey. Some on-line system data was determined to be inaccurate or incomplete; but was available separately from the JCPER, for certain years. For example, the most accurate data regarding contributions for plan years 2006 through 2010, was from a study performed by the JCPER. In addition,

some plans did not report certain data to the JCPER for some years, and some plans did not report any data during some years.

To verify accuracy of the data for the 15 selected plans, we analyzed and discussed the data with personnel of each of the plans. Certain corrections and additions were made to the data based on these procedures. We provided personnel of each of the 15 selected plans with a copy of their plan's sections of Appendixes A, B, and C to further verify the accuracy of information presented. For the remaining 74 plans (covering approximately 6 percent of statewide membership), we performed analytical procedures and identified, followed up on, and revised certain data that appeared inaccurate or incomplete.

In addition to surveying the 15 selected plans for key data not available from the JCPER, we surveyed these plans on various management practices and actions related to financial reporting and plan financial condition. This survey was limited to gathering and compiling information from each plan. We did not draw conclusions about the financial condition of any individual plan.

To obtain national-level data regarding certain indicators of plan financial condition, we researched and identified various publications that report values of and trends in certain ratios and other statistics at the national level. This report cites two of those publications. One publication, *The Funding of State and Local Pensions: 2012-2016*,[2] prepared by the Center for Retirement Research at Boston College, reports data obtained from a national sample of 126 DB plans (109 state-administered and 17 locally-administered). The other publication, *2014 Report on State Retirement Systems: Funding Levels and Asset Allocation*,[3] prepared by Wilshire Consulting, reports national data obtained from 134 state-sponsored DB plans.

The data and information presented in this report are based on accounting standards effective during the periods corresponding to the data. However, as noted at the Recent GASB Accounting and Reporting Changes section, significant changes to accounting standards are effective beginning in 2014; and as a result, certain data and information will differ in future years. In addition, this report outlines the key data and general benefit requirements

of all 89 Missouri public employee DB plans. Additional information regarding each plan is available from each plan. Contact information for each of the 15 selected plans is included at Appendix A, Chart 1.

Defined Benefit Plans

As noted above, DB plans are widely used by Missouri's state and local governments. An understanding of the basic structure, characteristics, and terminology used by DB retirement plans is essential to understand and evaluate the financial condition of the plans.

A typical DB plan promises retirement benefits to eligible members in the form of monthly payments. The monthly payments begin upon members' retirement and continue throughout their remaining lives normally, with some options for survivor benefits. Although individual plans differ, common features of DB plans include:

- Retirement benefits are guaranteed.
- Employees earn retirement benefits by working a required number of years to become vested.
- Retirement benefits are calculated based on a formula that considers employees' salaries, length of service, and a multiplier. Other benefits often include early retirement ages with a reduced benefit payment, cost of living adjustments (COLA), and temporary additional benefits in some situations.
- Retirement benefits may also be provided to survivors of deceased vested members and to disabled members.

The authorizing government and/or the sponsoring government and the plan's governing board design various aspects of the DB plan's benefit structure and policies. The governing boards' trustees are usually appointed and/or elected from among plan members and/or non-members. For some plans, the governing board's duties may be assumed by a governmental office. The governing board manages the plan's assets/investments and retirement benefit payments. Because benefit payments are guaranteed, the sponsoring government is responsible for funding these payments and assumes nearly all of the financial risk associated with operating the plan.

Retirement benefits are funded by plan assets accumulated from contributions by sponsoring governments, employees, or other sources; and investment earnings. These assets are held in trust for future benefit payments to retirees. To be considered fully funded, current plan assets should equal the estimated current (present) value of future benefit payments (accrued liabilities) earned by employees as of the actuarial valuation date.

Contributions necessary to fund retirement benefits of DB plans are determined using one of two approaches: actuarial funding or pay-as-you-go. With the actuarial funding approach, an actuarial analysis estimates and

compares the present value of future benefit payments (accrued liabilities) to plan assets. The actuary calculates the annual required contribution (ARC) needed to meet plan funding goals. The ARC includes an amount for normal costs and an amortization payment for the unfunded actuarially accrued liability (UAAL). The ARC must be paid in an actuarial funding approach to achieve funding goals. With the pay-as-you-go approach, the funding policy does not require payment of the ARC. Instead, contribution amounts are generally only sufficient to cover benefit payments and expenses that become due in the current period. This type of funding policy is not recommended for DB plans because it may create large fluctuations in contributions needed and does not allocate the cost of a current employees' total annual employment pay package to current taxpayers, known as inter-generational equity.

Retirement systems, especially DB plans, use a number of terminologies. See page 51 for a glossary of terms relevant to this survey.

Actuarial Valuations

Defined benefit plans use an actuarial valuation process, performed by actuaries, to determine the plans' liabilities, assets, and required contributions. Total actuarial liabilities are the present (current) value of all expected benefit payments. These liabilities include both actuarially accrued liability (AAL - benefits already earned) and future normal cost (benefits expected to be earned in the future). Actuarial assets are the assets available to make payments for the AAL. Required contributions are identified for portions of both normal cost and any unfunded AAL (UAAL). Actuarial assumptions and methods play a significant role in the actuarial valuation. The plan's governing board, and in some cases the sponsoring government, make judgments based on historical information and estimations of future events related to various factors including employment, terminations, retirement ages, life expectancies, employee disability rates, investment earnings, employee raises, COLA, and economic inflation. Recommendations from the plan's actuaries often provide important information for these judgments. In addition, various actuarial cost methods are used to allocate the costs over the remaining lives of the plan's members and the members' beneficiaries. Because plan funding is based on actuarial valuation processes, it is essential that sound actuarial decisions are made. If not, a plan could experience too much or too little assets to pay future benefits. Actuarial valuations are typically performed yearly or every other year, and are documented in reports provided to a plan's governing board. Governmental Accounting Standards Board (GASB) standards require actuarial valuations at least biennially for DB plans. Actuaries are required to follow the Actuarial Standards Board standards of practice.

Section 105.664, RSMo, requires each plan, at least biennially, to prepare an actuarial valuation in compliance with GASB. According to information the 89 plans reported to the JCPER for plan year 2012, actuarial valuations were obtained annually by 85 plans and biennially by 4 plans. When a plan makes a substantial proposed change in benefits, Article VII, Section 14 of the

Constitution and Sections 105.665, 105.670, and 105.675, RSMo, require the plan prepare an actuarial valuation, including a statement of the related costs and required increase to required contributions.

Actuarial valuations are often supported by experience studies performed by actuaries. These studies compare actual activity to past actuarial assumptions and actuarial methods used. Conducting periodic experience studies (typically every 3 to 5 years and covering 4 to 10 years of historical information) helps improve the accuracy of projections in future actuarial valuations. When differences between assumptions used and actual "experience" are identified, adjustments to future assumptions may be made.

Another aid to the actuarial valuation process are audits of the actuarial valuations. The audits, performed by an independent actuary, review the valuation for accuracy and may provide independent opinions on the reasonableness of actuarial assumptions and actuarial methods used. The audits cover one or more valuations and may also cover the most recent experience study.

Accounting and Reporting Requirements

Section 105.661, RSMo, requires that plans prepare annual financial statements and obtain audits of those statements. Certain information regarding a DB plan's financial condition is reported in financial statements of the plan and the sponsoring government.

GASB standards establish accounting and reporting requirements for DB plans. GASB published these standards, which have governed pension plans in recent years, in 1994[4] and added additional disclosure requirements in 2007.[5]

The GASB requirements have been amended by new standards issued in 2012 that will be implemented by plans and sponsoring governments beginning in 2014 and 2015. The new GASB standards will significantly change the pension data available in plan and sponsoring government financial statements. Discussion of the new accounting and reporting requirements, as well as the anticipated impact on DB plans and the sponsoring governments, is included in the Recent GASB Accounting and Reporting Changes section.

Key Indicators of Financial Condition

A plan's governing board and sponsoring government(s) must work together to implement responsible design practices to ensure the plan remains in good financial condition and that payments to retirees and survivors are ultimately sustainable. Basic plan design features that promote good financial condition provide (1) levels of benefits that allow the government to attract and retain employees, and (2) contribution levels that are not overly burdensome on the government, but are sufficient to generate adequate reserves to pay future benefit payments (liabilities).

Plan data typically used to indicate and assess financial condition is primarily determined using complex actuarial calculations which in turn are guided by the selection of numerous assumptions and estimates of future events. Appropriate assumptions and reasonable estimates are essential elements for accurate assessment of a plan's financial condition. The actual financial condition of a plan will never match the estimated financial condition of a plan due to differences between a plan's actual experience and the assumptions and estimates.

Various plan data can be analyzed to evaluate a plan's financial condition. Several key indicators of plan financial condition include (1) funded ratio, (2) percentage of ARC paid, (3) ARC as a percentage of covered payroll and as a percentage of budget, (4) UAAL as a percentage of covered payroll, and (5) market and smoothed versus assumed investment returns. The relative importance of these indicators to each plan's financial condition may vary depending on the characteristics of the plan and the sponsoring government.

Accounting and reporting standards require some of these indicators to be published, but others are only reported voluntarily by some plans or not reported at all. These indicators should not be reviewed individually, but in combination with other indicators along with a plan's actuarial assumptions and policies. In addition, the indicators should not be reviewed at a single point in time, but trends in the indicators should be reviewed over an extended period. Comparing the financial condition between various plans is difficult because the indicators are based on varying actuarial assumptions and methods used by individual plans.

Funded Ratio

Funded ratio, the most often cited indicator of plan financial condition, is calculated using actuarial values of assets and accrued liabilities earned by employees as of the valuation date. In simple terms, the funded ratio is the percentage of the present value of future retirement benefit payments (accrued liabilities) previously earned by employees that are covered by plan assets as of a specific date. When a plan has not accumulated enough assets to cover expected benefit payments in future years based on service to date, the plan has UAAL. Actuarial methods are usually designed with a target of 100 percent funding, and a plan is considered fully funded if the plan's assets meet or exceed the plan's accrued liabilities.

There are widely varying viewpoints regarding what minimum funded ratio percentage indicates a plan is adequately funded. In the private business sector, the federal government considers plans with funded ratios below 80 percent to be at risk of default. This ratio has commonly been applied in the public retirement system community as a threshold for gauging the adequacy of plan funding. However, a July 2012 issue brief,[6] published by the American Academy of Actuaries, termed the 80 percent standard a "myth." The issue brief explains that the standard is widely but erroneously cited as a basis for whether a pension plan is financially sound, that there is no clear attribution as to its source, and that understanding a pension plan's financial health should not be reduced to a single measure such as its funded ratio. Several credit rating agencies view public employee plan funded ratios of 60 percent and below as extremely poor-funded and 90 percent and above as very well-funded; however, the credit rating agencies do not review the funded ratio in isolation. Some economists and public policy groups believe a plan must maintain peak funded ratios well above 100 percent during periods of strong economic growth before the plan can be considered adequately funded and sustainable during periods of weak economic growth or declining economic conditions.

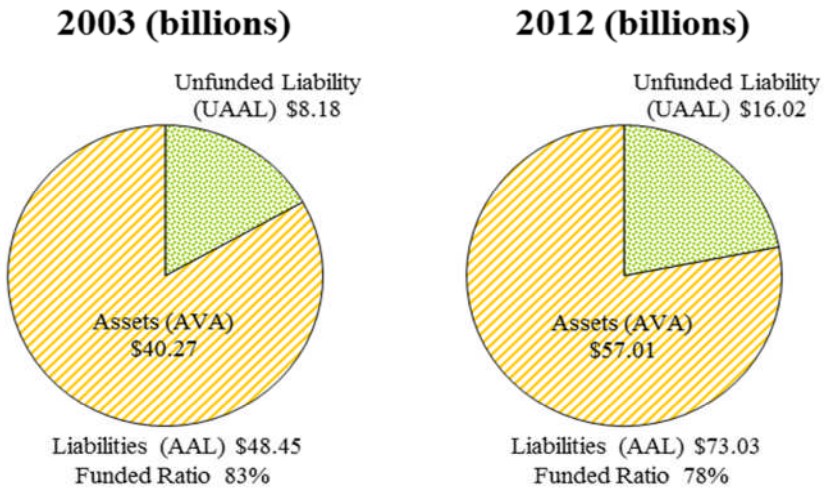
The funded ratio is best viewed over a number of years so that the stability (or upward/downward trend) of the ratio can be identified and evaluated. A decreasing funded ratio could indicate worsening financial condition, a declining ability to ultimately pay retirement benefits, and the possibility that employer/employee contributions may need to increase. An increasing funded ratio often indicates that a plan is making progress toward the overall funding goals that have been set by the governing board. However, the funded ratio should not be considered a single benchmark for plan financial condition, and should be reviewed along with other indicators and influences identified in this survey.

Figure 1 presents the aggregate actuarial values of assets, liabilities, UAAL, and funded ratios for the 89 plans as of 2003[7] and 2012.

[6] "The 80% Pension Funding Standard Myth," *Issue Brief*, The American Academy of Actuaries, July 2012, <http://www.actuary.org/files/80_Percent_Funding_IB_071912.pdf>, accessed on July 7, 2013, pp. 1-4.

[7] As of December 31, 2003, only 80 of the 89 plans existed or were reporting to the JCPER.

Figure 1: Missouri DB Plans: 2003 and 2012 Aggregate Actuarial Assets, Liabilities, UAAL, and Funded Ratio



The 2012 Missouri aggregate funded ratio of 78 percent is higher than aggregate funded ratios reported at the national level. A report issued by the Center for Retirement Research at Boston College[8] indicates an aggregate funded ratio of 73 percent nationwide in 2012, and a report issued by Wilshire Consulting[9] similarly indicates an aggregate funded ratio of 74 percent in 2012.

Figure 1 shows Missouri plans experienced a drop in aggregate funded ratio during the 10-year period, from 83 percent in 2003 to 78 percent in 2012. The Wilshire Consulting report also indicates national level funded ratios have declined fairly steadily from 89 percent in 2003 to 74 percent in 2012. The United States Government Accountability Office (GAO) reported, in a March 2012 study,[10] that funded ratios have declined nationwide due to poor investment returns in recent years, failure to fully fund the ARC, and benefit increases. Similarly, officials from the 15 selected plans indicated recent fluctuations in funded ratios occurred primarily due to market downturns, and changes to benefits and actuarial assumptions (e.g., lowered investment return assumptions or increased life expectancies).

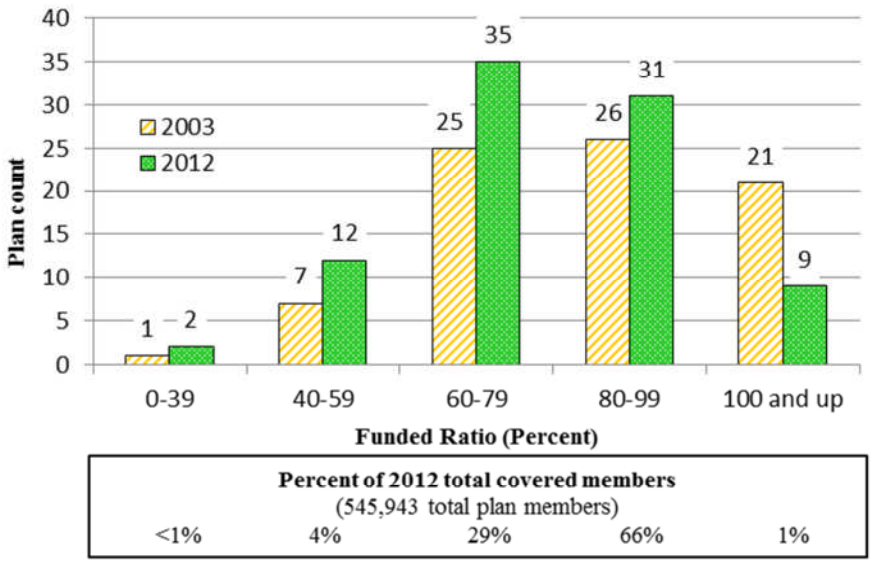
Czerwinski, "State and Local Government Pension Plans: Economic Downturn Spurs Efforts to Address Costs and Sustainability," GAO-12-322, United States Government Accountability Office, March 2, 2012, <http://www.gao.gov/products/GAO-12-322>, accessed on March 31, 2014, p. 13.

Figure 2 presents distributions of 2003 and 2012 funded ratios for the 89 plans.[11] While only 40 plans (45 percent) had funded ratios of 80 percent or higher for plan year 2012, those plans covered 67 percent of statewide membership. The Center for Retirement Research at Boston College[12] reported 33 percent of plans nationwide had funded ratios of 80 percent or higher for plan year 2012.

Figure 2: Missouri DB Plans: 2003 and 2012 Distribution of Funded Ratios



Funded ratios for each of the 89 plans for certain plan years during the period 2002 to 2012 are presented in Appendix B and Appendix C. These funded ratios ranged from 10 percent (Cedar Hill Fire Protection District Length of Service Awards Program) to 164 percent (Maplewood Police & Fire Retirement Fund). Ten-year comparative schedules of funded ratios for each of the 15 selected plans are presented in Appendix A, Chart 2. Funded ratios of these plans for 2012 ranged from 24.70 percent (Missouri State Employees' Retirement System - Judicial Plan) to 91.26 percent (Sheriff's Retirement System).

We asked officials of the 15 selected plans to explain any unique issues affecting their plan's funded ratio. Their responses are included in Appendix A, Responses to Certain Survey Items. For example, Missouri State Employees' Retirement System officials indicated the funded ratio of the Judicial Plan is low because prior to 1998, the plan used the pay-as-you-go funding method. These officials said the plan changed to an actuarially calculated funding method in 1998 and the UAAL is expected to steadily

[11] As of December 31, 2003, only 80 of the 89 plans existed or were reporting to the JCPER.
[12] Alicia H. Munnell, Jean-Pierre Aubry, Josh Hurwitz, and Madeline Medenica, "The Funding of State and Local Pensions: 2012-2016," *State and Local Pension Plans*, Number 32, Center for Retirement Research at Boston College, Chestnut Hill, Ma., July 2013, p. 2.

decrease over time. Officials from another plan with a low funded ratio, Missouri Department of Transportation & Highway Patrol Employees' Retirement System, indicated that until 1976, the plan was not funded at the actuarially recommended contribution amounts, benefit increases were not adequately funded, employee contributions were refunded without provision for replacement assets, and the plan first hired management professionals knowledgeable of pension fund operations in 1988 and investment professionals beginning in 1997.

Additionally, several plans are funded by set fees or have unique contribution sources or restrictions that could result in actual contributions differing from ARC. Our survey of the 15 selected plans noted the County Employees' Retirement Fund, Kansas City Public School Retirement System, Prosecuting Attorneys' & Circuit Attorneys' Retirement System, Public Education Employees' Retirement System, Public School Retirement System, and the Sheriff's Retirement System all have unique contribution sources or restrictions impacting funded ratios.

Guidelines or Criteria

Chapter 105, RSMo, requires consideration of funded ratios for all public retirement plans. For example when substantial plan benefit changes are proposed, Section 105.665.2(2), RSMo, requires an actuarial cost study that fully funds UAAL within 30 years or less. As a result, a retirement plan anticipating substantial changes must demonstrate the plan is capable of attaining a 100 percent funded ratio within 30 years. Section 105.684, RSMo, states for most plans, there should be no retirement benefit increases unless the plan's actuary has determined the funded ratio is at least 80 percent and will not be less than 75 percent after the benefit increase. The section also requires most plans with a funded ratio below 60 percent to prepare an accelerated contribution schedule based on a descending (closed) amortization period. Section 105.683, RSMo, states if a plan's funded ratio is below 60 percent and has been descending for 5 consecutive years, and the sponsoring government has not paid 100 percent of the ARC for 5 years, the sponsoring government can be considered delinquent in making contribution payments. The law provides that certain plans in this situation can intercept state payments due to the sponsoring government in the amount of 25 percent of the contribution deficiency. State laws specific to certain plans also contain requirements regarding funded ratios.

The JCPER monitors funded ratios annually and maintains a watch list of each DB plan with either market or actuarial value funded ratios of 70 percent or less. JCPER officials indicated the monitoring threshold was developed based on 2003 information from a credit rating agency. As of November 2013, the watch list included 24 plans with funded ratios ranging from 10 percent to 69 percent.

Percentage of ARC Paid

Contributions are paid by the sponsoring government and/or employees. For plan year 2012, contributions to the 89 plans totaled $2.65 billion, with

$1.78 billion from the sponsoring governments and $870 million from employees. About half of the plans received contributions solely from the sponsoring governments (non-contributory plans), and half received contributions from both the sponsoring governments and employees (contributory plans). For some plans, employee contributions were significant. For example, $761 million (87 percent) of the $870 million employee contributions, was paid by members of the Public Education Employees' Retirement System and the Public School Retirement System. Of the Missouri contributory plans, 2012 employee contributions for 26 plans ranged from 20 percent to 50 percent of total plan contributions. Many plans, including 7 of the 15 selected plans, have recently implemented or increased employee contribution requirements.

Actual contributions as a percentage of ARC, or percentage of ARC paid, indicates the extent the sponsoring government is making the employer contribution payments as recommended by the actuary. This factor measures an employer's commitment to achieving the plan's overall funding goals. A Government Finance Officers Association (GFOA)[13] best practice guide recommends that "under no circumstance should state and local government plan sponsors engage in pension contribution holidays or make insufficient contributions. When employers skip an actuarially required contribution or make a smaller payment than required, they defer that cost to the future and jeopardize the long-term funding of the plan. When governing bodies arbitrarily reduce contributions to a plan, the resulting systemic underfunding ensures future financial shortfalls and places the burden for that shortfall on future taxpayers. These types of funding decisions compound future funding problems and are, in many instances, a leading cause of funding shortfalls." When a plan's contributions are funded by a source other than employer and employee contributions, such as fees or specially levied taxes, the percentage of ARC paid could identify flaws in the funding design of the plan.

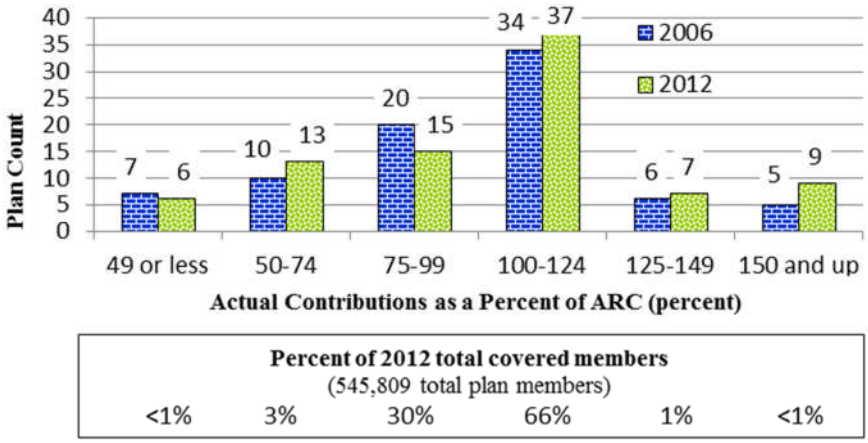
A plan that is consistently receiving contributions that equal 100 percent or more of ARC from year to year is more likely to achieve overall funding goals. A plan that consistently receives less than 100 percent of ARC has the potential of long-term funding shortfalls and ultimately poor financial condition. There is a relationship between a plan's funded status and the ARC. Generally, when a plan's funded status improves, the ARC decreases; and when the funded status declines, the ARC increases. Furthermore, the ARC is dependent on various assumptions approved by a plan's governing board; therefore, when changes to assumptions are made, the ARC likewise

[13] "Responsible Management and Design Practices for Defined Benefit Pension Plans," Government Finance Officers Association, October 2010, <http://www.gfoa.org/responsible-management-and-design-practices-defined-benefit-pension-plans>, accessed on June 24, 2014, p. 1.

changes. A plan's governing board can control the ARC through changes in assumptions.

Figure 3 shows a distribution of 2006 and 2012 actual contributions as a percentage of ARC for 87 of the 89 plans.[14] In 2012, contributions were not required for two plans. The figure shows 53 plans, or 61 percent, received 100 percent or more of the ARC in 2012. These plans cover 67 percent of statewide membership. A total of 34 plans, covering 33 percent of statewide membership, received less than 100 percent of the ARC in 2012; with 10 of these plans in the 90 percent to 99 percent range.

Figure 3: Missouri DB Plans: 2006 and 2012 Distribution of Percentage of ARC Paid



Ten-year comparative schedules of ARC, actual contributions, and percentage of ARC paid are presented for the each of the 15 selected plans in Appendix A, Chart 4. For 2012, 10 of the 15 plans received at least 100 percent of ARC. The percent of ARC paid for the 15 selected plans in 2012 ranged from 68 percent (Kansas City Public School Retirement System) to 144 percent (Prosecuting Attorneys' & Circuit Attorneys' Retirement System). Over the 10 years, 10 of the plans' contributions have consistently met or exceeded the ARC. Of the 5 plans that have not consistently met or exceeded ARC, 3 have special funding sources or statutory limitations that prevented the plan from receiving 100 percent of the ARC. Officials from one plan indicated they will begin receiving 100 percent of the ARC in 2014, and officials from the other plan indicated they have received at or above 90 percent of the ARC since 2007.

Actual percentage of ARC paid for each of the plans is presented in Appendix B and Appendix C. Our analysis of 2006 and 2012 percentages for these plans showed the percentage of ARC paid increased for approximately 40 percent of plans, decreased for approximately 40 percent of plans, and stayed the same for approximately 20 percent of the plans.

[14] As of December 31, 2006, only 82 of the 89 plans existed or were reporting to the JCPER.

A review of the aggregate percentage of ARC paid shows the 87 Missouri plans received 94 percent of ARC in 2012, an increase from 84 percent of ARC in 2006. Two of these plans, Public School Retirement System and Public Education Employee Retirement System, which together cover approximately 44 percent of statewide membership, had a percentage of contributions paid, respectively, of 71 percent and 77 percent in 2006, and 86 percent and 100 percent in 2012. The contribution percentage increased to 100 percent in 2013 for the Public School Retirement System. Lower percentages in earlier years for these two systems resulted from statutory limitations on increases in contribution rates. While reviewing aggregate data is informational, it can mask the significance of the extent that smaller plans are not receiving ARC.

In aggregate, Missouri plans have received higher percentages of ARC paid than at the national level. Data reported by the Center for Retirement Research at Boston College[15] indicates national-level aggregate percentage of ARC paid decreased from approximately 100 percent in 2001, to approximately 83 percent in 2006, and to approximately 80 percent in 2012.

Outgoing GASB standards require plans to calculate target contribution amounts based on ARC; however, the standards do not require that employers actually pay the ARC amount. Contribution payments for some plans are controlled by state or local laws or other contractual agreements. Of the 15 selected plans, state law requires contributions of 100 percent of ARC for 4 plans; and each of those plans received at least 100 percent of ARC during 2012. For 3 plans, state law requires calculation of contributions based on ARC, but actual contribution rates and/or annual rate increases are capped. As a result, 1 plan received only 86 percent in 2012. For 4 other plans, state law requires contributions of specific rates or fees, rather than ARC-based contributions. Two of these 4 plans received at least 100 percent of ARC in 2012, while 2 did not. State law governing the other 4 plans contain no such requirements regarding contributions. Two of the 4 plans received 100 percent of ARC, and the other 2 received less. As discussed at the Recent GASB Accounting and Reporting Changes section, the GASB-required methods of calculating the ARC are being eliminated for DB plans.

ARC as a Percentage of Covered Payroll and as a Percentage of Budget

For those plans primarily funded by employer contributions, ARC as a percentage of covered payroll (also referred to as contribution rate) or as a percentage of the government's budget are measures of stress the required contribution level could assert on the government's budget and operations. Rising ratios could indicate cause for concern. Long-term rising ratios could indicate a number of problems such as plan design features or policies that

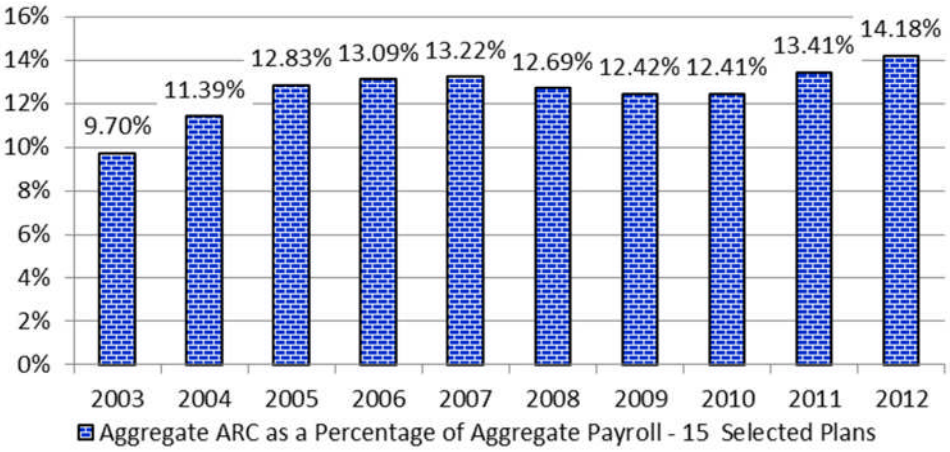
[15] Alicia H. Munnell, Jean-Pierre Aubry, Josh Hurwitz, and Madeline Medenica, "The Funding of State and Local Pensions: 2012-2016," *State and Local Pension Plans*, Number 32, Center for Retirement Research at Boston College, Chestnut Hill, Ma., July 2013, p. 3.

may not be correctly identifying and offsetting future pension liabilities. Short-term fluctuating ratios could be related to economic growth and decline. These ratios alone do not provide a full picture of a plan's financial health, but should be reviewed over a period of time and in combination with other indicators of financial condition. GASB reporting standards require plans to disclose the ARC as a percentage of payroll; however, there are no reporting requirements for ARC as a percentage of budget. While some plans may voluntarily report the ARC as a percentage of budget, it is not commonly reported and would be difficult for multiple-employer plans to report.

Certain factors could mitigate the significance of this ratio for some plans. For example, the cost of funding a plan that covers only a small portion of the sponsoring government's work force and/or represents only a small portion of the government's overall budget, would not likely have a significant impact on the government's budget even if these ratios are high.

Figure 4 presents 2003 through 2012 aggregate ARC as a percentage of payroll for the 15 selected plans. During this period, the aggregate rates for these plans trended upward by approximately 4.5 percent. While not necessarily true in all instances, such trends could indicate additional stress on the governments' budgets and operations.

Figure 4: 15 Selected Plans: 2003 to 2012 Aggregate ARC as a Percentage of Payroll



Ten-year comparative schedules of ARC as a percentage of payroll are presented for each of the 15 selected plans in Appendix A, Chart 4. In 2012, the rates for the 15 selected plans ranged from 4.94 percent (County Employees' Retirement Fund) to 58.6 percent (Missouri Department of Transportation & Highway Patrol Employees' Retirement System). Officials from the 15 selected plans indicated significant changes to contribution rates in recent years occurred primarily due to market downturns, differences between expected and actual payroll expense and employee counts, and changes to benefits and actuarial assumptions.

The 2012, 2010, and 2006 ARC as a percentage of payroll for each of the plans is presented in Appendix C. Of the 87 plans having ARC, only 83 plans had active employees with covered payroll. The ratios of the 83 plans for plan year 2012 ranged from 2.46 percent to 167.39 percent. Our analysis of available data for the applicable 83 plans found the aggregate ARC as a percentage of payroll was nearly the same as both the 2006 and 2012 percentages for the 15 selected plans. In addition, our review of the 2012 percentages noted most plan members were covered by plans with ARC as a percentage of payroll of less than 15 percent.

A Center for Retirement Research at Boston College[16] report indicates the national-level ARC as a percentage of payroll has increased annually from approximately 7 percent in 2003 and 11 percent in 2006, to 15.3 percent in 2012; with the most significant increases occurring during the periods 2003 to 2005 and 2010 to 2012, similar to the trend of increases for the 15 plans.

Rates of ARC as a percentage of state or local budget indicate the impact the ARC has on the sponsoring government's discretionary spending power. A report issued by Fitch Ratings[17] indicates, "assessing the contributions against the general fund, in the case of most entities, provides an indication of the affordability of the pension commitments and whether spending for pensions is or could be expected to start crowding out spending for other needs." A Fitch official indicated Fitch expects higher pension costs at the local level given the labor intensive nature of local services, and that pressure on a government's rating may arise when it becomes clear pension costs are being deferred or are reducing liquidity and financial flexibility.

Although information is not widely available regarding the impact of pension costs on governments' general funds, the following data presents pension cost data in relationship to certain governments' total budgets. A study performed by the National Association of State Retirement Administrators[18] of 2010 data indicated state and local spending on public pensions was 2.8 percent of total government spending. For Missouri state employees, required state contributions to the Missouri State Employees' Retirement System and Missouri Department of Transportation & Highway Patrol Employees' Retirement System for approximately 59,200 state

[18] Keith Brainard and Alex Brown, "Issue Brief: State and Local Government Spending on Public Employee Retirement Systems," National Association of State Retirement Administrators, Updated May 2013, <http://www.nasra.org/content.asp?admin=Y&contentid=116>, accessed on March 27, 2014, p. 1.

employees during fiscal year 2012 totaled approximately $455 million, or less than 2 percent of the state's total budgeted expenditures.

UAAL as a Percentage of Covered Payroll

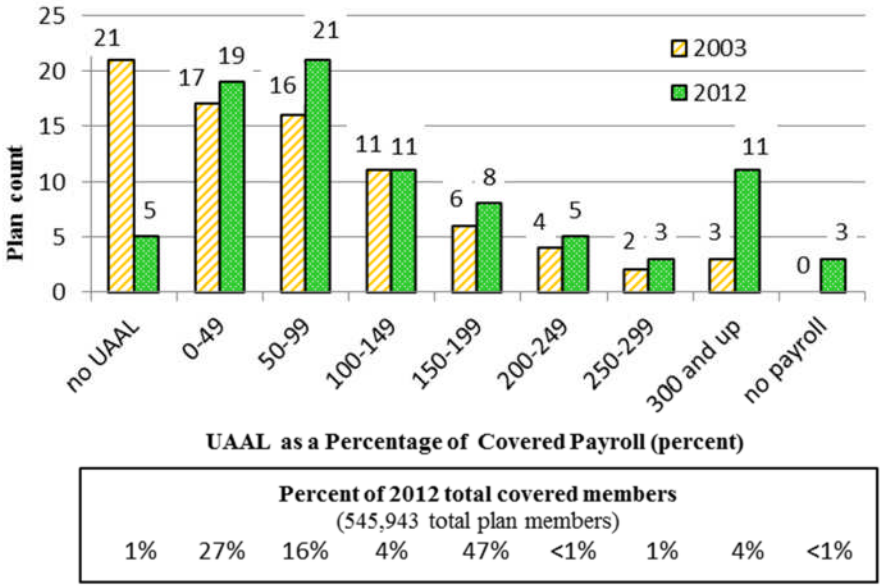
As noted in Figure 1 and Figure 2, 80 of the 89 plans are not fully funded, with an aggregate UAAL of approximately $16 billion as of plan year 2012. Calculating the UAAL as a percentage of covered payroll provides an indicator to help evaluate the stress the UAAL places on the sponsoring government's budget. This analysis compares UAAL to the sponsoring government's annual payroll expense for covered employees. This indicator, which is required by accounting and reporting standards to be reported for 6 years, is best reviewed over a number of years. An upward trend in this percentage could be an indication of worsening financial condition, and a downward trend could indicate improvement. Higher ratios may indicate a plan has weaker financial condition and the sponsoring government might have trouble making payments toward reducing the unfunded liability.

The trends in the UAAL as a percentage of payroll must be reviewed in conjunction with other indicators of financial position and other influences because, reviewed alone, it is not likely to provide a complete and accurate assessment of financial position. A number of influences including the economy, payroll trends, and proportion of active members to total plan members can impact this ratio. The economy can have a significant impact on the UAAL, and has recently exerted upward pressure on the ratio. Payroll growth is typically expected by most plans; however, during the recent recession, limited payroll increases and hiring freezes implemented by many sponsoring governments have also exerted upward pressure on the ratio. Finally, a plan that is "mature" or has a lower ratio of active members to total members, has a smaller payroll base against which to allocate the UAAL, exerting upward pressure on the ratio.

Figure 5 presents distributions of 2003 and 2012 UAAL as a percentage of payroll for the 86 plans that reported applicable data.[19] In 2012, 59 of the 86 (69 percent) plans, covering 94 percent of statewide membership, had UAAL as a percentage of payroll less than 200 percent, with 8 plans covering approximately 47 percent of statewide membership in the 150 to 199 percent range. Most other plans covering the majority of remaining statewide membership had a percentage less than 150 percent. A Wilshire Consulting[20] report indicates the national median UAAL as a percentage of payroll for 2012 was slightly over 150 percent.

[19] As of December 31, 2003, only 80 of the 86 plans existed or were reporting to the JCPER.
[20] Russell J. Walker, "2014 Report on State Retirement Systems: Funding Levels and Asset Allocation," Wilshire Associates Incorporated, Santa Monica, Ca., February 26, 2014, p. 10.

Figure 5: Missouri DB Plans: 2003 and 2012 Distribution of UAAL as a Percentage of Payroll



UAAL as a percentage of payroll for the 89 plans for plan years 2002 and 2011 is presented in Appendix C. UAAL as a percentage of payroll for the 15 selected plans, for certain years during the years 2004 through 2012, are presented in Appendix A, Chart 3. This percentage for 2012 ranged from 42.35 percent (County Employees' Retirement Fund) to 678.66 percent (Missouri State Employees' Retirement System - Judicial Plan) for these plans.

Market and Smoothed versus Assumed Investment Returns

Although frequently not reported by retirement plans, a comparison of the market-valued and smoothed investment returns to the assumed investment rate of return provides a good overview of a plan's long-term achievement of projected investment income. Investment income often provides the largest portion of DB plan assets; therefore, a plan should achieve at least the assumed investment rate of return over the long term to properly fund benefit payments. Investment returns can vary significantly from year to year depending on a plan's investment strategy and general economic conditions. As a result, a comparison of annualized market to assumed rates should be performed over an extended period. Analyses of annualized market to assumed rates are included in the Key Factors that Influence Financial Condition, Actuarial Assumptions section.

Key Factors that Influence Financial Condition

Numerous factors influence the financial condition of DB plans. Some factors are external influences a plan cannot control, but a plan must establish policies that anticipate and control the impact of those influences. Others factors are internal decisions made by a plan or sponsoring government. Setting policies to respond to these factors are key responsibilities of a plan's governing board.

The process of achieving or maintaining good financial condition of a DB plan, both on a short-term and long-term basis, is complex and can be challenging for a plan's governing board and the sponsoring government. The calculations that estimate liabilities and determine required contributions require the use of actuarial specialists. In addition, actuarial calculations rely on numerous judgments by a plan's governing board (usually made with the assistance of an actuarial consultant) regarding expected future events of the next 10, 20, 30, or even more years. In most cases, a governing board does not have the ability to control or change these future events. Small changes in some assumptions can have a big impact on the actuarial calculations and, ultimately, the perceived financial condition of a plan.

Officials from plans responding to our survey question regarding the primary cause(s) of recent funding level fluctuations indicated the weak economy and financial market downturn, as well as changes to benefits and actuarial assumptions, were the primary causes. Several officials indicated that 2013 and 2014 investment returns were much stronger and have resulted in improved financial condition. These officials also indicated the plan governing boards and/or sponsoring governments had implemented significant changes to benefit structures, actuarial assumptions, investment policies, vesting periods, and/or employee contributions to strengthen the long-term financial condition of the plans.

We identified factors or influences having the greatest impact on plans. Consideration of these various factors is necessary when evaluating a plan's financial condition.

Economy and Investment Performance

Investment performance has a significant impact on a plan's financial condition because investment earnings are a significant source of plan assets. Reports issued by the GAO[21] and the National Institute on Retirement Security[22] indicate investment returns generate more than half of pension fund asset increases nationwide.

The national and global economy can have a dramatic impact on investment performance and the financial condition of retirement plans. Economic expansions that generate investment returns above a plan's assumed

[21] Barbara D. Bovbjerg and Stanley J. Czerwinski, "State and Local Government Pension Plans: Economic Downturn Spurs Efforts to Address Costs and Sustainability," GAO-12-322, United States Government Accountability Office, March 2, 2012, <http://www.gao.gov/products/GAO-12-322>, accessed on March 31, 2014, p. 8.

[22] Ilana Boivie, "Pensionomics 2012: Measuring the Economic Impact of DB Pension Expenditures," National Institute on Retirement Security, March 6, 2012, <http://www.nirsonline.org/index.php?option=com_content&task=view&id=684&Itemid=48>, accessed on April 3, 2014, p. 3.

investment rate of return can increase the plan's funded ratio, decrease the unfunded liability, and decrease required contributions. Economic recessions that generate investment returns below the assumed investment rate of return will have the opposite impact on a plan's actuarially determined values and contributions.

The impact of the economy would be best reviewed by examining a plan's rate of return on investments; however, since the outgoing GASB standards did not require reporting of investment returns, such information is not readily available at the statewide or national level. We surveyed the 15 selected plans for this data. Ten-year comparative schedules of investment returns for the 15 selected plans are presented in Appendix A, Chart 7. These charts generally demonstrate that plan investment returns increased and decreased throughout this period in a pattern consistent with the economy's expansion and recession. The recent economic recession is reflected in the decreased investment returns and funded ratios of many plans. Because many plans have adopted asset smoothing policies, the losses incurred during the economic recession are recognized over a period of time, and therefore have not yet been fully recognized and reflected in the plans' annualized investment returns and funded ratios. For plans that have adopted asset smoothing policies, despite the economic recovery, annualized investment returns and funded ratios may continue to decrease until the losses are fully absorbed over a period of time (usually 3 to 5 years). See additional information regarding longer-term returns for certain plans at the Actuarial Assumptions, Economic Assumption and Policies section.

Because the health of the economy significantly impacts investment performance and the financial condition of a retirement plan over an extended period of time, a long-term outlook of the economy and development of a reasonable assumed investment rate of return is necessary for managing pension funds. Various best practices recommend plan administrators resist short-term reactions to market variations either positive or negative.

Governing Board

Adequate board governance is a key component of a properly managed retirement plan. Board governance considerations include composition, competence, selection, and training of board members. The authorizing statutes and/or sponsoring government generally establish the composition of a plan's governing board. The GFOA[23] recommends that "DB plan sponsors should pay particular attention to the composition of the Board of Trustees and make efforts to ensure that varied interests are represented and

[23] "Design Elements of Defined Benefit Retirement Plans," Government Finance Officers Association, February 2008, <http://www.gfoa.org/design-elements-defined-benefit-retirement-plans>, accessed on June 24, 2014, p. 2.

balanced among those of employers, employees, retirees, taxpayers and unions, if applicable. Criteria for governing board selection are crucial to ensure a competent board oversees the policy development of all plan activities." The GFOA further recommends board members receive adequate training.

Information about the board members for each of the 89 plans is included in Appendix A, Chart 1 and Appendix C. Many plans have governing boards that include representation from the plans' members and various non-member individuals. However, some plans had less diverse representation.

A review of governing board composition for the 15 selected plans indicates some plans may not have the recommended representation of varied and balanced interests. Plans classify and report the number of board members to the JCPER in 5 different categories including active plan members, retired plan members, non-plan members, appointed, and other. For the 15 selected plans, 10 plans' governing boards include trustees from 3 or more of the categories, 3 plans include trustees from 2 categories, and 2 plans include trustees from only 1 category.

Benefit Structure

A plan's benefit structure determines a member's benefit payment upon retirement and related plan liabilities. A 2010 GFOA advisory[24] indicates when benefit structures are not designed appropriately, they can compound funding problems; and that benefit structures, in many instances, are a leading cause of funding shortfalls. To contain costs associated with retirement benefits, the advisory recommends a benefit structure should include (1) retirement ages reflecting demographic trends for life expectancy, (2) exclusion of extraordinary or spiked income amounts, (3) avoidance of awarding retroactive benefit increases, (4) careful assessment of the cost of deferred retirement options and purchase of service credits, and (5) elimination of automatic COLA. Ultimately all benefits should be evaluated actuarially on a regular basis to assess both the financial condition of a plan and the advisability of implementing any benefit structure changes.

DB plans can significantly reduce costs by making changes to benefit structures. Such changes have been made across the country in recent years to address declining funded ratios exacerbated by the recent economic recession. National studies performed by the GAO[25] and the Center for State

[24] "Responsible Management and Design Practices for Defined Benefit Pension Plans," Government Finance Officers Association, October 2010, <http://www.gfoa.org/responsible-management-and-design-practices-defined-benefit-pension-plans>, accessed on June 24, 2014, p. 1.

[25] Barbara D. Bovbjerg and Stanley J. Czerwinski, "State and Local Government Pension Plans: Economic Downturn Spurs Efforts to Address Costs and Sustainability," GAO-12-322, United States Government Accountability Office, March 2, 2012, <http://www.gao.gov/products/GAO-12-322>, accessed on March 31, 2014, pp. 18-22.

and Local Government Excellence[26] indicate throughout the United States, pension plans have enacted benefit structure changes in recent years, primarily for new employees, by adjusting the benefit formula, raising the retirement age or length of work service requirements, and limiting or eliminating retiree COLA. These benefit structure changes were frequently paired with increased or new employee contribution requirements.

Many Missouri plans have also experienced similar changes, primarily for new employees. Officials from the 15 selected plans surveyed indicated benefit changes included increased retirement ages, reduced survivor benefits, elimination of the subsidy for purchase of prior work history, lengthened vesting periods, and limitation of COLA. Officials from some of these plans also indicated employee contributions had been implemented or increased.

In addition to benefit structure changes, some sponsoring governments in other states previously using only DB plans have moved to defined contribution plans, which shift all future investment risk to the members; or hybrid plans, which include both defined benefit and defined contribution components to limit future liabilities. Officials of the Kansas City Employees' Retirement Plan indicated the plan had implemented changes in which newly elected officials and judges are now required to participate in a defined contribution plan instead of the DB plan.

Because various factors of the benefit structure are considered contractual between the employee and employer, most changes to the benefit structure will only affect new employees. Therefore, the impact of changes to the benefit structure may take many years before the resulting impact on a plan's overall financial health is seen. A summary of the benefit structures and employee contribution requirements of each of the 15 selected plans is included at Appendix A, Chart 9.

Investment Policy

Our review of best practices, guidelines, and other published articles indicates a sufficiently designed investment policy is essential due to the significance of investment income to a plan's assets. DB plans usually have an investment cost advantage over other types of plans. Because DB plan assets are usually pooled into large funds, investing activity can be conducted more efficiently using a comprehensive investment plan. Section 105.688, RSMo, provides that plan assets should be invested using the same care, skill, prudence, and diligence that a prudent person acting in a similar capacity would use.

[26] "Survey Findings State and Local Government Workforce: 2013 Trends," Center for State and Local Government Excellence, May 2013, <http://slge.org/wp-content/uploads/2013/05/Workforce-Trends-2013_13-3541.pdf>, accessed on April 8, 2014, p. 4.

Choosing an appropriate investment strategy for a DB plan should be driven by the level of risk that the plan can accept for the security and liquidity of the investment principal. A plan that chooses an investment strategy involving higher risk would also need to establish an investment policy that is designed to control such risk. Pension investing is normally dependent on the actuarial "age" of a plan. A "younger" plan, in a phase of acquiring assets and funding new liabilities, can typically accept more investment risk because there is a long time frame over which to absorb market gains and losses. A more mature plan, which is reaching a phase of distributing a significant portion of the assets to retirees, would likely need to invest in instruments that do not put the principal of the investments at significant risk of loss and are more liquid. In addition, the assumed investment rate of return must be consistent with the chosen investment policy.

Asset allocation is one of the most important aspects of the investment strategy. The purpose is to manage overall investment risk by spreading the investment portfolio across chosen types of investments of varying degrees of risk. The specific allocation choices should be driven by other governing board policies such as long-term funding goals and a plan's cash flow needs. Also, asset allocation should consider the degree of risk a plan can accept and projected investment returns. A plan typically chooses percentage targets for allocating the plan's assets between multiple types of instruments. On an ongoing basis, a plan should monitor and rebalance assets between investment types to ensure the percentage targets are maintained. The asset allocation of the 15 selected plans for 2012, as reported to the JCPER, are presented in Appendix A, Chart 6. The officials of each plan exercise judgment when categorizing the plan's assets into the 11 asset classifications allowed by the JCPER; and as a result, the reported asset classifications may not be comparable among the plans. In addition, the data reported is based on actual investments and may not be reflective of the plans' target asset allocations.

The investment policies should be designed to ensure investments are diverse across investment types, credit ratings, issuers, industries, and countries. In addition, investment managers, both internal and external, should be properly monitored for performance and compliance with fiduciary responsibilities. Also, investment policies should help ensure investment costs are minimized within the constraints of the chosen investment allocation and other policies, and provide for monitoring of investment performance and comparison to a set of hypothetical investments (benchmarks) to ensure the investment strategy is achieving performance objectives.

Contributions and Funding Policies

Contributions play an integral role in a plan's funding policy and the financial condition of a plan. If the policies related to contributions and funding are not properly designed and adhered to, the financial condition of a plan can be significantly impacted.

The GFOA recommends funding guidelines[27] and sustainable funding practices[28] based on actuarial valuation studies. These practices include a long-term commitment to a reasonable funding policy. A properly designed policy provides reasonable assurance the cost of benefits will be funded in an equitable and sustainable manner. Contributions should be made in amounts recommended by the actuarial valuation and should be calculated to balance the conflicting goals of minimizing fluctuations in the contribution amounts and equitably allocating pension costs over the employees' active work history.

Sponsoring governments should commit to making all required employer contributions each year. When a sponsoring government does not make 100 percent of its required contributions, a plan is less able to invest sufficient monies to properly fund future benefit payments to the members.

Actuarial Assumptions

A plan's management and governing board must develop assumptions to estimate future results, because many factors that determine the costs of future benefit payments and the growth of the plan's assets are unknown. The selection of actuarial assumptions and methods significantly impacts the financial condition of a plan.

Actuarial assumptions include judgments about future events over an extended time period and must be carefully selected and diligently monitored to ensure the financial condition of a plan is not adversely impacted. An example of how a change in an economic assumption can impact plan financial condition can be seen at the Missouri State Employees' Retirement System - Judicial Plan. Plan officials indicated a temporary decrease to the wage inflation assumption from 4 percent to 0 percent in the 2009, 2010, and 2011 actuarial valuations, resulted in a $5 million decrease in actuarial accrued liability (and a decrease in UAAL).

Governing boards usually select and approve actuarial assumptions with the assistance of actuarial and investment advisors. To assist decision making, comparative analyses of the possible impact on plan financial condition from each assumption may be obtained from the actuary. For example, the Missouri State Employees' Retirement System-MSEP actuarial valuation as of June 30, 2012, estimated funded ratios of 66 percent, 73 percent, and 81 percent would occur if assumed investment rates of return were adjusted to 7 percent, 8 percent, and 9 percent, respectively.

[27] "Funding Defined Benefit Pensions," Government Finance Officers Association, June 2012, <http://www.gfoa.org/funding-defined-benefit-pensions>, accessed on June 24, 2014, p. 1.
[28] "Sustainable Funding Practices of Defined Benefit Pension Plans," Government Finance Officers Association, October 2009, <http://gfoa.org/sustainable-funding-practices-defined-benefit-pension-plans>, accessed on June 24, 2014, pp. 1-3.

The GFOA[29] indicates in a best practice guide, "The reliability of an actuarial valuation also depends on the use of reasonable methods and assumptions. Experience studies, performed no less frequently than every five years, can help to ensure the assumptions are in line with the plan's demographic and economic experience, or can be used as a guide to make necessary changes. Likewise, a comprehensive audit of the plan's actuarial valuations performed by an independent actuary at least once every five to eight years can be used to evaluate the appropriateness of the actuarial methods, assumptions, and their application." Another GFOA[30] best practice guide encourages the performance of actuarial audits by an incoming actuary when a plan begins using a new actuarial consultant and indicates plans frequently have such audits performed.

Retirement systems are not required to obtain these reports and studies unless state or local laws include such requirements. Missouri statutes do not require retirement systems to obtain actuarial audits; however, periodic experience studies are required, usually every 5 years, for the state employee retirement systems, the large teacher retirement systems, and some large police and fire retirement systems. Thirteen of the 15 selected plans obtained actuarial audits or alternative reviews, and experience studies or alternative studies. Officials from one of the two remaining plans indicated they do not consider these audits/studies necessary or cost effective because of their plan's high funded ratio and limited size. Instead, this plan periodically requires its actuary to perform additional reviews of selected assumptions.

Economic Assumptions and Policies

Key economic assumptions include assumed investment rate of return, price inflation, and wage inflation. Even a slight change in economic assumptions can have huge impact. For example, an increase in assumed investment rate of return will decrease required contribution amounts and increase the funded ratio. However a decrease in assumed investment rate of return will require additional contributions and will decrease the funded ratio.

Assumed Investment Rate of Return

The assumed investment rate of return is the long-term rate of return expected on plan assets, and is often cited as the assumption having the most impact on plan financial condition. There is significant debate among pension and public finance professionals regarding the most appropriate assumed investment rate of return (discount rate) to use when valuing pension liabilities (future benefit payments). We discuss key issues over that debate in the Risk-Free Discount Rate Debate section.

[29] "The Role of the Actuarial Valuation Report in Plan Funding," Government Finance Officers Association, February 2013, <http://www.gfoa.org/role-actuarial-valuation-report-plan-funding>, accessed on June 24, 2014, p. 3.
[30] "Actuarial Audits," Government Finance Officers Association, May 2014, <http://www.gfoa.org/actuarial-audits>, accessed on May 30, 2014, p. 2.

The assumed investment rate of return is typically also used as the discount rate when a plan's actuary calculates the present value of plan liabilities through a method called discounting. When setting the rate, a plan considers current and past economic conditions, long-term economic outlook predictions, expected inflation, past investment performance, investment policies, and asset allocation. This rate is the sum of the assumed real rate of return plus assumed price inflation, with the assumed real rate of return sometimes referred to as the "spread." A same or similar rate is typically assumed each year due to the long-term nature of the rate.

Because the rate used determines the present value of plan liabilities extending far into the future, it significantly impacts the perceived plan financial condition and the ARC. A higher rate creates a smaller present value of liabilities and UAAL, and lower ARC. Conversely, a lower rate creates a higher present value of liabilities and UAAL, and higher ARC. If the rate is not set realistically and reevaluated regularly, over time the funded ratio and contributions could become inconsistent with the benefit payment liability of a plan and could either overfund or jeopardize the financial condition of the plan. The National Association of State Retirement Administrators (NASRA) explains in an issue brief,[31] "An investment return assumption that is set too low will overstate liabilities and costs, causing current taxpayers to be overcharged and future taxpayers to be undercharged. A rate set too high will understate liabilities, undercharging current taxpayers, at the expense of future taxpayers. An assumption that is significantly wrong in either direction will cause a misallocation of resources and unfairly distribute costs among generations of taxpayers." Similarly, the GFOA states in an advisory,[32] "Unrealistically high investment return assumptions are likely to result in a chronically declining funded ratio and higher contributions in the future. Caution should be exercised to ensure the investment return assumption reflects the reasonably expected returns of the plans asset allocation over a reasonable period of time."

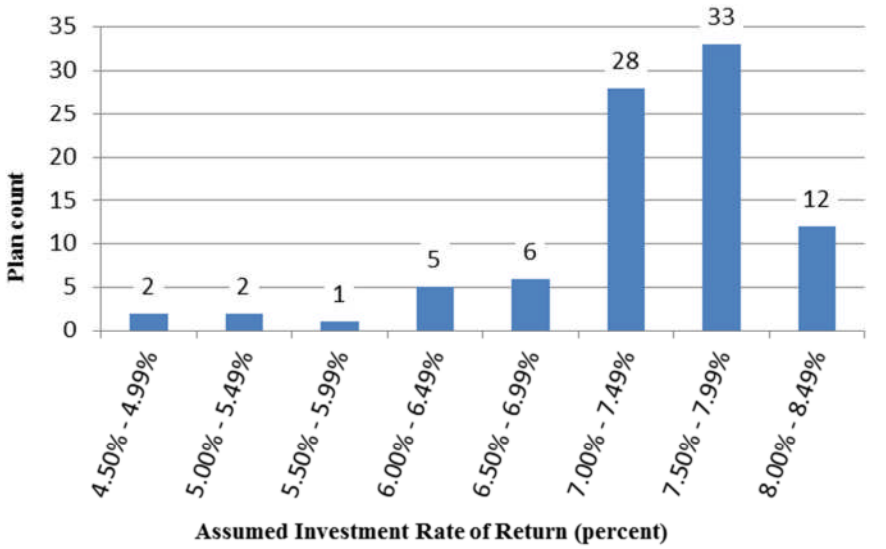
Numerous articles indicate the most common assumed investment rate of return used by plans nationwide range from 7.5 to 8.5 percent. The articles also indicate the average assumed rate used by plans is declining primarily due to the belief that future economic growth will be less than that made prior to the recent economic recession. The Missouri State Employees' Retirement System board's recent actions reflect these comments. The plan's

[31] Keith Brainard and Alex Brown, "Issue Brief: Public Pension Plan Investment Return Assumptions," National Association of State Retirement Administrators, December 2013, <http://www.nasra.org/content.asp?contentid=120>, accessed on April 11, 2014, p. 1.
[32] "Responsible Management and Design Practices for Defined Benefit Pension Plans," Government Finance Officers Association, October 2010, <http://www.gfoa.org/responsible-management-and-design-practices-defined-benefit-pension-plans>, accessed on June 24, 2014, p. 2.

annual financial report dated June 30, 2012, indicated pooled investments for the Judicial and MSEP plans returned about 8.5 percent (annualized) over 20 years, about equal to the assumed rate adopted by the board in 2001 through 2011. However, partially in response to the economy, the board reduced the assumed rate to 8 percent for both plans in 2012.

Figure 6 presents distributions of 2012 assumed investment rates of return for the 89 plans. Twelve plans covering 83 percent of statewide membership had an assumed investment return rate of between 8 and 8.5 percent.

Figure 6: Missouri DB Plans: 2012 Distribution of Assumed Investment Rate of Return



Percent of 2012 total covered members (545,943 total plan members)							
<1%	<1%	<1%	<1%	<1%	13%	4%	83%

The 2011 assumed investment rate of return for each of the 89 plans is presented in Appendix B and Appendix C. Ten-year comparative schedules of assumed investment rate of return, including assumed real rate of return and price inflation, for each of the 15 selected plans are presented in Appendix A, Chart 8. The 2012 assumed investment rates of return for the 15 selected plans ranged from 7.25 percent to 8.25 percent and the assumed real rate or return ranged from 3.75 percent to 5.5 percent.

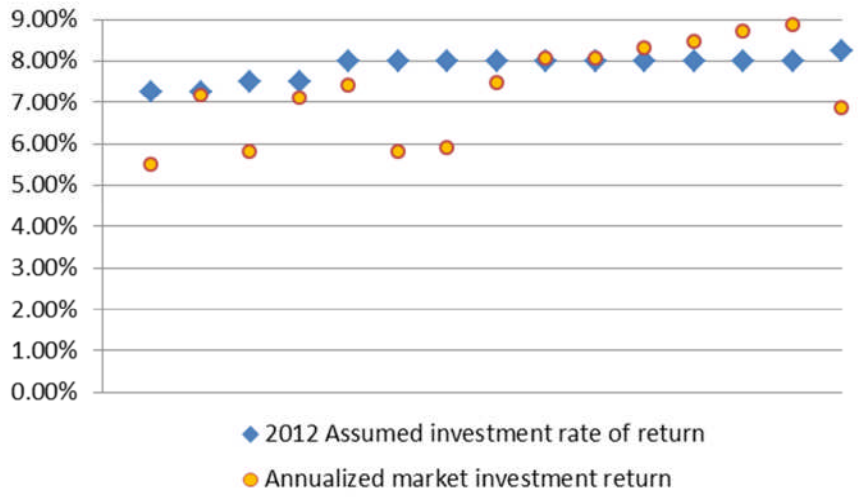
Missouri plans reported declining assumed investment return rates between the 2003 and 2012 plan years. The average (non-weighted) assumed rate for the 89 plans declined from 7.58 percent to 7.17 percent between 2003 and 2012. The average (non-weighted) assumed rate for the 15 selected plans declined from 8.00 percent to 7.85 percent during that period. This change likely indicates plans are anticipating economic growth will be slower in future years. Some individuals believe that even the lowered investment

return assumptions are unrealistically high. See the Risk-Free Discount Rate Debate section.

A test of the appropriateness of a plan's assumed investment rate of return would be a comparison of the assumed rate to the annualized market long-term investment returns. Unfortunately, long-term investment performance is not usually reported because there are no related reporting requirements. In addition, the JCPER does not collect this data.

Figure 7 below presents a comparison of the 2012 assumed investment rate of return to the 10-year annualized market investment return for each of the 15 selected plans for the 2003 to 2012. We surveyed the 15 selected plans for this information because such longer-term data regarding investment returns is not collected by the JCPER. The plans used varying methodologies to calculate the annualized market investment returns shown below. For example, some plans reported returns net of investment fees and costs, while other plans were unable to do so.

Figure 7: 15 Selected Plans: 2012 Assumed Investment Rate of Return and 2003 to 2012 Annualized Market Investment Return



The 15 selected plans reported 10-year annualized market investment returns ranging from 5.49 percent (Prosecuting Attorneys' & Circuit Attorneys' Retirement System) to 8.86 percent (University of Missouri Retirement, Disability, & Death Benefit Plan). As shown in Figure 7, for 9 plans the annualized market returns for the 10-year period were less than the assumed returns by 0.08 percent to 2.2 percent. The value of this comparison is somewhat limited because it only included the most recent 10 years that included 2 periods of significant economic downturn, and did not provide an extended long-term look-back. Annualized returns for longer time periods would likely produce different results and could reduce the negative effects of the recent economic recessions.

To obtain information for a longer-term look-back, we requested the 10 largest of the 15 selected plans, having 92 percent of statewide membership, to provide additional long-term investment performance data as of the plans' 2012 year ends. Table 1 presents information the plans provided and shows only 1 of the 10 plans underperformed investment return assumptions on both the 10-year and longer-term basis. In addition, officials from several plans indicated returns in 2013 and 2014 have been strong, which has positively impacted the plans' recent long-term returns even more than reflected in the information reported.

Table 1: 10 Selected Plans: 2012 Assumed Investment Rate of Return versus Annualized Market Rate of Investment Return through 2012 (unless otherwise noted)

Plan	2012 Assumed Investment Rate of Return (%)	Annualized Market Rate of Investment Return (%)	Market Return Over (Under) Assumed Return (%)	Number of Years
County Employees' Retirement Fund	8.00	7.40	(0.60)	10
		8.66	0.66	18[1]
Kansas City Public School Retirement System	8.00	7.48	(0.52)	10
		7.84	(0.16)	20
		8.21	0.21	24[2]
Local Government Employees' Retirement System	7.25	7.17	(0.08)	10
		8.70	1.45	20
Missouri Department of Transportation & Highway Patrol Employees' Retirement System	8.25	6.86	(1.39)	10
		6.75	(1.50)	20
Missouri State Employees' Retirement System - MSEP	8.00	8.07	0.07	10
		8.55	0.55	20
		10.32	2.32	32[3]

		8.47	0.47	20

[1] Since plan inception, January 1, 1995.

[2] Since inception of the plan's analysis of composite investment return data, July 1, 1989.

[3] Since inception of the plan's analysis of composite investment return data, April 1981.

[4] The Public Education Employees' and Public School Retirement Systems' assets are jointly managed. The 20-year and 30-year returns presented are combined for the plans.

[5] A 20-year rate is not available. The long-term returns reflect data from January 1986 through September 30, 2012, and are since inception of the plan's analysis of composite investment return data.

[6] Plan officials indicated they were only able to provide accurate investment return data back through 1998.

Assumed Price Inflation

The assumed price inflation rate is a component of both the assumed investment rate of return and assumed wage inflation and in some plans may be used in determining the amount of retirees' COLA increases. Any significant difference between actual price inflation and assumed price inflation rates will cause a reduction in unfunded liabilities either slower or faster than expected.

Price inflation rates should be set in relation to both historical and future anticipated inflation. Common indices include the Consumer Price Index and the Gross National Product. When selecting the assumed price inflation rate to be used in the economic assumptions, a plan may choose to adjust the historical index rate for local conditions, anticipated changes in the economy that have not occurred yet, and other relevant factors. A plan's investment returns generally need to exceed the economic inflation rate or the plan is losing "buying power." Ten-year assumed price inflation rates for the 15 selected plans are shown in Appendix A, Chart 8.

Assumed Wage Inflation

The assumed wage inflation rate affects the actuarial calculation of members' final salaries and the resulting expected benefit payments. Assumed wage inflation rate considers both price inflation and employee raises. Accurate wage inflation assumptions promote accurate benefit payment liability determinations as well as accurate assessment of financial condition. If the wage inflation rate is underestimated, the ultimate liability will be understated and the financial condition of a plan would appear better than it actually is and vice-versa. The assumed wage inflation rates for the 89 plans are presented in Appendix A, Chart 1 and Appendix C.

Demographic Assumptions

Numerous assumptions and predictions about plan member demographic information must be made in the actuarial valuation process. The key demographic assumptions include estimates of members' ages at retirement, mortality rates, rates of employment termination, rates of disability, and selection of benefit payment structures available. Actual member demographic experience will never exactly match the assumptions. When actual experience differs significantly from assumptions, the financial position of a plan is affected because payments made to retirees will not be in the amounts estimated at the time required contributions were calculated and made. A periodic experience study is designed to detect differences between actual experience and the original assumptions. When significant differences occur, a plan should consider revising the assumptions used in future actuarial valuations.

Actuarial Methods

Various actuarial approaches are used in plan actuarial valuations. Three key areas in which different approaches may be employed include actuarial cost methods, asset valuation methods, and amortization methods.

Actuarial Cost Methods

Actuarial cost methods are used to allocate estimated future pension costs of current employees over time, and the method used impacts when benefits are funded. There are several cost methods commonly used by Missouri DB plans, each with their own variations, which allow plans to tailor the cost allocation to their specific characteristics or long-term funding goals. Table 2 presents information reported to the JCPER by the plans on the basic cost methods used during plan year 2011.

Table 2: Missouri DB Plans: 2011 Actuarial Cost Methods

Method	15 Selected Plans	All Plans
Entry Age	12 plans (80%)	53 plans (60%)
Other	3 plans (20%)	36 plans (40%)
	15 plans	89 plans

Information regarding specific actuarial cost methods used by each of the 89 plans is included in Appendix A, Chart 1 and Appendix C.

The entry age method spreads the cost of total expected retirement benefits for each member on a level basis (percentage of payroll or dollar amount) each year over the expected work life of the member. The GFOA's best practices[33] state the entry age method is especially well suited to the objective of keeping contributions relatively stable and equitably allocating the costs over the employees' period of active service. In 2011, most of the 15 selected plans used the entry age cost method; however, only 60 percent of the 89 plans used the entry age method. Beginning in 2014 the entry age normal/level percentage of payroll will be the only allocation method allowed for calculating pension liabilities presented in financial statements.

Other actuarial cost methods used by the 89 plans during 2011 include aggregate, projected unit credit, frozen initial liability, and unit credit. Each of these methods uses different processes to spread the expected retirement benefits of members such as (1) allocating costs for each individual member separately, (2) determining combined liability for all members before spreading the cost, or (3) breaking the total expected costs into various pools and using a different allocation method for each pool. According to a Society of Actuaries article,[34] these cost methods, except for the unit credit method, are traditionally used by DB plans. The article indicates the unit credit method is not reasonable for plans with benefits based on percentages of pay, but is reasonable for plans with benefits not based on percentages of pay, frozen plans, and plans with no active members. In addition, this method is not suitable for determining contribution amounts.

[33] "Core Elements of a Funding Policy," Government Finance Officers Association, March 2013, <http://www.gfoa.org/core-elements-funding-policy>, accessed on June 24, 2014, p. 2.
[34] Philip Martin McCaulay, "Public Pension Plan Funding Policy," Society of Actuaries, June 2010, <http://www.soa.org/library/monographs/retirement-systems/public-pension-finance/2010/june/mono-2010-mrs10-mccaulay.aspx>, accessed on April 15, 2014, p. 14.

Missouri statutes include requirements pertaining to actuarial cost methods for certain statewide plans including the Missouri State Employees' Retirement System - Judicial Plan, Missouri State Employees' Retirement System - MSEP, and Missouri Department of Transportation & Highway Patrol Employees' Retirement System. Although the statutes do not specify the overall actuarial cost method, they require the plans' chosen methods determine normal cost as a level percentage of payroll. State statutes also require two of these plans to calculate UAAL cost as level percentage of payroll. The percentage of payroll calculation helps the state manage and minimize fluctuations in contribution amounts.

Asset Valuation Methods

The asset valuation method used significantly impacts a plan's actuarial asset values. Some plans value assets at market value, fully recognizing investment gains and losses in the year they occur. Many plans adopt an asset valuation method that recognizes a portion of each year's gains and losses relative to the assumed rate over a period of time, typically between 3 to 5 years. This method, called smoothing, spreads the impact of relative investment gains and losses over several years, providing for more moderate fluctuations in plan financial condition and required contributions. For the 15 selected plans, Appendix A, Chart 7 illustrates the effect of the smoothing process compared to market returns for the period of plan years 2003 through 2012.

The 89 plans utilized asset valuation methods in 2012 as shown in Table 3.

Table 3: Missouri DB Plans: 2012
Asset Valuation Methods

Method	15 Selected Plans	All Plans
3 year smoothing	1	5
4 year smoothing	2	10
5 year smoothing	11	36
Other[1]	1	3
Market value (no smoothing)	0	29
Not reported	0	6
	15	89

[1] Assumed Yield, Assured Yield, or Smoothed Actuarial Value

Information about the asset valuation methods used by each of the 89 plans is included in Appendix A, Chart 1 and Appendix C.

Amortization Methods

Amortization methods are used to determine current contributions needed to fund the UAAL. Most retirement plans do not fully fund the UAAL immediately, but spread the contribution payments across several years (the amortization period). The amortization method and period chosen can have a significant impact on the rate the UAAL becomes funded and the amount of contributions needed.

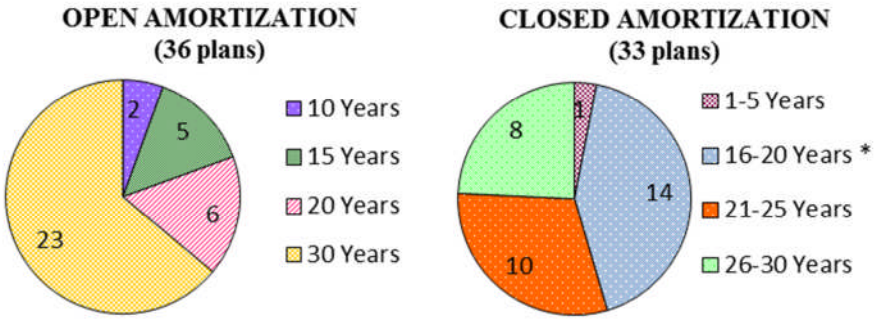
Amortization methods are not required when a plan does not have UAAL, which normally happens under two different scenarios. Some plans do not have UAAL because they are fully funded or utilize certain actuarial cost methods which do not calculate a UAAL amount that must be amortized. Plans that are fully funded do not need to make any contributions toward the UAAL, and plans that use an actuarial cost method that does not create UAAL only need to make contributions in an amount equal to the difference between the current and prior years' actuarial liability totals. All remaining plans would choose either an opened or closed amortization period.

An open amortization period allocates UAAL over an identified number of years on a rolling year basis. For example, each year, a plan that uses a 20-year open amortization period will spread the unfunded liability over the next 20 years. In theory this method could eventually approach full funding of liability; however, it will require significantly longer than the 20 years to arrive at that nearly fully funded position because there is no definite date in the future to achieve the goal.

A closed amortization period sets a future date that an unfunded liability will become fully funded and reduces the amortization period by 1 year each year after the closed period policy is adopted. For example, a plan that uses a 20-year closed amortization period will allocate liabilities over a 19-year amortization period in the year after the closed period was adopted, reducing the amortization period by 1 year each year thereafter. This method sets an absolute full funding date for the plan's liability and at the end of that period, the plan should have achieved a 100 percent funded ratio. Although using closed amortization periods provides for full funding more quickly than open periods, a plan using this method is likely to experience more significant fluctuations in financial condition and required contributions.

Information reported to the JCPER by Missouri DB plans for 2012 indicates 36 plans covering 32 percent of statewide membership used open amortization periods, 33 plans covering 66 percent of statewide membership used closed amortization periods and 20 plans covering 2 percent of statewide membership did not require amortization because the plans were fully funded and/or used an actuarial cost method that does not produce UAAL. Figure 8 presents the number of plans that used open or closed amortization periods and the number of years included in 2012 amortization calculations.

Figure 8: Missouri DB Plans: 2012 Distribution of Open and Closed Amortization Periods



* Includes the Local Government Employees' Retirement System in which liability amortization periods vary between 15 and 30 years by participating employer. Closed amortization is required for all periods in excess of 15 years and open amortization is used for periods of 15 years or less.

Information about the amortization methods used by each of the 89 plans is included in Appendix A, Chart 1 and Appendix C.

Missouri statutes require amortization periods of 30 years or less for some plans and a closed amortization period for one of those plans. However, there are no amortization period requirements for the majority of plans authorized by state statute. A discussion paper[35] published by the Society of Actuaries recommends using a closed or fixed period or fixed date to amortize the UAAL, because otherwise the UAAL may "grow until infinity and the responsibility for paying it is passed on to future taxpayers."

Risk-Free Discount Rate Debate

Pension and public finance professionals debate the most appropriate assumed investment rate of return (discount rate) to use when valuing pension liabilities (future benefit payments). The potential mismatch between guaranteed pension benefits and the uncertainty of investment returns drives this debate, and there is a clear division of opinion regarding the discount rate.

To achieve investment returns above the rate of inflation, plan administrators generally must expose a plan's assets to investment risk. The principal and/or the expected investment returns of these higher risk investments are not guaranteed. Investments with little to no risk of losing principal are considered risk-free. Based on our review of a number of articles, opinions vary regarding the selection of the risk-free rate. The opinions advocate a range of rates including a short-term Treasury Bill rate, a longer-term rate consistent with the sponsoring governments' cost of

[35] Philip Martin McCaulay, "Public Pension Plan Funding Policy," Society of Actuaries, June 2010, <http://www.soa.org/library/monographs/retirement-systems/public-pension-finance/2010/june/mono-2010-mrs10-mccaulay.aspx>, accessed on April 15, 2014, p. i.

borrowing, and a long-term government bond rate (e.g., 30-year Treasury bonds).

Some economists argue that using the traditional assumed rate of investment return, typically around 8 percent, to value liabilities produces misleading results by understating plan liabilities and overstating funding levels. They believe a more conservative valuation using a lower, risk-free or risk-adjusted, discount rate is appropriate due to the guaranteed nature of DB pension liabilities; and that such a rate considers the risk a plan will not achieve expected returns. In addition, they argue using the traditional, higher rate, may create an incentive for a plan to adopt riskier investment policies.

The assumed investment rate of return significantly impacts plan financial condition; and using a reduced discount rate will impact plan funding levels and the ARC. The Center for Retirement Research at Boston College[36] recalculated the 2012 aggregate funded ratio for a sample of plans nationwide using a 5 percent, risk-adjusted rate; estimating the aggregate funded ratio would only be 50 percent, significantly less than the 73 percent aggregate funded ratio calculated using current assumed investment rates of return. A policy study conducted by the Show-Me Institute[37] estimated aggregate funded ratios for five large statewide Missouri plans would decline from the current 81 percent funded ratio to 46 percent using a 4 percent risk-adjusted discount rate.

A discussion paper[38] regarding funding policies, published by the Society of Actuaries, indicates while traditional actuarial methods for funding DB plans are in need of improvement, the use of financial economics, which advocates the use of a risk-free rate in calculating pension liability, is not an appropriate solution. The society indicates "the use of a risk-free discount rate would require an increase in contributions to an unacceptable level." The society recommends improvements in actuarial cost methods, asset smoothing methods, UAAL amortization methods, and selection of actuarial assumptions.

A plan must carefully consider the assumed investment rate of return. The selected rate substantially impacts plan funding levels and required contributions. Plan administrators need to select a rate that provides for

sufficient funding levels without generating excessive funding and overcharging the current generation of taxpayers but also does not push excessive levels of risk of funding shortfalls onto future generations of taxpayers.

Recent GASB Accounting and Reporting Changes

The GASB recognized the need to reconsider its authoritative pension guidance and recently amended pension accounting and reporting requirements. The changes take effect for pension plans beginning in 2014, and for governments that sponsor or participate in pension plans beginning in 2015. While outgoing GASB requirements provide for a single set of methods and assumptions for both financial accounting/reporting and for calculating the ARC,[39] the revised GASB requirements only prescribe the methods and assumptions for financial accounting/reporting. As a result, under the new changes, DB plans will likely develop separate actuarial calculations for financial statement purposes and for funding purposes. The changes are intended to improve the usefulness of pension information reported by state and local governments for making decisions and assessing accountability. One of the most noticeable changes will be the inclusion of all pension activities and net long-term liabilities (or assets) in the sponsoring government's basic financial statements.

Outgoing GASB Requirements

Outgoing GASB standards include requirements for measuring and reporting financial statement information and calculating a plan's ARC. GASB-required DB plan financial reports must include financial statements, supplementary schedules, and explanatory notes. The financial statements report assets and liabilities as of a specific date and annual totals of income and expenses. The financial statements do not provide information about the long-term debt for pension benefit payments to be made in the future or long-term financial condition of a plan but focus instead on the current year of operations. The supplementary schedules report multi-year data for required and actual contributions made, actuarial assets and accrued liabilities, and funded ratios. The notes to the financial statements and other required supplementary information provide information about the financial condition of the plan and the plan's long-term debt for pension benefits. The explanatory notes also describe or define the employer(s) participating in the plan; types of employees covered; number of plan members; benefits provided; significant accounting, funding, and contribution policies; contribution rates and agreements; selected investment information; selected actuarial valuation assumptions and methods used; current year funded status information; and significant changes made. There are similar basic accounting and reporting requirements for sponsoring governments.

[39] The ARC is called actuarially determined contributions (ADC) in GASB 67 and 68.

GASB Revisions

GASB Statement No. 67[40] amends accounting and reporting requirements for pension plans and GASB Statement No. 68[41] amends accounting and reporting requirements for sponsoring governments. The new GASB statements require the following key changes in financial accounting and reporting for most DB plans.

- The new standards rename various financial statement terminologies. For example, AAL is renamed total pension liability (TPL), AVA is renamed fiduciary net position (FNP), normal cost is renamed service cost, UAAL is renamed fiduciary net pension liability (NPL), funded ratio is renamed fiduciary net position as a percentage of total pension liability (FNP/TPL), and ARC is renamed actuarially determined contribution (ADC).
- Plan assets (FNP) will be calculated based on current market value rather than smoothed. With this change, the year-to-year fluctuations in the FNP/TPL and NPL could be significant as the market value of assets fluctuates.
- The entry age normal/level percentage of payroll actuarial cost method will become the only allowable method for calculating total pension liabilities.
- Actuarial assets (FNP) will be compared to actuarial accrued liabilities (TPL) and a crossover point determined, if applicable, where TPL exceed actuarial assets. If this crossover point is expected, a blended discount rate must be used. Effectively, TPL covered by actuarial assets are calculated using the plan's assumed investment rate of return, while the remaining uncovered liabilities are calculated using a risk-adjusted interest rate for high-yield, tax-exempt, 20-year general obligation bonds (4.29 percent[42] as of July 24, 2014). Under current economic conditions, the blended rate will likely be lower than the assumed investment rate of return normally used to discount liabilities. The effect of using the blended rate, rather than only the assumed investment rate of return, to discount the liabilities may result in increased NPL (formerly UAAL) and decreased FNP/TPL (formerly funded ratio).
- Schedules of investment rates of return for 10 years will be presented.
- Factors that significantly affect trends in the amounts reported, such as changes of benefit terms, changes in the size or composition of the

[40] *Statement No. 67 of the Governmental Accounting Standards Board: Financial Reporting for Pension Plans-an amendment of GASB Statement No. 25,* Governmental Accounting Standards, Board Norwalk, Connecticut, June 2012.

[41] *Statement No. 68 of the Governmental Accounting Standards Board: Accounting and Financial Reporting for Pensions-an amendment of GASB Statement No. 27*, Governmental Accounting Standards, Board Norwalk, Connecticut, June 2012.

[42] As reported in The Bond Buyer 20-Bond GO Index. This index is comprised of a portfolio of 20 highly rated general obligation bonds that mature in 20 years.

population covered by the benefit terms, or the use of different assumptions will be presented.

- The notes to the financial statements will include additional information. Certain types of plans will need to report expanded information about actuarial assumptions, including a sensitivity study presenting alternate present values of pension liabilities assuming the liabilities were discounted one percent higher and lower than the actual discount rate.
- Previous requirements for calculating contribution amounts are eliminated. The methods for calculating pension liabilities, assets, and expenses that are reported in financial statements will not likely be used for determining required contributions. Different assumptions and methods may be used for determining a plan's liabilities reported in the financial statements versus determining the ADC. For example, a plan required to use the blended rate for determining reported liabilities can use a different assumed investment rate of return for funding purposes and determining contributions.

Plans will still exercise a significant degree of judgment regarding selection of actuarial assumptions and methods when applying the new GASB standards.

The new GASB statements require the following key changes in the sponsoring governments' financial accounting and reporting.

- If contributions to the plans do not at least equal 100 percent of the prior year's ADC, the unpaid amounts will generally be included in sponsoring governments' reported liabilities. When contributions are not significant to a sponsoring government's expenses, the impact is minimal. Previously, only any unpaid portion of the prior year's legally required pension contribution appeared on a government's financial statements. However, under the new requirements the difference between the ADC and actual contributions will now be reported.
- The long-term net pension liability, or unfunded accrued liability, will be reported in the sponsoring government's basic financial statements rather than just being disclosed in the notes to the financial statements as required by the outgoing standards. If there is no net pension liability, the financial statements will reflect an asset instead of a liability. Sponsoring governments that participate in multiple employer plans will report their individual or proportional share of the liability.

As a result, many sponsoring governments will report liabilities on the face of their financial statements that were not previously reported, which may have a significant impact on the sponsoring governments' reported financial condition.

The Center for Retirement Research at Boston College[43] reported funded ratios may change in 2014 for significantly underfunded plans. These plans will be forced to use a blended rate which will be lower than the assumed rate of return on assets. The study also estimated what 2012 funded ratios for certain state and local plans nationwide would have looked like under the new GASB requirements, and concluded the previous aggregate funded ratio of 73 percent would have fallen to 60 percent under the new GASB changes.

Impact of Key Changes

The GASB changes will have varying impact on the actuarial assumptions and methods used for financial reporting and resulting reported financial condition of Missouri retirement plans. Officials from 12 of the 15 selected plans indicated they had evaluated the various impacts of the GASB changes. All 12 indicated their plan would prepare separate calculations for funding purposes. These changes will impact the 15 selected plans in the following ways.

Value of Assets

All 15 selected plans currently use smoothing to value the assets and will therefore have to switch to using market value when calculating asset values (FNP).

Entry Age Normal/Level Percentage of Payroll Actuarial Cost Method

Twelve of the 15 selected plans currently use the Entry Age Normal method, and three plans use a different method. Officials from one of these three plans (St. Louis County Employees' Retirement Plan) acknowledged they will switch to the Entry Age Normal method, while officials from the other two plans (St. Louis Employees Retirement System and St. Louis Public School Retirement System) indicated they had not yet evaluated the needed changes.

Blended Discount Rate

Officials from 8 of the 12 plans that had evaluated the impact of the GASB changes indicated a blended discount rate would not be required in their actuarial valuations, and officials from 4 plans indicated the blended discount rate would be required in their valuations (Kansas City Public School Retirement System, Prosecuting Attorneys' & Circuit Attorneys' Retirement System, Sheriff's Retirement System, and St. Louis County Employees Retirement Plan).

[43] Alicia H. Munnell, Jean-Pierre Aubry, Josh Hurwitz, and Madeline Medenica, "The Funding of State and Local Pensions: 2012-2016," *State and Local Pension Plans*, Number 32, Center for Retirement Research at Boston College, Chestnut Hill, Ma., July 2013, pp. 5-7.

Recent Funding Guidance and Recommendations

Because the amended GASB standards no longer prescribe the requirements for determining funding and contribution levels, pension industry leaders identified a need for guidance on funding standards and practices. Several national organizations representing local and state governments established a Pension Funding Task Force to develop such guidance. In 2013, the task force published *PENSION FUNDING: A Guide for Elected Officials.*[44] The document included the following policy objectives and recommendations:

Actuarial Cost Method: 1) Each participant's benefit should be fully funded under a reasonable allocation method by the expected retirement date. 2) The benefit costs should be determined as a level percentage of member compensation and include expected income adjustments. [The Entry Age Normal (level percentage of payroll) actuarial cost method is especially well-suited to meeting these policy objectives.]

Asset Smoothing Method: 1) The funding policy should specify all components of asset smoothing, such as the amount of investment return subject to smoothing and the time period(s) used for smoothing a specific gain or loss. 2) The asset smoothing method should be the same for both gains and losses and should not be reset or biased toward high or low investment returns. [The use of a 5-year period for "smoothing" investment experience is especially well-suited to meeting these policy objectives.]

Amortization Policy: 1) The adjustments to contributions should be made over periods that appropriately balance intergenerational equity against the goal of keeping contributions level as a percentage of payroll over time. 2) The amortization policy should reflect explicit consideration of (a) gains and losses actually experienced by a plan, (b) any changes in assumptions and methods, and (c) benefit or plan changes. 3) The amortization of surplus requires special consideration consistent with the goal of stable costs and intergenerational equity. [Amortizing the various components of the unfunded actuarial accrued liability over periods that focus on matching participant demographics but also, except for plan amendments, consider managing contribution volatility, is especially well-suited to meeting these policy objectives.]

Regarding these recommendations, the Pension Funding Task Force indicated "some governments with well-funded pension plans will determine that they need to make few, if any, changes to their funding policies, while others may face many challenges." Officials from 11 of the 15 plans surveyed indicated they were aware of the Pension Funding Task Force's recommendations and 4 plans indicated they were not aware of the recommendations. Officials from 12 plans

[44] "PENSION FUNDING: A Guide for Elected Officials," 2013, <http://www.nasact.org /washington/downloads/announcements/03_13_Pension_Funding_Guide.pdf>, accessed on July 30, 2013, p. 6.

indicated they either already or plan to follow all or most of the recommendations. Officials from three plans indicated they had not evaluated if changes would be needed in response to the recommendations.

In addition, the GFOA[45] recommends adopting a funding policy that assures benefit costs will be funded in an equitable and sustainable manner. According to the GFOA, an appropriate funding policy would include frequent actuarial valuations to determine contributions, contributions that fully fund benefits, sponsoring governments' commitment to fully funding the recommended contributions, and reporting of information regarding the government's progress toward meeting its pension funding objectives.

Summary

The financial condition of the 89 Missouri public employee DB plans is impacted by various external factors and decisions made by the plans' governing boards and sponsoring governments. Key influences of financial condition identified and discussed in this survey include economic conditions and investment performance, benefit structure, board governance, investment policy, contribution and funding policies, and selection of actuarial assumptions and methods. The process of achieving or maintaining good financial condition of DB plans, both on a short-term and long-term basis, is complex and can be challenging for plans' boards and sponsoring governments. Because the interaction of factors that impact a plan's financial condition can vary among DB plans, it is difficult to compare the plans.

Our review of various indicators noted Missouri plans' financial condition varies widely, with some plans having indicators of very good financial condition and others having indicators of very poor financial condition. Overall, in aggregate, the financial condition of Missouri plans is higher than national averages. However, data supporting the financial condition of several plans raises significant concern regarding the financial health of those plans. All 89 plans receive actuarial valuations at least biennially, with many receiving them annually. Additionally, almost all the 15 selected largest and/or statewide plans (and likely some other plans) also obtain periodic actuarial audits and experience studies. These outside analyses are utilized to monitor the health of the plans and the appropriateness of actuarial assumptions underlying management decisions affecting the plans.

Many plans have experienced worsened financial condition in recent years. Aggregate UAAL for the Missouri plans has nearly doubled in the past 10

[45] "Funding Defined Benefit Pensions," Government Finance Officers Association, June 2012, <http://www.gfoa.org/funding-defined-benefit-pensions>, accessed on June 24, 2014, p. 1.

years, from $8.18 billion in 2003 to $16.02 billion in 2012. As a result, the aggregate funded ratio of Missouri plans has decreased from 83 percent to 78 percent during this period. Missouri plans' aggregate 2012 funded ratio is higher than national averages of 73 percent to 74 percent reported in two studies. While numerous factors cause fluctuations of individual plan funded ratios, the aggregate decreased funded ratios and increased UAAL appear to have resulted primarily from economic and financial market downturns during the period. Funded ratios for Missouri plans range from 10 percent to 164 percent. Almost half of the plans, covering 67 percent of total statewide membership, had funded ratios of 80 percent or higher in 2012. In addition, officials from several plans indicated investment returns in 2013 and 2014 have been strong. These returns have likely positively impacted the plans' funded ratios.

During 2012, contributions to Missouri DB plans totaled $2.65 billion, with $1.78 billion from the sponsoring governments and $870 million from employees. The expectation of the plans' financial health is based in large part on the premise that ARC amounts determined by actuarial consultants will be received. The failure of sponsoring governments to fully fund 100 percent of the ARC makes it difficult for the plans to reach financial goals. In aggregate, Missouri plans received 94 percent of ARC in 2012, higher than the national average of 80 percent. The aggregate percentage of ARC paid for Missouri plans has increased from 84 percent in 2006 to 94 percent in 2012, while national averages have decreased from 83 percent in 2006 to 80 percent in 2012. Aggregate information for Missouri plans is fairly good, primarily driven by the large plans or overfunding by some plans. However, 34 plans (38 percent of Missouri plans), covering 33 percent of total members, received less than 100 percent of the ARC in 2012. This statistic is concerning as it indicates sponsoring governments of some plans may not be committed to achieving plans' overall funding goals. Five of the 15 selected plans, covering 94 percent of total statewide membership, did not receive 100 percent of ARC in 2012. However, 2 of these plans received 93 percent and 96 percent in 2012. Officials from 2 other plans reported changes had been made that will provide for higher ARC payments going forward, and officials from another plan indicated funding received exceeded the ARC in 2013 and 2014.

Aggregate ARC as a percentage of payroll (also referred to as the contribution rate) has increased from 9.7 percent in 2003 to 14.18 percent in 2012, for the 15 selected plans. These percentages and upward trend are similar to those at the statewide and national level. ARC as a percentage of payroll can reflect the stress employer contributions place on a sponsoring government's budget and operations.

Governing boards and sponsoring governments of many of the largest and statewide plans have taken measures to strengthen financial condition. Such measures include lengthening vesting periods, increasing retirement ages,

reforming benefits and benefit formulas, restricting or reducing retiree COLA payments, and increasing employee contribution requirements. In addition, many plans have changed actuarial assumptions and investment policies, and sponsoring governments have become more committed to fully funding the ARC. Officials from most of the 15 selected plans indicated changes had been recently implemented that should improve plan financial condition. However, it will take time before the effect of such changes become fully evident. All plans and sponsoring governments must remain vigilant to ensure continued monitoring and additional adjustments as needed.

In this survey, we identified various key practices DB plans should follow to support adequate financial condition. Plans should be managed and governed by employees and board members experienced and knowledgeable in DB plan operations and funding. DB plans should have actuarially based funding practices with the goal of annually fully funding benefits earned and systematically reducing UAAL. Plans should work with sponsoring governments to ensure required contributions are made and that benefit structures are affordable. Investment policies should be designed to achieve the investment return assumption and allow for the greatest return on assets without taking unacceptable risks. Plans should monitor to ensure actuarial assumptions are met, and modify assumptions as needed. Assumptions should be supported by periodic actuarial valuations prepared by competent actuaries; approved by the board; and validated by periodic actuarial audits and experience studies, or alternative processes. Plan governing boards should include a balanced representation of sponsoring governments and plan members to ensure decisions are unbiased and the interests of all parties are considered. Many of the above-mentioned practices have been implemented by Missouri plans, including the 15 selected plans. Failure to adhere to these practices could result in significant fiscal problems for the plan, sponsoring organization, and taxpayers.

Significant changes in pension accounting and reporting requirements, prescribed by the GASB, begin taking effect in 2014. Because the amended GASB standards will no longer address funding and contribution levels, it is imperative that plans evaluate plan funding policies, and modify those policies if necessary. Consideration should be given to the recently-published guidance from the Pension Funding Task Force that provides plans with recommended funding standards and practices.

Plans and sponsoring governments must closely monitor and react to the indicators of financial condition to ensure adequate financial condition is maintained. Periods of stress, usually caused by political climate, economic environment, and/or market swings can have dramatic effect on the financial health of plans. Such impact may be felt not only in the short term, but over generations. A plan that is not properly managed for long-term health is at

risk of not achieving good financial condition and is likely to place a heavier financial burden on future generations.

Retirement systems, especially DB plans, use a number of terminologies. The following terms are relevant to this survey.

Actuarial Accrued Liability (AAL)
The portion of the present value of estimated future benefit payments (liabilities) earned by employees as of the actuarial valuation date. The AAL represents the portion of liability which would already have assets on hand to support future benefit payments if a plan was 100% funded. The actuarial cost method selected by a plan impacts the portion of pension liability included in the AAL. The portion of the present value of future benefit payments not included in AAL includes benefits employees will earn in future periods (normal cost).

Actuarial Cost Method (Funding Method)
A procedure for allocating the actuarial present value of projected benefits (and expenses if applicable) to time periods, usually in the form of a normal cost and an actuarial accrued liability.

Actuarial Value of Assets (AVA)
The actuarially determined value of plan assets available to pay retirement benefits. A plan's governing board selects an asset valuation method that complements the overall funding goals of the plan. Methods used include a range of options that generally recognize assets at current market value or adjusts asset value by allocating (smoothing) certain changes in the market value of assets over a period of time.

Amortization of Unfunded Actuarial Accrued Liability (UAAL)
Allocating the UAAL over a period of time to determine the contribution needed to fund the upcoming year's portion of the UAAL. The actuary uses the number of years (amortization period) specified by the governing board after consulting with the plan's actuary and investment professionals. The two basic amortization period types are open and closed.

Annual Required Contribution/Actuarially Required Contribution (ARC)
The ARC represents the amount of cash that should be added to a plan's assets in the upcoming year to ensure the plan remains in a good long-term financial condition. The ARC includes funding for the normal cost of the following year and for the amortization of UAAL over a period of time, with the goal of fully funding the plan at the end of the period. Contributions are made by the employer or, in some plans, also by the employees covered by the plan. In some limited cases, a plan's contributions may come not from employer/employee contributions, but from some alternative source such as a fee for a specific government service, that is collected and forwarded to the plan.

Asset Allocation
The allocation of plan assets to various investment categories within a plan's investment portfolio, as approved by the governing board. Example investment categories include government bonds, corporate bonds, domestic stocks, and short-term investments.

Assumed Investment Rate of Return/Interest Rate
The rate of return a plan expects to earn on invested assets over a long period of time. The rate is approved by the governing board.

Assumed Price Inflation/Economic Inflation/Deflation
The rate a plan expects that the general price level of goods and services in the economy will change over a period of time.

Covered Payroll
The total amount of pay earned in the current year by all employees who are or may become eligible for retirement benefits.

Discounting
The mathematical process used to determine the present value of future benefit payments (liabilities).

Funded Ratio/Funded Status/Percentage Funded
A comparison of a plan's assets to the plan's liabilities. It is expressed as a percentage calculated by dividing the AVA by the AAL.

Normal Cost
The portion of the present value of estimated future benefit payments (liabilities) that will be earned by current employees in the upcoming year or is expected to be earned in some future year. Typically, normal costs are funded by future cash inflows. The actuarial cost method selected by the plan impacts the portion of total liability included in the normal cost and the allocation of normal costs between the upcoming year and future years. The portion of the present value of future benefit payments not included in normal cost includes benefits employees have already earned in previous periods (AAL).

Present (Current) Value of Future Benefits
The current worth of future benefit payments determined by discounting at an assumed rate of interest and adjusting for the probabilities of payment. Benefit liabilities are comprised of AAL (benefits that have already been earned by employees) and normal cost (estimated benefits that are expected to be earned by current employees in future periods). Because assets can be held and invested until needed for future payments and many plans will continue to receive contributions from the sponsoring governments, employees, and other sources, the current value of the assets held to make these payments can be less than the future value of the payments. Future cash inflows are expected to make up the difference.

Rate of Return/Market Rate of Return
Investment income earned on invested assets, usually net of investment expenses. The rate is expressed as an annual percentage of increase (or decrease) on investment principal.

Real Rate of Return/Spread on Investment Return
The real rate of return equals the assumed investment rate of return less the assumed price inflation rate.

Risk-Free Discount Rate
A theoretical discount rate related to a series of payments with near zero risk with respect to payment timing and amount. This rate is usually quoted at or near interest rates for investments considered to be high grade and low risk, which would produce a steady, unchanging, and predictable income stream, such as U.S. government securities.

Smoothed Rate of Return
Rate of return calculated after the market value of assets have been allocated (smoothed) over a multi-year smoothing period. The smoothing period, usually a 3 to 5 year period, is approved by the governing board. The smoothing adjustment assists a plan in managing extreme fluctuations that may occur in the amount of cash needed on a year to year basis to keep the plan in a good long-term financial condition.

Unfunded Actuarial Accrued Liability (UAAL)
The portion of AAL that is not covered by current plan assets. The UAAL is calculated by subtracting the AVA from the AAL.

Wage Inflation
The increase in wages expected throughout employees' careers. Wage inflation considers both the increases in raises due to 1) general cost of living, which typically approximates economic inflation rates and 2) career advances.

Selected Data for 15 Large/Statewide Missouri Public Employee Defined Benefit Retirement Plans
Plan Years Ended January 1, 2012 to December 31, 2012

This appendix presents key background information, financial data, and actuarial information for 15 selected Missouri public employee defined benefit retirement plans. These 15 plans include the 12 plans with membership exceeding 5,000 (including 7 large statewide plans) and 3 additional smaller statewide plans, with a combined total of 15 plans that covered approximately 94 percent of total statewide plan membership.

The information and data was obtained from the JCPER database, the plans' financial statements and actuarial valuation reports, and a questionnaire we sent to the plans. Unless otherwise indicated, the information and data is presented as of each plan's fiscal year ended during calendar year 2012. When available, certain additional data was presented for plan years 2003 through 2012.

The appendix provides certain key elements of each plan. Complete financial information can be obtained from the plans and contact information for each plan is included at Chart 1.

COUNTY EMPLOYEES' RETIREMENT FUND
Plan Year Ended December 31, 2012 *

Chart 1:

General Information

Statutory Authorization: Section 50.1000, RSMo
Year Established: 1994
Covered Members: 16,387
Annual Covered Payroll: $357.4 million
Members also covered by Social Security: Yes
Trustees: 9 Members, 2 Non-members

Key Actuarial Assumptions

Investment Rate of Return: 8.0%
Wage Inflation: 3.0% plus an allowance for merit, seniority, and promotional wage increases based on age and service
Asset Valuation Method: 5-year smoothed
Actuarial Cost Method: Entry age normal
Liability amortization period: 20-year, closed

Web Site: http://www.mocerf.org/

Chart 2: Funded Ratio*

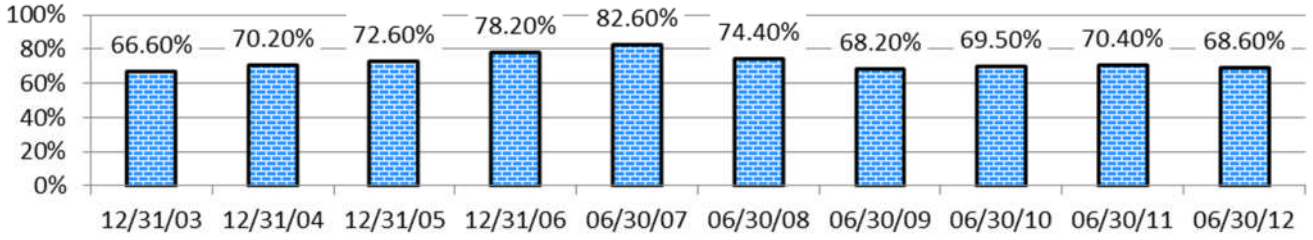

Chart 3: Actuarial Assets and Liabilities (millions)*

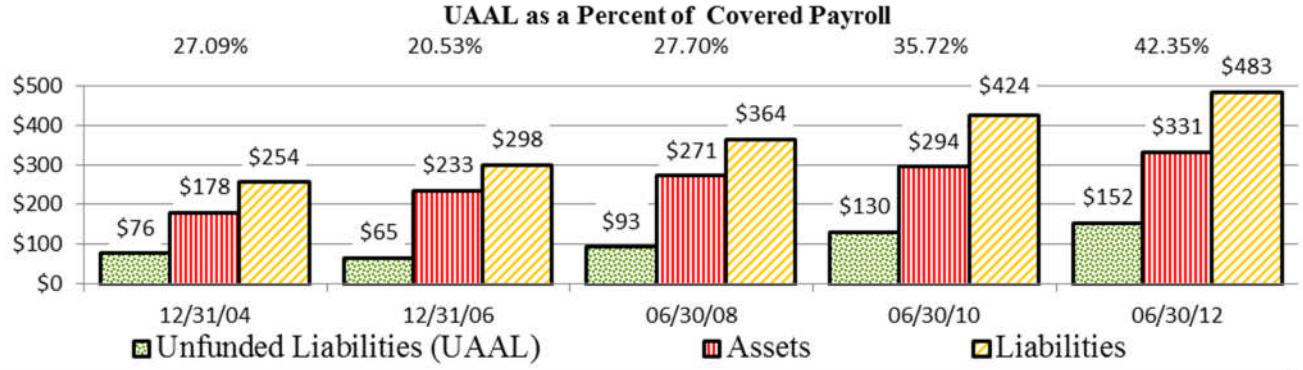

Chart 4: Employer Contributions - Required and Actual[1] (millions)[2]

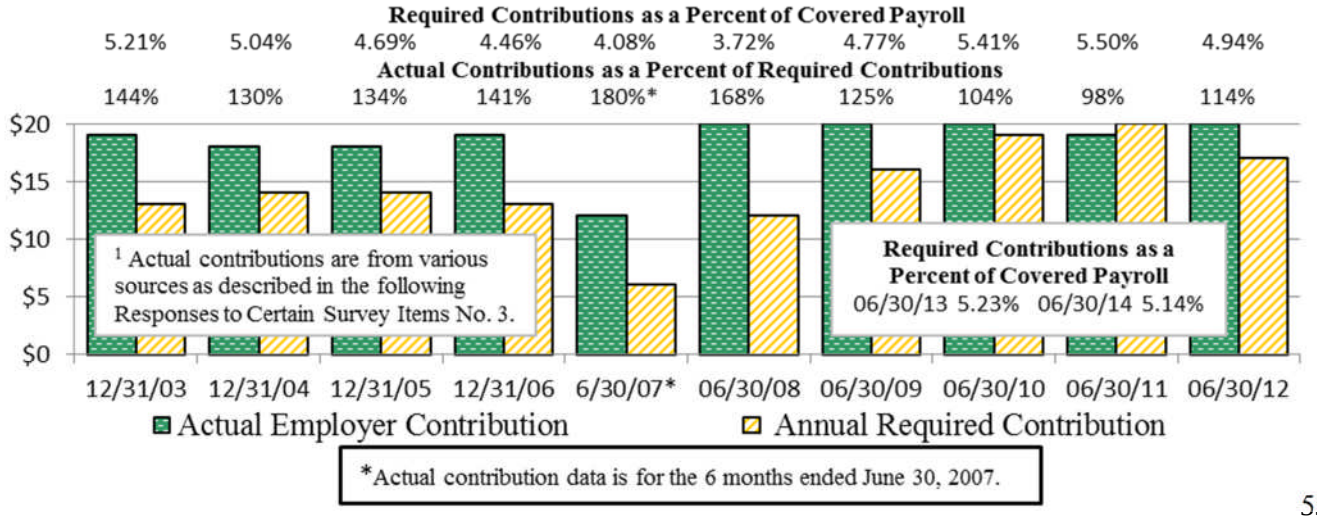

[2] The plan changed actuarial valuation dates in 2007. Actuarial projections for 2003 through 2007 are based on valuations as of January 1 of the respective year. Actuarial projections for 2008 through 2014 are based on valuations as of July 1 of the preceding year.

COUNTY EMPLOYEES' RETIREMENT FUND
Plan Year Ended December 31, 2012

Chart 9: Benefit and Employee Contribution Summary[1]		
Name of Tier or Group	**LAGERS**	**Non-LAGERS**
Full Vesting: Years of Service	8	8
Normal Retirement	Age 62 with 8 years of service	Age 62 with 8 years of service
Basic Annual Benefit Formula including temporary benefit	2/3 of Non-LAGERS	See below
Guaranteed COLA	Yes	Yes
Required Member Contributions	4% of payroll	6% of payroll
Optional Member Contributions	Not available	Not available

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. See the plan's web site for additional details.

Non-LAGERS Basic Annual Benefit Formula (Replacement Ratio Formula):

(Not available for those who terminated before January 1, 2000.)

The Replacement Ratio (see Replacement Ratio table below)
x
The Average Final Compensation (average of the highest 2 years of compensation)
-
The age 62 Social Security Primary Insurance Amount
x
Years of Creditable Service

Replacement Ratios

	Average Final Compensation Range Termination Date	
	On or After	Before
Ratio (%)	October 1, 2007	
80	Below $36,000	Below $30,000
77	$36,000 to $48,000	$30,000 to $40,000
72	Over $48,000	$40,000 to $50,000
70	Not applicable	Over $50,000

Credited Service is limited to 25 years. The Replacement Ratio Formula is prorated for less than 25 years.

For those who terminate on or after October 1, 2007, with more than 25 Years of Creditable Service, an additional 1% of Average Final Compensation is added in the Replacement Ratio Formula for each Year of Creditable Service in excess of 25 but not in excess of 29.

A minimum benefit is provided so that the monthly benefit is at least $29 x years of service, not in excess of 29 years.

The normal form is a life annuity. Various optional forms are available.

COUNTY EMPLOYEES' RETIREMENT FUND
Plan Year Ended December 31, 2012

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

After in-depth actuarial analyses, the County Employees' Retirement Fund (CERF) determined that its revenue sources were sufficient to support the plan and no special action was necessary.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

Five percentage points of drop from 2007 to 2008 was because of benefit improvement.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

The year 2008 was very negative for CERF and all pension plans. As a result, the required contribution rates after 2008 went up. Actuarial analyses determined that CERF's revenue sources were sufficient to support the higher contribution rates. Also plan assets have steadily recovered since 2008.

Actual contributions include payroll-based amounts from employers and employee payroll deductions, late filing fees from county property assessments, 3/7 of penalty and interest for delinquent and back property tax payments, a $6 fee for recording or filing official documents, an additional $1 fee on each document recorded, a $20 fee for county merchant licenses, and any interest earned on investment of these collections prior to remitting to CERF.

KANSAS CITY EMPLOYEES' RETIREMENT SYSTEM
Plan Year Ended April 30, 2012

Chart 1:

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

A Mayor's Blue Ribbon Task Force on pension reform was created and recommended changes were then considered by a Pension Project Team (made up of City leaders and pension system representatives). The results are as follows:

Plan design changes for the Employees' system have been agreed to and ratified.

a. Requires City to fully fund the Actuarially Required Contribution (ARC)

b. Tier 2 benefit plan (see the following chart)

c. Increased contributions from employees (see the following chart)

KANSAS CITY EMPLOYEES' RETIREMENT SYSTEM
Plan Year Ended April 30, 2012

Tier 2 Benefit Plan and Employee Contributions		
Name of Group	**Current Employees**[1]	**New Hires Beginning 9/1/2013**
Benefit multiplier	2.22% unmarried 2.00% married	1.75% for all
Normal retirement eligibility	Age 65 Age 60 with 10 years of service 80 points (age + service)	Age 67 Age 62 with 10 years of service Age 55 with 30 years of service 85 points (age + service)
Early retirement eligibility	Age 55 with 10 years of service Age 60 with 5 years of service	Age 57 with 10 years of service
COLA	3% simple	Ad hoc payable at age 62[2]
Vesting	5 years	10 years
Interest on employee account balance	3.00%	3.00%
Increase to previously established member contribution rate	1.00%[3]	1.00%
Final average earnings period	2 years	3 years

[1] "Current employees," as used herein, shall include all vested and non-vested employees currently working for the City, all current retirees, and all employees hired prior to September 1, 2013. Current employees who transfer to new positions or who receive promotions will remain "current employees" for purposes of this agreement.

[2] The ad hoc cola will be payable if the prior year funding ratio is greater than or equal to eighty percent (80%). The rate of the COLA will be equal to the percentage increase in the consumer price index, up to a maximum of two and one-half percent (2.5%). The consumer price index used for purposes of this agreement shall be the final national CPI for All Urban Consumers (CPI-U), that is published prior to December 31 in advance of the next year's COLA adjustment.

[3] The one-percent (1%) increase in employee contribution rates will become effective on the first pay period starting immediately after ratification of this agreement, or on such date thereafter as the City shall establish. If for any reason the Police Retirement System amendments are not approved by the Missouri Legislature and signed into law by the Governor, then all monies withheld under this provision shall be returned/refunded to each affected employee as earned wages.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

Fluctuations are due to market change. No changes in contribution rates or benefits have occurred during this time.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

The City of Kansas City's 2014 fiscal year runs from May 1, 2013 through April 30, 2014. The City of Kansas City started contributing the ARC in fiscal 2014.

Guaranteed COLA	No	No
Required Member Contributions	7.5% rate through 2013. For 2014 and each year after the rate is actuarially determined to be no less than 7.5% and no more than 9.0% with a maximum increase or decrease each year of 0.5%	For 2014 and each year after the rate is actuarially determined to be no less than 7.5% and no more than 9.0% with a maximum increase or decrease each year of 0.5%
Optional Member Contributions	Not available	Not available

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. See the plan's web site for additional details.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

Legislation was passed in June 2013. New members, effective on or after January 1, 2014, will receive full retirement at the Rule of 80 (where age plus credited service is greater than or equal to 80) or age 62 with a multiplier of 1.75% versus the current benefit at the Rule of 75 (where age plus credited service is greater than or equal to 75) or age 60 with a multiplier of 2.0%. Legislation provides for a variable contribution rate recommended by the actuary. The contribution rate for both the employer and the employee will not be less than 7.5% and the contribution rate will not exceed 9.0% and changes to the contribution rate from year to year shall be in increments of one-half percent. Also, in November 2011 our investment policy changed to further diversify the investment program by adding other asset classes that were not strongly correlated to each other to increase the return potential and reduce the overall volatility of the investment program.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

The economic crisis of 2007-2009 affected the funded ratio. Also, during 2010, there was an increase in retirees and decrease in active members due to "right-sizing plan" by the Kansas City School District, which affected the funded ratio.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

KANSAS CITY PUBLIC SCHOOL RETIREMENT SYSTEM
Plan Year Ended December 31, 2012

Due to the funding status of the plan, legislation was passed in June 2013 to provide for variable contributions for both the Employers and Employees. The rate will be no less than 7.5% with an increase or decrease of no more or no less than 0.5% per year with a maximum rate of 9.0%.

LOCAL GOVERNMENT EMPLOYEES' RETIREMENT SYSTEM
Plan Year Ended June 30, 2012

Chart 1:

General Information

Statutory Authorization: Sections 70.600 to 70.755, RSMo
Year Established: 1967
Covered Members: 54,467
Annual Covered Payroll: $1.360 billion
Members also covered by Social Security: Yes, except for a limited number of non-OASDI employers
Trustees: 3 Members, 4 Non-members

Key Actuarial Assumptions

Investment Rate of Return: 7.25%
Wage Inflation: 3.5%
Asset Valuation Method: 5-year smoothed
Actuarial Cost Method: Entry age normal
Liability amortization period: varies between 15 and 30 years by participating employer. Closed amortization is required for all periods in excess of 15 years and open amortization is used for periods of 15 years or less.

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. See the plan's web site for additional details.

Basic Annual Benefit Formula:
The Local Government Employees' Retirement System (LAGERS) is an agent-multiple employer retirement system and each individual employer selects one of the following benefit formulas, established by Section 70.655, RSMo, for the employer's entire workforce:

- L-1 (1.0% for life)
- L-3 (1.25% for life)
- LT-4(65) (1.0% for life, 1.0% to age 65)
- LT-5(65) (1.25% for life, 0.75% to age 65)
- L-6 (2.0% for life)
- L-7 (1.5% for life)
- LT-8(65) (1.5% for life, 0.5% to age 65)
- L-12 (1.75% for life); LT-14(65) (1.75% for life, 0.25% to age 65)
- L-11 (2.5% for life – non-OASDI coverage only).

All LT programs denoted LT(62) extend temporary benefits to age 62, rather than age 65.

LAGERS consists of 622 different employers with 1,007 unique contribution rates. Each of the employer and primary departments have their own funded ratio and amortization schedules with unique employer contribution rates. The statistics provided above represent aggregate numbers of the system.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

As part of a periodic review in 2011, LAGERS changed the system's investment return assumption to 7.25% (from 7.5%). The components of the assumption are 3.5% inflation, 3.75% assumed real rate of return.

LOCAL GOVERNMENT EMPLOYEES' RETIREMENT SYSTEM
Plan Year Ended June 30, 2012

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

LAGERS uses a 5-year smoothing technique for valuing assets and the recent recession of 2007-2009 impacted valuation assets.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

The numbers presented above are the aggregate amounts for the 620+ employers participating in LAGERS. The increase in contribution rates is related to the lower asset valuation due to the recent recession of 2007-2009. The recent 2013 actuarial valuation indicates that rate changes for 2014 are: 359 increases, 77 unchanged and 595 decreases.

[3] Age 55 for uniformed members of the Highway Patrol
[4] N/A for uniformed members of the Highway Patrol
[5] For uniformed members of the Highway Patrol, the base benefit is calculated by multiplying this amount by 1.333333.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

Lowered assumed rate of return on investments to 7.75% effective July 1, 2012, for plan year ended June 30, 2013.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

Market downturns/unfavorable investment returns in 2009 and 2008.

MISSOURI DEPARTMENT OF TRANSPORTATION & HIGHWAY PATROL EMPLOYEES' RETIREMENT SYSTEM
Year Ended June 30, 2012

The Missouri Department of Transportation & Highway Patrol Employees' Retirement System (MPERS) provided an additional response regarding the funded ratio of 46 percent at June 30, 2012. Plan officials indicated the low funded ratio is due to many factors that occurred over a number of years; however, the primary factors include:

- Contribution rates were set by statute until 1976; and as a result, the ARC was not met prior to that date.
- Benefit increases were granted by the legislature without changes to the contribution rates.
- Employee contributions were originally required, but eliminated in 1976 and refunded to employees, with no replacement funds given to MPERS.
- MPERS first hired a dedicated Executive Director in 1988, an investment manager in 1997, and internal investment staff in 2003.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

Significant decrease in number of active employees and decrease in funded ratio.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

Changes in Plan Provisions

Chart 9 includes the changes in plan provisions for benefits and employee contribution summary.

Changes in Investment Policy

During 2012, the Missouri State Employees' Retirement System (MOSERS) board adopted the staff recommendations of beta balancing 80% of the total fund, with 20% of the total fund to be invested in illiquid assets. Five broad asset classes (global equities, nominal bonds, inflation indexed bonds, commodities and hedge fund betas) will be targeted for beta balancing. The beta balanced portfolio will have a leveraged notional exposure limit of 1.25 times beta balanced capital and a cash buffer target of 25% of synthetic exposure. The illiquid portfolio will consist of two broad categories – growth sensitive investments and inflation sensitive investments, targeted at 10% each with benchmarks. A transition period from the current policy benchmark to the new policy benchmark was also approved.

Changes in Actuarial Assumptions

In September 2009, the MOSERS board adopted a temporary change to increase the upper limit on the amount by which the actuarial value of assets could exceed the market value of assets (the corridor) from 20% to 30%, with the FY 2011 corridor being 30%; the FY 2012 corridor being 25%; and the FY 2013 corridor reverting to 20%.

MISSOURI STATE EMPLOYEES' RETIREMENT SYSTEM - JUDICIAL PLAN
Plan Year Ended June 30, 2012

In June 2012, the MOSERS board approved the changes to the demographic assumptions recommended in the 4-year experience study (July 1, 2007 through June 30, 2011). The demographic assumption categories include pay increase rates, normal retirement experience, early retirement experience, rates of withdrawal, disability rates, death-in-service mortality rates, and retired life mortality. For additional information on the most recent experience study and the impact of the demographic assumptions, see the plan's web site.

In July 2012, the MOSERS board adopted revised economic actuarial assumptions, see Chart 8.

In June 2013, the MOSERS board replaced the existing policy and board rules on sound actuarial condition with a formal funding policy. In addition, the board adopted changes to existing policies in the following two areas:

a). Amortization Policy: The amortization change will go from the use of a rolling 30-year period for amortization of the unfunded liability to a period that is decremented by 1 year annually until reaching 1 year. However, the board shall reexamine the amortization period in connection with the 2030 actuarial valuation to determine whether or not it should be reduced below 15 years.

b). Asset Smoothing Policy: The asset smoothing change will combine all deferred gains and losses with the current year's gains and recognize one-third of that total in the current year and defer two-thirds of it to the future. In the following year, the gain or loss for that year will be combined with the amount deferred the previous year and, in like fashion, one-third of it will be recognized that year with two-thirds of it deferred to the future, and so on.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

The Judicial Retirement Plan funded ratio is 24.7 percent at June 30, 2012, because the plan operated on a pay-as-you-go basis through June 30, 1998. As a result, the contribution to finance retirement benefits prior to that date was exactly equal to the benefits being paid out with no assets being accumulated to fund future benefit payments. Accordingly, the funded ratio was zero through June 30, 1998. The actuarial funding program for benefits commenced July 1, 1998, and since that time, the funded ratio has gone from zero to 26% at June 30, 2013. It is anticipated that the funded position will, on a going forward basis, increase 2% to 3% per year.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

Chart 4 shows the changes in the contribution rate. The employer contribution rate for the last 5 years has changed from 58.48% in FY 2010 to 59.69% in FY 2014, an overall increase of 1.21%. We do not view these fluctuations as significant.

Future Years: We anticipate that as the number of new hires becomes a larger portion of our active member population, the employer contributions will decrease over time, given that the new tier is a lower cost plan as compared to the previous tier for judges.

MISSOURI STATE EMPLOYEES' RETIREMENT SYSTEM - MSEP

Changes in Plan Provisions

Chart 9 includes the changes in plan provisions for benefits and employee contribution summary.

Changes in Investment Policy

During 2012, the MOSERS board adopted the staff recommendations of beta balancing 80% of the total fund, with 20% of the total fund to be invested in illiquid assets. Five broad asset classes (global equities, nominal bonds, inflation indexed bonds, commodities and hedge fund betas) will be targeted for beta balancing. The beta balanced portfolio will have a leveraged notional exposure limit of 1.25 times beta balanced capital and a cash buffer target of 25% of synthetic exposure. The illiquid portfolio will consist of two broad categories – growth sensitive investments and inflation sensitive investments, targeted at 10% each with benchmarks. A transition period from the current policy benchmark to the new policy benchmark was also approved.

Changes in Actuarial Assumptions

In September 2009, the MOSERS board adopted a temporary change to increase the upper limit on the amount by which the actuarial value of assets could exceed the market value of assets (the corridor) from 20% to 30%, with the FY 2011 corridor being 30%; the FY 2012 corridor being 25%; and the FY 2013 corridor reverting to 20%.

MISSOURI STATE EMPLOYEES' RETIREMENT SYSTEM - MSEP
Plan Year Ended June 30, 2012

In June 2012, the MOSERS board approved the changes to the demographic assumptions recommended in the 4-year experience study (July 1, 2007 through June 30, 2011). The demographic assumption categories include pay increase rates, normal retirement experience, rates of withdrawal, disability rates, death-in-service mortality rates, retired life mortality, and other liability adjustments. For additional information on the most recent experience study and the impact of the demographic assumptions, see the plan's web site.

In July 2012, the MOSERS board adopted revised economic actuarial assumptions, see Chart 8.

In June 2013, the MOSERS board replaced the existing policy and board rules on sound actuarial condition with a formal funding policy. In addition, the board adopted changes to existing policies in the following two areas:

a). Amortization Policy: The amortization change will go from the use of a rolling 30-year period for amortization of the unfunded liability to a period that is decremented by 1 year annually until reaching 1 year. However, the board shall reexamine the amortization period in connection with the 2030 actuarial valuation to determine whether or not it should be reduced below 15 years.

b). Asset Smoothing Policy: The asset smoothing change will combine all deferred gains and losses with the current year's gains and recognize one-third of that total in the current year and defer two-thirds of it to the future. In the following year, the gain or loss for that year will be combined with the amount deferred the previous year and, in like fashion, one-third of it will be recognized that year with two-thirds of it deferred to the future, and so on.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

The annual net change in the funded ratio is a product of favorable and unfavorable factors. The primary unfavorable factor was the investment losses attributable to the market decline in FY 2009.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

Chart 4 shows the changes in the contribution rate. The changes in the contribution rate have been products of many factors. A few of the explanations for the variation in the employer contribution rate include the changes in actuarial assumptions (see the response to question number 1), experience losses including the large recognized loss on valuation assets, and change in normal cost as the proportion of active members in the 2011 plan increases.

Future Years: We anticipate that as the number of new hires becomes a larger portion of our active member population, the employer contributions will decrease over time, given that the new tier is a lower cost plan as compared to the MSEP and MSEP 2000 tiers.

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. Contact the plan for additional details.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

The plan implemented the following actuarial assumption changes between July 1, 2008 and July 1, 2012: Effective July 1, 2012, in order to better reflect future plan experience, the investment return assumption was changed from 7.5% to 7.25%, and the mortality assumption was changed from the RP 2000 Mortality Table, male and female rates, to the RP 2000 Mortality Table, male and female rates, projected generationally using Scale AA.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

The significant decrease from 2011 to 2012 is due to:

1. A change to more conservative assumptions (see response to Item 1 above) and,
2. Investment return for year ended June 30, 2012 less favorable than assumed.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

Contributions are not related to payroll. Contributions are from two primary sources:

1. A fixed dollar monthly contribution paid by the individual counties as set forth in statute.
2. A $4 per court case surcharge (except for cases sent to the Fine Collection Center)

Normal Retirement Option 1	Age 60 with 5 years of service
Normal Retirement Option 2	Any age with 30 years of service
Normal Retirement Option 3	Rule of 80 where age plus credited service is greater than or equal to 80
Basic Annual Benefit Formula including temporary benefit	1.61% x Final Average Salary x Years of Service A temporary benefit of 0.8% of Final Average Salary x Service is payable until reaching minimum eligibility age for Social Security
Guaranteed COLA	Yes, subject to maximums
Required Member Contributions	6.86% of payroll
Optional Member Contributions	Not available

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. See the plan's web site for additional details.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

COLAs have been capped at 2.0% where allowable by statute, employee and employer contributions have been increased where allowable per statute and in 2013 and 2014 we have overfunded the ARC.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

No significant fluctuations are noted. Smaller fluctuations were due to updated actuarial assumptions, increased contribution rates, and capped COLAs. Larger fluctuations were due to the performance of the investment markets in 2008 and 2009.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

Rates increased in 2010 by 0.25%, in 2011 by 0.13% and in 2012 by 0.23% for both the employer and the member. Rates are not expected to increase in the future.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

- Lower assumed interest rate (2008) 8.0% to 7.5%
- New mortality table assumption (2012)
- Asset-smoothing method (2012)

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

A response was not provided.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

The contribution source is a $3 surcharge on civil and criminal court cases in the state, and is unrelated to payroll. There is no "employer," per se, that makes the contributions.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

The County uses a 30-year (was 15-year) amortization of unfunded accrued liability or 10-year amortization if the assets exceed the accrued liability, effective as of January 1, 2009.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

Primarily investment earnings/losses.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

A response was not provided.

Full Vesting: Years of Service	5 years or 65 years of age while still working
Normal Retirement Option 1	Age 65 with 5 years of service
Normal Retirement Option 2	Age 65 with less than 5 years of service while still working
Normal Retirement Option 3	"Rule of 85" where age plus credited service is greater than or equal to 85
Basic Annual Benefit Formula including temporary benefit	2.0% x highest 3-year average compensation out of last 10 years x years of credited service
Guaranteed COLA	None
Required Member Contributions	5% of payroll
Optional Member Contributions	Yes, subject to restrictions

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. See the plan's web site for additional details.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

Although not related or in response to economic conditions, the plan has changed actuarial assumptions by updating to the Internal Revenue Service (IRS) mortality tables & modifying the investment policy as needed.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

The funding ratio under Governmental Accounting Standards Board No. 25 has remained fairly stable, and for 2013 is 84.3%.

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

The large increase for 2013 was primarily due to the change in actuarial assumptions or the update to the use of the more current IRS Mortality Tables & RP-2000 Disability Mortality Tables from the RP-2000 Health Lives Tables. No known significant changes to future contributions.

Year Ended September 30, 2012

Chart 9: Benefit and Employee Contribution Summary[1]		
Name of Level or Group	**Level 1 (hired before 10/1/2012)**	**Level 2 (hired after 10/1/2012)**
Full Vesting: Years of Service	5	5
Normal Retirement Option 1	Age 65 with 5 years of service	Age 65 with 5 years of service
Normal Retirement Option 2	Age 62 with 25 years of service	Age 62 with 25 years of service
Early Retirement Option 3	Age 55 with 10 years of service	Age 55 with 10 years of service
Basic Annual Benefit Formula including temporary benefit	2.2% x Final 5-year average base salary x years of credited service	1.0% x Final 5-year average base salary x years of credited service
Guaranteed COLA	None	None
Required Member Contributions	1.0% x salary up to $50,000 plus 2.0% of salary in excess of $50,000	1.0% x salary up to $50,000 plus 2.0% of salary in excess of $50,000
Optional Member Contributions	Not available	Not available

[1] The benefit and contributions summary above does not include all provisions applicable to the plan. See the plan's web site for additional details.

Responses to Certain Survey Items:

1. What significant changes, if any, has the plan implemented since the recent economic decline to address the impact on the plan's financial condition?

- Employee required contributions were added to the Plan in 2009
- A new Level (Level 2) for employees hired on or after October 1, 2012 was adopted which among other changes reduced annual benefit accruals from 2.2% to 1.0% of salary. To offset the reduction in the Defined Benefit plan, a Defined Contribution plan was created with a 2% base employer contribution and a 100% match up to 3%. Employees hired October 1, 2012 or after have both benefits.
- No ad hoc retiree increases since 2007
- The President of the University of Missouri System has appointed a special Benefits Task Force to study current retirement plan options, among other items. Evaluation regarding future options has not begun.

2. If the funded ratio of your plan has changed significantly during the 10-year period, please provide the primary factors contributing to the funding level fluctuations.

Reduction in funded ratio was the result of the investment market declines of 2008/2009

3. Please list the primary reasons for significant changes in contribution rates for the last 5 years, if applicable. In addition, please provide any known or expected significant changes to contribution rates in future years.

Increase in contribution rates over the last 5 years is the result of the market declines of 2008/2009. A complete review of actuarial assumptions was recently completed, with recommendations submitted to the Board of Curators for consideration. The University is also studying the impact of GASB Statement No. 67, *Financial Reporting for Pension Plans*, and GASB Statement No. 68, *Accounting and Financial Reporting for Pensions* – both of which will be implemented by the University at June 30, 2014. It is unknown at this time what impact these items may have on contribution rates in future years.

Missouri Public Employee Defined Benefit Retirement Plans - Abbreviated Key Plan Data Reported to the JCPER
Plan Years Ended January 1, 2011 to December 31, 2011 (unless otherwise noted)

This appendix presents certain key financial and actuarial data reported to the JCPER for all 89 Missouri public employee defined benefit plans, including funded ratios for certain plan years during the 10-year period 2003 through 2012; percentage of ARC paid for plan years 2010 and 2012; and the number of covered members, actuarial assets, unfunded liabilities, and assumed investment rate of return for plan year 2011. The 15 selected largest/statewide plans are listed first, followed by the 74 remaining plans. Additional data for each plan is presented in Appendix C.

Plan year 2011 data was the most current data available for all plans at the time of our initial data collection, thus certain data is presented as of that plan year. Once plan year 2012 data became available, certain limited data for that plan year was downloaded and included in this appendix.

The data presented in this appendix was reported to the JCPER by each of the plans. This data was not subjected to audit procedures, and could contain some inaccurate and/or incomplete data as some limitations with that data were identified in our survey.

Plan Years Ended January 1, 2011 to December 31, 2011 (unless otherwise noted)

NR - Data was not reported to JCPER by the plan.

Ⓐ Plan changed actuarial valuation dates in 2007. Actuarial projections for 2003 through 2007 are based on valuations as of January 1 of the respective year. Actuarial projections for 2008 through 2012 are based on valuations as of July 1 of the preceding year.

Ⓑ Plan established in 2003.

Ⓒ Plan converted from a defined contribution to a defined benefit plan in 2009.

Ⓓ No ARC required.

Ⓔ Plan did not offer a defined benefit component until 2010. Actuarial valuation calculations are first available for plan year 2011.

Ⓕ Plan established in 2008.

Ⓖ Plan established in 2004.

Missouri Public Employee Defined Benefit Retirement Plans - Key Plan Data Reported to the JCPER
Plan Years Ended January 1, 2011 to December 31, 2011 (unless otherwise noted)

This appendix presents expanded key financial and actuarial data reported to the JCPER for all 89 Missouri public employee defined benefit plans, including general information, asset/liability information, key actuarial assumptions, and contribution information for certain plan years during the period 2002 through 2012. Plan year 2011 data was the most current data available for all plans at the time of our initial data collection, thus most data is presented as of that plan year. Once plan year 2012 data became available, certain limited data for that plan year was downloaded and included in this appendix.

The data presented in this appendix was reported to the JCPER by each of the plans. This data was not subjected to audit procedures, and could contain some inaccurate and/or incomplete data as some limitations with that data were identified in our survey. The appendix provides certain key elements of each plan. Complete financial information can be obtained from the plans.

See footnote descriptions on page 135.

Ⓐ N/A, the plan is administered by the sponsoring government or others.

Ⓑ Plan year 2002 data, except as noted.

Ⓒ Plan did not offer a defined benefit component until 2010. Actuarial valuation calculations are first available for plan year 2011.

Ⓓ No ARC required.

Ⓔ Contributions are determined by state statute and are partially fee based.

Ⓕ Contributions are subject to statutory maximums.

Ⓖ Contributions are determined by state statute and are entirely fee based.

Ⓗ Plan converted from a defined contribution plan to a defined benefit plan in 2009.

Ⓘ Plan established in 2008.

Ⓙ Liability amortization periods vary between 15 and 30 years by participating employer. Closed amortization is required for all periods in excess of 15 years and open amortization is used for periods of 15 years or less.

Ⓚ Varies for each participating employer.

Ⓛ 3.0% plus an allowance for merit, seniority, and promotional wage increases based on age and service.

Ⓜ Actual contributions include payroll-based amounts from employers and employee payroll deductions, late filing fees from county property assessments, 3/7 of penalty and interest for delinquent and back property tax payments, a $6 fee for recording or filing official documents, an additional $1 fee on each document recorded, a $20 fee for county merchant licenses, and any interest earned on investment of these collections prior to remitting to the plan.

Ⓝ Actual contribution amounts are set by legislation at 7.5% of covered payroll.

Government Finance Officers Association (GFOA) Resources

Our research identified valuable best practices resources and other guidance published by the GFOA. A full listing of GFOA best practices guidance, other advisories, and publications is available at http://www.gfoa.org/products-and-services/resources. Other organizations and authors publish similar resources and technical papers, which are generally available for download or purchase by sponsoring governments and retirement plans. Several of the available GFOA retirement system management resources most applicable to issues discussed in this survey are listed below.

BEST PRACTICES

- Actuarial Audits (May 2014)
- Core Elements of a Funding Policy (March 2013)
- The Role of the Actuarial Valuation Report in Plan Funding (February 2013)
- Procuring Actuarial Services (October 2012)
- Disclosures of Pension Funding Obligations in Official Statements (October 2012)
- Funding Defined Benefit Pensions (June 2012)
- Sustainable Pension Benefit Tiers (May 2011)
- Governance of Public Employee Postretirement Benefits Systems (March 2010)
- Public Employee Retirement System Investments (October 2009)
- Sustainable Funding Practices of Defined Benefit Pension Plans (October 2009)
- Asset Allocation for Defined Benefit Plans (October 2009)
- Design Elements of Defined Benefit Retirement Plans (February 2008)
- Developing a Policy for Retirement Plan Design Options (March 2007)

ADVISORIES

- Responsible Management and Design Practices for Defined Benefit Pension Plans (October 2010)
- Using Alternative Investments for Public Employee Retirement Systems and OPEB Established Trusts (October 2008)

In addition to the above resources, GFOA best practices and advisories cover other topics related to DB plans including communicating the plan design, educating members, developing retirement incentives, understanding pension fund risk, investing plan assets, and using pension obligation bonds to fund pensions. The available GFOA resources also cover other types of retirement plans including defined contribution and hybrid plans.

Thomas A. Schweich

Missouri State Auditor

Dent County

October 2014

Report No. 2014-093

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Dent County

Sheriff Controls and Procedures	The Sheriff has not adequately segregated accounting duties and does not perform supervisory reviews. The Jail Administrator does not perform monthly bank reconciliations for bank accounts and does not timely deposit monies in some accounts. The Sheriff does not adequately follow up on billings for boarding prisoners and has not turned over commissary profits to the county treasury since February 2010. The Sheriff does not have statutory authority to collect a $10 bond processing fee.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney does not routinely follow up on outstanding checks, and 19 checks (totaling $1,018) had been outstanding for over a year. The Prosecuting Attorney was still maintaining an inactive restitution and bad check account used by a former official that included 51 outstanding checks (totaling $4,401) from 2004 to 2010 and another $11,159 in unidentified funds. The Prosecuting Attorney's office does not account for and monitor the disposition of all bad checks.
Property Tax System and County Collector Liabilities	As noted in our two prior audit reports, neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Collector does not prepare a monthly list of liabilities and reconcile the list to the available cash balance.
County Sales Tax	The county did not properly report property tax levy reductions to the State Auditor's office for several years, used incorrect data in sales tax reduction calculations, did not properly consider prior year levy reductions results, and could not locate the 2010 calculation worksheets.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

2. Prosecuting Attorney Controls and Procedures....7
3. Property Tax System and County Collector Liabilities....9
4. County Sales Tax....10

Organization and Statistical Information 13

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Dent County

We have audited certain operations of Dent County in fulfillment of our duties under Section 29.230, RSMo. In addition, Nichols, Stopp & VanHoy, LLC, Certified Public Accountants, was engaged to audit the financial statements of Dent County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Dent County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Lori Bryant
Audit Staff:	Meghan Dowell
	Shannon Spicer

1. Sheriff Controls and Procedures

Weaknesses exist in controls and procedures in the Sheriff's office. The Sheriff's office processed monies for civil fees, concealed carry permits, bonds, inmate receipts, commissary commissions, and other miscellaneous receipts totaling approximately $180,000 for the year ended December 31, 2013.

1.1 Segregation of duties

The Sheriff has not established adequate segregation of accounting duties and does not perform supervisory reviews. The Sheriff's former bookkeeper handled the fee and bond bank accounts and the Jail Administrator handled the commissary bank account. Each employee was responsible for receiving, recording, depositing, and disbursing monies for the accounts assigned to them. In August 2013, the Jail Administrator became responsible for all 3 accounts.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement a documented independent or supervisory review to ensure bank records are in agreement with accounting records.

1.2 Bank reconciliations and liabilities

The Jail Administrator does not perform monthly bank reconciliations for the fee, bond, and commissary bank accounts. In addition, the Jail Administrator does not maintain a running cash balance or prepare a monthly list of liabilities to reconcile to the balance of the commissary account. The reconciled bank balance should agree to the total of the individual inmate balances plus commissary profits; however, a reconciliation is not performed to check for agreement between records. As of December 31, 2013, the commissary account balance was $7,174, and identified liabilities totaled $1,352, resulting in an unidentified balance of $5,822.

Maintaining running book balances in check registers and performing monthly bank reconciliations helps ensure accurate records are kept and increases the likelihood errors will be identified. Regular identification and comparison of liabilities to the reconciled cash balance, is necessary to ensure records are in balance and monies are available to satisfy all liabilities. Further, various statutory provisions provide for the disposition of unidentified monies.

1.3 Deposits

The Jail Administrator is not depositing monies received in the Sheriff's fee, bond, and commissary accounts timely. For example, $713 received from November 24 through December 7, 2013, was not deposited in the commissary account until December 9, 2013. In another example, separate deposits were made for fee, bond, and commissary accounts on October 16, 2013. These deposits included 15 receipts from September 26 through September 30 totaling $260 for the fee account, 3 receipts from September

27 through September 30 totaling $1,201 for the bond account, 20 receipts from September 25 through September 28 totaling $425 for the commissary account, and did not include any receipts after September 30. The Jail Administrator indicated the delay in making the deposits occurred because she was on vacation and deposits could not be made until she returned from vacation.

Failure to implement adequate depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper depositing procedures are necessary to ensure all receipts are handled and accounted for properly.

1.4 Board of prisoners

The Sheriff bills other entities for boarding prisoners, but does not adequately follow up on billings to ensure all payments are received. The Jail Administrator indicated the office does not maintain a list of amounts billed, collected, or owed, or otherwise monitor billed amounts to ensure payment is received. The county reported board of prisoners receipts totaling nearly $159,000 in its 2014 budget for the year ended December 31, 2013.

Adequate procedures to bill and collect board of prisoner costs are necessary to ensure amounts owed are collected. Proper records and follow up procedures are also necessary to safeguard against possible loss, theft, or misuse of funds going undetected.

1.5 Bond fees

State law does not include provisions for the Sheriff to collect a $10 bond processing fee. Bond processing fees of approximately $3,600 collected during the year ended December 31, 2013, were deposited into the Law Enforcement Sales Tax Fund. The Sheriff does not have statutory authority to collect this fee and should cease this practice.

1.6 Commissary profits

The Sheriff has not turned over any of the commissary profits to the county treasury since February 2010 when the County Commission authorized the office to provide commissary services for inmates. As noted in section 2.2, Sheriff's office personnel do not prepare bank reconciliations or a list of liabilities for the commissary account. As a result, the amount of profit retained in the account cannot be determined. However, the bank balance less known liabilities at December 31, 2013, was $5,822.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

Similar conditions previously reported

We noted similar conditions to sections 1.1, 1.3, and 1.4 in our prior audit report.

Recommendations

The Sheriff:

1.1 Adequately segregate accounting duties to the extent possible and ensure supervisory reviews of accounting records are performed and documented.

1.2 Ensure running balances in the check register are maintained, monthly bank reconciliations are performed, and reconciled to lists of liabilities. Any differences between accounting records and reconciliations should be investigated and resolved. After sufficient efforts are made to resolve differences, any remaining unidentified monies should be disposed of in accordance with state law.

1.3 Ensure deposits are made timely.

1.4 Establish adequate procedures to routinely follow up and pursue collection of unpaid board bills.

1.5 Discontinue collecting the bond fee.

1.6 Ensure existing and future commissary profits not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer to be deposited into the Inmate Prisoner Detainee Security Fund.

Auditee's Response

The Sheriff provided the following written responses:

1.1 The Sheriff has implemented segregation of duties by assigning personnel to collect funds separately. All incoming commissary money is received by Dispatch and Sheriff's Office employees. The Jail staff add money to inmate accounts on BankersWeb, verifying that all money and pertinent information is present for the money drop. After the money has been dropped, all money is secured in the lock box and the Jail Administrator checks for the proper balance and deposits the money. Dispatch receives all bond money and other fees and secures in the lock box. The Administrative Assistant then collects the money from lock box, balances, and deposits the money.

1.2 The Jail Administrator is responsible for the commissary account only. Each time a deposit is made at the bank that deposit is properly recorded. At the end of the month a total is given to the Sheriff. The Administrative Assistant is responsible for fee and bond

deposits. Each time a deposit is made it is documented and a total is added at the end of the month. On all accounts, bank reconciliations and liabilities will be addressed and checked by administrative staff and the Sheriff. We will maintain a running balance for all accounts.

1.3 To ensure that deposits are made timely, the Jail Administrator and the Administrative Assistant will make weekly deposits to the bank. This task will be performed every Friday.

1.4 When checks from other counties are received, dispatch will pass on to the Jail Administrator to be recorded and then the money will be placed in lock box for the Administrative Assistant to deposit into the proper account. The Jail Administrator will be making copies of checks that are sent for inmate board bills. Copies will be secured in inmate's jail jacket. We will also identify in the case tracking and accounts receivable system that payment has been made.

1.5 As of April 2014, the Dent County Sheriff's Office no longer collects a bond fee.

1.6 Funds totaling $5,000 were deposited into the Inmate Prisoner Detainee Security Fund in July 2014. All profits will be documented.

2. Prosecuting Attorney Controls and Procedures

Procedures over outstanding checks and tracking of bad checks need improvements. The Prosecuting Attorney's office processed approximately $91,000 in bad check and court ordered restitution and fees during the year ended December 31, 2013.

2.1 Outstanding checks

The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks. At December 31, 2013, 19 checks, totaling $1,018, had been outstanding for over a year in the restitution and bad check account. In addition, the Prosecuting Attorney was still maintaining an inactive restitution and bad check account that had been used by a former official. As of December 31, 2013, this inactive account had 51 outstanding checks, totaling $4,401, with issue dates ranging from 2004 to 2010, and the remaining $11,159 held was unidentified. Various statutory provisions provide for the disposition of unidentified monies.

Proper follow up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise allowed by state law.

2.2 Tracking procedures

The Prosecuting Attorney's office does not have adequate procedures in place to account for and monitor the disposition of all bad checks submitted

to the office for collection. The legal assistant receives the bad check complaint forms, records them in the computer system, sends out 10 day notice letters, and accepts payments. Bad check complaint forms submitted by merchants when bad checks are turned over to the Prosecuting Attorney for collection are not assigned a sequential tracking number. Information from the complaint form is entered into the computer system and the complaint form is filed in the defendant's case file. Without a tracking procedure, there is less assurance all bad check complaints are entered into the computer system for processing.

To ensure bad checks are handled and accounted for properly, a sequential number should be assigned to each bad check complaint form or bad check received. This number should be used to track the status and disposition of the corresponding bad check.

Similar conditions previously reported

We noted similar conditions in our prior audit report.

Recommendations

The Prosecuting Attorney:

2.1 Establish procedures to routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payees cannot be located, those amounts and any remaining unidentified monies should be disposed of in accordance with state law and the inactive restitution and bad check account should be closed.

2.2 Develop procedures and records that provide sufficient information to track the receipt and disposition of all bad check complaints.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

2.1 At this time, we have identified all known victims for purposes of the restitution account in question. We will be sending the remaining funds to the State Treasurer's office in the very near future. On September 15, 2014, this office wrote a check from the current account in the amount of $1,854.31 to the State Treasurer's office, along with the necessary forms required by that office. This amount accounted for identifiable victims that we have been unable to locate in our current restitution account. Effective immediately, we are closing all additional past restitution accounts and will be utilizing a centralized account. It is my belief that our follow-up procedure correctly identified the issue, but our due diligence involved making every effort possible to locate victims that are entitled to restitution. We have exhausted all avenues at this point

and will be submitting all remaining funds to the State Treasurer's office as abandoned property.

2.2 Our current restitution program does not create a sequential number at the moment the 10 day letter is provided. The program is commonly referred to as Dennis Jones. I have spoken with the software designer and he has indicated that the program includes functionality to address this issue. This should resolve the matter as the sequential number can be tracked from creation of the account through its finality. We will continue to only accept money orders and online payments to ensure that a record is created for each transaction.

3. Property Tax System and County Collector Liabilities

Procedures related to property taxes and the County Collector's monthly list of liabilities need improvement. For the year ended February 28, 2014, property taxes and other monies collected by the County Collector totaled approximately $7.2 million.

3.1 Review of property taxes

As similarly noted in our prior two audit reports, neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Clerk does not include yearly totals in the account book summarizing property tax transactions each month. In addition, the County Clerk and the County Commission do not perform procedures to verify the accuracy and completeness of the County Collector's annual settlements. As a result, there is an increased risk of loss, theft, and misuse of property tax monies going undetected, and less assurance the annual settlements are complete and accurate.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. An account book or other records that summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector are accounted for properly and could also be used by the County Clerk and County Commission to verify the County Collector's annual settlements. These procedures are intended to establish checks and balances related to the collection of property taxes.

3.2 Liabilities

The County Collector does not prepare a monthly list of liabilities and reconcile the list to the available cash balance. As similarly discussed in the prior audit report, throughout the audit period there was no procedure in place to reconcile the bank account balance to existing liabilities monthly. At our request, the County Collector prepared a liabilities list, performed a

reconciliation as of December 31, 2013, and determined the reconciled cash balance of $5.1 million agreed with total liabilities.

Without a regular comparison of liabilities to the reconciled cash balance, there is less likelihood errors will be identified and the ability to resolve errors is diminished. Differences must be adequately investigated and explained.

Recommendations

3.1 The County Clerk should determine yearly totals in her account book and the County Commission and the County Clerk should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

3.2 The County Collector prepare monthly lists of liabilities, reconcile the lists to the available cash balance, and promptly investigate any differences.

Auditee's Response

The County Commission and the County Clerk provided the following written response:

3.1 The County Clerk will determine the yearly totals in her account book and the County Commission and the County Clerk will ensure the accuracy and completeness of the County Collector's annual settlements.

The County Collector provided the following response:

3.2 The County Collector has implemented this recommendation.

4. County Sales Tax

The county did not properly report property tax levy reductions to the State Auditor's office for several years. In addition, the County Clerk used incorrect data in her sales tax reduction calculations, did not properly consider prior year levy reduction results, and could not locate her 2010 calculation worksheets.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Dent County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet the 50 percent reduction requirement and provides for an adjustment for actual sales tax collections of the preceding year that are more or less than the estimate for the preceding year.

The county is required to certify to the State Auditor's office the annual property tax levy including the amount the levy is reduced for sales tax collections, as well as voluntary reductions, if any. For many years the

county has chosen to set the general revenue tax levy at .0350, and has either incorrectly reported the reduction as voluntary instead of as a sales tax reduction or combination of sales tax and voluntary reductions or has not designated the reduction classification on its tax rate forms. The county certified a voluntary reduction for 2008 and the State Auditor's office followed Section 137.073.5(4), RSMo (amended in 2008), which provides a voluntary reduction taken in a non-assessment year (even year) results in a reduced tax rate ceiling during the subsequent reassessment year (odd year), causing a significantly lowered tax rate ceiling for the county in 2009.

County officials were apparently unaware of the lowered tax rate ceiling and the County Clerk used incorrect tax rate ceilings in her sales tax reduction calculations for 2009 through 2013. The County Clerk also did not properly consider the results of prior year property tax reductions when performing her annual calculations. For some years no adjustment was made and for other years the adjustment was computed using incorrect information. Documentation supporting the county's 2010 tax levy reduction calculations could not be located.

After we brought these concerns to the county's attention, the County Commission took the necessary steps to reinstate the county's tax rate ceiling for 2014. The county held a public hearing and adopted a resolution to increase its previously reduced tax rate ceiling as allowed by Section 137.073.5(4), RSMo, and submitted amended tax rate forms to the State Auditor's office as allowed by Section 137.073.6(3), RSMo (effective September 11, 2013). County officials used the reinstated ceiling in performing 2014 sales tax reduction calculations and when setting the county's property tax levy.

To ensure property tax levies are properly set and property tax rate ceilings are maintained, the County Commission and County Clerk should ensure property tax levy reductions are accurately calculated, reported and certified. Documentation of calculations and tax rate setting decisions is important to demonstrate compliance with statutory provisions and serve as a reference tool should questions arise.

Recommendation

The County Commission and County Clerk properly calculate and report property tax rate reductions (sales tax or voluntary). During the tax rate setting process, the County Commission and County Clerk should ensure tax rate information reported back to the county in the State Auditor's office certification letter is consistent with expectations and, if not, promptly follow up on any discrepancies.

Auditee's Response

The County Commission and the County Clerk provided the following written response:

The County Commission and County Clerk will ensure the tax rate information on the pro forma tax rate summary sheet is consistent with state statutes and our expectations. We will ensure the totals are properly reported.

Dent County
Organization and Statistical Information

Dent County is a county-organized, third-class county. The county seat is Salem.

Dent County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 39 full-time employees and 15 part-time employees on December 31, 2013.

In addition, county operations include a Senate Bill 40 Board and Senior Citizens Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Darrell Skiles, Presiding Commissioner	$	28,400
Dennis Purcell, Associate Commissioner		26,400
Gary Larson, Associate Commissioner		26,400
Cindy Ard, Recorder of Deeds		40,000
Angie Curley, County Clerk		40,000
Andrew M. Curley, Prosecuting Attorney		116,858
Rick Stallings, Sheriff		44,000
Denita Williams, County Treasurer		40,000
Gina White, County Coroner		12,000
James Kotschedoff, Public Administrator		40,000
Dennis O. Medlock, County Collector, year ended February 28,	40,000	
Tina Whitaker, County Assessor, (1) year ended August 31,		3,846
Brenda Bell, County Assessor, (1) year ended August 31,		30,085
Craig Ruble, County Surveyor (2)		

(1) Due to a vacancy in this office, Tina Whitaker, the Assessor-elect, was appointed in July 2013.
(2) Compensation on a fee basis.

Financing Arrangements

The county entered into capital leases for 8 pieces of road and bridge equipment and 1 patrol vehicle. The total remaining principal outstanding at December 31, 2013, was $508,537. Interest remaining to be paid over the life of the agreements totals $40,694.

Thomas A. Schweich

Missouri State Auditor

Texas County

October 2014

Report No. 2014-094

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Texas County

Tax Maintenance Fund	Due to a disagreement with the County Commission, the County Collector-Treasurer opened a separate Tax Maintenance bank account and used this account for some deposits and disbursements instead of using the county's Tax Maintenance Fund. This activity was not recorded in the county's accounting system or reflected in the county's financial statements resulting in the county not issuing some required 1099-MISC forms. The County Collector-Treasurer made more than $10,000 in disbursements that were not in compliance with state law and/or did not appear reasonable. Purchases included security equipment and installation; a 47-inch flat screen television; cooking supplies, food, and catering services for "customer appreciation" events; a gaming system and video games; a tablet computer; a laptop; office decorations; and cable television service. Under state law the Tax Maintenance Fund is to be used for administration and operation costs of the office of the County Collector-Treasurer.
County Collector-Treasurer Controls and Procedures	The County Collector-Treasurer and her deputies improperly waived and adjusted as much as $7,830 in penalties and interest on delinquent taxes for some taxpayers and needs to improve procedures and records related to the collection of partial payments. The County Collector-Treasurer did not ensure complete and accurate bank reconciliations or lists of liabilities were performed and did not document her reviews. The County Collector-Treasurer has not ensured overpayments received are documented or refunded properly. The County Collector-Treasurer does not have procedures to reverse recorded payments for insufficient fund checks and the County Clerk incorrectly entered the effective date on which penalties would begin being charged on delinquent taxes.
Public Administrator Controls and Procedures	The former Public Administrator did not timely file annual settlements for active wards, did not timely file settlements following the death of a ward for at least 17 cases, and did not assess and collect fees from the accounts of some wards and estates. Similar weaknesses had been discussed in one or more prior audit reports. The former Public Administrator also did not make payments timely, maintain adequate supporting documentation for some disbursements, and did not prepare monthly bank reconciliations for any bank accounts.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney has not adequately segregated accounting duties or performed a supervisory review of accounting records. The Bad Check Clerk does not prepare a monthly list of liabilities and reconcile the list to the cash balance. The Prosecuting Attorney's office does not adequately monitor the collection of court-ordered restitution, account for and monitor the disposition of all bad checks submitted to the office, ensure information recorded in the computerized accounting system is accurate and reliable, or routinely follow up on outstanding checks.

Sheriff Controls and Procedures	As noted in our prior 3 audits reports, the Sheriff has not adequately segregated accounting duties and has not established a supervisory review of accounting records. The Jail Administrator had not performed a bank reconciliation since October 2010, and the bank reconciliations prepared at our request identified 397 checks that had been outstanding for more than one year. The Sheriff has not established adequate controls over seized property.
Minutes and County Procedures	The County Commission did not approve 8 of 49 open meeting minutes during 2012, the County Commission and the County Clerk do not always agree on the accuracy of the minutes and do not resolve their differences, topics discussed in closed meetings were not always cited in open meetings, and roll call votes to enter the closed meeting were not always documented. The county did not solicit requests for proposals or enter into written agreements for several professional service purchases. Some county officials do not require their staff to change computer passwords periodically, while others allowed staff to share passwords. The county lacks procedures to ensure 1099-MISC forms are prepared and filed as required.
County Assessor Receipts	The County Assessor does not always issue receipt slips for monies received, record all receipts on a log when received, or account for the numerical sequence of receipt slips issued.
Wri-Tex 911 Operations Fund	The Wri-Tex 911 Executive Board has not developed a plan to address the declining financial condition of the Wri-Tex 911 Operations Fund. The cash balance has fallen from $157,062 in 2011 to a budgeted $28,610 in 2014. Texas County did not have the authority to transfer an administrative fee from the Wri-Tex 911 Operations Fund to the county's General Revenue Fund.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 30

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Texas County

We have audited certain operations of Texas County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Texas County for the 2 years ended December 31, 2012. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

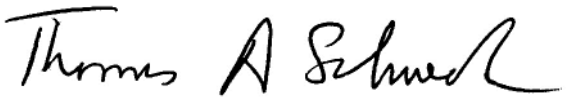
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Texas County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Natalie B. McNish, CGAP
Audit Staff:	Michelle Crawford, M.Acct, CIA
	Terese Summers, MSAS, CPA
	Shannon Spicer
	Katelyn Crosson

1. Tax Maintenance Fund

We identified significant problems with the management and use of Tax Maintenance Fund monies.

The County Collector-Treasurer is required to collect a penalty of 7 percent of the total charged on delinquent taxes, and two-sevenths of this penalty is required to be paid into the Tax Maintenance Fund of the county to be used for additional administration and operation costs related to the office of the County Collector-Treasurer. During the year ended December 31, 2012, the County Collector-Treasurer authorized disbursements of $10,418 from the county's Tax Maintenance Fund and $8,057 from her Tax Maintenance bank account.

1.1 Bank account

In February 2012, due to disagreements between the County Commission and the County Collector-Treasurer regarding the appropriate use of funds, the County Collector-Treasurer opened a separate Tax Maintenance bank account and during the year ended December 31, 2012, she deposited $8,186 of $15,144 in fees collected into this bank account instead of the county's Tax Maintenance Fund. The County Collector-Treasurer also disbursed $8,057 from this bank account instead of disbursing the monies from the county's Tax Maintenance Fund. As a result, the activity in the separate bank account was not recorded in the county's accounting system, the county's 2012 financial statements did not present this activity, and in at least 3 instances, required vendor 1099-MISC forms were not issued.

In order to avoid future problems, the County Collector-Treasurer should close the separate bank account and record all activity of the Tax Maintenance Fund in the county's accounting system.

1.2 Disbursements

The County Collector-Treasurer made more than $10,000 in disbursements from both the county's Tax Maintenance Fund and the separate bank account that were not in compliance with uses allowed by state law and/or did not appear reasonable. Many purchases appeared to be for personal use and not essential to the administration or operation of the County Collector-Treasurer's office. In addition, some purchases were not adequately supported, and some property items purchased were not tagged as county property. Also, personal use of some items was identified.

- In July 2012, the County Collector-Treasurer purchased security equipment including professional installation for $4,000, including a wireless clock with camera, 2 wireless exit signs with cameras, a digital wireless camera, and a digital video recorder with DVD burner. The wireless exit signs were installed at the courthouse entrances without the knowledge of any other official. The remaining items were installed in the County Collector-Treasurer's office. This property was not tagged as county property or added to the county's capital asset listing.

- In November 2010, the County Collector-Treasurer purchased a 47 inch flat screen television costing $1,148. The television was placed in a meeting room to be used by the County Collector-Treasurer and her staff to exercise after work. According to the receipt, the County Collector-Treasurer received a $250 gift card with this purchase; however, no documentation supporting the use of this gift card was retained by the County Collector-Treasurer. At our request, the County Collector-Treasurer contacted the retailer and obtained the documentation. It showed the $250 gift card was used to purchase four yoga mats, four DVDs, exercise weights, office supplies, and donuts. The television was not tagged as county property or added to the county's capital asset listing.

- In February 2011, the County Collector-Treasurer purchased cooking supplies including a 10 piece cookware set ($89), two skillets ($50), muffin pans ($10), and other small kitchen gadgets. Also, various grocery items totaling more than $1,300 in 2012 and $700 in 2011, including coffee, bottled water, soda, chips, candy, cookies, meat, bread, and fresh produce, were purchased. The County Collector-Treasurer indicated she hosts a customer appreciation event each Friday at her office, and the food is for those events. Catering services totaling $115 in January 2011 and $300 in December 2011 were also identified as customer appreciation items. Review of the bank account register for 2013 transactions between January and May 2013, identified similar purchases of grocery items.

- In March 2011, the County Collector-Treasurer purchased a gaming system ($399) and two video games ($50 each). The County Collector-Treasurer indicated these items are used by herself and her staff to exercise after work. We observed the County Collector-Treasurer's grandson using the gaming system. The gaming system was not tagged as county property or added to the county's capital asset listing.

- In November 2011, the County Collector-Treasurer purchased a 10 inch tablet computer ($398), protective case ($40), and screen protectors ($15). When the County Collector-Treasurer prepared the disbursement information for the County Clerk to process, she identified the item as a computer monitor; however, this description is inaccurate. Also, in September 2013, the County Collector-Treasurer purchased a laptop computer ($399). According to the County Collector-Treasurer, the tablet and laptop are kept at her home and are used to access her e-mail account when she is away from the office. Neither the tablet nor the laptop was tagged as county property or added to the county's capital asset listing.

- The County Collector-Treasurer purchased various office decorations and miscellaneous items including flowers and flower boxes, clocks, bird feeders and bird seed, bales of hay, pumpkins, a Christmas tree and Christmas decorations totaling approximately $600 for the 2 years ended December 31, 2012. Review of the bank account register for 2013 transactions between January and May 2013, identified similar purchases of office decorations and miscellaneous items.

- The County Collector-Treasurer pays for cable television service in her office totaling approximately $200 per year.

Section 54.325, RSMo, indicates the Tax Maintenance Fund is to be used for administration and operation costs of the office of the County Collector-Treasurer. It is unclear how the above items benefited the operation or administration of the office of the County Collector-Treasurer and therefore, the disbursements are not an appropriate use of Tax Maintenance Fund monies. In addition, several of the items appear to be for personal rather than office use. Adequate capital asset records and procedures are necessary to ensure effective internal controls over county property.

Recommendations

The County Collector-Treasurer:

1.1 Should close the separate bank account and record all Tax Maintenance Fund activity in the county's accounting system.

1.2 Ensure disbursements from the Tax Maintenance Fund are adequately documented and in compliance with statutory provisions. In addition, the County Collector-Treasurer should ensure equipment purchased is tagged as county property, and recorded in the county property records.

Auditee's Response

The County Collector-Treasurer provided the following written responses:

1.1 The County Collector-Treasurer has closed her separate account.

1.2 The County Collector-Treasurer disagrees with the auditor's finding. The County Collector-Treasurer believes that every expense made was essential to the administration and operation of the County Collector-Treasurer's office. The County Collector-Treasurer does not believe items purchased and valued under $1,000 are required to be tagged [49.093 RSMo].

- *The purchase of a security system was needed for the operation of the office. Other officials including members of the County Commission had knowledge of the system.*
- *The purchase of the television and the placement in the meeting room has been used by most of the offices in the Administrative Center including the County Commission.*
- *The purchase of supplies and equipment has been used by most of the offices in the Administrative Center including the County Commission.*
- *The County Commission approved the meeting room use as an exercise room for after work hours.*
- *A tablet computer is a needed piece of equipment.*
- *The decorations cost of the office is reasonable.*
- *The cost of cable services is a reasonable expenditure.*

The County Collector-Treasurer will discuss this fund with any resident needing additional information.

Auditor's Comments

1.2 We could not determine how any of the questionable items were "essential" to the operation or administration of the office of the County Collector-Treasurer. The County Collector-Treasurer's response only mentions one purchase that was "needed for the operation of the office." Many of the purchases seemed only for personal use with no intent to be used in the business operations of the office.

The County Collector-Treasurer's response does not address the need to tag as county property items purchased that exceeded $1,000 (television and security system). Under Texas County capital assets policies, officials may report items costing less than $1,000 and if reported the items are tagged as county property. It appears the County Collector-Treasurer's past practice has been to add computers or computer related items costing under $1,000 to her office's capital asset listing because the current listing included about 20 such items.

2. County Collector-Treasurer Controls and Procedures

Significant control weaknesses were noted in the processing of transactions. The County Collector-Treasurer's office processed tax collections of more than $8.5 million during the year ended February 28, 2013.

2.1 Waivers and adjustments

The County Collector-Treasurer and her deputies improperly waived and adjusted penalties and interest on delinquent taxes for some taxpayers. Under Section 139.100, RSMo, collectors are required to collect penalties and interest on delinquent taxes. That section allows the penalties and interest to be waived or adjusted for the purpose of processing certain transactions such as items postmarked prior to the due date or for taxes due from persons absent from the home and serving in the military. The County Collector-Treasurer and her deputies waived or adjusted penalties and interest in the property tax system by either manually deleting penalties and interest or by changing the date used by the system to calculate penalties and interest due. Our review of delinquent tax transactions processed between January 3 and December 12, 2012, identified 2,444 transactions where penalties and/or interest totaling $7,830 were likely waived or adjusted by the County Collector-Treasurer or her staff for other than allowable reasons. We selected 61 of these transactions for further review and identified approximately $320 in penalties and approximately $1,100 in interest not collected when required.

The County Collector-Treasurer did not maintain separate records of these waivers and adjustments or review waivers and adjustments made by her staff. The County Collector-Treasurer was unable to provide any justification for some waivers and adjustments and some reasons provided, such as taxpayers not receiving a tax bill, incorrect addresses, or land parcels not being correctly combined for billing purposes, are not sufficient to warrant adjustment of penalties and interest due.

The County Collector-Treasurer should collect penalties and interest on delinquent taxes as required by law. In addition, the County Collector-Treasurer should ensure any waivers or adjustments are supported by adequate documentation and reviewed and approved by the County Commission.

2.2 Partial payments

The County Collector-Treasurer has not established adequate procedures and records related to the collection of partial payments. The County Collector-Treasurer accepts partial payments from taxpayers who are unable to pay their tax bills in full. Partial payments are held in escrow in the County Collector-Treasurer's bank account until the tax bill is fully paid, whereupon the County Collector-Treasurer records the taxes as paid in the property tax system. During the year ended December 31, 2012, the County

Collector-Treasurer handled partial payments totaling approximately $21,000 for 40 taxpayers.

Manual receipt slips were not always issued for partial payments received, did not always document method of payment, were not always issued in numerical sequence, and voided manual receipts slips were not always retained. In addition, some partial payments were not recorded on partial payment ledgers, some partial payment ledgers were destroyed, some partial payments received were not deposited timely, and balances due were not always updated for current interest charges.

For example, the County Collector-Treasurer accepted a $600 money order as partial payment on March 20, 2012, for a taxpayer who owed a total of $1,182 at March 30, 2012. No manual receipt slip was issued, the money was not timely deposited, and no partial payment ledger was established. A second payment was receipted on June 19, 2012, totaling $291. These two payments, totaling $891, were held and not deposited until July 31, 2012. On October 23, 2012, the taxpayer made a final payment totaling $291. All payments, totaling $1,182, were recorded in the property tax system on October 23, 2012. However, $102 in interest accumulated between March and October 2012 was not collected.

Without accurate and detailed records for all partial payments collected and balances due, there is little assurance partial payments are properly handled and recorded. A properly maintained partial payment account ledger is crucial in the process of identifying liabilities of the County Collector-Treasurer.

2.3 Bank reconciliations and liabilities

The County Collector-Treasurer did not ensure her staff prepared complete and accurate bank reconciliations or a list of liabilities, and did not document her review of bank reconciliations prepared.

Bank reconciliations do not indicate all deposits in transit and a periodic list of liabilities was not prepared and agreed to the reconciled cash balance. We prepared a list of liabilities totaling $170,915 at April 30, 2013, which included taxes to be distributed, bank interest, and partial payments; however, the reconciled cash balance at that date was $190,448, resulting in a difference of $19,533. The County Collector-Treasurer believes approximately $7,000 of this amount is additional partial payments held; however, she was unable to provide documentation to support this amount.

Adequate and accurate bank reconciliations are necessary to ensure all receipts and disbursements are accounted for properly and the cash balance in the bank account can be properly identified. Without regular comparison of liabilities to the available cash balance and documented supervisory review, there is less likelihood errors will be identified and the ability to

resolve errors is diminished. Differences must be adequately investigated and explained to provide assurance that bank and book balances have been properly reconciled, and that book balances are accurately stated.

2.4 Refunds

The County Collector-Treasurer has not established procedures to ensure overpayments received are documented or refunded properly. When an individual overpays his/her taxes by check, the amount due is recorded, instead of the check amount, in the property tax system. Then, when preparing the deposit slip, only the amount due is recorded on the deposit slip instead of the check amount and a "note" is prepared requesting the bank issue a cashier's check(s) payable to the taxpayer for the overpayment amount. The bank issues the cashier's checks at no cost to the County Collector-Treasurer and the County Collector-Treasurer mails the refund to the individual.

For example, on May 11, 2012, $124 in cash and $636 in checks ($760 total) was recorded in the tax accounting system as payment received. The deposit slip prepared agrees to the recorded information in composition and total; however, the bank actually received cash totaling $124 and checks totaling $650, for a total of $774. The bank deposited $760 and issued two cashier checks for refund of over payments in the amount of $9 and $5 to specified taxpayers. The County Collector-Treasurer did not maintain records of all refunds issued by cashier's check and failed to properly receipt or document actual amounts received in accounting records. To fully understand refund transactions required obtaining bank data since the County Collector-Treasurer's records did not provide sufficient detail.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, overpayments should be properly receipted, recorded and deposited and refunds should be made by check from the County Collector-Treasurer's bank account. Refunded amounts should be supported by adequate documentation.

2.5 Insufficient fund checks

The County Collector-Treasurer does not have procedures in place to reverse payments previously recorded in the property tax system for insufficient fund (NSF) checks. When tax receipts are collected by the County Collector-Treasurer's office, the payments are posted to the tax accounting system. However, when subsequent notices of NSF checks are received, adjustments are not made to the property tax system.

Restitution for NSF checks may not be received until several months after the tax receipt was initially collected and in some instances, restitution may not be received. However, the County Collector-Treasurer disburses all monies recorded in the property tax system as receipts to the various political subdivisions on a monthly basis. As a result, the County Collector-Treasurer disbursed approximately $4,400 during the year ended February 28, 2013, even though these amounts were not actually received.

2.6 Penalty date

The County Clerk's office incorrectly entered the effective date on which penalties would begin being charged on delinquent taxes in the property tax system for 2011 real estate and personal property taxes.

The County Clerk's office is responsible for entering the date on which penalties are to be assessed on delinquent taxes owed. When this information was entered into the property tax system, the County Clerk's office mistakenly entered March 1, 2012, instead of January 1, 2012, causing the system to not charge the 7 percent penalty on delinquent 2011 property taxes paid between January 1 and February 28, 2012. The County Collector-Treasurer stated her office did not identify the error until late February 2012, and opted not to correct the error at that time. As a result, taxpayers delinquent in paying taxes were not charged the statutory 7 percent penalty required by law until March 1, 2012, and we estimate approximately $25,200 in penalties were not collected. In addition, the failure to assess and collect the 7 percent penalty resulted in less monies being disbursed to the General Revenue Fund, Tax Maintenance Fund, and County Employee's Retirement Fund as outlined by state law.

To ensure penalties are properly and consistently charged to county taxpayers, the County Clerk should review the penalty dates entered into the property tax system and the County Collector-Treasurer should ensure penalties charged are accurate.

Recommendations

The County Collector-Treasurer:

2.1 Collect penalties and interest on delinquent taxes as required by law. In addition, the County Collector-Treasurer should ensure any waivers or adjustments are supported by adequate documentation and reviewed and approved by the County Commission.

2.2 Ensure partial payments are receipted immediately upon receipt, record partial payments on payment ledgers and ensure ledgers are maintained to support payment activity, and ensure balances are updated to reflect interest accrual.

2.3 Prepare complete bank reconciliations including lists of liabilities and reconcile the list of liabilities to the reconciled bank balance monthly. Any differences should be investigated and promptly resolved and supervisory review of the bank reconciliations should be documented.

2.4 Receipt, record, and deposit overpayments received, pay refunds by check, and maintain a complete record of all refunds issued.

2.5 Establish procedures to reverse NSF check payments from the property tax system timely.

2.6 Work with the County Clerk to review the penalty dates entered into the property tax system to ensure penalties are properly assessed and collected.

Auditee's Response

The County Collector-Treasurer provided the following written responses:

2.1 The County Collector-Treasurer agrees and has established adequate procedures and will follow the statutory requirements.

2.2 The County Collector-Treasurer has established adequate procedures to collect partial payments.

2.3 The County Collector-Treasurer believes she has proper procedures pertaining to bank reconciliations. Each month is approved and signed off by said County Collector-Treasurer. In addition, office staff will prepare a list of liabilities monthly and reconcile the list to the reconciled bank balance.

2.4 The County Collector-Treasurer believes she has proper procedures implemented to ensure adequate refunds and overpayment.

2.5 The County Collector-Treasurer has implemented procedures to adequately deal with payments related to NSF checks.

2.6 The County Collector-Treasurer has reviewed with the County Clerk and questions the amount of the audit finding.

The County Commission provided the following written response:

2.1 The County Commission agrees with the recommendation.

The County Clerk provided the following written response:

2.6 The County Clerk's office did incorrectly enter the wrong date on which penalties would begin being charged on delinquent taxes in the property tax system for 2011. The County Clerk's office will strive to enter the correct penalty dates so that the correct penalties will be charged on future delinquent taxes in the property tax system. The County Clerk's office questions the auditor's estimate of penalties not collected.

Auditor's Comment

2.4 The current method for handling refunds and overpayments used by the County Collector-Treasurer results in several control weaknesses including the failure to (1) deposit receipts intact, (2) make all disbursements by check, and (3) record all receipts and disbursements in the County Collector-Treasurer's accounting system, and increases the risk that loss or theft of monies could occur and not be detected.

2.6 The County Clerk indicated there was no attempt by county officials to calculate the amount of penalties that were not collected. Our methodology produced a reasonable estimate of the amount of penalties not collected.

3. Public Administrator Controls and Procedures

Procedures in the Public Administrator's office need improvement. During the year ended December 31, 2012, the Public Administrator was the court appointed personal representative for 59 individuals comprised of 36 active wards requiring annual settlements, 17 decedent estates, and 6 guardianships.

Unless otherwise specified, references to Public Administrator relate to the former Public Administrator whose term ended December 31, 2012. The current Public Administrator took office in January 2013. Recommendations are directed to the current Public Administrator since she is in a position to work with the Associate Circuit Court, Probate Division and implement changes.

3.1 Annual settlements

As noted in our previous two audit reports, the Public Administrator did not file annual settlements timely in compliance with state law. In addition, the Associate Circuit Court, Probate Division does not have procedures to notify the Public Administrator prior to the deadline for the annual settlement or to follow up on annual settlements not filed by the required date.

We reviewed the beginning and ending settlement dates for 32 active ward's case files with an annual settlement due for 2012 or 2013. We found annual settlements had not been filed in at least 3 years for 29 of the 32 cases reviewed, including 2 cases with no settlements filed since 2004 and 13 cases with no settlements filed since 2005. In addition, no annual settlement had been filed for 3 of the 32 cases as of October 1, 2013.

Further, with a newly elected official taking office in January 2013, the prior Public Administrator was required by Section 473.767.2 and .3, RSMo, to submit final settlements for each active ward in order to turn over assets to the newly elected official. In our review of these same 32 cases, we found 3 cases where final settlements were not filed until July 2013 and 3 cases in which no final settlement had been filed as of October 1, 2013.

Also, the settlements filed did not always include all needed information and the court did not have a system in place to monitor and ensure timely filing of settlements, and did not always timely follow up with the Public Administrator regarding settlement omissions or other problems. The Public Administrator filed an annual settlement on July 25, 2012, without including beginning inventory or signing the document to attest to its accuracy. The Probate Clerk failed to contact the Public Administrator to request the needed information and signature until December 29, 2012. The Public Administrator filed an amended settlement including the needed information and signature on January 15, 2013, and the settlement was approved by the Judge on January 22, 2013.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Section 473.767, RSMo, requires the Public Administrator to deliver property and file necessary settlements prior to leaving his/her term of office. In addition, Sections 473.557 and 475.280, RSMo, require the clerk of the court to notify the conservator or guardian (Public Administrator) of the deadline for the annual settlement. Timely, complete, and accurate settlements are necessary for the court to properly oversee the administration of cases and reduce the possibility that loss, theft, or misuse of funds will go undetected.

3.2 Case disposition

The Public Administrator did not timely file final settlements following the death of a ward for at least 17 cases. Fourteen of these wards died from 3 to 10 years prior to the final settlement filing date, and one ward died in the same year as the final settlement filing date. As of October 1, 2013, final settlements for 2 cases for wards who died in 2006 and 2009 were still not filed, and assets, including bank account balances, had not been distributed to the wards' heirs. The Public Administrator provided no explanation for the delays. Further, the Public Administrator held bank accounts open for these deceased wards and several banks charged monthly service fees to the accounts, slowly depleting the amount available for payment of fees or disbursement to heirs.

To reduce the risk of loss, theft, or misuse of assets, the Public Administrator should ensure final settlements are filed timely and assets are promptly distributed to heirs.

3.3 Estate fees

As noted in our prior audit report, the Public Administrator did not assess and collect fees from the accounts of some wards and estates. As noted in sections 3.1 and 3.2, the Public Administrator continued to fail to file annual or final settlements throughout the remainder of her term. Due to the untimely filing of settlements, the Public Administrator did not always petition the court to approve fees from the accounts of some wards and estates, and did not always document the criteria used to determine the fees charged. Section 473.742, RSMo, provides all fees collected by a Public

Administrator who elects to be salaried are to be deposited into the county treasury.

The Public Administrator requested fees totaling $46,307 upon filing of settlements between January 1 and October 1, 2013, from 17 of 35 wards and estates. The Public Administrator did not request fees from the other 18 wards and estates. As of October 31, 2013, $27,344 has not been disbursed from the accounts of wards and estates and remains due to the county. The current Public Administrator stated she had no knowledge of fees owed by wards under her authority and had not established an accounts receivable listing to ensure the collection of these fees. The current Public Administrator indicated many cases currently held do not have sufficient assets or resources to pay the fees of the former Public Administrator.

In addition, the Public Administrator was not always consistent in the method used to calculate the fees. During our review of fees charged for services rendered during 2012, we noted some wards were charged $40 per hour for some services in addition to the $25 per month fee allowed by the Judge.

The Public Administrator issued checks for payment of fees prior to the Judge's approval of the request to pay fees incurred. For example, we noted a check for fees issued to the county in the amount of $6,169 and a check for mileage reimbursement issued to the Public Administrator in the amount of $615 in the Associate Circuit Court, Probate Division case file. These checks had been prepared and signed on July 15, 2013, however the fees and mileage reimbursement were not approved by the Judge until October 22, 2013, and the check for fees was not transmitted to the County Collector-Treasurer until October 25, 2013.

To ensure fees are properly assessed against the accounts of the wards and estates, the Public Administrator should work with the Associate Circuit Judge to establish a fee schedule. The Public Administrator should request fees when filing each annual and final settlement and remit all approved fees to the county treasury timely. In addition, the Public Administrator should consult with the Associate Circuit Judge regarding the unpaid fees of the former Public Administrator.

3.4 Disbursements and checks

The Public Administrator did not make payments timely and did not maintain adequate supporting documentation for some disbursements.

- Disbursements were not always paid timely. According to court documents found in several ward case files, several care facilities were not paid monthly for housing wards but instead were paid periodically for several months at one time during 2012 and 2013. The Public Administrator did not retain copies of the care facility invoices and we

were unable to determine if wards incurred penalties due to the untimely payments.

- Attorneys are not required to submit invoices or other documentation supporting the services provided for fees approved by the court on behalf of wards and estates.

To ensure payments are valid and proper, the Public Administrator should maintain adequate supporting documentation for disbursements paid and ensure all disbursements are paid timely.

3.5 Bank reconciliations

The Public Administrator did not prepare monthly bank reconciliations for any bank accounts. Timely preparation of monthly bank reconciliations is necessary to ensure bank accounts are in agreement with accounting records and to detect and correct errors.

Recommendations

The Public Administrator:

3.1 Ensure annual settlements are filed timely and contain all required information. In addition, the Associate Circuit Court, Probate Division should notify the Public Administrator of annual settlement deadlines timely, follow up on settlements not filed by the required date, and ensure settlements are processed timely.

3.2 File final settlements for deceased wards and petition the court for orders of distribution timely.

3.3 Work with the Associate Circuit Judge to establish a fee schedule, request fees when filing annual and final settlements and remit approved fees to the county treasury timely. In addition, the Public Administrator should consult with the Associate Circuit Judge regarding the unpaid fees of the former Public Administrator.

3.4 Ensure disbursements are paid timely and supported by adequate documentation.

3.5 Prepare and document monthly bank reconciliations for all wards bank accounts.

Auditee's Response

The Public Administrator provided the following written responses:

3.1 Annual settlements will be filed timely and will contain all required information. I have implemented a computerized system which notifies me when a filing is due to ensure timeliness.

3.2 All final settlements and petitions for distribution will be completed in a timely manner.

3.3 The Associate Circuit Judge and I have established a new fee schedule. I will request fees when filing settlements and will remit fees to the county upon approval of the Judge. I will consult with the Associate Circuit Judge regarding the unpaid fees and if necessary will establish procedures to track and remit fees as reasonable.

3.4 All disbursements will be paid timely and all supporting documentation, such as invoices and copies of checks, will be retained.

3.5 I have hired a part-time clerk who completes the bank reconciliations monthly for all wards bank accounts. I then review all reconciliations for completeness and accuracy. In the future, I will also initial these reconciliations to document my review.

The Associate Circuit Judge provided the following responses:

3.1 I have directed the Probate Clerk to comply with the provisions of Sections 473.557 and 475.280, RSMo, and to process settlements timely.

3.3 I approved the new fee schedule submitted by the Public Administrator.

4. Prosecuting Attorney Controls and Procedures

Accounting duties are not adequately segregated and supervisory reviews are not performed. Procedures to prepare lists of liabilities and reconcile the list to the cash balance have not been established, and monitoring procedures for court-ordered restitution are not adequate. Also, procedures have not been established to follow up on outstanding checks. The Prosecuting Attorney's office processed bad check restitution and fees and court-ordered restitution totaling approximately $86,500 during the year ended December 31, 2012. In addition, the Prosecuting Attorney's office began collecting delinquent taxes in 2013.

4.1 Segregation of duties

The Prosecuting Attorney has not adequately segregated accounting duties or performed a supervisory review of accounting records. The Bad Check Clerk is responsible for receipting, recording, depositing, disbursing and reconciling all bad check and court-ordered restitution monies received. The Office Manager does not document a review of any accounting records other than the bank reconciliation. In addition, the Office Manager is primarily responsible for receipting, recording, and transmitting monies received for delinquent tax collections to the Missouri Department of Revenue.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Prosecuting Attorney should implement and document an independent or supervisory review of accounting records.

4.2 Liabilities

The Bad Check Clerk does not prepare a monthly list of liabilities and reconcile the list to the cash balance. At our request, the Bad Check Clerk prepared a list of liabilities as of December 31, 2012, which totaled $673, while the reconciled cash balance was $6,923, indicating $6,250 in unknown liabilities. All monies in the bad check account are either accountable fees or are due to victims for reimbursement for bad checks or court-ordered restitution.

A complete and accurate list of liabilities should be prepared monthly and reconciled to the book balance to ensure records are in balance and sufficient funds are available for payment of all liabilities. Any differences between monthly lists of liabilities and reconciliations should be investigated and resolved.

4.3 Tracking procedures

The Prosecuting Attorney does not adequately monitor the collection of court-ordered restitution and does not account for and monitor the disposition of all bad checks submitted to the office. In addition, information recorded in the computerized accounting system is not always accurate and reliable.

Office personnel do not utilize the computerized court-ordered restitution accounting system. This system could be used to record court-ordered restitution receipts and disbursements, track amounts due, and notify clerks when payments are due or a defendant's probationary period is nearing completion. Defendant's manual case files do not clearly document the amount of restitution ordered or the balance due. In addition, the clerks entered "test" information into the computerized accounting system that was not deleted.

Office personnel do not fully utilize either of the two computerized bad check accounting systems. One system is not utilized at all and one system is only used to generate letters notifying the bad check writers they have 10 days to pay before charges are filed. Manual logs maintained to track bad check complaint forms submitted by merchants when bad checks are turned over to the Prosecuting Attorney for collection do not allow for compilation of amounts collected by date and therefore, amounts due cannot be readily determined; however, these computerized bad-check accounting systems would track the collection and disposition of each bad check complaint. Further, we noted some information recorded in one of the bad check accounting systems was related to a court-ordered restitution case, and therefore, was recorded in the incorrect system.

Adequate procedures for recording and tracking court-ordered restitution and bad-check complaints received and processed is necessary to ensure collection and disposition of each bad check, facilitate monitoring amounts due, provide information to the court, and improve accountability.

4.4 Outstanding checks

The Bad Check Clerk has not established procedures to routinely follow up on outstanding checks. As of December 31, 2012, 46 checks totaling $1,226 had been outstanding for over a year with 4 checks dating back to 2003. Procedures to routinely follow up on outstanding checks are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

Similar conditions previously reported

Similar conditions to sections 4.2 and 4.4 were noted in our two prior audit reports.

Recommendations

The Prosecuting Attorney:

4.1 Adequately segregate accounting duties or ensure an independent or supervisory review of accounting records is performed and documented.

4.2 Prepare a list of liabilities and reconcile the list to the available cash balance monthly for the bad check bank account. Any differences should be investigated and resolved.

4.3 Develop procedures and records to adequately record and track court-ordered restitution and the receipt and disposition of all bad check complaints.

4.4 Establish procedures to routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located, the amount should be disbursed in accordance with state law.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

4.1 I already have implemented and currently have the Office Manager review all accounting records for the Prosecutor's Office and I will continue to ensure that the Office Manager will review and sign and date when she approves all accounting records.

4.2 I have already implemented the monthly procedure for the Bad Check Clerk to do upon receipt of the bank statement, she is to match all transactions with the bad check account ledger, and then prepare a monthly list of any outstanding liabilities for the month. The Office Manager reviews all statements to ensure that there are

no errors and then she will sign and date each document that she has reviewed and approved.

4.3 I am in the process of changing our bad check program. We currently use the program called Bounce Back bad check and restitution collection program and we will begin to utilize the Karpel Solutions Program instead. When this change is completed then all cases will be entered into the Karpel program along with any restitution to be collected and all monies paid to victims by our office for all cases. We began utilizing Karpel for restitution payments for criminal cases on June 1, 2014. This does not include the Bad Check cases and Child Support Enforcement Restitution Cases. I am in the process of getting the Karpel program prepared to handle all cases received. When the program issues are fixed, we will begin documenting all cases received in this office into one program (Karpel Program) so that we can monitor all cases for collection of restitution and the reimbursement of payments to victims through one program (Karpel) instead of two.

4.4 We previously implemented the procedure for the Bad Check Clerk to do each month after balancing the bank statements. First, she makes a list of outstanding checks. Then each month she will monitor the outstanding check ledger and add or remove checks that have or have not been cashed by the victim and she will maintain a list to see if any of the outstanding checks have been cleared by the bank each month. If we have not received the check or money order back in the mail we will attempt to contact the victims that received the restitution payment to determine why they have not cashed the check or money order. If we are unable to locate the victim who hasn't cashed the check we will contact the bank to put a stop payment on the check(s) and then that money will be forwarded to the County Collector-Treasurer to dispose of at the end of each year. If we receive the check or money order back by mail with no forwarding address, and we are unable to locate the victim, we will void that check and issue a check for the same amount to the County Collector-Treasurer for disposal of the monies. We will prepare a check to the County Collector-Treasurer for any outstanding checks for the previous year in January of the next year. This process is also reviewed and approved by the Office Manager and she will sign and date the approved transactions.

5. Sheriff Controls and Procedures

Controls and procedures in the Sheriff's office are in need of improvement. The Sheriff's office collected monies related to civil services fees, mileage, concealed carry weapon (CCW) fees, all-terrain vehicle permits, and other miscellaneous receipts totaling more than $122,000 during the year ended

December 31, 2012. The Sheriff's office also collects bonds; however, the total amount collected was not available.

5.1 Segregation of duties

As similarly noted in our prior 3 audit reports, the Sheriff has not adequately segregated accounting duties and has not established adequate supervisory reviews. The Jail Administrator is responsible for receiving, recording, depositing, and disbursing inmate monies collected in the jail, and no supervisory review of the records is completed. The Sheriff's secretary is responsible for receiving, recording, depositing, disbursing or transmitting all monies collected in the Sheriff's office (civil fees), or transmitted from the jail, including CCW fees and bonds. The Lieutenant does not document his review of monthly bank reconciliations completed by the Sheriff's secretary, and no periodic review or comparison of receipt and deposit records is completed.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement and document an independent or supervisory review of accounting records.

5.2 Bank reconciliations

The Jail Administrator had not performed a bank reconciliation for the commissary account since October 2010. At our request, the Jail Administrator performed bank reconciliations for the months of November 2010 through October 2013. The October 2013 reconciliation identified 397 checks totaling $1,138 that had been outstanding for more than one year. Twenty-three of these checks dated back to 2009. The Jail Administrator printed a report of detainee balances as of October 31, 2013, showing $898 held as liabilities; however, the reconciled cash balance at the same date was only $779, resulting in a $119 shortage.

To ensure records are in balance and sufficient funds are available for payment of all liabilities, bank reconciliations should be prepared monthly and the balance compared to identified liabilities. Any differences should be promptly investigated and resolved. Procedures to routinely follow up on outstanding checks are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

5.3 Seized property

The Sheriff has not established adequate controls over seized property. Upon taking office on January 1, 2013, the Sheriff completed an inventory listing of all seized property that included over 440 containers and items. The Sheriff did not establish procedures for updating the listing as items were added or removed from the seized property storage area. Also, several items in the seized property storage area have been held since 2003, and the Sheriff should determine if disposal is appropriate and obtain the necessary approvals from the Prosecuting Attorney and/or the court.

Considering the often sensitive nature of seized property, adequate internal controls are essential to reduce the risk of loss, theft, or misuse of the items. Accurate and complete inventory records of all seized property items are necessary to ensure all items are accounted for properly. Section 542.301, RSMo, provides guidance for the disposition of unclaimed seized property.

Recommendations

The Sheriff:

5.1 Adequately segregate accounting duties or ensure an independent or supervisory review of accounting records is performed and documented.

5.2 Prepare monthly bank reconciliations and list of liabilities and reconcile the list to the book balance monthly for the commissary bank account. Any differences should be investigated and resolved. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located, the amount should be disbursed in accordance with state law.

5.3 Maintain complete and accurate seized property inventory records and make timely and appropriate dispositions of seized property.

Auditee's Response

The Sheriff provided the following written responses:

5.1 The Sheriff's office believes that duties are properly segregated, and this is the preferred method to ensure accuracy at this time, with the resources that are available. Since the audit, the Sheriff has implemented supervisory review by the Lieutenant and Sheriff of the monthly bank statements and reconciliations (which are initialed) and the monthly receipts and disbursement of fees to the Texas County Collector-Treasurer.

5.2 Regarding commissary, bank reconciliations and lists of liabilities are prepared monthly and turned into the Sheriff for review. Any differences are investigated and resolved. We are in the process of reissuing old outstanding checks or turning amounts over to the County Collector-Treasurer as unclaimed fees. Most monies are now disbursed to the payee upon release from the Texas County jail.

5.3 Upon taking office, the Sheriff completed an inventory of seized evidence/property room and has also created a log which details the date logged in, case number, quantity, rack and shelf location, release date, and miscellaneous section for additional information as needed. Since taking office numerous requests were sent to the

Prosecutor's Office of which many were returned to release or destroy evidence, which has been completed.

6. Minutes and County Procedures

Improvement is needed with regard to County Commission minutes and county procedures.

6.1 Commission minutes

The County Commission and County Clerk procedures related to the documentation and approval of County Commission meeting minutes are not adequate and do not always comply with the Sunshine Law.

- The County Commission did not approve 8 of 49 open meeting minutes during the year ended December 31, 2012. The County Commission and the County Clerk do not always agree on the accuracy of the minutes and do not resolve their differences. As a result, the value of the minutes, which are the only official record of actions taken by the County Commission, is diminished.

- Neither the County Commission nor the County Clerk ensures procedures related to closed meetings are documented in compliance with the Sunshine Law. Topics discussed in closed meetings, including litigation and personnel matters, were not always cited in open meetings and roll call votes to enter the closed meeting were not always documented in open meeting minutes. We identified these issues for 7 of 9 closed meetings held during the year ended December 31, 2012.

The County Commission minutes are the only record of the discussions held and decisions made by the County Commission and should be complete, accurate, and properly approved. In addition, the Sunshine Law, Chapter 610, RSMo, requires minutes to include the reason for the closed meeting be voted on in an open meeting. In addition, this law provides the County Commission shall not discuss any other business in a closed meeting that does not directly relate to the specific reason announced and documented to justify the closed meeting.

6.2 Professional services

The county did not solicit requests for proposals or enter into written agreements for several professional service purchases including property and liability insurance through an insurance brokerage service ($69,392), information technology services ($26,229), and jail medical services ($14,853) during the year ended December 31, 2012.

Soliciting proposals for services is a good business practice, helps provide a range of possible choices, and allows the county to make better-informed decisions to ensure necessary services are obtained from the best qualified provider after taking expertise, experience, and cost into consideration. Written contracts are necessary to ensure all parties are aware of their duties

and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions be in writing.

6.3 Computer controls

Various county officials have not established adequate password controls to reduce the risk of unauthorized access to computer systems and data. Passwords are required to authenticate access to computer systems.

The County Clerk, Prosecuting Attorney, County Assessor, and Sheriff do not require employees to change passwords periodically, and employees in the County Clerk and County Assessor offices share passwords within their office. In addition, the Recorder of Deeds failed to promptly delete user access for an employee who resigned in August 2013.

The security of a password system is dependent upon keeping passwords confidential. Since some passwords do not have to be periodically changed and some users access was not promptly deleted, there is less assurance passwords are effectively limiting access to computer systems and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of unauthorized access to and use of systems and data.

6.4 1099-MISC forms

The county has not established procedures to ensure 1099-MISC forms are prepared and filed as required. During the year ended December 31, 2012, the county paid a special prosecuting attorney $11,897, a security system salesman/installer $4,000, a handyman $1,356, and a law firm $709 without issuing 1099-MISC forms to any of these identified vendors.

Sections 6041 to 6050 of the Internal Revenue Code require non-wage payments of at least $600 in one year to an individual or to an attorney for legal services be reported to the federal government on 1099-MISC forms. To ensure compliance with IRS requirements, the county should establish procedures to ensure 1099-MISC forms are issued in all applicable instances.

Recommendations

The County Commission:

6.1 Work with the County Clerk to ensure minutes are accurate and approved by the appropriate parties and properly cite reasons for and roll call votes approving closed meetings.

6.2 Periodically solicit proposals for professional services, and enter into written agreements as required by law.

6.3 Require unique passwords for each employee that are confidential and periodically changed and promptly delete user access following

termination of employment to prevent unauthorized access to computer systems and data.

6.4 Ensure non-wage payments and payments to attorneys are reported on 1099-MISC forms.

Auditee's Response

The County Commission provided the following written responses.

6.1 The County Commission requested that some minutes be changed to reflect what actually happened in our meeting before we would approve them, we kept waiting for a corrected copy but we never saw some.

In the future if requested corrections are not made, the County Commission will make the corrections, then approve those minutes and instruct the County Clerk to record our approved minutes.

We have always had a roll call vote to go into a closed meeting in our open meetings and the reason was stated why we are going into a closed meeting at that time. It is unfortunate these votes were not correctly recorded in the open meeting minutes.

In the future the County Commission will make sure these votes and the reason for going into a closed meeting are included in the open meeting minutes.

6.2 The County Commission was unaware it needed to solicit bids for the insurance booker since this is for an agent of record to allow the broker to solicit costs for insurance coverage from different insurance companies.

The County Commission believes some of the amount paid to the information technology service was for the purchase of computers and software which we did compare prices of companies before buying from this company. Some of this company's technology service was performed because of an emergency situation on January 1, 2012, due to the newly elected Recorder of Deeds being locked out of all computers in her office.

The County Commission believes at the time these jail medical services were provided there was only one doctor in this area willing to provide these services.

In the future, the County Commission will improve its attempts to solicit bids and will enter into written agreements as required.

6.3 Although the county employees have been instructed to randomly change their passwords, the County Commission will remind them and also warn the elected officials of the importance of removing passwords of any employee that is no longer employed with the county.

6.4 The County Commission does not see any W-2 or 1099-MISC forms, these forms are produced by the County Clerk's office. The County Commission was unaware of the $4,000 for a camera system, $1,356 for a handy man or the $709 to a law firm. This was due to the County Collector-Treasurer paying these through a separate bank account not authorized by the County Commission and did not go through the county's accounts payable. These items were paid from the separate bank account established by the County Collector-Treasurer unbeknownst to the County Commission.

In the future the County Commission will request the County Clerk at the end of each year to give the County Commission a list of names of non-wage payments and payments to attorneys of $600 or more and that his office send each of them a 1099-MISC form.

The County Clerk provided the following written responses.

6.1 The County Clerk has fully complied with Section 51.120, RSMo, for the past thirty-five years and will continue to comply with state law. Discussions had by County Commissioners outside of the official meeting dates of the commission and outside of the official meeting location are not the responsibility of the County Clerk. The County Clerk disagrees with the audit report statement that the Commission meeting minutes are not adequate. The County Clerk disagrees with the audit report statement that the official record of actions taken by the County Commission are diminished. The County Clerk disagrees with the audit report statement that procedures related to closed meetings are not in compliance.

6.2 The County Clerk disagrees with the audit report statement that the County did not solicit request for proposals. The County Clerk believes the county acted in the best interest of its citizens for certain professional services.

6.3 The County Clerk agrees that elected officials and department heads should continue to work to see that county records and information are secure at all times.

6.4 The County Clerk's office will do its part to follow established procedures to ensure 1099-MISC forms are prepared and filed as required.

Auditor's Comment

6.1-6.2 The County Clerk provided no documentation to dispute the facts presented or to demonstrate that minutes complied with the Sunshine Law and bidding requirements were met.

7. County Assessor Receipts

The County Assessor does not always issue receipt slips for monies received, record all receipts on a log when received, or account for the numerical sequence of receipt slips issued. The County Assessor writes a receipt slip if requested and documents cash receipts on a log. At the end of the month, the County Assessor records checks processed on the log and prepares a transmittal for the County Collector-Treasurer for monies transmitted. The County Assessor does not have a procedure to account for the numerical sequence of receipt slips and since all monies are not recorded on the log at the time of receipt, there is no way to ensure all monies received are properly recorded and transmitted to the County Collector-Treasurer. During the year ended December 31, 2012, the County Assessor collected and turned over to the County Collector-Treasurer approximately $8,300.

To adequately account for receipts and reduce the risk of loss, theft, or misuse of funds, official prenumbered receipt slips should be issued for all monies immediately upon receipt, receipts should be recorded on the log when received, and the numerical sequence of those receipt slips accounted for.

Recommendation

The County Assessor ensure prenumbered receipt slips are issued for all monies received, record all receipts on the log when received, and account for the numerical sequence of receipt slips.

Auditee's Response

The County Assessor provided the following written response:

We have implemented this recommendation. We now issue prenumbered receipt slips and record monies on the log when received. We account for the sequence of receipt slips each month when preparing our monthly transmittal.

8. Wri-Tex 911 Operations Fund

The Wri-Tex 911 Executive Board (Board) has not developed a plan to address the declining financial condition of the Wri-Tex 911 Operations Fund. Texas County collects an administrative fee from this fund that is not authorized by the intergovernmental cooperative agreement.

8.1 Financial condition

The Board has not developed a plan to address the declining financial condition of the Wri-Tex 911 Operations Fund. The County Commissioners

of Texas and Wright Counties serve as the members of the Board. In 1992, Texas and Wright counties entered into an intergovernmental cooperative agreement to establish the Wri-Tex 911 Emergency Telephone System and Board. This service is funded by a tax levied under Section 190.305, RSMo, which allows up to 15 percent of the tariff local service rate or 75 cents per access line per month, whichever is greater, to be charged on all land telephone lines within the geographical confines of the counties.

The following table reflects the cash balances, receipts and disbursements for the Wri-Tex 911 Operations Fund.

	2014 Budget	2013 Actual	2012 Actual	2011 Actual
Cash Balance, January 1	$ 50,912	83,833	157,062	198,739
Telephone tax	335,500	348,516	360,393	360,507
Other receipts	2,500	18,377	6,469	8,686
Disbursements	(360,302)	(399,814)	(440,091)	(410,870)
Cash Balance, December 31	$ 28,610	50,912	83,833	157,062

Disbursements made between 2010 and 2013 have exceeded telephone tax receipts by more than $50,000 annually. In addition, telephone tax receipts show a slow, but steady, decline over the years presented above. The Board needs to develop a plan to reduce costs or increase receipts to improve the financial condition of the Wri-Tex 911 Operations Fund. By not considering alternative revenue sources and properly managing costs by reducing unnecessary disbursements, this trend will likely continue.

8.2 Administrative fees

Texas County did not have the authority to transfer administrative fees of approximately $20,000 annually from the Wri-Tex 911 Operations Fund to the Texas County General Revenue Fund. Under the intergovernmental cooperative agreement between Texas and Wright counties, Texas County provides administrative services for the 911 operation. However, the cooperative agreement does not specifically authorize a fee for the administrative services. The Texas County Clerk indicated Section 50.515, RSMo, allowed the county to impose an administrative service fee on this fund; however, this statute does not provide for an administrative service fee from this revenue source. In addition, while actual expenses incurred by Texas County for administration would constitute a reasonable use of these monies, Texas County has not determined the actual cost of providing those services. Due to the financial condition of the Wri-Tex Operations Fund, it is imperative the Board ensure transfers are authorized and appropriate.

Recommendations

The Wri-Tex Executive Board:

8.1 Develop plans to adequately fund operations and monitor the financial condition of the Wri-Tex 911 Operations Fund.

8.2 Require Texas County to determine the actual cost of providing administrative services for 911 operations. In addition, the Wri-Tex Executive Board should include provisions related to reimbursement of administrative costs in the cooperative agreement.

Auditee's Response

The Texas County Commission provided the following written responses:

8.1 The reason for the decrease in Wri-Tex E911 revenue was because people were going to cell phones and dropping their landlines. Commissioners all over the state of Missouri were working with state legislators to find avenues to increase funding for all 911 systems. We had been working for the past 8 years trying to get a bill passed to identify a cell phone as a telephone so we could collect the same fee we collect for land lines. The only other way the Wri-Tex E-911 Board could increase its revenue was to pass a sales tax.

In April 2014, the voters of Texas County passed a 3/8 cent sales tax to create and fund a Texas County Emergency Service (911) for Texas County. Wri-Tex E-911 will dissolve at the end of 2014 and Wright County will be responsible for its own 911 services.

8.2 The present Wri-Tex E-911 Board was under the understanding that the initial intergovernmental cooperative agreement authorized these administrative fees. In January each year the Wri-Tex E-911 Board votes to approve its budget, which includes a percentage for the administrative fees.

The Texas County Clerk provided the following written responses:

8.1 Voters of Texas County in April 2014 approved a 3/8 cent sales tax to replace landline fees. Beginning in 2015, Texas County and Wright County will operate their 911 centers separately.

8.2 Texas County has collected an administrative fee for the past 15 years without a question being raised by auditors. Texas County believes they have a right to collect said fees. This will not be an issue beginning in 2015 as the new Texas County Emergency Service Board will have control and management of the county's 911 operations.

Texas County
Organization and Statistical Information

Texas County is a township-organized, third-class county. The county seat is Houston.

Texas County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county bridges, and performing miscellaneous duties not handled by other county officials. The townships maintain county roads. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 61 full-time employees and 15 part-time employees on December 31, 2012.

In addition, county operations include a Senate Bill 40 Board, and a 911 Emergency Board, which operates jointly with Wright County.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2013	2012
Fred W. Stenger, Presiding Commissioner	$	29,390
John Casey, Associate Commissioner		27,390
Linda Garrett, Associate Commissioner		27,390
Susan Warkentin, Recorder of Deeds		41,500
Donald R. Troutman, County Clerk		41,500
Mike Anderson, Prosecuting Attorney		112,824
Carl Watson, Sheriff		46,000
Thomas Whittaker, County Coroner		14,000
Theresa Campbell, Public Administrator		41,500
Tammy Cantrell, County Collector-Treasurer, year ended March 31,	41,500	
Debbie James, County Assessor, year ended August 31,		41,378
Louie Carmack, County Surveyor (1)		N/A

(1) Compensation on a fee basis.

Financing Arrangements

In 2006, the county contracted with an underwriter to finance the building of a new county justice center and jail. Also included in the project was the remodeling of the current courthouse. The financing arrangement required the underwriter to issue $15 million in certificates of participation (COPs) and for the county to lease the new facility over the 20-year period the debt would be paid off. The county's lease payments equal the amount of debt principal and interest, and the county will take ownership of the justice

center when the debt is extinguished, which is scheduled for 2025. The remaining principal balance at December 31, 2012, was $12,220,000.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Webster County

Fuel Usage and Monitoring	The county spent over $700,000 on fuel for vehicles and equipment but does not effectively monitor fuel use. The county terminated an employee in 2009 for stealing county fuel, but did not sufficiently correct the weaknesses, and in 2011 another employee was terminated for stealing $5,200 in county fuel. County officials did not perform adequate reviews of fuel records and made over $40,000 in duplicate payments during 2012 and 2013 and paid $2,225 in late fees during 2012. The fuel card user list included former employees, and the road and bridge department does not reconcile fuel dispensed or fuel purchased with fuel cards to mileage and equipment logs. Sheriff's office employees share PIN numbers, do not always enter vehicle odometer readings into the fuel system, and prepared incomplete manual fuel logs. The Sheriff does not adequately review monthly fuel card billing statements, and does not adequately account for all fuel cards. County officials could not explain why they had not noticed during their reviews of fuel billing statements that the County Clerk's former Administrative Assistant was listed as a purchaser of fuel after his termination. While the County Clerk and County Commission responded they had improved fuel procedures, it is evident by the numerous problems identified during the audit, continued improvement is needed.
County Procedures	Several county officials did not solicit bids for the purchase of new software and equipment during 2012. The county did not always enter into written agreements, and the Emergency Management Director and one Assistant Prosecuting Attorney do not prepare timesheets. The Sheriff purchased jail management software with Sheriff's Revolving Fund monies, which is not in compliance with state law, and did not solicit proposals for its purchase.
Property Tax System Controls and Procedures	County officials still have not implemented adequate controls and procedures over the property tax system despite indicating they would implement the recommendations from our 3 previous audit reports. The County Clerk does not prepare or verify the accuracy of the current or delinquent tax books. Neither the County Commission nor the County Clerk adequately reviews the financial activities of the County Collector. The County Commission and County Clerk do not review and approve property tax additions and abatements, or ensure changes were made to the property tax system.
County Collector Controls and Procedures	As noted in our prior audit reports, the County Collector has not adequately segregated accounting duties and independent or supervisory reviews of accounting records are not performed, and procedures for receipting, recording, and depositing monies need improvement. The County Collector also does not prepare a monthly list of liabilities and compare it to cash balances.

Public Administrator Controls and Procedures	The former Public Administrator did not always timely file annual settlements and inventories of assets and did not timely notify the court of the death of a ward. The former Public Administrator did not retain adequate supporting documentation for some disbursements and has poor controls and procedures for the sale of property. The former Public Administrator did not solicit bids for auctioneer services. The former Public Administrator was negligent in her handling of one ward's funds incurring additional costs related to interest and penalties for not paying bills timely, and failing to timely deposit dividend checks.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney has not adequately segregated accounting duties and does not perform an independent or supervisory review. The office needs to improve its procedures for receipting, recording, and transmitting monies and does not generate a monthly list of unpaid bad checks and restitution.
Recorder of Deeds Controls and Procedures	The Recorder of Deeds has not adequately segregated accounting duties and does not perform an independent or supervisory review. The Deputy Clerk does not perform bank reconciliations or maintain a running check register balance, and the Recorder of Deeds does not account for the numerical sequence of transaction numbers assigned by the computerized accounting system.
Sheriff Controls and Procedures	Jailers do not issue receipt slips for bond monies collected for other political subdivisions and do not maintain documentation to support transmittal of bond monies. Bond forms are not prenumbered. The Sheriff's seized property building was disorganized, many items were difficult to locate, and the records need improvement.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 30

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Webster County

We have audited certain operations of Webster County in fulfillment of our duties under Section 29.230, RSMo. In addition, Davis, Lynn & Moots, P.C., Certified Public Accountants, was engaged to audit the financial statements of Webster County for the 2 years ended December 31, 2012. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Webster County.

An additional report, No. 2014-045, *Webster County Procurement Procedures and County Clerk*, was issued in June 2014.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Roberta Bledsoe
Audit Staff:	Michelle Crawford, M.Acct., CIA
	Katelyn Crosson
	Terese Summers, MSAS, CPA

1. Fuel Usage and Monitoring

County officials have not established effective monitoring procedures for vehicle and equipment fuel use, and did not perform effective reviews of fuel billings.

The county maintains bulk fuel tanks at 2 county road and bridge buildings, and also allows employees to use fuel cards and credit cards at local gas stations to purchase fuel for vehicles and equipment. The road and bridge department and Sheriff's office can dispense fuel from the bulk tanks; however, Sheriff's office personnel typically use fuel and credit cards. The county purchased bulk fuel totaling approximately $454,000 and made fuel card payments totaling approximately $251,000 during the 2 years ended December 31, 2013. In addition, fuel purchases using various county credit cards are listed on billing statements along with other types of purchases, and we did not determine those fuel amounts.

Similar weaknesses were noted in our prior county audit report (Report No. 2010-27), in which we reported the county terminated a county employee in 2009 who admitted to stealing county fuel, but did not sufficiently correct these weaknesses after the theft occurred. More recently, the County Commission terminated a road and bridge department employee in February 2011, who admitted to stealing an estimated $5,200 of county fuel. The County Commission required restitution and it was paid in full. However, a review of procedures during this audit shows the County Commission still did not sufficiently correct weaknesses related to monitoring of fuel use and reviewing fuel billings.

In our Report No. 2014-045, *Webster County Procurement Procedures and County Clerk*, we reported improper credit card purchases by the former Administrative Assistant to the County Clerk. We identified the former Administrative Assistant's name listed as a buyer on fuel card statements for periods several months after his termination date. As a result, we expanded our review of fuel procedures to include the period January 2012 through November 2013, and identified the following concerns.

County review and payments

The County Clerk and County Commission did not perform adequate reviews of fuel records prior to payments being made. As a result, the county made duplicate payments totaling at least $10,932 in 2013 and $29,396 in 2012. The vendor credited the county's account for the overpayments. In addition, the county did not always pay fuel card billings timely, resulting in late fees totaling $2,225 during the year ended December 31, 2012.

The County Clerk and County Commission do not periodically review the fuel card user list to ensure only authorized users are included. We reviewed the fuel card user list as of November 2013, and identified 8 former county employees still included on the fuel card user list, including the former

Assistant Administrator, who was terminated on July 26, 2013. The former Assistant Administrator had issued himself a fuel card without approval of the County Clerk and County Commission. His job duties did not require him to use a county vehicle or purchase fuel using the county's fuel cards.

Sheriff's fuel cards and records

The Sheriff's office maintains 23 vehicles, and fuel is obtained from bulk fuel tanks and also purchased using fuel cards and credit cards. We identified various concerns as follows.

- A fuel card (exclusively used to purchase fuel) is assigned to each Sheriff's vehicle and requires entry of a unique PIN number and odometer reading at the time fuel is purchased; however, employees sometimes share PIN numbers. Additionally, Sheriff's office employees do not always accurately enter the vehicle odometer reading and, as a result, fuel card statements do not reflect accurate vehicle mileage. Also, manual fuel logs maintained by the Sheriff's office do not include all fuel purchases from local gas stations and these logs are not reviewed or used to reconcile fuel used to fuel purchased. For example, we noted a fuel card statement showed 4 purchases made on August 11, 2013, while only 2 purchases were recorded on the related fuel log for that day. Some fuel logs could not be located at the time of our review.

- The Sheriff does not adequately review monthly fuel card billing statements. For example, the County Clerk's former Administrative Assistant was listed as a purchaser of fuel on billing statements for the Sheriff's office for September and October 2013 after his termination in July 2013. The Sheriff had documented his review and approval of these statements. We brought these discrepancies to the attention of the Sheriff, County Clerk, and County Commission in November 2013, and none of them could explain why the former Administrative Assistant's name was listed as a fuel purchaser on the fuel card statements and had not noticed this during their reviews. Additional review determined these fuel purchases were proper and the discrepancies were caused by the use of a badge number instead of an employee number as the PIN number in the fueling system. While these purchases were explained, some other purchases noted on the fuel card statements appear questionable. For example, according to a fuel card statement, on November 30, 2012, an officer purchased 13 gallons of fuel and 1 minute later the same officer purchased an additional 14 gallons. However, the officer's manual fuel log showed only 1 fuel purchase on that day.

- The Sheriff's office does not adequately account for all fuel cards. The Sheriff assigned the responsibility of tracking fuel cards to the Chief Deputy. At our request, the Chief Deputy identified each fuel card on hand and the cards assigned to specific vehicles. The fuel card online

system showed 31 fuel cards assigned to the Sheriff's office; however, the Chief Deputy could only account for 17 of those cards. Two of the 14 unaccounted for fuel cards were assigned to vehicles that had been sold. In addition, the Sheriff has not adequately evaluated the number of fuel cards needed for his office. Of the 31 fuel cards, 12 had no activity in 2013 (9 of which are among the 14 unaccounted for cards).

Road and bridge mileage and fuel records

The road and bridge department maintains 48 vehicles and motorized pieces of equipment. The county uses a computerized fuel control system to dispense fuel from the bulk tanks. Reports of fuel dispensed from the bulk fuel tanks are not reconciled to fuel purchases or to mileage and equipment logs maintained.

In addition, 17 fuel cards are used by 29 road and bridge department employees to complete work related to a grant project being administered by the City of Springfield. These fuel cards are used to purchase fuel at local gas stations. Fuel card purchases are not reconciled to mileage and equipment logs maintained by the road and bridge department. The county is subsequently reimbursed for fuel costs by the city.

Conclusion

Procedures for maintaining and reviewing fuel usage logs, reconciling this information to purchases and related records, and a careful review of fuel and credit card billings to individual receipts are necessary to ensure vehicles and equipment are properly utilized, and payments for fuel billings are appropriate. Also, such procedures decrease the risk of theft or misuse of fuel occurring without detection. Logs should provide sufficient details to enable the county to effectively monitor vehicle and equipment fuel costs. In addition, periodic reviews of fuel card users are necessary to ensure fuel purchases are only made by authorized county employees.

Recommendation

The County Commission and County Clerk should work with the road and bridge department and Sheriff's office to establish adequate procedures and records to effectively monitor fuel use for completeness and reasonableness. In addition, fuel use should be reconciled to fuel purchases, and any significant discrepancies should be investigated. Also, the County Commission and County Clerk should implement procedures to ensure bills are paid accurately and timely to avoid late fees, and periodically review the fuel card user list to ensure only authorized users are included.

Auditee's Response

The County Clerk and County Commission provided the following written response:

The narrative above contains a number of criticisms: a) that the county did not take effective action after previous thefts of fuel; b) that not de-activating PIN numbers of former employees immediately is a serious security issue; c) that in prior years, invoices were either paid late or paid

twice; and d) that the County Clerk and County Commission should ensure other departments reconcile their fuel logs to fuel invoices.

We disagree on the first two points. We have gone to great lengths to improve our procedures for the purchase of fuel, and for its proper use. In fact, the new fuel system was already underway in late 2010, but was not yet complete at the time of the employee theft in February 2011. Currently, each fuel station is under constant video surveillance. Also, the system requires both a fuel card (tied to a specific county vehicle) and a unique employee PIN number for access (the existence of one without the other is of no consequence). And we are continuing to make improvements. The issue of incorrect/late payment of fuel invoices was tied to one employee, who actively worked to defeat and/or circumvent existing policies and procedures. That employee was fired, and we are currently pressing felony charges. Policy and procedures are now being followed, and have also been refined.

As for the last point, we concede that we should place more responsibility on the Sheriff's office and the road and bridge department to encourage them to review lists of PIN numbers and reconcile fuel logs to fuel purchases.

Auditor's Comment

The County Commission and County Clerk did not disagree with the factual accuracy of the details contained in the finding. Due to the numerous problems identified during our review, it is clear continued improvement is needed.

2. County Procedures

Procedures relating to procurement, written agreements, and timesheets need improvement.

2.1 Procurement procedures

Several county officials did not solicit bids for the purchase of new software and equipment during 2012.

The County Assessor did not solicit bids for a new property tax system (real and personal property assessment, internet filing, imaging, and photo and sketching modules). The County Assessor implemented this property tax system in January 2012, and the county has paid this vendor $52,575 during 2012 through 2014, and plans to pay the vendor another $10,315 in 2015 for a total of $62,890 for the system. In addition, in March 2012, the County Assessor purchased new equipment (3 printers and 7 monitors) totaling $8,411 without soliciting bids. These purchases were paid out of the Assessment Fund.

The County Collector did not solicit bids for a new property tax system (tax billing and collection modules). The County Collector implemented the

property tax system in June 2012, and the county has paid this vendor $34,940 during 2012 through 2014, and plans to pay the vendor another $5,980 in 2015 for a total of $40,920 for the system. In addition, the County Collector did not solicit bids for the purchase of digital check processing software and a check scanner totaling $12,175 in March 2012. These purchases were paid out of the County Collector's Tax Maintenance bank account.

Section 50.660, RSMo, provides bidding requirements. Routine use of a competitive procurement process for major purchases ensures the county has made every effort to receive the best and lowest prices and all interested parties are given an equal opportunity to participate in county business. Documentation of the various proposals received, the selection process, and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made.

2.2 Written agreements

The county did not always enter into written agreements.

- The County Commission did not obtain written agreements for the distribution of county aid road trust (CART) monies and capital improvement sales tax (CIST) monies to the Seymour Special Road District. During the year ended December 31, 2012, the county distributed approximately $127,000 of CART monies and $184,000 of CIST monies to the special road district based on the district's share of miles within the county.

- The Sheriff has not entered into written agreements with surrounding counties and cities for the boarding of prisoners. Such agreements should detail housing rate to be paid, the services to be provided, or any required notification for emergency or non-routine situations.

Section 432.070, RSMo, requires all agreements of political subdivisions to be writing. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

2.3 Sheriff's jail management software

The Sheriff paid for jail management software costing $22,187 during the year ended December 31, 2012, from the Sheriff's Revolving Fund, which is not in compliance with the uses allowed by state law. The Sheriff's office uses the jail management software to process officer reports and inmate records and does not use the software to process concealed carry endorsements. In addition, the Sheriff did not solicit proposals for the purchase of the jail management software, and did not enter into a written agreement with the software vendor.

Per Section 50.535, RSMo, Sheriff's Revolving Fund monies are to be used for the purchase of equipment, to provide training, and to make necessary

expenditures to process applications for concealed carry endorsements or renewals, including but not limited to the purchase of equipment, training, fingerprinting and background checks, and employment of additional personnel. In addition, as cited in sections 2.1. and 2.2, Section 50.660, RSMo, provides bidding requirements and Section 432.070, RSMo, requires all agreements of political subdivisions to be writing.

2.4 Timesheets

The Emergency Management Director and 1 of 2 assistant prosecuting attorneys do not prepare timesheets. Both are full-time salaried employees and are not required to submit documentation of hours worked and/or tasks performed. According to the County Clerk's Administrative Assistant, the Assistant Prosecuting Attorney's annual salary is $30,000 regardless of the number of hours worked and the Emergency Management Director's annual salary is $31,288 based upon 40 work hours per week.

Timesheets are necessary to document and monitor hours actually worked to substantiate payroll disbursements and to ensure compliance with the Fair Labor Standards Act of 1938 (FLSA) requirements. Additionally, the county personnel manual requires the county to keep accurate time records for every employee.

Similar conditions previously reported

Conditions similar to points 2.1, 2.2, and 2.4 were noted in our prior audit report.

Recommendations

2.1 The County Assessor and County Collector perform a competitive procurement process for all major purchases and maintain documentation of decisions made.

2.2 The County Commission and Sheriff enter into written agreements with other political subdivisions as appropriate, and ensure the agreements are signed by all parties and specify the services to be rendered and the manner and amount of compensation to be paid.

2.3 The Sheriff ensure all disbursements from the Sheriff's Revolving Fund are allowable by law, reimburse the Sheriff's Revolving Fund from other funds, and perform a competitive procurement process as required. The Sheriff should also ensure written agreements are entered into as appropriate.

2.4 The County Commission and Prosecuting Attorney require all employees to submit timesheets.

Auditee's Response

The County Assessor provided the following written response:

2.1 I did not solicit a bid since we have used the same software provider since 1997. I went to a quicker and time saving cost system. Using a

different software vendor and cost system would take time, over 2 years to implement a new cost system for personal and real estate. It would be costly and time consuming to change. I was able to cut 2 employees by upgrading and using the current provider. However, in the future I will follow the recommendation.

The County Collector provided the following written response:

2.1 The software and equipment upgrade was with our existing software provider and was mandatory to stay in compliance with the state Department of Revenue, Division of Motor Vehicle and Driver Licensing office. There are only a few state certified software providers in the state, and the one we use is the only one in Southwest Missouri. To change to a new software provider would mean a complete new program and would cost more to set up, it would also require retraining everyone in both the County Collector and County Assessor's office. In the future, I will obtain bids.

The County Clerk and County Commission provided the following written responses:

2.2 The Seymour Special Road District is an independent body with its own elected Board. The district maintains 15 percent of the roads used by our citizens, and we share 15 percent of our revenue with it. We do not intend to interfere in the district's affairs.

2.4 The Assistant Prosecuting Attorney does not work for the County Clerk or County Commission. Instructions for record keeping should be directed to the Prosecuting Attorney to whom that individual reports. As for the Emergency Management Director, the County Commission will require documentation of hours worked.

The Sheriff provided the following written responses:

2.2 I *appreciate the finding of this due to its importance, but at one of the Missouri Sheriff's Association meetings it was agreed upon by the Missouri Sheriffs to allow a 3 day pickup time for inmates with out of county warrants at zero charge. We do invoice counties in which we house inmates, just as they invoice us. At that time the Jail Supervisor sent out letters to surrounding counties and cities relating the fees, procedures and services for Webster County to house inmates. However, copies of those letters were boxed and stored away due to our lack of storage space and at this time they cannot be located. We will be sending out new letters with this information and asking for their acknowledging signature.*

2.3 I thank you for pointing this issue out because we believed that we were well within compliance allowed by state law due to the fact that the software was agreed upon with the intent that the conceal and carry permits would be entered using this new software. Due to software problems this did not occur. We did not solicit proposals for this software due to the fact that Webster County 911 chose and paid for the software up front. In order to best serve the citizens of Webster County we wanted to streamline and be included in this integrated system. The Webster County Sheriff's office paid Webster County 911 a portion of the fees to be able to be connected to the dispatch center. Information from Webster County 911 was to be entered in the software system for report writing, inmate book-ins, conceal and carry permits, etc. and combine all facets of the Sheriff's office. Webster County 911 has since decided to end the use of this software because of their own reasons. We also had to end the use of that program as well, because of the many software issues and due to the fact the software was not providing the services we needed. I will transfer a portion of the cost of this jail management system from funds available in 2014 and will budget to transfer the remaining portion in 2015 as finances allow to reimburse the Sheriff's Revolving Fund for the purchase. We have since obtained a new software program and have entered into a written agreement with the vendor.

The Prosecuting Attorney provided the following written response:

2.4 I will consider implementing this recommendation.

Auditor's Comment

2.2 As the County Clerk and County Commission response indicates the 15 percent of CIST and CART monies that the county shares with the special road district (a separate political subdivision) are county monies. They, as county officials, have a fiduciary responsibility to ensure the use of these monies is proper and allowable.

2.4 Without timesheets, the County Clerk, County Commission, and Prosecuting Attorney have no assurance the amount paid and time worked is reasonable and appropriate, and cannot ensure compliance with the FLSA.

3. Property Tax System Controls and Procedures

County officials have not implemented adequate controls and procedures over the property tax system. Although some of these problems were noted in our previous 3 audit reports, and the County Clerk and County Commission indicated they would implement the recommendations, little progress has been made. The County Collector was charged with collecting

approximately $19 million in property taxes for the year ended February 28, 2013.

3.1 Tax books

The County Clerk does not prepare or verify the accuracy of the current or delinquent tax books prepared by the property tax system vendor. A review of the tax books should include verification of individual entries in the tax books and recalculating tax book totals and charges. Failure to prepare and review the tax books and test individual tax statement computations may result in errors, irregularities, or misuse going undetected.

Sections 137.290 and 140.050, RSMo, require the County Clerk to extend the current and delinquent tax books and charge the County Collector with the amount of taxes to be collected.

3.2 Review of activity

Neither the County Commission nor the County Clerk adequately review the financial activities of the County Collector. The County Clerk maintains a spreadsheet summarizing property tax collections each month; however, the spreadsheet does not include charges, additions and abatements, protested amounts, and city collections. In addition, the County Clerk and County Commission do not adequately review and approve the County Collector's annual settlement. The County Clerk indicated he discusses the annual settlement with the County Commission; however, there are no procedures in place for the commission's review and approval.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An accurate account book or other records that summarizes all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records should be used by the County Clerk and County Commission to verify the County Collector's annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

3.3 Additions and abatements

The County Commission and County Clerk do not review and approve property tax additions and abatements. Additions and abatements totaling $245,656 and $61,324, respectively, were reported on the County Collector's annual settlement for the year ended February 28, 2013. The County Assessor makes changes to the property tax system for additions and abatements, and manual court orders or other records are not prepared and compared to actual changes made to the property tax system. As a result, additions and abatements, which constitute changes to the amount of taxes the County Collector is charged with collecting, are not properly monitored and errors or irregularities could go undetected.

Sections 137.260 and 137.270, RSMo, assigns responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. If it is not feasible for the County Clerk to make corrections to the tax books, an independent reconciliation of approved additions and abatements to actual changes made to the property tax system would help to ensure changes are proper.

Similar conditions previously reported

Conditions similar to points 3.2 and 3.3 were noted in our prior audit report.

Recommendations

3.1 The County Clerk prepare the current and delinquent tax books, or verify the accuracy of the tax books prior to charging the County Collector with the property tax amounts.

3.2 The County Clerk maintain an accurate and complete account book with the County Collector. In addition, the County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

3.3 The County Commission and County Clerk review and approve additions and abatements and compare court orders or other supporting records to actual changes made to the property tax system.

Auditee's Response

The County Clerk and County Commission provided the following written response:

3.1-3.3 Statutory language stating that the County Clerk prepares tax books is antiquated and completely out of phase with current practice, not only in Webster County, but statewide. Tax books are prepared by the County Assessor and County Collector on a common computerized database. Likewise, additions and abatements are now the purview of the County Assessor and County Collector. Their work is reviewed by the State Tax Commission and the State Auditor's office on a periodic basis. Neither the County Clerk nor the County Commission are involved in this process in any meaningful way. The statutory language should be updated to reflect this new reality.

Auditor's Comment

3.1-3.3 These sections of law establish the required duties of various elected county officials and provide for a segregation of duties or checks and balances in the property tax system area. As stated in the finding, the County Collector is responsible for collecting approximately $19 million in property taxes for most taxing authorities in the county. Because the County Commission and

County Clerk charge the County Collector with the amount of taxes to collect, it is imperative they monitor any changes to amounts charged and ensure accountability by the County Collector. Lack of such monitoring can create a situation where theft and manipulation of records can occur without detection. County officials should implement procedures to satisfy the intent of the statutory provisions.

4. County Collector Controls and Procedures

As similarly noted in our prior audit reports, improvement is needed in accounting controls and procedures of the County Collector's office.

4.1 Segregation of duties

The County Collector has not adequately segregated accounting duties and independent or supervisory reviews of accounting records are not performed. The Deputy Collector performs the duties of receiving, recording, depositing, and disbursing property taxes, and reconciles the bank accounts. The County Collector does not perform a documented review of accounting records or a comparison of monies received to those deposited.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving, recording, depositing, and disbursing monies. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential and include comparing daily receipt activity to deposits.

4.2 Receipting, recording, and depositing

Procedures for receipting, recording, and depositing need improvement.

- County Collector's office personnel do not always record the method of payment accurately in the property tax system, and the composition of receipts (cash, check, money order, or credit card) recorded in the property tax system is not reconciled to the composition of deposits.

  We identified numerous instances where the composition of receipts in the property tax system differed from the composition of the deposit. We reviewed supporting documentation for selected deposits and determined some differences were due to data entry errors, and some were due to office personnel generally recording an entire transaction as one method of payment (using the method of payment for the largest portion of the payment) even if a payment is made using a combination of cash and check, rather than specifying the individual amounts of cash and check received.

In addition, overpayments and subsequent refunds are not reflected in the property tax system and on daily collection reports; and the property tax system reduces the total cash amount on the audit journal page (total page) of the daily collection report by the amount of refunds. Since the property tax system reduces the cash amount on the audit journal page for refunds, the total amount received for cash does not agree to the total amount deposited. County Collector's office personnel indicated they do not use the audit journal page totals to reconcile the composition of receipts to the composition of deposits since cash totals on the audit journal page do not agree. The County Collector and Deputy Collector indicated they were aware the composition of receipts collected did not agree to the composition noted on the audit journal page, but did not ensure reasons for the differences were identified or explained.

- Property tax receipts are not always deposited timely. For example, property tax receipts totaling $169,154 collected on December 17, 2012, were held and not deposited until January 2, 2013. We identified other instances where deposits were not made timely.

- Fees received for issuing duplicate tax receipts are held, not deposited, and are used to make change throughout the year. A cash count in September 2013, identified $423 on hand from duplicate tax receipts.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Properly receipting and recording payments, recording method of payment, and intact and timely depositing are necessary to ensure receipts are adequately safeguarded and reduce the risk of loss, theft, or misuse of funds.

4.3 Bank reconciliations and liabilities

The County Collector does not compare the reconciled bank account balances to existing liabilities. At our request, a list of liabilities was prepared for the property tax account as of February 28, 2013, and the list totaled $626,851. The reconciled cash balance totaled $628,835, exceeding identified liabilities by $1,984.

A list of liabilities should be prepared monthly and reconciled to cash balances to ensure sufficient cash is available for the payment of all amounts due and all monies in the bank account can be identified. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed.

Recommendations

The County Collector:

4.1 Segregate accounting duties to the extent possible or ensure adequate independent or supervisory review of accounting and bank records are performed and documented.

4.2 Record the method of payment accurately, deposit monies intact and timely, and reconcile the composition of receipts to the composition of deposits. The County Collector should also consider working with the tax system programmer to implement changes to the system that will allow overpayments and refunds to be properly recorded in the property tax system.

4.3 Reconcile bank balances to a list of liabilities monthly, and ensure any differences are investigated and resolved.

Auditee's Response

The County Collector provided the following written responses:

4.1 For a big part of the year the County Collector's office staff consists of the County Collector and one other person. From January to October duties are segregated pretty well. However, during the busiest time of the year, when we have additional staff (most of whom have little training) it is difficult to segregate office duties because of the extra work load in the office. Part-time employees are not trained to make deposits, balance drawers, etc. The County Collector works full-time at the counter working with taxpayers that come in and the deputy handles bank deposits, problems that arise, working with mortgage companies, etc. I will make an effort to segregate the duties more as well as review the accounting records.

4.2 Method of payment inaccuracies are sometimes due to entry errors. However, it can also be because taxpayers changes their mind on method of payment. It is not uncommon for taxpayers to say they want to pay with a credit card, then after realizing there is a fee for a credit card to change their mind and pay with cash or check. Or taxpayers may say they want to pay with check and then realize they are out of checks. Once the method of payment is selected there is no way to change it. There is no option in our software program to show a refund, however we do keep a separate spreadsheet that details all refunds, who the refund was to, how much it was and the date it was refunded. I will work with our programmer to implement changes to our tax system to enable us to show refunds on this software program. I will reconcile cash, check, and charge receipts and deposit money daily.

4.3 The County Collector's office has four separate bank accounts at one bank and an additional three accounts with another bank in different cities during November and December. All but one of the accounts is reconciled monthly. I will reconcile these accounts to a list of liabilities monthly, and will investigate any differences.

5. Public Administrator Controls and Procedures

We identified several problems with the controls and procedures of the former Public Administrator. The Public Administrator is an elected official appointed by the Associate Circuit Judge sitting in the Associate Circuit Court, Probate Division to serve as guardian of persons or conservator or personal representative of estates. During the time of the audit, the Public Administrator was responsible for the financial activity of approximately 80 estates.

Unless otherwise specified, references to the Public Administrator relate to the former Public Administrator whose term ended December 31, 2012. The current Public Administrator took office in January 2013. Recommendations are directed to the current Public Administrator since she is in a position to work with the Associate Circuit Court, Probate Division and implement changes.

The Public Administrator received numerous summonses from the Associate Circuit Court, Probate Division to file annual settlements and appear in court; however, she did not comply with some of the summonses. As a result, the Associate Circuit Judge also reassigned some of cases handled by the former Public Administrator to the current Public Administrator before the ongoing settlement period was completed. We reviewed the 4 remaining cases still under the supervision of the former Public Administrator and 1 case under the supervision of the current Public Administrator in 2013.

5.1 Annual settlements, inventories of assets, and death notices

Procedures for filing annual settlements, inventories of assets, and death notices are not adequate, and the Associate Circuit Court, Probate Division does not perform sufficient reviews of the activity of cases assigned to the Public Administrator.

- The Public Administrator did not always file annual settlements timely. For each ward, the Public Administrator is required to file an annual settlement with the court that reflects a detailed list of assets held as well as financial activity. We reviewed the annual settlements and final settlements filed for 4 wards, which were due in 2012 and 2013. Two annual settlements and 1 final settlement were filed between 4 to 8 months after the due date (a ward had both an annual and final settlement filed late).

- The Public Administrator did not always file inventories of assets and notify the court of the death of a ward timely. An inventory of assets for a ward was due in September 2012, and was not filed with the court until June 2013. Also, a ward passed away in November 2012, and the death notice was not filed with the court until June 2013.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file annual settlements with the court for each ward or estate. Timely filing of settlements, inventories of assets, and death notices are necessary for the court to properly oversee the administration of cases and reduce the possibility that errors or misuse of funds will go undetected.

The Associate Circuit Court, Probate Division does not perform sufficient reviews of the activity of cases assigned to the Public Administrator. The Public Administrator did not provide documentation such as invoices, canceled checks, and all months' bank statements to the Associate Circuit Court, Probate Division when filing annual settlements. As a result, the court's review of the annual settlement and related documentation was limited to the last monthly bank statement (the only bank statement submitted to the court by the Public Administrator).

Without adequate documentation, it is difficult for the court to assess the validity and reasonableness of disbursements made by the Public Administrator. Consideration should be given to requiring filing of such supporting documentation with the court. Failure to adequately review and monitor the activity of cases assigned to the Public Administrator by the Associate Circuit Court, Probate Division increases the risk that errors or misuse of funds could go undetected.

5.2 Supporting documentation

The Public Administrator did not retain adequate supporting documentation in the case files for some disbursements. Supporting documentation for 3 cashier's checks totaling $2,296 only included the debit memo on the bank statement and copies of the cashier's checks. We obtained documentation for these disbursements, and $1,476 was for room and board, $750 was for a burial plan, and $70 was for personal spending monies of the ward; all of which were reasonable and necessary expenses.

To ensure payments are valid and proper, the Public Administrator should maintain adequate supporting documentation for disbursements.

5.3 Sale of property

Improvements are needed regarding the sale of property by the Public Administrator. The Public Administrator did not solicit bids for auctioneer services for the sale of real estate and personal property in August 2013 for 2 wards, and the commission percentage charged by the auctioneer on the sale of the real estate exceeded that of other auctioneers in the county and surrounding area.

The auctioneer charged a 10 percent commission on the sale of real estate. We contacted 5 other auctioneers in the county and surrounding area and they indicated they charge a 5 to 6 percent commission on the sale of real estate. The 2 real estate properties were sold for $125,000 ($85,000 and $40,000 each) resulting in commissions to the auctioneer of $12,500. Had the Public Administrator solicited proposals, a potential cost savings of $5,000 to $6,250 may have resulted for the wards.

The Public Administrator did not obtain a formal appraisal prior to the sale of a ward's real estate for $85,000. In addition, the Public Administrator did not retain supporting documentation for personal items sold at auction for 2 wards, with proceeds totaling $15,304. Supporting documentation for the auctioned items had to be obtained from the auctioneer.

While professional services may not be subject to standard bidding procedures, soliciting proposals for auctioneer services is a good business practice, helps provide a range of possible choices, and allows the Public Administrator to make a better-informed decision to ensure necessary services are obtained from the best-qualified provider after taking expertise, experiences, and cost into consideration. Good business practice also requires obtaining a formal appraisal to ensure the price obtained for the property is reasonable and represents the fair value of the property. Record retention is necessary to ensure the validity of transactions and provide an audit trail. Section 109.270, RSMo, states all records made or received by officials in the course of their public duties are public property and are not to be disposed of except as provided by law.

5.4 Management of ward funds

The Public Administrator was negligent in her handling of one ward's funds.

- The Public Administrator failed to pay tax liabilities for this ward timely and incurred a substantial amount of interest and penalties. The Public Administrator did not pay 2008 and 2009 income taxes and the related penalties and interest totaling $5,862 due for a ward until December 2013, even though sufficient funds were available during those years.

- The Public Administrator also did not pay this ward's real estate property taxes ($1,524) and interest and penalties ($145) for tax years 2010, 2011, and 2012. As a result, the ward's real estate was placed on the Webster County Collector's 2013 tax sale list. However, the taxes, interest, and penalties were paid in full in March 2013, and the property was not sold at the tax sale.

- The Public Administrator did not adequately monitor the account balances of this ward and the bank's minimum balance requirement of $1,000, and as a result, service charges totaling $123 were incurred from December 2010 to June 2013.

- The Associate Circuit Judge indicated he received numerous complaints that the Public Administrator was not paying this ward's residential facility room and board bills timely in 2011. As a result, in April 2011, the payee on the ward's social security payment was changed from the Public Administrator to the facility.

- The Public Administrator did not always deposit this ward's dividend checks timely. A $325 dividend check was received in September 2012, but was not deposited until December 2012. Additionally, 2 dividend checks dated in December 2011 and September 2012 totaling $650 were not included on the annual settlement for the period of November 9, 2011, to November 30, 2012.

The Public Administrator should pay bills timely to avoid unnecessary penalties and interest, protect wards assets, and monitor bank account balances and minimum bank balance requirements to avoid service charges. To ensure all monies received are properly deposited and to reduce the risk of loss, theft, or misuse of funds, the Public Administrator should deposit monies received timely and receipts should be accurately reflected on the annual settlements.

Recommendations

The Public Administrator:

5.1 Ensure annual settlements are filed timely. The Associate Circuit Judge should establish procedures to adequately monitor the activity of cases assigned to the Public Administrator, and require supporting documentation such as invoices, canceled checks, and all bank statements be filed with the court.

5.2 Ensure adequate supporting documentation is retained.

5.3 Obtain formal independent appraisals for real estate sold, ensure adequate supporting documentation is retained for the sale of personal property, and solicit proposals for auctioneer services.

5.4 Should pay bills and tax obligations timely, monitor bank account balances and minimum bank account requirements, deposit monies timely, and ensure annual settlements are accurate.

Auditee's Response

The Public Administrator provided the following written responses:

5.1 There are no delinquent annual settlements at this time. I receive written notification via the Probate Clerk approximately 6 weeks before each settlement is due. When filed, settlements include all bank statements and canceled check images. Invoices are available upon request. Please note that the audit refers to my predecessor.

5.2 Adequate supporting documentation is currently retained on all transactions. Please note that the audit refers to my predecessor.

5.3 Formal independent real estate appraisals will be obtained if financially feasible for the estate. In the event that no funds are available, informal appraisals from local real estate professionals will be utilized. Adequate supporting documentation is currently retained for the sale of personal property. By September 30, 2014, I will send a "Request for Qualifications" to each auction company and real estate office in Webster County and retain the returned reports for future use. Please note that the audit refers to my predecessor.

5.4 Since I took office in January 2013, all bills and tax obligations have been paid in a timely manner, bank account balances and minimum bank account requirements are monitored, money is deposited in a timely manner, and annual settlements are accurate. Please note that the audit refers to my predecessor.

The Associate Circuit Judge provided the following written response:

5.1 The Associate Circuit Court, Probate Division now requires all bank statements and canceled checks be filed with each settlement, and closely monitors settlements as recommended by the audit report. Invoices will be requested and reviewed for any non-routine disbursements.

6. Prosecuting Attorney Controls and Procedures

Improvement is needed in the accounting controls and procedures of the Prosecuting Attorney's office. Criminal restitution, delinquent taxes, and bad check restitution and fees collected by the Prosecuting Attorney's office totaled approximately $213,000 during the year ended December 31, 2012.

6.1 Segregation of duties

As noted in the prior audit report, the Prosecuting Attorney has not established adequate segregation of accounting duties or review and approval procedures.

One clerk primarily performs all duties related to the receiving, recording, and transmitting of bad checks and restitution collected. Neither the Prosecuting Attorney nor other clerks perform documented supervisory or independent reviews of accounting records or comparisons of monies received to those transmitted.

In addition, all personnel in the office have the ability to record adjustments to the computerized accounting system without obtaining independent approval, and adequate documentation of such adjustments is not retained. Common reasons for adjustments recorded in the computerized accounting

systems include transferring cases from one system to another, writing off uncollectible amounts, or correcting errors.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential. Also, to reduce the risk of loss, theft, or misuse of funds, and ensure the validity of all adjustments, adjustments should be reviewed and approved by a supervisor.

6.2 Receipting, recording, and transmitting

Procedures for receipting, recording, and transmitting monies need improvement. The Prosecuting Attorney's office utilizes 3 separate receipting systems (2 computerized and 1 manual) to track bad check restitution and fees, and court ordered restitution.

Manual receipts

Office personnel issue unofficial manual receipt slips for bad check restitution and fees, court ordered restitution, delinquent tax payments, and child support payments, and we noted various problems with the use of manual receipts. Multiple receipt books are used concurrently for each type of receipt collected in the office, and the numerical sequence of receipt slips is not accounted for properly. In addition, office personnel do not always indicate the method of payment, do not reconcile the composition of payments received to the composition of deposits, and do not always timely post manual receipt slip information to the computerized accounting systems. For example, the details of 2 manual receipt slips issued to defendants on November 8, 2012, were not posted to a computerized accounting system until November 15, 2012. Also, manual receipt slips issued are not reconciled with monies recorded in the computerized accounting system to ensure all monies received are properly recorded and transmitted.

Computerized receipting systems

Clerks in the Prosecuting Attorney's office concurrently used two computerized accounting systems during 2012 and 2013 to receipt monies collected, and a clerk primarily used one system to receipt monies from January to August 2012, and another clerk primarily used the other computerized accounting system to receipt monies from September 2012 through 2013. As a result, neither of the computerized accounting systems provides a complete record of all monies received and processed. In addition, the numerical sequence of computerized receipt numbers is not accounted for properly. Each computerized accounting system assigns a sequential receipt number and generates a receipt slip each time a payment is entered. We identified 12 of 241 receipt numbers issued from one of the computerized accounting systems for the period January 2012 through June 2013 were associated with deleted transactions and not included on collection reports generated by the Prosecuting Attorney's office. Office personnel had not identified these skipped receipts and could not explain

what occurred with these receipts. Also, for the other computerized accounting system the same sequence of receipt numbers was being used for both restitution and bad check payments. For example, we identified the same receipt number was issued on April 3, 2013, for $245 for restitution payments and was also issued on June 26, 2013, for $610 for bad check payments. Receipts are not reconciled to transmittals. The clerk provides a letter to the County Treasurer indicating the date of the receipts along with money orders and receipt slips generated from the computer systems for each receipt; however, the letter does not indicate the amount of the transmittal.

Failure to implement adequate receipting, recording, and transmitting procedures, including comparing receipt records to transmittals, increases the risk of loss, theft, or misuse of monies and likelihood that errors will go undetected. In addition, the use of multiple receipting systems is cumbersome and reduces the assurance that all monies received are accurately recorded and accounted for properly.

6.3 Accounts receivable

The Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution, and is not proactive in identifying cases with unpaid receivables. Improvement is needed to better monitor and pursue collection of unpaid receivables.

A complete and accurate list of unpaid bad checks and restitution would allow the Prosecuting Attorney's office to more easily review amounts due and to take appropriate steps to ensure amounts owed are collected or to determine if amounts are uncollectible.

Recommendations

The Prosecuting Attorney:

6.1 Segregate duties to the extent possible, implement appropriate review and monitoring procedures, and require someone independent of receiving and recording monies to review and approve all adjustments.

6.2 Ensure a complete record of all monies received is maintained and monies are recorded promptly in the accounting systems. In addition, the Prosecuting Attorney should ensure the numerical sequence of receipt numbers are accounted for properly, official prenumbered receipt slips are issued for all receipts and reconciled to the accounting systems, and the composition of receipts is reconciled to the composition of transmittals.

6.3 Establish procedures to monitor and collect accounts receivables.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

6.1 I do not have the staff to make the segregations recommended; however, I currently review and monitor the monies received by comparing the written receipt books to the deposits and monies paid out. In addition, for every electronic payment made, I receive an email of that transaction and then compare that to the monies recorded in our internal system to double check the accuracy of my staff member's accounts receivable and payable. In addition, the majority of the responsibility for accepting over-the-counter payments has been given to someone other than the staff member in charge of entering the information into our internal system, which allows for checks and balances when comparisons are made by me between the receipt book and the internal accounting. I currently review and approve all adjustments on monies received and recorded in the Prosecutor's office.

6.2 Comparisons are now being made between the receipt books and the internal system by me. I have instructed my staff that such transactions must be entered immediately upon receipt.

6.3 I will require a monthly list of unpaid bad checks and restitution reports to be prepared and reviewed to identify unpaid receivables and pursue collection.

7. Recorder of Deeds Controls and Procedures

Improvement is needed in the accounting controls and procedures of the Recorder of Deed's office. The Recorder of Deed's office collects various fees for recording documents such as deeds and marriage licenses. During the year ended December 31, 2012, receipts totaled approximately $290,000.

7.1 Segregation of duties

The Recorder of Deeds has not established adequate segregation of accounting duties or review and approval procedures.

The Deputy Clerk performs all receiving, recording, and depositing duties, and compares the bank balance to end of month reports. Neither the Recorder of Deeds nor the other clerk performed documented supervisory or independent reviews of accounting records or comparisons of monies received to those deposited.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory review of accounting and bank records is essential.

7.2 Bank reconciliations

The Deputy Clerk does not perform bank reconciliations or maintain a running check register balance. The Deputy Clerk only compares the bank balance to end of the month reports. According to the Recorder of Deeds, all fees collected during the month are distributed each month and the reconciled bank and book balance at each month end should always be zero; however, we identified a small difference between the reconciled bank balance and book balance as of December 31, 2012.

The preparation and review of monthly bank reconciliations is necessary to ensure accounting records are in balance and to identify errors timely. Regular identification and comparison of liabilities to the reconciled cash balance, is necessary to ensure records are in balance and monies are available to satisfy all liabilities. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed.

7.3 Computer system controls

The Recorder of Deeds does not account for the numerical sequence of transaction numbers assigned by the computerized accounting system. According to the Deputy Clerk, if a customer does not want a receipt slip, she turns the printer off to ensure a receipt slip is not printed. Once the transaction is processed, the Deputy Clerk turns the printer back on and opens a new transaction to ensure the computerized accounting system is in sync with the printer, and then deletes that transaction number from the computerized accounting system. During October 1 through December 31, 2012, 2,052 transaction numbers were issued and 169 (8 percent) transactions were deleted and not accounted for. The software vendor verified these transactions were deleted from the computerized accounting system.

To ensure monies received are properly recorded and deposited, and reduce the risk of loss, theft, or misuse of funds, the Recorder of Deeds should ensure adequate controls are in place to properly account for the numerical sequence of transactions numbers.

Similar conditions previously reported

Similar conditions to sections 7.1 and 7.2 were noted in our prior audit report.

Recommendations

The Recorder of Deeds:

7.1 Segregate accounting duties to the extent possible or ensure adequate independent or supervisory review of accounting and bank records are performed and documented.

7.2 Prepare monthly bank reconciliations, maintain running balances in the check register, and reconcile bank balances to liabilities

monthly. Any differences between accounting records and reconciliations should be investigated and resolved.

7.3 Ensure adequate controls are in place to allow for proper accountability of all transactions numbers.

Auditee's Response

The Recorder of Deeds provided the following written responses:

7.1 Some days we don't have two people in the office. I will document my review of the accounting records.

7.2 Recommended procedures for bank reconciliations, check register balances, and liabilities have been put into place. Any differences in accounting records are taken care of daily.

7.3 Procedures have been changed and a receipt slip is printed for all transactions so all receipt numbers match the transacted amount of receipts. We were just trying to save taxpayer money. Receipt paper is expensive.

8. Sheriff Controls and Procedures

Controls and procedures need improvement. The Sheriff's office processed approximately $225,000 during 2012 in civil and criminal process fees, concealed carry permits, bonds, and other miscellaneous receipts.

8.1 Receipting and transmitting

Receipting and transmitting procedures need improvement. Jailers do not issue receipt slips for bond monies collected for other political subdivisions; documentation is not maintained to support the transmittal of bond monies to the Webster County Circuit Court; and bond forms are not prenumbered.

To ensure all monies received are properly recorded and transmitted, and to reduce the risk of loss, theft, or misuse of funds, adequate receipting and transmitting procedures are needed.

8.2 Seized property

Accurate controls over seized property have not been established. The Sheriff's seized property building was disorganized and many items were difficult to locate.

- Computerized logs of seized property are not accurate and complete. For example, seized cash totaling $1,560 was included on the computerized logs, but could not be located in the seized property building. The property record for this particular case indicated the cash was returned to the victim on April 19, 2011, but the disposition of these monies was not recorded on the log. Additionally, some seized property is not documented on the computerized logs, and periodic physical inventories of seized property items are not conducted.

Adequate supporting documentation is not always maintained for the release of seized property. For example, the computerized logs indicated $800 cash was released to a defendant on March 24, 2011; however, there was no property record signed by the defendant, indicating the cash was released.

- During our review of seized property on June 25, 2013, we observed seized property being stored in 2 unlocked lockers in the Sheriff's office.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of theft or misuse of the stored items. Complete and accurate inventory records should be maintained and periodic physical inventories should be performed and the results compared to inventory records to ensure seized property is accounted for properly.

Recommendations

The Sheriff:

8.1 Issue receipt slips for all bond monies collected, ensure the transmittal of bond monies between the Sheriff's office and Circuit Court is documented, and issue prenumbered bond forms.

8.2 Ensure a complete and accurate seized cash and property inventory record is maintained and a periodic physical inventory is conducted and reconciled to the records, and investigate any differences.

Auditee's Response

The Sheriff provided the following written responses:

8.1 My office had been, we thought, helping our fellow agencies that mail bonds to us. The Detention officers do not see these bonds as they come in the mail. If the check had been made out to the Webster County Sheriff's office we were endorsing the check and making it "payable to the entity to which it belonged" example "City of Marshfield" as a courtesy to the counties and municipalities. From this point on, if the cash bond is not properly made out to the correct court, we will record it in a pre-numbered receipt book where the check came from, the name of the person that bonded and the amount of the bond. We will also make a copy of the check to attach to the receipt. After that we will mail the check back to the originating agency with a note directing them to the proper agency. As far as the request for pre-numbered bond forms, the computer software in the jail does not allow for pre-numbered bond forms. We had used preprinted bond forms with numbers in the past; however in trying to streamline book-in we started using the forms that were included with the computer software. To correct this we will obtain a pre-numbered bond log. As we issue the pre-printed

bond from our computer software we will attach a bond number sticker on the bond form. This bond log will be in numerical order with the bond number, who the bond was for, the Detention officer doing the bond and the bond number sticker.

On the night of August 21, 2014, we unfortunately had an employee steal bond money out of the locked bond box. During our normal routine to check the bond monies, we discovered that $350 of bond monies was missing. We immediately began to review our video surveillance system where it appeared that one of our employees was involved. We then immediately contacted the Missouri State Highway Patrol to begin the investigation. During the Missouri State Highway Patrol's interview of the employee, the employee confessed and returned what money he had left ($223). We fired the employee, he was arrested and we also contacted the State Auditor's office to advise audit staff of what was going on. We have since given what money was recovered ($223) to the Circuit Court and wrote a check from our Sheriff's Fund to cover the difference of $127. We are expecting to recover the funds from the former employee through criminal restitution via the prosecution process. We do believe that this is an isolated incident however we will continue this investigation to discover if any other monies had possibly been stolen. If any other monies are discovered as stolen we will contact both the Missouri State Highway Patrol and the Missouri State Auditor's office immediately and request that charges be filed.

8.2 *In the past 6 years no evidence has ever been lost, stolen, misused nor has it compromised any criminal investigation from the Sheriff's office. The Sheriff's office does realize however, that evidence needs to be totally overhauled, which we are in the beginning stages of. We are currently in the process of moving into a newer, updated, temperature controlled facility. We have begun sorting through all evidence, past and present, and purging what is no longer needed. We will have a better idea of what property we do have. We will also implement a bar coding system, we have already obtained the bar code scanners and printers. All property will be scanned and is automatically entered into our records software. The property will be scanned if it were to be released for court and scanned if we release to the property owner. As we move property from the old evidence building to the new evidence building we will begin bar coding, thus improving our records management.*

We have updated our on-site seized property lockers, which will be locked at all times if they contain evidence. Empty lockers will be unlocked until such evidence needs placement. We now have 11

lockers (instead of 4 lockers) making it much easier to secure the evidence.

We have created new release forms, which are signed prior to the release of any and all property. The property that is released is listed on that form.

The Sheriff's Office will begin periodic physical inventories of seized property and compare to the computer log of seized property.

If the property seized is cash, we will be speaking to the County Commissioners to open a new checking account for Seized Property. The deputy will copy the cash, secure the cash in the sealed bag and place in the evidence locker. The Chief Evidence Officer will take the unopened bag to the bank to be deposited; when and if the property is to be released to property owner the other evidence officer will write the check for such property. The bank statement for that account will be reconciled by a separate person in the administration office.

Webster County
Organization and Statistical Information

Webster County is a county-organized, third-class county. The county seat is Marshfield.

Webster County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 65 full-time employees and 17 part-time employees on December 31, 2012.

In addition, county operations include the Senate Bill 40 Board and Senior Citizens' Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2013	2012
Paul Ipock, Presiding Commissioner	$	31,700
Susie Knust, Associate Commissioner		29,700
Denzil Young, Associate Commissioner		29,700
Gary Don Letterman, Recorder of Deeds		45,000
Stanley D. Whitehurst, County Clerk		45,000
Danette L. Padgett, Prosecuting Attorney		113,292
Roye Cole, Sheriff		51,525
Mary P. Clair, County Treasurer		45,000
Michael Taylor, County Coroner		16,000
Donna Hannah, Public Administrator		26,336
David Young, County Collector (1), year ended February 28,	68,630	
Jim Jones, County Assessor, year ended August 31,		45,000
Dennis D. Amsinger, County Surveyor (2)		

(1) Includes $23,630 of commissions earned for collecting city property taxes.
(2) Compensation on a fee basis.

Financing Arrangements

In August 2012, the county issued $60,000 in Neighborhood Improvement District Bonds, Series 2012, for the purpose of constructing certain road improvements within Sweetbriar Drive. The bonds bear interest at the rate of 2.99 percent. Principal and interest payments are due annually on March

1 of each year. The remaining principal outstanding at December 31, 2012, was $49,412. Interest remaining to be paid over the life of the agreement totals $7,582.

THOMAS A. SCHWEICH
Missouri State Auditor

October 6, 2014

Ted Stephenson, Chairman and Executive Director
and
Board of Directors
Grindstone Plaza Drive Transportation Development District
Columbia, Missouri

The State Auditor is required under Section 238.275, RSMo, to audit a transportation development district (TDD) prior to the question of abolishment being submitted to a vote. On July 18, 2014, the Board of Directors of the Grindstone Plaza Drive TDD notified the State Auditor of the intent to dissolve the district and requested an audit as required by statute. Because the TDD had no financial activity an audit was not performed.

The scope of our review included, but was not necessarily limited to, the year ended December 31, 2013, and the period from January 1 through June 30, 2014. The objectives of our review were to evaluate the financial status of the district and determine whether it may be abolished pursuant to law.

Our methodology included reviewing a financial disclosure filed with the State Auditor's office indicating no financial activity had occurred and other pertinent documents, interviewing a Board member who also serves as legal counsel of the TDD, and obtaining a signed statement from him indicating no financial activity occurred.

The TDD is located in the City of Columbia. The TDD was organized in January 2011 by petition of the property owners within the proposed TDD. The Board of Directors and officers include representatives of the property owner. The TDD was formed for the purpose of constructing transportation projects and adopted a fiscal year end of December 31. Our review determined the TDD (1) Board of Directors never voted to implement a TDD sales tax, (2) did not establish a bank account, (3) did not receive any monies or incur any expenditures, and (4) has no outstanding liabilities.

Based on our review, we determined the Board of Directors may proceed with abolishment of the district in accordance with Section 238.275, RSMo.

Sincerely,

Thomas A Schweich

Summary of State and Local Audit Findings - Sunshine Law

October 2014

Report No. 2014-097

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Summary of State and Local Audit Findings - Sunshine Law

Background	This report was compiled using the nearly 300 audit reports issued between January 2012 and December 2013. The objective of this report was to summarize recent audit issues and recommendations regarding the Sunshine Law, Chapter 610, RSMo, and other issues related to meeting minutes.
Open Meetings	Formal meeting minutes were not prepared or maintained for some open meetings, and minutes maintained did not always include sufficient detail. Minutes of affiliated boards, committees and commissions were not always prepared or maintained by the custodian of records. Several entities failed to document the reasons for closing meetings, the specific section of law that allowed for the closing, and the votes regarding meeting closure. Minutes were not always approved timely and some entities conducted business outside of regular open meetings.
Closed Meetings	Minutes were not prepared or maintained for some closed meetings, and minutes maintained did not always include sufficient detail. Several entities did not document how some issues discussed in closed meetings were allowable under state law, and some discussed issues other than the specific reasons cited for going into closed session or issues discussed were not allowable. Some governing bodies did not always publicly disclose the final disposition of applicable matters discussed in closed sessions.
Public Records	Some governing bodies did not have adequate policies and procedures regarding public access to records, and some did not maintain sufficient documentation to demonstrate compliance with the law.
Meeting Agendas	Some entities did not prepare, post, and/or retain tentative agendas, or the agendas did not disclose sufficient information. Also, open meeting agendas routinely indicate the potential for a closed meeting, and all topics listed on the agendas were not routinely discussed.
Legislative Issues	Neither the Missouri House of Representatives nor the Missouri Senate considers the Sunshine Law applicable to records of individual members. The Missouri Employers Mutual Insurance Company (MEM) contends it is neither a public governmental body nor a quasi-public governmental body for purposes of the Sunshine Law, but it was formed under state statutes subject to the Sunshine Law. We recommend the General Assembly amend the law to apply to individual legislators while carving out legitimate and necessary exceptions and determine whether the MEM is subject to the Sunshine Law.

Because of the limited objective of this review, no overall rating is provided.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Honorable Chris Koster, Attorney General
and
Members of the General Assembly
Jefferson City, Missouri

This report was compiled using audit reports issued between January 2012 and December 2013 (report numbers 2012-001 through 2012-146 and 2013-001 through 2013-150). The objective of this report was to summarize recent audit issues and recommendations regarding the Sunshine Law, Chapter 610, RSMo, and other issues related to meeting minutes.

Recommendations address a variety of topics including open and closed meetings, public records, meeting agendas, and legislative issues. These topics were addressed in 44 reports issued between January 2012 and December 2013. Appendix A provides a list of each report, and the publication date, that included the issues presented.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Keriann Wright, MBA, CPA
In-Charge Auditor:	Josh Allen, CPA, CFE

Summary of State and Local Audit Findings - Sunshine Law Audit Issues

1. Open Meetings

1.1 Preparation of meeting minutes

Formal meeting minutes were not prepared or maintained for some open meetings. In addition, minutes and records of meetings of affiliated boards, committees, and commissions were not always prepared. Further, copies of minutes and records of the affiliated boards, committees, and commissions were not maintained by the official custodian of records of the governing body.

Section 610.020, RSMo, provides that minutes of open meetings shall be taken and retained by the public governmental body.

Recommendation

Ensure minutes are prepared and retained to support all open meetings, including affiliated boards, committees, and commissions, and copies are maintained by the official custodian of records of the governing body.

2013-007 (City of Diamond)
2012-069 (Chariton County)
2012-016 (The School District of Springfield, R-XII)

1.2 Detail in meeting minutes

Meeting minutes did not always include sufficient detail of matters discussed or actions taken, and many decisions were not adequately documented in the meeting minutes.

Section 610.020, RSMo, requires minutes of meetings include the date, time, place, members present, members absent, and a record of votes taken.

Recommendation

Ensure meeting minutes include adequate detail of the issues discussed and the decisions made.

2013-127 (City of Savannah)
2013-066 (Village of Deerfield)
2013-007 (City of Diamond)
2012-126 (Polk County)

1.3 Reasons for closing meetings

Reasons for closing meetings, the specific section of law that allows for the closed meetings and the vote to close the meetings were not adequately documented within the open meeting minutes.

Section 610.022, RSMo, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on during an open meeting.

Recommendation

Ensure the vote to close a meeting is documented in the open meeting minutes, along with the reason for closing the meeting and the specific section of law that allows the meeting to be closed.

2012-005 (Higher Education/Southeast Missouri State University)
2012-001 (Madison County)

1.4 Open meeting

Business was conducted outside of regular open meetings.

Section 610.020, RSMo, provides that governing bodies of all political subdivisions are required to conduct business in regular open meetings. Any time a quorum of board members meet in person or by phone and transact public business, they are subject to the Sunshine Law.

Recommendation

Ensure business of the governing body is conducted in compliance with the Sunshine Law.

Report source

2013-066 (Village of Deerfield)
2012-016 (The School District of Springfield, R-XII)

1.5 Approval of minutes	Meeting minutes were not always reviewed and approved in a timely manner. To ensure all decisions are properly documented and minutes are properly maintained, all minutes should be reviewed and approved timely.
Recommendation	Ensure meeting minutes are properly and timely reviewed and approved for all meetings.
Report source	2013-085 (St. Louis Public School District) 2012-126 (Polk County) 2012-069 (Chariton County)

2. Closed Meetings

2.1 Preparation of meeting minutes	Minutes were not prepared or maintained for some closed meetings. Section 610.020, RSMo, provides that minutes of closed meetings shall be taken and retained by the public governmental body.
Recommendation	Ensure minutes are prepared and retained to support all closed meetings.
Report source	2013-131 (Gentry County) 2013-127 (City of Savannah) 2013-103 (Ste. Genevieve County) 2013-083 (Crowder College) 2013-068 (Crawford County) 2013-034 (City of Brentwood) 2013-022 (City of Buckner) 2013-007 (City of Diamond) 2013-002 (Caldwell County) 2012-145 (McDonald County) 2012-133 (Lake Lotawana Community Improvement District) 2012-130 (Village of Altamont) 2012-127 (Vernon County) 2012-118 (Benton County) 2012-109 (Lawrence County) 2012-061 (Wright County) 2012-040 (Stone County) 2012-004 (Nodaway County)
2.2 Detail in meeting minutes	Closed meeting minutes did not include sufficient details of discussions held and decisions made, and votes or final actions, if any, taken by the governing body during closed meetings.

Such documentation is important to both demonstrate compliance with statutory provisions and provide information for future reference should concerns or questions be raised regarding topics addressed in closed meetings. Sections 610.020 and 610.021, RSMo, provide requirements regarding closure of meetings and documentation.

Recommendation

Ensure closed meeting minutes include the information necessary to provide a complete record of all significant matters discussed and actions taken.

Report source

2012-130 (Village of Altamont)
2012-125 (Montgomery County)
2012-016 (The School District of Springfield, R-XII)

2.3 Allowable topics

The governing body did not document how some issues discussed in closed meetings were allowable under state law and some issues discussed during closed meetings were not allowable.

Chapter 610.021, RSMo, states the specific reasons governmental bodies are allowed to close a public meeting.

Recommendation

Ensure items discussed in closed meetings are allowed by state law.

2012-005 (Higher Education/Southeast Missouri State University)
2012-001 (Madison County)

2.4 Topics discussed

Some topics discussed during closed meetings were other than the specific reasons cited for going into closed meeting.

Section 610.022, RSMo, requires a closed meeting, record, or vote to be held only for the specific reasons announced publicly at an open session. In addition, this law provides that public governmental bodies shall not discuss any other business during the meeting that differs from the specific reason used to justify such meeting, record, or vote.

Recommendation

Limit issues discussed in closed meetings to only those specific reasons cited to justify the closed meeting.

Report source

2013-131 (Gentry County)
2013-127 (City of Savannah)
2013-003 (Cedar County)

2012-082 (Kansas City Board of Police Commissioners)
2012-058 (Putnam County)
2012-016 (The School District of Springfield, R-XII)

2.5 Publication of final disposition

Some governing bodies did not always publicly disclose the final disposition of applicable matters discussed in closed sessions.

Section 610.021, RSMo, requires the final disposition of certain matters discussed in closed session to be made public.

Recommendation

Ensure matters discussed and actions taken in closed meetings are properly made available to the public, as required by law.

Report source

2013-085 (St. Louis Public School District)
2012-082 (Kansas City Board of Police Commissioners)

3. Public Records

3.1 Public access policy

The government did not have adequate policies and procedures regarding public access to records or the policy was not in compliance with state law. Additionally, the government did not maintain complete and detailed documentation to support the rates charged for providing copies of public records, and fees charged were not consistently applied.

Section 610.026, RSMo, describes the allowable fees for copying public records, and Section 610.023, RSMo, lists requirements of making records available to the public.

Recommendation

Establish adequate written policies and procedures regarding public access to and/or copies of records to ensure compliance with state law.

Report source	2013-140 (Public Water Supply District #1 of Carroll County) 2013-139 (City of Bolivar) 2013-066 (Village of Deerfield) 2013-062 (Southern Dallas County Fire Protection District) 2013-049 (Pike County) 2012-016 (The School District of Springfield, R-XII)
3.2 Documentation of requests for records	The government did not maintain a record documenting information requests received, if any, or copies of records provided; therefore, the proper handling of any Sunshine Law information requests could not be determined. Section 610.023, RSMo, provides each request for access to public records shall be acted upon as soon as possible, but in no event later than the end of the third business day following the date the request was received.
Recommendation	Maintain a public request log to help ensure compliance with state law.
Report source	2012-016 (The School District of Springfield, R-XII) 2012-008 (Monarch Fire Protection District)

4. Meeting Agendas

4.1 Agenda preparation	A tentative agenda was not prepared, posted, and/or retained for all meetings or the agenda did not disclose sufficient information pertaining to the upcoming meeting. Section 610.020, RSMo, requires public entities to give notice of the time, date, and place of each meeting, and its tentative agenda, to advise the public of matters to be considered. The notice shall be given at least 24 hours prior to the meeting.
Recommendation	Ensure proper notification and agendas for public meetings are given and sufficiently detailed or reasons for any deviation are documented in the meeting minutes in accordance with state law.
Report source	2013-098 (City of Liberal) 2013-066 (Village of Deerfield) 2013-062 (Southern Dallas County Fire Protection District) 2013-033 (Department of Public Safety/State Emergency Management Agency) 2013-007 (City of Diamond) 2012-016 (The School District of Springfield, R-XII)

4.2 Closed meeting notices	Open meeting agendas routinely used the same statement to indicate the potential for a closed meeting, and all topics listed on the agendas were routinely not discussed. Section 610.022, RSMo, requires the specific reasons for closing a meeting be announced publicly at an open meeting and entered into the minutes. A blanket statement which includes a potential issue(s) that may be discussed in a closed session appears to circumvent the intent of the law.
Recommendation	Ensure agendas state the specific reasons for going into a closed meeting.
Report source	2013-127 (City of Savannah) 2012-005 (Higher Education/Southeast Missouri State University)

5. Legislative Issues

5.1 General Assembly	The Missouri House of Representatives and the Missouri Senate do not consider the Sunshine Law applicable to records of individual members. The law related to this matter is ambiguous and no Missouri court has ruled on this specific issue. We are cognizant of the need to keep certain records confidential; however, correspondence clearly relating to the conduct of public business should be subject to public scrutiny. Section 610.010(4), RSMo, defines a "public governmental body," in part, as, any legislative, administrative or governmental entity created by the Missouri Constitution or statutes of the state. The Sunshine Law defines a "public record," in part, as, any record whether written or electronically stored, retained by or of any public governmental body including any report, memorandum, or other document. Section 610.025, RSMo, also provides that any message relating to public business by electronic means should be concurrently transmitted to either the member's public office computer or the custodian of records in the same format.
Recommendation	The General Assembly amend the Sunshine Law so that it clearly applies to individual members while carving out legitimate and necessary exceptions to public disclosure.
Report source	2013-026 (General Assembly and Supporting Functions/Senate) 2013-025 (General Assembly and Supporting Functions/House of Representatives)
5.2 Missouri Employers Mutual Insurance Company (MEM)	The MEM contends it is neither a public governmental body nor a quasi-public governmental body for the purposes of the Sunshine Law; however, the MEM was formed under state statutes subject to the Sunshine Law.

Section 610.010(4), RSMo, defines a public governmental body as any governmental entity created by statute when operating in an administrative capacity. Section 610.010(4)(f), RSMo, defines a quasi-public governmental body as any corporation authorized to do business pursuant to Chapters 352, 353 or 355 of the Missouri statutes, or performs a public function as evidenced by a statutorily based capacity. Section 287.902, RSMo, states that MEM was created to insure Missouri employers against liability from workers' compensation liability and ". . . shall have the powers granted a general-not-for-profit company pursuant to Section 355.090, RSMo, . . .".

Recommendation

The General Assembly determine whether the MEM is subject to the Sunshine Law and/or clarify state law as deemed appropriate.

Summary of State and Local Audit Findings - Sunshine Law Appendix B
Chapter 610 Governmental Bodies and Records

Notice of meetings, when required--recording of meetings to be allowed, guidelines, penalty--accessibility of meetings--minutes of meetings to be kept, content--voting records to be included

610.020. 1. All public governmental bodies shall give notice of the time, date, and place of each meeting, and its tentative agenda, in a manner reasonably calculated to advise the public of the matters to be considered, and if the meeting will be conducted by telephone or other electronic means, the notice of the meeting shall identify the mode by which the meeting will be conducted and the designated location where the public may observe and attend the meeting. If a public body plans to meet by internet chat, internet message board, or other computer link, it shall post a notice of the meeting on its website in addition to its principal office and shall notify the public how to access that meeting. Reasonable notice shall include making available copies of the notice to any representative of the news media who requests notice of meetings of a particular public governmental body concurrent with the notice being made available to the members of the particular governmental body and posting the notice on a bulletin board or other prominent place which is easily accessible to the public and clearly designated for that purpose at the principal office of the body holding the meeting, or if no such office exists, at the building in which the meeting is to be held.

2. Notice conforming with all of the requirements of subsection 1 of this section shall be given at least twenty-four hours, exclusive of weekends and holidays when the facility is closed, prior to the commencement of any meeting of a governmental body unless for good cause such notice is impossible or impractical, in which case as much notice as is reasonably possible shall be given. Each meeting shall be held at a place reasonably accessible to the public and of sufficient size to accommodate the anticipated attendance by members of the public, and at a time reasonably convenient to the public, unless for good cause such a place or time is impossible or impractical. Every reasonable effort shall be made to grant special access to the meeting to handicapped or disabled individuals.

3. A public body shall allow for the recording by audiotape, videotape, or other electronic means of any open meeting. A public body may establish guidelines regarding the manner in which such recording is conducted so as to minimize disruption to the meeting. No audio recording of any meeting, record, or vote closed pursuant to the provisions of section 610.021 shall be permitted without permission of the public body; any person who violates this provision shall be guilty of a class C misdemeanor.

4. When it is necessary to hold a meeting on less than twenty-four hours' notice, or at a place that is not reasonably accessible to the public, or at a time that is not reasonably convenient to the public, the nature of the good cause justifying that departure from the normal requirements shall be stated in the minutes.

5. A formally constituted subunit of a parent governmental body may conduct a meeting without notice as required by this section during a lawful meeting of the parent governmental body, a recess in that meeting, or immediately following that meeting, if the meeting of the subunit is publicly announced at the parent meeting and the subject of the meeting reasonably coincides with the subjects discussed or acted upon by the parent governmental body.

6. If another provision of law requires a manner of giving specific notice of a meeting, hearing or an intent to take action by a governmental body, compliance with that section shall constitute compliance with the notice requirements of this section.

7. A journal or minutes of open and closed meetings shall be taken and retained by the public governmental body, including, but not limited to, a record of any votes taken at such meeting. The minutes shall include the date, time, place, members present, members absent and a record of any votes taken. When a roll call vote is taken, the minutes shall attribute each "yea" and "nay" vote or abstinence if not voting to the name of the individual member of the public governmental body.

Closed meetings and closed records authorized when, exceptions

610.021. Except to the extent disclosure is otherwise required by law, a public governmental body is authorized to close meetings, records and votes, to the extent they relate to the following:

(1) Legal actions, causes of action or litigation involving a public governmental body and any confidential or privileged communications between a public governmental body or its representatives and its attorneys. However, any minutes, vote or settlement agreement relating to legal actions, causes of action or litigation involving a public governmental body or any agent or entity representing its interests or acting on its behalf or with its authority, including any insurance company acting on behalf of a public government body as its insured, shall be made public upon final disposition of the matter voted upon or upon the signing by the parties of the settlement agreement, unless, prior to final disposition, the settlement agreement is ordered closed by a court after a written finding that the adverse impact to a plaintiff or plaintiffs to the action clearly outweighs the public policy considerations of section 610.011, however, the amount of any moneys paid by, or on behalf of, the public governmental body shall be disclosed; provided, however, in matters involving the exercise of the power of eminent domain, the vote shall be announced or become public immediately following the action on the motion to authorize institution of such a legal action. Legal work product shall be considered a closed record;

(2) Leasing, purchase or sale of real estate by a public governmental body where public knowledge of the transaction might adversely affect the legal

consideration therefor. However, any minutes, vote or public record approving a contract relating to the leasing, purchase or sale of real estate by a public governmental body shall be made public upon execution of the lease, purchase or sale of the real estate;

(3) Hiring, firing, disciplining or promoting of particular employees by a public governmental body when personal information about the employee is discussed or recorded. However, any vote on a final decision, when taken by a public governmental body, to hire, fire, promote or discipline an employee of a public governmental body shall be made available with a record of how each member voted to the public within seventy-two hours of the close of the meeting where such action occurs; provided, however, that any employee so affected shall be entitled to prompt notice of such decision during the seventy-two-hour period before such decision is made available to the public. As used in this subdivision, the term "personal information" means information relating to the performance or merit of individual employees;

(4) The state militia or national guard or any part thereof;

(5) Nonjudicial mental or physical health proceedings involving identifiable persons, including medical, psychiatric, psychological, or alcoholism or drug dependency diagnosis or treatment;

(6) Scholastic probation, expulsion, or graduation of identifiable individuals, including records of individual test or examination scores; however, personally identifiable student records maintained by public educational institutions shall be open for inspection by the parents, guardian or other custodian of students under the age of eighteen years and by the parents, guardian or other custodian and the student if the student is over the age of eighteen years;

(7) Testing and examination materials, before the test or examination is given or, if it is to be given again, before so given again;

(8) Welfare cases of identifiable individuals;

(9) Preparation, including any discussions or work product, on behalf of a public governmental body or its representatives for negotiations with employee groups;

(10) Software codes for electronic data processing and documentation thereof;

(11) Specifications for competitive bidding, until either the specifications are officially approved by the public governmental body or the specifications are published for bid;

(12) Sealed bids and related documents, until the bids are opened; and sealed proposals and related documents or any documents related to a negotiated contract until a contract is executed, or all proposals are rejected;

(13) Individually identifiable personnel records, performance ratings or records pertaining to employees or applicants for employment, except that this exemption shall not apply to the names, positions, salaries and lengths of service of officers and employees of public agencies once they are employed as such, and the names of private sources donating or contributing money to the salary of a chancellor or president at all public colleges and universities in the state of Missouri and the amount of money contributed by the source;

(14) Records which are protected from disclosure by law;

(15) Meetings and public records relating to scientific and technological innovations in which the owner has a proprietary interest;

(16) Records relating to municipal hotlines established for the reporting of abuse and wrongdoing;

(17) Confidential or privileged communications between a public governmental body and its auditor, including all auditor work product; however, all final audit reports issued by the auditor are to be considered open records pursuant to this chapter;

(18) Operational guidelines, policies and specific response plans developed, adopted, or maintained by any public agency responsible for law enforcement, public safety, first response, or public health for use in responding to or preventing any critical incident which is or appears to be terrorist in nature and which has the potential to endanger individual or public safety or health. Financial records related to the procurement of or expenditures relating to operational guidelines, policies or plans purchased with public funds shall be open. When seeking to close information pursuant to this exception, the public governmental body shall affirmatively state in writing that disclosure would impair the public governmental body's ability to protect the security or safety of persons or real property, and shall in the same writing state that the public interest in nondisclosure outweighs the public interest in disclosure of the records;

(19) Existing or proposed security systems and structural plans of real property owned or leased by a public governmental body, and information

that is voluntarily submitted by a nonpublic entity owning or operating an infrastructure to any public governmental body for use by that body to devise plans for protection of that infrastructure, the public disclosure of which would threaten public safety:

(a) Records related to the procurement of or expenditures relating to security systems purchased with public funds shall be open;

(b) When seeking to close information pursuant to this exception, the public governmental body shall affirmatively state in writing that disclosure would impair the public governmental body's ability to protect the security or safety of persons or real property, and shall in the same writing state that the public interest in nondisclosure outweighs the public interest in disclosure of the records;

(c) Records that are voluntarily submitted by a nonpublic entity shall be reviewed by the receiving agency within ninety days of submission to determine if retention of the document is necessary in furtherance of a state security interest. If retention is not necessary, the documents shall be returned to the nonpublic governmental body or destroyed;

(20) The portion of a record that identifies security systems or access codes or authorization codes for security systems of real property;

(21) Records that identify the configuration of components or the operation of a computer, computer system, computer network, or telecommunications network, and would allow unauthorized access to or unlawful disruption of a computer, computer system, computer network, or telecommunications network of a public governmental body. This exception shall not be used to limit or deny access to otherwise public records in a file, document, data file or database containing public records. Records related to the procurement of or expenditures relating to such computer, computer system, computer network, or telecommunications network, including the amount of moneys paid by, or on behalf of, a public governmental body for such computer, computer system, computer network, or telecommunications network shall be open;

(22) Credit card numbers, personal identification numbers, digital certificates, physical and virtual keys, access codes or authorization codes that are used to protect the security of electronic transactions between a public governmental body and a person or entity doing business with a public governmental body. Nothing in this section shall be deemed to close the record of a person or entity using a credit card held in the name of a public governmental body or any record of a transaction made by a person using a credit card or other method of payment for which reimbursement is made by a public governmental body; and

(23) Records submitted by an individual, corporation, or other business entity to a public institution of higher education in connection with a proposal to license intellectual property or perform sponsored research and which contains sales projections or other business plan information the disclosure of which may endanger the competitiveness of a business.

Closed meetings, procedure and limitation--public records presumed open unless exempt--objections to closing meetings or records, procedure

610.022. 1. Except as set forth in subsection 2 of this section, no meeting or vote may be closed without an affirmative public vote of the majority of a quorum of the public governmental body. The vote of each member of the public governmental body on the question of closing a public meeting or vote and the specific reason for closing that public meeting or vote by reference to a specific section of this chapter shall be announced publicly at an open meeting of the governmental body and entered into the minutes.

2. A public governmental body proposing to hold a closed meeting or vote shall give notice of the time, date and place of such closed meeting or vote and the reason for holding it by reference to the specific exception allowed pursuant to the provisions of section 610.021. Such notice shall comply with the procedures set forth in section 610.020 for notice of a public meeting.

3. Any meeting or vote closed pursuant to section 610.021 shall be closed only to the extent necessary for the specific reason announced to justify the closed meeting or vote. Public governmental bodies shall not discuss any business in a closed meeting, record or vote which does not directly relate to the specific reason announced to justify the closed meeting or vote. Public governmental bodies holding a closed meeting shall close only an existing portion of the meeting facility necessary to house the members of the public governmental body in the closed session, allowing members of the public to remain to attend any subsequent open session held by the public governmental body following the closed session.

4. Nothing in sections 610.010 to 610.028 shall be construed as to require a public governmental body to hold a closed meeting, record or vote to discuss or act upon any matter.

5. Public records shall be presumed to be open unless otherwise exempt pursuant to the provisions of this chapter.

6. In the event any member of a public governmental body makes a motion to close a meeting, or a record, or a vote from the public and any other member believes that such motion, if passed, would cause a meeting, record or vote to be closed from the public in violation of any provision in this chapter, such latter member shall state his or her objection to the motion at or before the time the vote is taken on the motion. The public governmental body shall enter in the minutes of the public governmental body any objection made pursuant to this subsection. Any member making such an

objection shall be allowed to fully participate in any meeting, record or vote that is closed from the public over the member's objection. In the event the objecting member also voted in opposition to the motion to close the meeting, record or vote at issue, the objection and vote of the member as entered in the minutes shall be an absolute defense to any claim filed against the objecting member pursuant to section 610.027.

Records of governmental bodies to be in care of custodian, duties--records may be copied but not removed, exception, procedure--denial of access, procedure

610.023. 1. Each public governmental body is to appoint a custodian who is to be responsible for the maintenance of that body's records. The identity and location of a public governmental body's custodian is to be made available upon request.

2. Each public governmental body shall make available for inspection and copying by the public of that body's public records. No person shall remove original public records from the office of a public governmental body or its custodian without written permission of the designated custodian. No public governmental body shall, after August 28, 1998, grant to any person or entity, whether by contract, license or otherwise, the exclusive right to access and disseminate any public record unless the granting of such right is necessary to facilitate coordination with, or uniformity among, industry regulators having similar authority.

3. Each request for access to a public record shall be acted upon as soon as possible, but in no event later than the end of the third business day following the date the request is received by the custodian of records of a public governmental body. If records are requested in a certain format, the public body shall provide the records in the requested format, if such format is available. If access to the public record is not granted immediately, the custodian shall give a detailed explanation of the cause for further delay and the place and earliest time and date that the record will be available for inspection. This period for document production may exceed three days for reasonable cause.

4. If a request for access is denied, the custodian shall provide, upon request, a written statement of the grounds for such denial. Such statement shall cite the specific provision of law under which access is denied and shall be furnished to the requester no later than the end of the third business day following the date that the request for the statement is received.

Electronic transmission of messages relating to public business, requirements

610.025. Any member of a public governmental body who transmits any message relating to public business by electronic means shall also concurrently transmit that message to either the member's public office computer or the custodian of records in the same format. The provisions of this section shall only apply to messages sent to two or more members of that body so that, when counting the sender, a majority of the body's members are copied. Any such message received by the custodian or at the

member's office computer shall be a public record subject to the exceptions of section 610.021.

Fees for copying public records, limitations--fee money remitted to whom--tax, license or fee as used in Missouri Constitution article X, section 22, not to include copying fees

610.026. 1. Except as otherwise provided by law, each public governmental body shall provide access to and, upon request, furnish copies of public records subject to the following:

(1) Fees for copying public records, except those records restricted under section 32.091, shall not exceed ten cents per page for a paper copy not larger than nine by fourteen inches, with the hourly fee for duplicating time not to exceed the average hourly rate of pay for clerical staff of the public governmental body. Research time required for fulfilling records requests may be charged at the actual cost of research time. Based on the scope of the request, the public governmental body shall produce the copies using employees of the body that result in the lowest amount of charges for search, research, and duplication time. Prior to producing copies of the requested records, the person requesting the records may request the public governmental body to provide an estimate of the cost to the person requesting the records. Documents may be furnished without charge or at a reduced charge when the public governmental body determines that waiver or reduction of the fee is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the public governmental body and is not primarily in the commercial interest of the requester;

(2) Fees for providing access to public records maintained on computer facilities, recording tapes or disks, videotapes or films, pictures, maps, slides, graphics, illustrations or similar audio or visual items or devices, and for paper copies larger than nine by fourteen inches shall include only the cost of copies, staff time, which shall not exceed the average hourly rate of pay for staff of the public governmental body required for making copies and programming, if necessary, and the cost of the disk, tape, or other medium used for the duplication. Fees for maps, blueprints, or plats that require special expertise to duplicate may include the actual rate of compensation for the trained personnel required to duplicate such maps, blueprints, or plats. If programming is required beyond the customary and usual level to comply with a request for records or information, the fees for compliance may include the actual costs of such programming.

2. Payment of such copying fees may be requested prior to the making of copies.

3. Except as otherwise provided by law, each public governmental body of the state shall remit all moneys received by or for it from fees charged pursuant to this section to the director of revenue for deposit to the general revenue fund of the state.

4. Except as otherwise provided by law, each public governmental body of a political subdivision of the state shall remit all moneys received by it or for it from fees charged pursuant to sections 610.010 to 610.028 to the appropriate fiscal officer of such political subdivision for deposit to the governmental body's accounts.

5. The term "tax, license or fees" as used in section 22 of article X of the Constitution of the state of Missouri does not include copying charges and related fees that do not exceed the level necessary to pay or to continue to pay the costs for providing a service, program, or activity which was in existence on November 4, 1980, or which was approved by a vote of the people subsequent to November 4, 1980.

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Washington Avenue Transportation Development District

Public Accessibility

The Transportation Development District (TDD) project, a parking lot located at 1100 Washington Avenue in the City of St. Louis, is not accessible to the public. The TDD was formed through a court order in August 2009. The project is a prepaid lease between the developer (original owner of the building adjacent to the parking lot) of the project and the TDD for a parking lot adjacent to one of the loft apartment buildings in the district. A 1-cent (1 percent) sales tax was imposed on retail sales within the district.

The intergovernmental agreement between the city, TDD, and the developer acknowledges the general economic benefit and value to the community created by the TDD project and provides for public access to the project. In addition, when the TDD leased the parking lot from the developer, who also owned the adjacent loft apartments, and when the TDD leased the parking lot back to the developer for $1 per year, both leases state the parking lot will be open to the general public. In June 2013, we were told by a TDD Board member that the parking lot was open to the public. Instead, as evidenced by a photograph we took on a July 17, 2013, visit to the parking lot, the parking lot is gated with a code required to open the gate and clearly marked with signs stating, "Resident Parking" and "Unauthorized Vehicles will be Towed Away." The developer is leasing the parking spaces to 29 tenants of his apartment building and apparently collecting a total of $1,450 per month.

When we returned to the parking lot on October 15, 2013, a sign advertised "Reserved Monthly Public Parking" and provided the developer's phone number. Approximately 2 weeks after our October visit, the entire TDD board resigned, and we subsequently learned the developer sold the parking lot, the adjacent building, and a $1.141 million taxable sales tax revenue note in October 2013. The new owners said they did not know the parking lot was required by law to remain open to the public and did not know the TDD was not generating sufficient revenue to make payments on the note.

Formation and Operation

The TDD did not receive approval from the city to enter into a leaseback of the parking lot to the developer for $1 per year. Neither the developer nor the current owners are in compliance with the terms of the leaseback agreement, as the parking lot remains unavailable to the general public. Under the terms of the lease, the TDD is to pay the developer (or his successor) $4,567 per month for the duration of the lease; however, no payments have been made. The Board has not adequately planned how the TDD will generate sufficient revenues to fund its obligations. Revenues have fallen sharply during fiscal year 2014, with sales tax collections from July 2013 through February 2014 of less than $100. It appears at least one of the businesses within the TDD is not collecting the TDD sales tax on all transactions.

Reconciliations and Financial Statements	The TDD does not perform formal bank reconciliations and submitted inaccurate financial statements to the State Auditor's office
Financial Documentation	The Board did not maintain documentation to demonstrate the TDD revenues were only used to pay TDD formation costs. The developer also formed a Community Improvement District (CID) in conjunction with forming the TDD and paid approximately $31,000 to form both, but has not submitted documentation to support the amount associated with the TDD formation. The TDD has paid $10,059 toward the formation costs, but without additional documentation, it is unclear how much, if any, is still owed by the TDD or if an overpayment occurred. In addition, a portion of the TDD is in a Tax Increment Financing (TIF) district but there is no documentation to support how the TIF payments were determined or how much sales tax was received from each business within the TIF district.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 12

THOMAS A. SCHWEICH
Missouri State Auditor

Erin Johnston, Chairman
and
Board of Directors
Washington Avenue Transportation Development District
St. Louis, Missouri

We have audited certain operations of the Washington Avenue Transportation Development District in fulfillment of our duties under Section 238.272, RSMo. The scope of our audit included, but was not necessarily limited to, the period August 31, 2009, to June 30, 2010, and the 3 years ended June 30, 2013. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Washington Avenue Transportation Development District.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Rex Murdock, M.S.Acct.
	Wayne Kauffman, MBA

Washington Avenue Transportation Development District
Management Advisory Report
State Auditor's Findings

1. Public Accessibility

The Transportation Development District (TDD) project, a parking lot located at 1100 Washington Avenue in the City of St. Louis (city), is not accessible to the public. The TDD was formed through a court order in August 2009. The project is a prepaid lease between the developer (original owner of the building adjacent to the parking lot) of the project and the TDD for a parking lot adjacent to one of the loft apartment buildings in the district. A 1-cent (1 percent) sales tax was imposed on retail sales within the district.

The TDD leased the parking lot from the developer that formed the TDD in December 2010 for $4,567 per month and issued a $1,141,000 taxable sales tax revenue note to the developer. The TDD then leased the parking lot back to the developer for $1 per year, giving the developer operational control of the lot. Both leases indicate the parking lot will be open to use by the general public. In June 2013, we asked a member of the TDD Board if the parking lot was available for general public parking and she said it was open to the public. On July 17, 2013, we visited the parking lot. The parking lot was gated with a code required to gain access. The following photograph was taken of one of the two lot entrances, but both entrances had the same signs and access restrictions.

Throughout our audit fieldwork, the Board member we spoke with in June repeatedly indicated the parking lot is available to the public. It is unlikely the public would know this based on the restricted access signage. We inquired who was currently parking in the lot and received a listing showing 29 tenants of the loft apartment building adjacent to the parking lot who lease spaces in the lot. Based on information available on the developer's web site, these spaces lease for $50 per month to tenants, resulting in the developer potentially collecting $1,450 per month for these parking spaces.

On October 15, 2013, we again visited the parking lot and noted a new sign had been added to each gate.

The phone number listed on the sign is the developer's number. The original TDD Board consisted of employees/representatives of the developer. Board members indicated no one from the general public has contacted the developer about parking in the lot. Approximately 2 weeks after our October 2013 visit to view the parking lot, all of the Board members resigned their positions. Subsequently, we learned the parking lot and adjacent building had been sold by the developer in October 2013, along with the taxable sales tax revenue note, to another company. It is unclear the

amount paid specifically for the revenue note, but the new owners indicate they were unaware the parking lot was required by law to remain open to the public or that the TDD was generating insufficient revenue to make payments on the note (see MAR finding number 2.3).

A visit to the parking lot on March 27, 2014, indicated the "reserved public parking" sign had been removed from both gates.

Section 3.1 of the ground lease and leaseback between the TDD and the developer indicates the parking lot shall be used for the primary purpose of parking, which shall remain open to use by the general public. Resolution No. 2010-005 of the TDD Board of Directors states the transportation project includes acquisition of a leasehold interest in a parking lot within the district for the purpose of providing additional public parking. The intergovernmental agreement between the city, TDD, and the developer states the city and the TDD acknowledge the general economic benefit and

value to the community created by the TDD project and to provide for public access within the TDD project. Public access within the TDD project has been restricted in violation of the terms of these various agreements.

Recommendation

The TDD Board make the parking lot available to the public.

Auditee's Response

The TDD Board provided the following written response:

The current Board members were all newly appointed in May 2014 and are still gathering information regarding the operations of the TDD. We will review the audit report with our legal counsel to confirm agreement with the report's findings and to determine the appropriate actions to take in light of the auditor's concerns.

2. Formation and Operation

The TDD has not received approval from the city to modify the project by leasing the parking lot back to the developer. The city serves as the local transportation authority (LTA) for the project. In December 2010, the TDD entered into a lease agreement for use of the parking lot with the developer and then on the same day, the TDD entered into a leaseback agreement with the developer. This leaseback gave the operational control and use of the parking lot back to the developer, while leaving the burden of maintenance and repair of the lot with the TDD. The parking lot was constructed prior to the formation of the TDD and we were provided no documentation to show additional funds were spent by the developer on the parking lot. Our review of the formation document, leases and agreements, and the current operations of the TDD revealed significant concerns.

2.1 Modification of the project

The TDD has not received approval from the city to enter into a leaseback of the parking lot to the developer, which constitutes a modification to the project. Modifications are required to be approved by the LTA according to state law. We were provided with a copy of an intergovernmental agreement between the TDD, the city, and the developer, which specifically mentions the lease of the parking lot by the developer to the TDD, but the agreement makes no mention of the leaseback. Ordinance No. 68435, passed by the city in June 2009, documents the city's approval of the intergovernmental agreement and indicates the transportation project will benefit the city by increasing the available supply of parking. The TDD is required by state law to have any modifications to the project approved by the city.

Section 238.257.4, RSMo, states the board may modify the project previously approved if the modification is approved by the LTA.

2.2 Leases

Neither the developer nor current owners are in compliance with the terms of the leaseback agreement entered into with the TDD.

The TDD leased the parking from the developer for 30 years for $1,141,000 plus interest, or $4,567 per month for the duration of the lease. In conjunction with this lease, a $1,141,000 taxable sales tax revenue note was issued by the TDD pledging the transportation sales tax revenues to make the payments on the lease. The leaseback between the TDD and the developer is for 20 years for $20, or $1 per year. It gives the developer operational control and use of the lot, and requires the TDD to pay for the maintenance and repair of the parking lot. The leaseback contains no language voiding the original lease, so if and when sales tax revenues are sufficient, the TDD is still responsible for making the monthly payments for the lot. The leaseback still requires the lot to be available for use by the general public, but the developer is leasing those spaces to tenants in the adjacent apartment building.

Violation of the terms of the leaseback agreement

The developer and now the current owners are violating the terms of the leaseback agreement. The TDD has the authority to lease a project to another entity, if the lease serves a function listed under Section 238.250, RSMo, or is necessary or convenient to fulfill the purpose of the TDD. Allowing the developer to operate the project serves a function provided for under the law; however, a primary purpose of the TDD project is to provide for public access. In addition, section 3.1 of the leaseback to the developer from the TDD indicates the parking lot shall be used for the primary purpose of parking, which shall remain open to use by the general public. Use of the lot has been restricted to only residents of the adjacent apartment building, in violation of the terms of the leaseback, and in conflict with a primary purpose of the TDD project. The Board should seek to enforce the terms of the leaseback agreement.

Section 238.250, RSMo, allows a TDD to contract with a corporation or partnership regarding funding, promotion, planning, designing, constructing, improving, maintaining or operating projects or to assist in such activity. Further, Section 238.252(5), RSMo, allows a TDD to exercise other implied powers necessary and convenient for the district to accomplish its purposes, which are not inconsistent with its express powers.

2.3 Financial condition and planning

The TDD has not adequately planned for how it will generate sufficient revenues to fund its obligations. Budgets prepared by the TDD indicate the Board did not anticipate sufficient revenues to pay the lease payments (approximately $55,000 per year) and legal fees. No amounts are budgeted by the TDD for the lease payments. In addition, the TDD is potentially obligated to reimburse the developer for unpaid formation costs (see MAR finding number 4.1). Sales tax revenues have steadily declined over the past 3 years and it is questionable whether the TDD sales tax is being collected by all of the businesses operating within the TDD.

We contacted the Department of Revenue (DOR) and obtained a listing of the TDD and city sales tax collections by each of the 4 businesses located in the TDD, because both the city and TDD have a 1 percent tax rate on all sales. This listing showed the TDD collections were approximately $7,000 less than the collections for the city during the same period of time, indicating at least 1 of the businesses was not collecting the TDD sales tax on all transactions. In addition, the listing shows collections for 1 of the businesses ended in 2011 and 2 others ended in 2012. It is unclear how the Board planned to pay its annual obligations with insufficient revenues being generated and Board meeting minutes included no discussion regarding the financial situation of the TDD. The budgeted revenue each year is far less than the approximate $55,000 annual lease obligation and as the chart below shows, sales tax collections have come in significantly below the projected amounts.

Sales Tax Collections	Fiscal Year Ended				
	June 30, 2013	June 30, 2012	June 30, 2011*	December 31, 2010	Total
Budgeted	$ 20,000	20,100	50,100	6,000	96,200
Actual	5,985	9,372	9,179	4,196	28,732
Deficit	$ (14,015)	(10,728)	(40,921)	(1,804)	(67,468)

*The Board adopted resolution 2010-001 in 2010 to change its fiscal year end from December 31 to June 30. As a result, the 2011 fiscal year budget is for the period January 1, 2011 to June 30, 2011.

Revenues have fallen sharply during fiscal year 2014, with sales tax collections from July 2013 through February 2014 of less than $100. No principal or interest payments have been made toward the taxable sales tax revenue note issued to the developer and the Board has not developed a plan for paying ongoing administrative expenses and making payments on the note. The Board should contact the DOR and determine the status of the businesses in the district and whether the sales tax is being properly collected and remitted to help determine the viability of continuing TDD operations.

Recommendations

The TDD Board:

2.1 Ensure the terms of the intergovernmental agreement are being met, and modifications of the original project and any subsequent leases related to the project are properly approved by the city.

2.2 Ensure the terms of any lease entered into are being followed by the lessee.

2.3 Investigate the cause of the declining revenues and develop a plan to generate adequate revenues to pay the annual obligations of the TDD.

Auditee's Response

The TDD Board provided the following written response:

The current Board members were all newly appointed in May 2014 and are still gathering information regarding the operations of the TDD. We will review the audit report with our legal counsel to confirm agreement with the report's findings and to determine the appropriate actions to take in light of the auditor's concerns.

3. Reconciliations and Financial Statements

TDD officials do not prepare formal bank reconciliations. In addition, they submitted inaccurate financial statements to the State Auditor's office (SAO). The beginning and ending fiscal year 2010 cash balances were understated by $200 and the beginning and ending fiscal year 2011 cash balances were overstated by $538. In addition, the fiscal year 2011 ending cash balance does not agree to the fiscal year 2012 beginning cash balance. These errors would have been identified if the Board Treasurer had reconciled the cash balances on the financial statements to the cash balances on the bank statements and transaction register.

The preparation of monthly bank reconciliations is necessary to ensure the accounting records are in balance and to identify errors timely. Accurate financial statements are necessary to keep citizens informed of the financial activity and condition of the district.

Recommendation

The TDD Board ensure monthly bank reconciliations are performed and the financial statements submitted to the SAO are accurate.

Auditee's Response

The TDD Board provided the following written response:

The current Board members were all newly appointed in May 2014 and are still gathering information regarding the operations of the TDD. We will review the audit report with our legal counsel to confirm agreement with the report's findings and to determine the appropriate actions to take in light of the auditor's concerns.

4. Financial Documentation

We identified concerns regarding the repayment of TDD formation costs to the developer and payments made to the St. Louis Tax Increment Finance (TIF) Commission.

4.1 Formation costs

The Board did not maintain documentation to demonstrate that TDD revenues were only used to pay TDD formation costs. The TDD Board provided us a listing of the costs associated with forming the TDD and forming the 1133 Washington Avenue Community Improvement District (CID). The listing indicated the developer paid approximately $31,000 in total for various expenses associated with forming the TDD and CID, but it did not indicate what portion of the total expenses related to the TDD. The TDD has paid $10,059 toward the formation costs through the period ending

June 30, 2013, and it is unclear how much, if any, is still owed by the TDD or if an overpayment occurred.

Section 238.217, RSMo, allows the developer to be reimbursed for the fees of filing and defending the petition of the court to form the TDD. However, TDD revenues can only be used to reimburse the developer for the costs of filing and defending the TDD formation and cannot be used to reimbursement the developer for the costs of filing and defending the CID formation.

4.2 TIF payments

The TDD Board is not adequately tracking the amount of sales tax monies collected from businesses within the TIF district and has no support for the amount of tax collections paid to the TIF district. A portion of the TDD is located in a TIF district and thus, 50 percent of the sales taxes collected by the businesses in the TIF, and received by the TDD, is due to the TIF district. The TDD made various payments totaling $9,848 to the TIF district during the 3 years ended June 30, 2013, but there is no documentation to support how these payments were determined or how much sales tax was received from each business within the TIF district.

To ensure compliance with applicable statutes related to TIF payments and amounts paid to the TIF Commission are accurate, records related to sales taxes received and amounts due to the TIF Commission should be prepared and retained.

Recommendations

The TDD Board:

4.1 Request documentation to support the formation costs applicable to the TDD and determine if any amount is still owed or a refund is due.

4.2 Perform an analysis to determine the portion of TDD sales tax revenues that should be paid to the TIF Commission.

Auditee's Response

The TDD Board provided the following written response:

The current Board members were all newly appointed in May 2014 and are still gathering information regarding the operations of the TDD. We will review the audit report with our legal counsel to confirm agreement with the report's findings and to determine the appropriate actions to take in light of the auditor's concerns.

Washington Avenue Transportation Development District
Organization and Statistical Information

The Washington Avenue Transportation Development District (TDD) is located in in the City of St. Louis. The TDD was organized in August 2009 by petition of the property owners within the proposed TDD. The members of the Board of Directors of the district are elected by the property owners and included two property owners and three members representing the property owners.

In September 2009, the qualified voters of the TDD, in this case the property owners, approved the imposition of a sales tax of up to 1-cent (1 percent) on all taxable transactions within the boundaries of the district. The Board of Directors subsequently passed a resolution that set the sales tax rate at 1-cent (1 percent), effective January 1, 2010, for 40 years, unless terminated sooner. The retail establishments within the district are required to collect and remit the sales tax to the Missouri Department of Revenue (DOR). In turn, the DOR distributes the sales tax monies to the district.

The TDD was formed for the purpose of acquiring, constructing, reconstructing and repairing a parking lot or garage and other related improvements; construction of public access areas to the district, construction, reconstruction, relocation, installation, and repair of streets, roads and signing; acquisition of right-of-way or easement rights necessary for any or all of the transportation project improvements; and other improvements located within or adjacent to the parking lot or garage right-of-way or street and roads including trees, lighting, landscaping and/or other decorative features. The City of St. Louis is the public entity with jurisdiction over these projects. The parking lot had already been constructed at the time the TDD was formed and no additional work has been performed on the project.

The TDD has a fiscal year end of June 30, and did not have independent audits performed for the 4 years ended June 30, 2013.

In October 2013, the developers sold all of the property located within the TDD and the entire Board of Directors resigned. A new Board of Directors was appointed at the May 2014 meeting of the property owners.

District Board

An elected board acts as the policy-making body for the district's operations. The board's five members serve 3-year terms without compensation. Members of the board at June 30, 2013, were:

Bill Bruce, Chairman and Executive Director (1)
Rachel Robards, Treasurer (2)
Kathy Kleiman, Secretary (2)
Brian Bruce, Member (1)
John Perkins, Member (2)

(1) Property owner
(2) Property owner representative

Effective in May 2014, members of the board are:

Erin Johnston, Chairman
John Alvery, Executive Director
Stuart Woody, Treasurer
Chad Sneed, Secretary
Pat Gerlich, Member

Financial Activity

On December 15, 2010, the TDD leased the parking lot from the developer for $1,141,000 for a period of 30 years. As compensation for the lease, the TDD issued a $1,141,000 taxable sales tax revenue note, payable to the developer in monthly installments of $4,567. The TDD has not made any payments toward the note since it was issued. The note indicates it is only secured by available resources and shall not constitute a general obligation of the district, city, or state.

A summary of the district's financial activity for the 3 years ended June 30, 2013, follows:

	Year Ended June 30,		
	2013	2012	2011
RECEIPTS			
Sales taxes	$ 5,985	9,372	9,179
Total Receipts	5,985	9,372	9,179
DISBURSEMENTS			
Professional fees	2,143	9,409	3,793
Tax increment financing	2,653	3,777	3,418
Total Disbursements	4,796	13,186	7,212
RECEIPTS OVER (UNDER) DISBURSEMENTS	1,189	(3,815)	1,967
BEGINNING CASH	1,064	4,879	2,911
ENDING CASH	$ 2,253	1,064	4,879

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Mike Downing, Director
Department of Economic Development
Jefferson City, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-023, *Brownfield Remediation Tax Credit Program*, issued in April 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the Department of Economic Development (DED) about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the DED, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we met with DED officials and received a written status to selected recommendations. We reviewed the DED's written responses related to those recommendations. We identified bills introduced in the current session of the General Assembly that included provisions involving tax credit programs. We contacted an official of the Joint Committee on Administrative Rules regarding that process. This report is a summary of the results of this follow-up work, which was substantially completed during September 2014.

Thomas A. Schweich
State Auditor

Brownfield Remediation Tax Credit Program
Follow-Up Report on Prior Audit Findings
Status of Findings

1.1 Program Administration and Oversight - Eligible cost percentage and per-project caps

The DED had not conducted a formal evaluation of the Brownfield Remediation Tax Credit (BRTC) Program to determine whether authorizing BRTCs for 100 percent of eligible costs was the most advantageous to the state. The DED issued BRTCs for up to 100 percent of the eligible costs, subject to limitations of the proven financing gap and the state net economic benefit provisions. State law provides the DED with the authority to base the credit on a lower percentage. For 6 of 15 projects reviewed, the DED authorized BRTCs for 100 percent of eligible costs. In addition, Missouri had not established a per-project cap. Of the 13 states with brownfield remediation programs, only Missouri and Connecticut authorized tax credits for up to 100 percent of eligible costs. The rates noted for the other states ranged from a low of 12 percent for some types of projects in Iowa to 75 percent in New Jersey. Six states have established per-project caps ranging from $150,000 to $500,000.

Recommendation

The DED evaluate and consider decreasing the percentage of eligible costs qualifying for BRTCs.

Status

Implemented

The DED indicated this recommendation has been implemented for all applications approved after April 2014. The DED will decrease the percentage of eligible costs qualifying for BRTCs to the extent the applicant fails to prove that costs estimates were obtained in a competitive manner. The DED indicated no applicant since April 2014 has failed to meet the requirements for competitive procurement.

Recommendation

The General Assembly consider establishing per-project caps for individual projects.

Status

Not Implemented

The audit was released in April 2014, after General Assembly deadlines to submit new legislation. However, several legislative bills had already been introduced that would have impacted the BRTC program, including Senate Bill (SB) 577, House Bill (HB) 1477, HB 2133 and HB 2207. These bills were omnibus tax credit bills that impacted many if not all of the state's tax credit programs and did not solely impact the BRTC program. None of these bills were amended to establish caps for individual projects, and none passed.

1.2 Program Administration and Oversight - Procurement of project services

The DED did not (1) require developers to solicit bids for project services on a competitive basis, require detailed unit price/quantity bids, or require bids for some project costs; (2) have policies to restrict potential conflicts of interest on BRTC projects; and (3) compile historical unit costs for BRTC projects.

Recommendation

The DED promulgate state regulations to establish procedures requiring BRTC applicants to procure project activities competitively and to select the lowest and best bid, and rules to define and limit conflicts of interest. We also recommend the DED maintain a database of historical cost information for BRTC projects.

Status

In Progress

The DED filed rules with the Secretary of State, however, the Joint Committee on Administrative Rules (JCAR) "disapproved" the proposed rules. As a result of JCAR's disapproval, the DED currently has the following options (1) withdraw the proposed rules, (2) revise the rules, hold additional public hearings, and resubmit the rule for JCAR's consideration, or (3) wait for the General Assembly to act. If the DED chooses not to withdraw or modify the proposed rules, the General Assembly has 30 legislative days after it reconvenes in January of 2015, to ratify by concurrent resolution, JCAR's disapproval pursuant to Article IV, Section 8 of the Constitution. If the General Assembly ratifies JCAR's disapproval, the resolution is then sent to the Governor who may either approve or veto the resolution. If the Governor vetoes the resolution the General Assembly may override the veto. If the General Assembly does not ratify JCAR's disapproval, the rule will go into effect.

The DED is currently evaluating all options related to the administrative rulemaking process. In the interim, the DED has begun to maintain a database of cost information for BRTC projects, and is instructing current applicants to procure project activities competitively.

1.3 Program Administration and Oversight - Cost certification

The DED did not require certification of the actual project costs by a licensed engineer, architect or certified public accountant. The DED requires a certification of eligible costs by a certified public accountant (CPA) in other tax credit programs including the Historic Preservation and Low Income Housing Tax Credit programs. Both Iowa and Florida require an independent CPA firm to review eligible costs prior to issuance of Brownfield tax credits.

Recommendation

The DED require certification of actual project costs by a licensed engineer, architect, and/or certified public accountant.

Status

Implemented

The DED indicated this recommendation has been implemented for all applications approved after April 2014. The DED informs all applicants that project costs should be certified by a licensed engineer, architect, or certified public accountant. Without the certification, the DED will not provide applicants any assurance that tax credits will be issued.

1.4 Program Administration and Oversight - Scrap values

The DED authorized BRTCs for $2,265,000 more than the financing gap for the Northwest Plaza Project (NWP) because the DED did not reduce the authorized BRTCs for the proceeds from the sale of scrap materials generated during demolition. In addition, the DED had not established policies and procedures to handle scrap proceeds.

Recommendation

The DED reduce the authorization award associated with the NWP project by $2,265,000 and establish policies and procedures to handle scrap proceeds.

Status

In Progress

The DED has not completed its review of, and no tax credits have been issued in connection with, the NWP project. The DED directs all applicants to structure bids to account for and list scrap values in their bid documents. DED project managers are required to check that scrap value is included in the bids.

2.1 Program Efficiency and Effectiveness - Job creation

The DED did not usually include clawback provisions that required developers to repay portions of the BRTCs if the number of projected new jobs were not created. According to DED personnel, the DED required clawback provisions for only three projects since the programs inception.

For the 15 projects we reviewed, no project had the amount of authorized BRTCs limited because of the state economic benefit calculation. Most BRTC projects did not create the projected number of new jobs. Of the 15 projects reviewed, 10 had completed remediation activities. For those 10 projects, developers projected approximately 2,500 jobs would be created; however, according to the annual reports developers submitted to the DED only 116 full-time and 322 part-time jobs were actually created. In addition, because the DED used the developers' estimates in the annual cost-benefit analysis submitted to the General Assembly, the state economic impact of the BRTC program was significantly overstated.

Recommendation

The DED include clawback provisions for BRTC projects.

Status

Implemented

The DED indicated this recommendation has been implemented for all applications approved after April 2014. The DED requires all applicants to submit a clawback agreement prior to receiving a notice to proceed.

2.2 Program Efficiency and Effectiveness - Annual and cumulative limits

The General Assembly had not established annual or cumulative limits on the BRTC. During the period of state fiscal years 2003 through 2013, the DED issued BRTCs totaling approximately $174 million and redemptions totaled approximately $168 million.

Recommendation

The General Assembly evaluate and consider implementing an annual limit on the amount of BRTCs awarded.

Status

Not Implemented

The audit was released in April 2014, after General Assembly deadlines to submit new legislation. However, several legislative bills had already been introduced that would have impacted the BRTC program, including SB 577, HB 1477, HB 2133 and HB 2207. These bills were omnibus tax credit bills that impacted many if not all of the state's tax credit programs and did not solely impact the BRTC program. None of these bills were amended to establish an annual limit on the amount of BRTCs issued, although one bill would have made all tax credits subject to the appropriation process. In addition, none of these bills passed.

2.3 Program Efficiency and Effectiveness - Sunset Provision

State law did not include a sunset provision for many tax credits, including the BRTC program. The Sunset Act, passed in 2003, provides for new programs to sunset after a period of not more than 6 years unless reauthorized by the General Assembly or the program is exempted from the Sunset Act. The Act requires the Committee on Legislative Research to review applicable programs before the sunset dates and present a report to the General Assembly regarding the sunset, continuation, or reorganization of each affected program. However, the BRTC program was created prior to the Sunset Act and is exempted.

Recommendation

The General Assembly establish a sunset provision for the BRTC program.

Status

Not Implemented

The audit was released in April 2014, after General Assembly deadlines to submit new legislation. However, several legislative bills had already been introduced that would have impacted the BRTC program, including SB 577, HB 1477, HB 2133 and HB 2207. These bills were omnibus tax credit bills that impacted many if not all of the state's tax credit programs and did not solely impact the BRTC program. None of these bills were amended to establish a sunset provision, and none passed.

2.4 Program Efficiency and Effectiveness - Use of multiple incentives

State law does not prohibit claiming the same project costs under two or more tax credit programs. This "stacking" of tax credits can be lucrative for developers resulting in additional tax credits being issued while no additional economic activity or state benefit is generated.

Companies may claim certain project costs under the Historic Preservation, Low Income Housing, Brownfield Remediation, and the Neighborhood Preservation Tax Credit programs. Between fiscal years 2000 and 2011, the

state issued tax credits totaling approximately $738 million for 117 projects that received funding from two or more of these tax programs.

Recommendation

The General Assembly establish cost containment provisions regarding project costs claimed under multiple tax credit programs.

Status

Not Implemented

The audit was released in April 2014, after General Assembly deadlines to submit new legislation. However, several legislative bills had already been introduced that would have impacted the BRTC program, including SB 577, HB 1477, HB 2133 and HB 2207. These bills were omnibus tax credit bills that impacted many if not all of the state's tax credit programs and did not solely impact the BRTC program. None of these bills were amended to establish cost containment provisions regarding project costs claimed under multiple tax credit programs, and none passed.

City of Pevely

October 2014

Report No. 2014-100

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Pevely

Financial Issues	The city inappropriately transferred $200,000 from the Water and Sewer Fund to finance general operations and does not have a formal plan in place to repay the funds. The Board does not receive and review detailed financial information, which would assist in effectively monitoring cash balances and the financial condition of city funds. Audit staff noted several concerns related to bond issues and tax collections. The city became responsible in 2013 for covering a portion of the general obligation bond payments related to a Neighborhood Improvement District (NID) when the revenue collected from special assessments was not enough to cover the bond payments. The city improperly used monies from the NID bond reserve account to make bond payments, and did not properly enforce several taxes, resulting in lost revenues. The city was not collecting two sales taxes on residential customer utility bills (one to fund road improvements and the other to fund construction of city hall) and was not properly collecting a telecommunications tax.
Budgets and Financial Statements	Annual budgets do not contain all elements required by state law, and the city did not submit an annual financial report to the State Auditor's office as required by law for the year ended December 31, 2012, and, as of July 8, 2014, had not submitted an annual financial report for the year ended December 31, 2013.
Bidding and Professional Services	The city did not solicit bids for all purchases over $3,000, including $24,674 for sewer pumps, $22,400 for a pickup truck, $18,235 for playground equipment, and $13,199 for another pickup truck. The city only provided documentation of the winning bid for one project and did not maintain invoices related to the project. The city has used the same city attorney and Certified Public Accountant for approximately 20 years without periodically soliciting proposals for services.
Mayor's Cellular Phone	For more than 10 years, the city did not require former Mayor Knobloch to submit detailed supporting documentation for his cellular phone bill reimbursements. These payments ranged from $61 to $279 per month.
Accounting Controls and Procedures	The city does not timely perform bank account reconciliations and does not routinely follow up on outstanding checks. The city had 35 checks totaling $4,475 that had been outstanding for more than one year. The City Clerk and two utility clerks are able to make adjustments to customer accounts without independent approval. The city does not reconcile customer utility deposits held to the amounts reported in the city's accounting records. As of June 30, 2013, the city held deposits totaling $142,000, but the city's accounting system indicated $120,000 was being held. The city does not have a centralized list of all city property, and assets are not tagged for specific identification. The city allows users to pay monthly utility bills, court costs, fees, and various fines by credit or debit card, but it does not charge users a sufficient convenience fee to offset card service costs and transaction fees assessed.

Employee Compensation	The city does not report the value of personal (commuting) mileage for using a city-owned vehicle on W-2 forms as required by the Internal Revenue Service. The city paid approximately $12,200 in perfect attendance payments, which violates the Missouri Constitution.
Sunshine Law Violations	The Board did not record roll call votes to go into closed session for 11 of 21 closed sessions reviewed and some issues discussed in closed sessions were not allowable under the Sunshine Law.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 18

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Pevely, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Pevely. We have audited certain operations of the city in fulfillment of our duties. The city engaged Jeffrey J. Eftink, Certified Public Accountant (CPA), P.C., to audit the city's financial statements for the year ended December 31, 2012. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2012. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Pevely.

An additional report, No. 2014-013, *Twenty-Third Judicial Circuit, City of Pevely Municipal Division,* was issued in March 2014.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Chris Vetter, CPA
In-Charge Auditor:	David Olson
Audit Staff:	Morgan Alexander
	Andrew Roley

1. Financial Issues

The city inappropriately transferred $200,000 from the Water and Sewer Fund to finance general city operations and the Board of Aldermen (Board) does not receive and review financial information that would assist in monitoring the city's finances. In addition, the city improperly used money from a bond reserve account and did not properly enforce several taxes.

1.1 Inter-fund obligations

The city inappropriately used $200,000 in restricted Water and Sewer Fund monies to finance general operations. In April 2013, the city transferred the monies from the Water and Sewer Fund to the General Fund. The city did not appropriate the funds to repay the loan in the 2014 budget document or have a formal plan in place to reimburse the Water and Sewer Fund. In January 2014, city officials stated the Board's plan was to pay back the loans during 2014, by making separate $50,000 transfers throughout the year. However, the entire loan was repaid, without interest, to the Water and Sewer Fund in April 2014. No budget amendments were made to reflect the loan payment.

Transfers from restricted funds to general funds should occur only for allowable and specific purposes, and reasons should be adequately documented. Section 250.150, RSMo, restricts the use of water and sewer monies for operating the systems, payment of bonds, establishment of a reserve, fulfillment of any agreements contained in ordinances, and payment of costs of improvements of such systems.

1.2 Financial information and monitoring

The Board does not receive and review detailed financial information, which would assist in effectively monitoring cash balances and the financial condition of city funds. The Board typically receives only a report showing the sales taxes collected for the month and a list of disbursements to be approved. The Board should also be receiving information such as all revenue collected for the month and year-to-date and debt obligations.

To effectively monitor cash balances and the financial condition of city funds, the Board must receive timely and comprehensive financial information.

1.3 Bonds and sales taxes

We identified the following concerns related to bond issues and tax collections:

- The city became responsible in 2013 for covering a portion of the general obligation bond payments related to a Neighborhood Improvement District (NID) when the revenue collected from special assessments was not enough to cover the bond payments. According to the city, the developer was given approximately $7.1 million in bond proceeds and construction advances at the beginning of the project. Special assessments paid by builders and homeowners in the subdivision are intended to pay off the bonds; however, because of the

difficult economic environment the subdivision has not developed as intended resulting in problems collecting some assessments. In addition, water and sewer tap fees were to be used to reimburse the city for the construction advances. Because of the problems completing the NID project, the city may never receive some of these special assessment fees and water and sewer tap fees. The remaining principal outstanding on the bonds at December 31, 2013, was $4.4 million. Interest remaining to be paid over the life of the bond issue totals $1.4 million. The remaining amount due to the city on the construction advances at December 31, 2013, was $656,854.

- The city improperly used monies from the NID bond reserve account to make bond payments, resulting in the reserve account having a $161,000 shortage at December 31, 2012. City officials indicated the bond reserve account shortage has been addressed and is $20,000 short as of July 2014.

- The city did not properly enforce several taxes, resulting in lost revenues.

  A sales tax approved by voters in 1993 to fund road improvements was not being collected on residential customer utility bills. The former City Administrator estimated the city has lost total revenues of approximately $250,000 of this sales tax since 1993.

  Another sales tax approved by voters in 2006 to fund the construction of city hall was also not being collected on residential customer utility bills. City officials estimated the city has lost total revenues of approximately $100,000 of the sales tax since 2006.

  According to the city's 2012 financial statement audit report, the Board approved a telecommunications tax in 2002; however, the tax was not being properly collected. The gross receipts of applicable businesses were being taxed only 1 percent instead of the intended 5 percent. Neither the city's independent Certified Public Accountant (CPA) auditor nor city officials estimated the financial impact on the city of not properly collecting this telecommunications tax, and current city officials are uncertain as to how much revenue has been lost by the city.

  The city corrected these tax collection issues in June 2013 after city officials noticed tax collections were well below projected amounts. We estimate the city is now collecting an additional $3,200 per month from the two sales taxes since this issue was corrected. City officials estimate the city is collecting on average an additional $33,100 per month from the telecommunications tax since this issue was corrected.

While the city is addressing these issues, it is imperative that the Board receives accurate and complete information to properly manage the city's finances (see section 1.2). With $10 million in long-term debt at December 31, 2013, the city cannot afford to be unprepared for additional unforeseen situations by not properly collecting all potential sources of revenue. The Board should also ensure disbursements are closely monitored as problems with disbursements were noted in MAR finding numbers 3 and 4.

To ensure the financial obligations of the city can be met, the Board must receive complete financial information. In addition all revenue-related ordinances should be up-to-date and in agreement with voter-approved ballot issues and applicable laws to ensure all possible revenues are being collected.

Recommendations

The Board of Aldermen:

1.1 Avoid improper interfund transfers.

1.2 Require preparation of timely, detailed, and complete financial reports and closely monitor the city's financial condition.

1.3 Ensure all financial obligations can be met and all potential sources of revenue are being properly collected.

Auditee's Response

The Board of Aldermen provided the following written responses:

1.1 We will develop protocols to address interfund transfers.

1.2 Beginning in April 2014, the city hired the CPA firm of Thurman, Shinn & Company to prepare monthly financial statements for the city. The firm has prepared and presented financial statements through June 2014. These financial statements include a summary of all funds and detailed information regarding each department of the city. The financial statements show year-to-date actual, annual budget, variance and percentage of budget.

1.3 The city receives budget-to-actual reports on a monthly basis along with a listing of cash balances that has been adjusted for any due to/due from amounts within funds. We will ensure all financial obligations can be met and all potential sources of revenue are being properly collected.

2. Budgets and Financial Statements

The city does not prepare complete budgets, or prepare and submit annual financial reports as required by state law.

2.1 Budgets

Annual budgets do not contain all elements required by state law. Budgets did not include a budget message, budget summary, information on city indebtedness, or the beginning fund balances.

Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and also sets specific guidelines for the format. A complete budget should include beginning fund balances. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in setting tax levies and utility rates and informing the public about city operations and current finances.

2.2 Financial reporting

The city did not submit an annual financial report to the State Auditor's office as required by law for the year ended December 31, 2012, and, as of July 8, 2014, had not submitted an annual financial report for the year ended December 31, 2013. Section 105.145, RSMo, requires each political subdivision to file annual reports of its financial transactions with the State Auditor's office. In addition, 15 CSR 40-3.030 requires the annual financial report to be filed within 4 months after the end of the political subdivision's fiscal year if an unaudited financial report is filed and within 6 months after the end of the political subdivision's fiscal year if an audit report prepared by a certified public accountant is filed.

Recommendations

The Board of Aldermen:

2.1 Prepare budgets in compliance with state law.

2.2 Submit annual financial reports to the State Auditor's office as required by state law.

Auditee's Response

The Board of Aldermen provided the following written responses:

2.1 The city will prepare a budget with all necessary parts for each budget year.

2.2 The city will provide a copy of its 2013 audit as soon as it is completed.

3. Bidding and Professional Services

Bidding decisions were not well documented. The city procedures for selecting and contracting for goods and services are not sufficient and proposals are not periodically solicited for some professional services.

3.1 Bidding

City officials and employees do not always comply with the city's purchasing policy. City policies 135.120 and 135.190 require written bids to be obtained for purchases over $3,000. Bids were not solicited for the following items:

Item		Amount
Sewer pumps	$	24,674
Pickup truck		22,400
Playground equipment		18,235
Pickup truck		13,199
Auto body repairs		7,984
Mower		6,599
Police radios		6,549
Patrol car equipment		6,025
Total purchases not bid	$	105,655

Also, the city was only able to provide documentation of the winning bid for street paving and construction even though multiple bids were received. The contract for this project was approximately $205,000; however, the city did not maintain invoices related to the $225,000 paid to the vendor for the project. At our request, the city was able to obtain copies of change orders (invoices) from the vendor to support approximately $223,000 in payments, resulting in approximately $2,000 in payments without supporting documentation.

Competitive bidding procedures for major purchases provide a framework for economic management of city resources and help ensure the city receives fair value by contracting with the lowest or best bidders. Competitive bidding also helps ensure all parties are given an equal opportunity to participate in city business. In addition, to ensure obligations were actually incurred and amounts paid were proper, all disbursements should be supported by paid receipts, itemized vendor invoices or other detailed documentation with payment information clearly indicated.

3.2 Professional services

According to city officials, the city has used the same city attorney and CPA for approximately 20 years without periodically soliciting proposals for services. The city's professional services procurement policy sections 135.340-135.360 requires the city to request "expressions of interest" from at least 5 firms and to request "detailed proposals" from at least 3 firms on purchases over $10,000. During the year ended December 31, 2013, and

2012, the city paid the city attorney approximately $44,000 and $110,000 respectively, and the CPA approximately $25,000 and $21,000, respectively. In addition, the city did not have a contract with the city attorney.

Soliciting proposals for professional services is a good business practice. Such procedures help provide a range of possible choices, and allow the city to make better-informed decisions to ensure necessary services are obtained from the best qualified provider after taking expertise, experience, and cost into consideration. Also, written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

Recommendations

The Board of Aldermen:

3.1 Ensure bids are solicited for all applicable purchases in accordance with city policy and maintain all bid and disbursement supporting documentation.

3.2 Periodically solicit proposals for professional services as required by city policy.

Auditee's Response

The Board of Aldermen provided the following written responses:

3.1 The city will review its purchasing policy and make sure that all purchases are made in accordance with the policy. We will also ensure all documentation relating to disbursements and bids is maintained.

3.2 The city is actively soliciting requests for qualifications (RFQ) for the legal representation. A RFQ for accounting services has been published and to date the city has received no responses. Effective immediately, the city will periodically solicit proposals for legal and financial services.

4. Mayor's Cellular Phone

For more than 10 years, the city did not require former Mayor Knobloch to submit detailed supporting documentation with his requests for the city to pay a portion of his monthly personal cellular phone bill. The city spent $12,753 on cellular phone bills submitted by the Mayor since 2003.

While the city generally paid the Mayor's cellular phone provider a set amount for most months for any given year, documentation was not provided showing the Board's approval of the original amount set or subsequent increases, and many years had 1 or 2 payments that were significantly higher than payments for other months of the year. There was

also no documentation explaining why the city chose to pay the Mayor's personal cellular phone bill instead of providing him with a city-owned cellular phone or paying a set allowance each month.

The city's monthly payments gradually increased over the years, starting at $61 per month in 2003 and increasing to $138 in 2011. However, there was 1 or 2 months in many years where a significantly higher amount was paid without explanation. For example, during the year ended December 31, 2012, the city paid the cellular phone provider approximately $138 per month, except in June when the city paid $275. Also, the number of payments varied with some years having more than 12 payments and some having less than 12 payments. Overall, the city made 123 payments to the Mayor's cellular phone provider from 2003 to 2013.

The Mayor typically did not submit the current month's bill, only submitted the summary page, and sometimes handwritten amounts were on the bills submitted. We reviewed all cellular phone bills submitted by the Mayor for the period January 2003 through August 2013 and identified several concerns. Some bills are discussed in more than one point.

- For most months, the Mayor did not submit the billings specifically pertaining to the month for which he was seeking payment. Rather he repeatedly submitted bills pertaining to only 7 months as supporting documentation from January 2003 through August 2013. The Mayor submitted 3 of the 7 bills at least 20 times each. For example, from April 2009 to October 2012, the Mayor submitted the same April 2009 cellular phone bill. The city paid approximately $5,400 based on this April 2009 bill that was submitted repeatedly.

- The Mayor frequently submitted bills with correction fluid covering the amount due and a handwritten amount for the city to pay. This situation occurred 60 times from April 2003 to July 2013. The city paid the Mayor's cellular phone provider approximately $7,800 based on the handwritten amounts.

- For one bill, which was submitted 7 times, the cellular phone provider showed a credit balance and the words "Do Not Pay," but the city paid the amount that was handwritten on the bill. Payments related to these bills totaled approximately $960.

- In the last few months before the city stopped paying the Mayor's cellular phone bill in August 2013, the Mayor began submitting current bills with a few additional details. The bills submitted for July and August 2013 showed 2 phone numbers on the account, both in the Mayor's name, and the city paid the entire bill.

In addition, the July 2013 bill was paid twice. The payment was submitted by the city late, resulting in the July balance and a $5 late fee being included on the August 2013 bill. The city then paid the full balance due of $276.

The following table summarizes the city's payments related to the Mayor's cellular phone bills.

Mayor's Cellular Phone Payments

Year	Number of Payments	Total Amount Paid[1]	Range of Monthly Payments[1] Low	Range of Monthly Payments[1] High	Bill Dates Submitted for Payment[3]
2003	14	$ 953	$ 61	$ 143	August 12, 2002
					September 11, 2003
2004	8	680	67	200	September 11, 2003
2005	9	735	67	134	September 11, 2003
2006	12	1,069	67	267	September 11, 2003
2007	12	877	67	79	September 11, 2003
					August 8, 2007
2008	13	1,287	79	279	August 8, 2007
2009	12	1,167	79	109	August 8, 2007
					April 13, 2009
2010	12	1,304	109	109	April 13, 2009
2011	12	1,820	109	275	April 13, 2009
2012	12	1,788	138	275	April 13, 2009
					September 13, 2012
2013[2]	7	1,073	110	276	September 13, 2012
					July 13, 2013
					August 13, 2013
Totals	123	$ 12,753			

[1] Amounts are rounded to the nearest whole dollar amount.
[2] The city's last payment to the Mayor's cellular phone provider was issued on August 27, 2013.
[3] Dates of the bill submitted by the mayor for payment during each year. The Mayor typically did not submit the current month's bill.

The bills submitted by the Mayor provided no assurance the Mayor actually incurred cellular phone expenses for the period for which reimbursement was requested, or that amounts paid were proper and related solely to the Mayor's phone and did not include costs related to other lines, if any, included on the Mayor's cellular phone plan. The Board approved payment of these bills without requiring appropriately detailed documentation to support the payments. The Board should have rejected the bills submitted by the Mayor and required the actual billings for the applicable months prior to approving payments.

In 2013, several board members and residents began to question whether paying the Mayor's cellular phone bill was a prudent use of city funds and asked for additional documentation. Instead of providing more detailed documentation, the Mayor announced he would no longer ask the city to pay his cellular phone bill. Board members wanted to seek reimbursement for the cellular phone payments. After discussions with the Mayor at board meetings over the course of several months, a settlement agreement was reached in June 2014. The Mayor reimbursed the city $3,610 in disputed cellular phone bills and the city reimbursed the Mayor $3,360 for legal fees he incurred related to the city's investigation of the Mayor's cellular phone bills. The Mayor resigned effective July 7, 2014.

In addition, the city does not have a cellular phone policy. The city provided 21 cellular phones to city employees and elected officials and spent $16,224 on cellular phones (excluding the Mayor) during the year ended December 31, 2013.

Adequate supporting documentation should be required before the city makes the related cellular phone payments. To ensure the efficient and effective use of cellular phones, the Board should develop a comprehensive written policy regarding appropriate cellular phone usage and monitoring to ensure the plan most beneficial to the city is used.

Recommendation

The Board of Aldermen should require adequate supporting documentation for cellular phone payments made to or on behalf of officials and employees. Also, the Board of Aldermen should develop a comprehensive written policy regarding the use of cellular phones.

Auditee's Response

The Board of Aldermen provided the following written response:

The city no longer reimburses individuals for individual cell phones and the city is developing a cell phone policy at this time.

5. Accounting Controls and Procedures

Accounting controls and procedures need improvement.

5.1 Bank reconciliations

The city does not perform timely reconciliations of bank accounts. Our review of the December 2013 and May 2013 bank reconciliations noted that the bank reconciliation for these bank statements were not completed until March 2014 and July 2013, respectively.

Timely monthly bank reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and errors or discrepancies are detected and corrected timely.

5.2 Outstanding checks

The city has not established procedures to routinely follow up on outstanding checks. As of December 2013, the city had 35 checks totaling $4,475 that had been outstanding for more than one year. Some checks were more than 2 years old. These checks included 4 issued to employees and 8 issued to local businesses.

Proper follow up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise allowed by state law. Old outstanding checks should be voided and reissued to those payees who can be readily located, and amounts remaining unclaimed should be disposed of in accordance with state law.

5.3 Utility adjustments

The city does not require independent approval to be obtained for adjustments posted to the utility system. The City Clerk and two utility clerks are able to make adjustments to customer accounts. The utility clerks also prepare bills and post payments to the customer accounts. The adjustments are not reviewed by anyone at the city to ensure the adjustments are proper. During the year ended December 31, 2013, clerks made approximately $15,800 in adjustments to the city's utility system.

Requiring someone independent of receipting and recording functions to review and approve adjustments would help ensure all adjustments are valid. In addition, for the Board to be aware of the number and amount of adjustments, a report of adjustments should be presented periodically to the Board.

5.4 Utility deposits

The city is not reconciling customer utility deposits held in the utility deposit bank account to the amounts reported in the city's accounting records. Also, procedures for closing inactive customer accounts need improvement. As of June 30, 2013, the city held deposits totaling approximately $142,000. However, the city's accounting system indicated approximately $120,000 was being held. City personnel stated the $22,000 difference was due to monies from closed customer accounts that had not been refunded, which are not included in the reports generated by the accounting system due to a system error. The city does not have a list showing to whom this money is owed. City officials indicated the system would have to be fixed before a proper list can be generated and the monies refunded. The city requires deposits of $100 from residential customers and $200 from business customers. The city needs to ensure that any inactive customer accounts are properly closed out in the city's accounting system

and refund applicable deposits to these customers if necessary. Any unclaimed refunds should be handled in accordance with state law.

5.5 Capital assets

The city does not have a centralized list of all city property and assets are not tagged for specific identification. Lists of property are updated periodically and are kept on a departmental basis, but the lists are not always turned in to the City Clerk's office. A 2013 inventory was not conducted for the city administration offices, parks department, planning and zoning department, and police department. The last inventories in these departments occurred in 2012.

Adequate capital asset records and procedures are necessary to provide controls over city property; safeguard city assets that are susceptible to loss, theft, or misuse; and provide a basis for proper financial reporting and insurance coverage.

5.6 Credit and debit card fees

The city allows monthly utility bills, court costs, fees, and various fines to be paid by credit or debit card; however, card users are not charged a sufficient convenience fee to offset card transaction fees assessed. On April 30, 2012, the city began charging a $4 service costs and convenience fee for payments made by credit or debit card. Credit and debit card service costs and transaction fees in 2012 totaled approximately $3,500, but the city only received approximately $1,970 in convenience fees. In 2013, service costs and transaction fees totaled approximately $5,600 while the city received approximately $3,050 in convenience fees. City officials should consider increasing the convenience fee to offset the card costs. In addition, absorbing a portion of the credit and debit card transaction fees is a possible violation of Article VI, Section 23, Missouri Constitution, which prohibits the granting of public funds to individuals.

Recommendations

The Board of Aldermen:

5.1 Ensure bank reconciliations are completed timely.

5.2 Establish procedures to routinely follow up and reissue old outstanding checks and dispose of unclaimed monies in accordance with state law.

5.3 Require an independent review and approval of all utility system adjustments.

5.4 Ensure reconciliations of utility deposits are performed between the utility deposit bank account and the deposits held per the city's accounting records. Any discrepancies should be promptly investigated. In addition, the Board of Aldermen should ensure applicable utility deposits are refunded or applied to balances due.

5.5 Ensure adequate property records are maintained in a centralized location. The Board of Aldermen should also properly tag, number, or otherwise identify all applicable city property and ensure an annual inventory of all property is conducted.

5.6 Evaluate convenience fees as compared to processing fees and increase fees assessed as appropriate to a level sufficient to cover the costs of the service.

Auditee's Response

The Board of Aldermen provided the following written responses:

5.1 All bank reconciliations have been completed for 2014.

5.2 The city will review old outstanding checks and ensure that monies are appropriately disbursed to payees or as otherwise allowed by state law.

5.3 The city is in the process of reviewing the financial internal controls of the city, including the utility department. A control will be put in place to make sure that all adjustments are reviewed and signed off by a second individual.

5.4 All customer accounts will be reviewed to make sure that utility deposits for closed customer accounts are disbursed back to the customer when appropriate. Reconciliations between the utility deposit bank account and the deposits recorded in the city's accounting system will be performed. Any differences will be investigated.

5.5 The city receives an inventory listing with its annual property insurance policy. However, at this time, the city does not tag inventory. The city will develop a dollar threshold to determine which items will be tagged and inventoried. We will ensure an annual inventory is conducted each year and maintain the inventory records in a centralized location.

5.6 The city feels that the difference of the convenience fees collected and the actual credit card charges paid is the cost of doing business. It is felt that this amount is much like service charges charged on checking accounts. The city will evaluate this policy.

6. Employee Compensation

The city does not report commuting mileage benefits and some employees receive additional compensation related to tasks performed as a part of regular job duties.

6.1 Commuting mileage

The city does not report the value of personal (commuting) mileage for using a city-owned vehicle to commute between home and work on individual W-2 forms as required by Internal Revenue Service (IRS) guidelines. According to the City Clerk, the Water Supervisor, Streets Supervisor, Animal Control Officer, and 2 Codes Enforcement Officers are assigned city-owned vehicles. These employees are not required to maintain a mileage log indicating business and personal use of the vehicle.

IRS reporting guidelines indicate personal commuting mileage is a reportable fringe benefit. Furthermore, IRS guidelines require the full value of the provided vehicle be reported in employee W-2 forms if the employer does not require submission of detailed logs that distinguish between business and personal use. Additionally, the city may be subject to penalties and/or fines for failure to report all taxable benefits.

6.2 Additional compensation

The city paid approximately $12,200 in perfect attendance payments, which violates the Missouri Constitution, for the year ended December 31, 2012. As part of the perfect attendance program employees could receive an extra week of pay at the end of the year if they did not use any sick leave during the calendar year. While such payments were implemented by the city to encourage and reward good work attendance, such payments pose legal questions because courts have held that attendance is part of normal job duties. Thus, providing such payments appears to represent additional compensation for services previously rendered. City officials terminated the program in January 2014 and made no perfect attendance payments for the 2013 calendar year after we discussed our concerns with them.

Additional compensation for services previously rendered is in violation of Article III, Section 39, Missouri Constitution, and Attorney General's Opinion No. 72, 1955 to Pray, which states, ". . . a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service had been rendered."

Recommendations

The Board of Aldermen:

6.1 Comply with IRS guidelines for reporting fringe benefits related to commuting in city-owned vehicles. In addition, the Board of Aldermen should ensure usage logs are required when vehicles are used for commuting.

6.2 Ensure all employee compensation is in compliance with state law.

Auditee's Response

The Board of Aldermen provided the following written responses:

6.1 During 2014 the city stopped allowing city-owned vehicles to be taken home. The city will determine the dollar amount of the commuting fringe benefit for the time that commuting was allowed during 2014 and follow IRS guidelines for reporting the fringe benefit.

6.2 The city no longer provides compensation for perfect attendance.

7. Sunshine Law Violations

The Board did not always comply with the Sunshine Law. Roll call votes to go into closed session were not recorded for 11 of 21 closed sessions reviewed during the audit. In addition, based on closed meeting minutes, some issues discussed in these meetings were not allowable under the Sunshine Law. For example, closed meeting minutes indicated the Board discussed the city budget, city financial issues, increases in fees and taxes, traffic control issues, and appointing a city Prosecuting Attorney.

Section 610.022, RSMo, requires roll call votes when closing a meeting, and Section 610.021, RSMo, limits discussions in closed meetings to only those specifically allowed by law.

Recommendation

The Board of Aldermen ensure roll call votes to close a session are documented in the open minutes. In addition, the Board of Aldermen should only discuss issues in closed session allowable by state law.

Auditee's Response

The Board of Aldermen provided the following written response:

The current Board of Aldermen is following strict procedural protocols in accordance with the state of Missouri's Sunshine Law. All members of the Board of Aldermen have been provided with Sunshine Law publications and the opportunity to attend a Sunshine Law seminar.

City of Pevely
Organization and Statistical Information

The City of Pevely is located in Jefferson County. The city was incorporated in 1953 and is currently a fourth class city. The city employed 42 full-time employees on December 31, 2012.

City operations include law enforcement services, utilities, and recreational facilities.

Mayor and Board of Aldermen

The city government consists of a mayor and six-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 4-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at December 31, 2012, are identified below. The Mayor is paid $275 per month and members of the Board of Aldermen are paid $75 per meeting. The compensation of these officials is established by ordinance.

John Knobloch, Mayor
Freddie Busch, Alderman
Marlin Hahn, Alderman
Steve Markus, Alderman
Dave Shelley, Alderman
Ed Ziegelmeyer, Alderman
Vacant*

* Alderman Carol Moore resigned his position in October 2012. The vacant position was not filled until February 2013.

Other Elected Official

The Municipal Judge at December 31, 2012, was Denis Huston. Because he was unable to fulfill his duties for personal reasons, Steven Davis was appointed Chief Administrative Judge in March 2013. During the year ended December 31, 2013, Judge Huston was paid $8,400 and Judge Davis was paid $5,500.

Financing Arrangements

The city issued $6.2 million in general obligation bonds in 2004 after creating a Neighborhood Improvement District for the Southern Heights subdivision. The bonds are to be paid from special assessment property taxes collected within the district. The bonds are scheduled to be paid off in 2025. The remaining principal outstanding at December 31, 2013, was $4.4 million. Interest remaining to be paid over the life of the bond issue totals $1.4 million.

The city issued $4.4 million in revenue bonds in 2007 for the construction and lease-purchase of city hall. The bonds are to be paid using the city's capital improvement sales tax. The bonds are scheduled to be paid off in 2032. The remaining principal outstanding at December 31, 2013, was $4 million. Interest remaining to be paid over the life of the bond issue totals $2.1 million.

In 2011, the city refinanced the remaining balance of $595,000 on revenue bonds issued in 2001 for the construction and lease-purchase of the wastewater treatment plant and issued $490,000 in new bonds. The bonds are to be paid from the Water and Sewer Fund. The remaining principal outstanding at December 31, 2013, was $615,000. Interest remaining to be paid over the life of the bond issue totals $33,150.

The city issued construction advances, not to exceed $912,500, to the developer of the Southern Heights subdivision for public infrastructure improvements. The advances are to be paid from water and sewer tap fees from the subdivision. The agreement expires on April 18, 2017. The remaining amount due the city at December 31, 2013, was $656,854.

A developer spent $55,000 to construct a sewage system lift station for a subdivision. The city agreed to reimburse the developer using special assessment revenues. The remaining amount owed by the city at December 31, 2013, was $54,691.

The city entered into a 10-year lease agreement in 2008 for $105,000 for city hall office furniture. The remaining principal outstanding at December 31, 2013, was $60,000. Interest remaining to be paid over the life of the agreement totals $8,550.

Thomas A. Schweich

Missouri State Auditor

Benton County Sewer District No.1

November 2014

Report No. 2014-101

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Benton County Sewer District No. 1

Background

The Benton County Sewer District No. 1 was formed in November 1994, and the voters authorized issuance of $2 million in revenue bonds for the construction of the sewer treatment plant and collection system. The district's financial condition began to decline as early as 2004. The district was also experiencing problems with collection of accounts receivable, increasing operational costs, and increasing maintenance and repair needs. In April 2013 the voters approved the dissolution of the district, and in July 2013 the district was ordered into receivership, which transferred all responsibilities, functions, duties, powers and authority of the district to a Department of Natural Resources (DNR) employee. On August 25, 2014, the court authorized the receiver to sell the district's assets and wind down the district's affairs. Following this sale, the district was dissolved. Since it ceased to be a political subdivision, we no longer had authority to audit the district and we terminated our audit but we provide some observations.

Observations

We noted a significant turnover of board members since 2010. The district filed inaccurate financial reports with regulatory agencies, did not ensure required annual audits were completed, and failed to file annual financial reports with the State Auditor's office. The district and the receiver both changed user rates without completing any financial or usage analysis or using the rate methodology available from the DNR. The district's accounts receivable listing may be inaccurate, and Board meeting minutes did not demonstrate compliance with the Sunshine Law. The Missouri Ethics Commission determined 2 board members had violated state law and also reviewed and dismissed 8 additional allegations. The district faced numerous legal battles and spent $55,727 for legal services during 2013 and 2012, and the DNR issued a notice of violation to the district citing non-compliance with the Missouri Clean Water Law, which resulted in a consent judgment against the district.

The overall performance of this entity was **Poor.***

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Trustees
Benton County Sewer District No. 1

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Benton County Sewer District No. 1. We initiated our audit of certain operations of the Benton County Sewer District No. 1 on July 21, 2014. The scope of our audit included but was not limited to year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties.

On April 1, 2013, the U.S. Department of Agriculture requested the United States District Court for the Western District of Missouri (Court) for an injunction prohibiting the district from dissolving. On April 2, 2013, the voters of the district approved the dissolution of the district under Section 67.955, RSMo. On July 2, 2013, the Court ordered the district into receivership, left the Board of Trustees intact, but removed its authority to act, and appointed a receiver to operate the district. On August 25, 2014, the Court ordered the sale of the district's collection system, treatment plant, and real and personal property and instructed the receiver to wind down the district's affairs. When the Court issued its order approving the sale, the district ceased to exist as a political subdivision pursuant to Section 67.955, RSMo, thereby revoking our authority to audit this district under Section 29.230, RSMo.

As a result of the work performed prior to termination of the audit, we made certain observations and identified certain concerns related to the district's internal controls, compliance with legal provisions and management practices and operations which are discussed in the observation section of our report.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was unaudited.

The accompanying Report presents our observations noted during the review of the Benton County Sewer District No. 1.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Natalie B. McNish, CGAP

Benton County Sewer District No. 1
State Auditor's Observations

Background

The Benton County Sewer District No. 1 (district) was formed by a vote of the people in November 1994, under Sections 204.250 through 204.470, RSMo. In November 1995, the voters authorized issuance of $2 million in revenue bonds for the construction of the sewer treatment plant and collection system. In April 1998, the district received a grant from the United States Department of Agriculture (USDA) totaling $913,000 for the construction of the facility, and in November 1998, the district received a loan from the USDA for $1,529,600, which was collateralized by a revenue bond issued for the same amount. The district also received a grant from the Department of Natural Resources (DNR) totaling $1,376,329 for the construction of this facility. Construction of the plant and collection system was completed in 1999.

As early as 2004, officials of the USDA and the district noted a declining financial condition, increasing problems in the collection of accounts receivables, increasing operational costs, as well as rapidly increasing costs for maintenance and repair of system components. In 2012, due to lack of sufficient operating revenue, the district began using its $90,000 debt service fund to meet debt obligations. The following table shows the decline of the district's available cash balances:

As of December 31,	Amount
2007	$ 173,562[1]
2008	159,542[1]
2009	119,064[1]
2010	112,427[2]
2011	112,964[2]
2012	86,369[2]

[1] Information obtained from district audited financial statements.
[2] Information obtained from district financial reports.

At July 10, 2013, when the receiver assumed responsibility of the district, the available cash balance had declined to $52,999.

The Board of Trustees (Board) attempted to address the declining financial condition by increasing the sewer rates by more than 300 percent between 2007 and 2013. Residential rates in 2007 were $35 per month. The rate was increased to $45 per month in April 2010, $54 per month in January 2011, $64 per month in July 2012, $101 per month in October 2012, and $116 in February 2013. Commercial rates experienced similar increases. The Board also changed late fees and interest charges and how those charges were assessed many times during this span of time.

As rates increased, accounts receivable balances also increased. According to district financial records, accounts receivable balances were as follows:

As of December 31,	Amount
2007	$ 8,578[1]
2008	26,870[1]
2009	11,387[1]
2010	29,410[2]
2011	66,518[2]
2012	106,789[2]

[1] Information obtained from district audited financial statements.
[2] Information obtained from district accounts receivable aging reports.

At June 30, 2013, just prior to the district being placed into receivership, the accounts receivable balance had increased to $146,286.

Dissolution

District citizens filed a petition with sufficient signatures for placing a question on the April 2013 ballot to dissolve the district. On April 1, 2013, the United States District Court for the Western District of Missouri (Court) issued a temporary restraining order prohibiting the district from dissolving pending further court action. On April 2, 2013, the voters approved the dissolution of the district. On May 1, 2013, the Court issued a preliminary injunction prohibiting the dissolution of the district, citing concerns that the dissolution of the district may leave residents of Benton County without an adequate means of disposing of their sewage and residents of surrounding counties may be harmed by the dissolution without representation of their interests. On July 2, 2013, the Court ordered the district into receivership, thereby transferring all responsibilities, functions, duties, powers and authority of the district to a DNR employee as receiver. The receiver's purpose was to operate the facility as required by the order and the consent agreement until a sale of the district assets could be negotiated and approved by the courts. On August 25, 2014, the Court authorized the receiver to sell the district's collection system, treatment plant, and real and personal property assets to a private utility and to wind down the district's affairs. According to the asset purchase agreement, the private utility company will pay $750,000 for the system and acquired assets. This amount will be paid to the USDA in satisfaction of the related debt of over $1.2 million. The sale did not include district monies collected up to the time the sale is finalized or any past due accounts receivable. Those funds will be used by the receiver to operate the system until the private utility company assumes control. The private utility company has made application to the Missouri Public Service Commission for authority to operate the sewer system.

Following the Court's order for sale of the district, the district was dissolved as a political subdivision pursuant to the election of April 2, 2013, and Section 67.955, RSMo.

Receivership

The receiver provided our auditors several financial and court required reports covering the district's activities from July 10, 2013, through June 30, 2014. During that period, collections totaled approximately $306,000, the receiver used $72,295 from the depreciation and reserve funds, and disbursements totaled approximately $387,000. As of June 30, 2014, the district's available cash balance had declined to $17,725, and the district's accounts receivable balance had increased to $242,577. The receiver retained the services of an attorney to pursue collections against many of the customer accounts with larger overdue balances. The receiver is required to continue efforts to collect the accounts receivable balances and keep the system operating until the private utility is approved by the Public Service Commission to operate the collection and treatment system. The DNR also provided administrative services to the receivership including accounting services for the district's financial activity and supervision of the receiver's activities.

Observations

During our review of documentation obtained and interviews completed, we made the following observations.

Board membership

We noted a significant turnover of board members particularly since 2010. Twelve different members served on the Board from January 2012 through July 2, 2013. This turnover resulted in members having little or no experience making important decisions on the operations of the district and contributed to the inability of the Board to take positive actions to address the financial and operational problems of the district.

We also noted some board members were elected, some board members were appointed by the Benton County Commission, and some board members were appointed by the remaining members of the Board.

When a vacancy is created by resignation or end of term, Chapter 204, RSMo, requires the district Board to notify the County Commission of the vacancy and allow the County Commission 60 days from the notification to appoint a new member. If the County Commission does not appoint a new member, the Board may appoint the replacement to fill the vacancy. There is no provision for election of the members of the Board.

We noted one member, elected in April 2013, was improperly denied his seat by the Board and the Board then appointed the citizen who had lost the election to serve on the Board.

Financial reports, audits, and budgets

The district filed inaccurate financial reports with regulatory agencies and budgetary information and management reports used by the Board were inaccurate, incomplete, or failed to comply with statutory provisions. District budgets did not comply with Section 67.010 to 67.040, RSMo. Budgets did not include a budget message or budget summary, actual beginning and ending or estimated ending fund balances, or a schedule of indebtedness. In addition, actual receipts and disbursements reported did not agree to information pulled from the district's accounting software, cash balances reported could not be traced to either the bank balances or the reconciled bank balances for the same accounting period, and budgets included accrual estimates for items such as depreciation expense, which do not affect cash position. In addition, no audit of the district has been completed since the year ended 2009 and no financial transactions report has been filed with the State Auditor's office for 2009, 2010, 2011, or 2013.

Sections 67.010 to 67.040, RSMo, provide specific items required for budgets of all political subdivisions. Section 250.150(3), RSMo, requires the district to be audited at least once a year and an annual audit is required by the district's revenue bond covenants and USDA loan requirements. Section 105.145, RSMo, requires all political subdivisions to file annual reports of financial transactions with the State Auditor's office.

Rate analysis and changes

The district and the receiver both changed user rates without completing any documented financial or usage analysis, or utilizing the rate methodology available from the DNR. The only documented rate analysis found was completed in July 2012 by a third party; however, source financial information provided by the district for that analysis was inaccurate and therefore, the suggested rates developed from the study were likely inaccurate as well. The Board was unable to provide any other documented review of rates. Between July 2010, and July 2013, the Board increased residential user rates five times from $35 per month to $116 per month. After the receivership was established, the receiver lowered the residential user rate to $80 per month as of August 2013. Similar changes were noted for commercial user rates.

Also, a comparison of Board actions to changes in customer account billings found some discrepancies in the application and timing of rate changes and late charges. For example, a Board resolution indicating a rate increase should have been effective August 2012 was not applied to customer accounts until October 2012. Also, we found no Board vote, resolution or ordinance to support the rate of $45 charged between April and December 2010.

Section 204.440, RSMo, requires charges to be fixed at a rate sufficient for the operations and maintenance of the system and the payment of related debt.

Accounts receivable

Amounts identified on the district's accounts receivable listing may be inaccurate. Numerous changes in rates, late fees, and the inconsistency in which these items were applied to user accounts, as discussed above, contributed to this observation. In addition, the Board occasionally negotiated the amounts due without maintaining appropriate documentation to support changes to account balances. Due to these issues, it is unclear whether the account balances in the financial system for some customers are accurate.

Section 204.455(1), RSMo, requires the district to charge interest on any account becoming delinquent and provides authority to place a lien upon the land charged.

Conflicts of interest

We identified the appearance of conflicts of interest while completing a review of minutes. Board member, Ted Seek, voted in favor of the district accepting a legal settlement agreement for improper warranty claims he had submitted. During part of the time frame in which these claims were submitted, Mr. Seek also served as the Sewer District Superintendent. The district had retained Mr. Seek's son to make repairs including repairs under warranty to the system and Mr. Seek on occasion assisted his son in completing the warranty work. Mr. Seek submitted the warranty claims. In addition, he was reimbursed approximately $2,700 for mileage and stolen tools during the 2 years ended December 31, 2013. However, he failed to abstain from the vote approving the reimbursement. Mr. Seek also entered a closed session meeting with other board members to discuss his son's sewer account. While the minutes document he left the closed session prior to participating in the vote to waive fees on his son's account, the minutes show he read a letter prior to leaving the room requesting waiver of fees in exchange for work his son previously performed for the district.

We also noted another board member, George Hall, served as the Sewer District Superintendent for several months. The Missouri Ethics Commission investigated these 2 board members and determined they had violated state law because the district had not solicited bids for sewer superintendent services and each board member had received more than $500 per month while serving as Sewer District Superintendent.

Board members serve in a fiduciary capacity. Personal interests in business matters of the district could create the appearance of conflicts of interest. Sections 105.454 and 105.458, RSMo, prohibit financial transactions between the district and elected or appointed officials that involve more than $500 per month or $5,000 per year unless there has been public notice to solicit proposals and competitive bidding, provided the bid or offer accepted is the lowest received.

Ethics investigations

Between July 2011 and December 2013, the Missouri Ethics Commission reviewed and dismissed 8 additional allegations of conflict of interest, nepotism, or campaign finance improprieties involving 6 board members.

Meeting minutes

Board meeting minutes did not document compliance with the Sunshine Law and were not signed by the preparer or any member of the Board to attest to accuracy. During our review of meeting minutes for the 2 years ended December 31, 2013, numerous unallowable discussions were documented in closed meeting minutes including changes to late fees; opening and approving bids for pump repair, plant operator, and billing services; discontinuance of accepting cash payments; hiring legal counsel; and adjustments to specific customer accounts.

In addition, open meeting minutes were not maintained for meetings when a closed meeting was the only agenda item. Open meeting minutes did not always record a roll call vote of the Board to enter into the closed meeting. Votes taken while in closed meetings were not always recorded as roll call votes. Further, closed meeting minutes did not document discussion of some specific reasons for closing a meeting documented in open meeting minutes, and some allowable discussion documented in closed meeting minutes was not cited as specific reasons for closing the meeting in open meeting minutes. Also, some minutes did not document at least three votes for the passage of a motion.

The Sunshine Law, Chapter 610, RSMo, requires minutes be kept for all open and closed meetings, and that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session by roll call vote and documented in the open session minutes.

Legal costs

The district faced numerous legal battles in 2011, 2012, and 2013, including customer debts, employment issues, warranty issues, and environmental non-compliance. Costs incurred for legal representation and filing of liens during the 2 years ended December 31, 2013, totaled $55,727. Examples of some litigation faced by the district are summarized below.

Vendor settlement agreement

In late 2010, the district's pump vendor claimed the district owed it more than $80,000 for the district's pro rata share of pumps and parts provided for warranty claims. Other issues regarding the validity of warranty claims were later brought to the attention of the district. In response to these claims, the district asked the Benton County Sheriff to investigate improprieties in the warranty repair claim process. This investigation was turned over to the Federal Bureau of Investigations (FBI) in early 2011. The FBI provided information to the Benton County Prosecuting Attorney's office. No civil or criminal charges were filed as a result of these investigations. In June 2011, following negotiation with the district, the vendor agreed to lower the

amount due to $78,603; however, the Board voted in December 2011 to not negotiate any settlement with the vendor and wait for the vendor to file legal action against the district. The Board reviewed the issue again in 2012 and negotiated a settlement agreement with the vendor on August 13, 2012, for $76,864.

Notice of violation

On February 29, 2012, the DNR issued a notice of violation to the district citing non-compliance with the Missouri Clean Water Law. The district hired a wastewater services company to address the areas of non-compliance in March 2012, and the company started work immediately. On May 4, 2012, the company terminated the agreement with the district, citing lack of support from the Board to complete necessary repairs and maintenance required. Repairs and maintenance completed by this company cost the district $9,611, and minutes documented an estimated $52,000 in additional repairs were still needed. The district was unable to get the system into compliance within the given timeframe. The Benton County Circuit Court issued a consent judgment against the district citing violation of the Missouri Clean Water Law on October 3, 2012. This consent judgment included an extensive list of corrective actions for the district to complete within specific timeframes and stipulated monetary penalties if the district failed to comply with these deadlines or requirements.

Audit Termination

A petition for audit was submitted to our office containing 109 valid signatures, 4 more than the 105 needed to obtain a petition audit. The petition with signatures was certified in February 2014, and auditors began work in July 2014. During July and August 2014, auditors collected preliminary information from the petitioners, district offices, and various outside sources including the DNR and the Attorney General's office, regarding the formation, construction, operations, financing, and pending dissolution of the district. Following the Court's order for sale of the district, the district was dissolved as a political subdivision pursuant to the election of April 2, 2013, and Section 67.955, RSMo. This action revoked our authority to audit this district since Section 29.230, RSMo, only provides us the authority to audit a political subdivision. The preceding observations are provided for information only.

Benton County Sewer District No. 1
Organization and Statistical Information

The Benton County Sewer District No. 1 was a common sewer district organized and governed under Section 204.250 through Section 204.470, RSMo. The district was located in Warsaw, Missouri. The district began operating in 1999, was placed into receivership in 2013, and most assets will be sold to a private entity in 2014. The district served approximately 350 customers.

Board of Trustees and Personnel

The five-member Board acted as the policy and decision making body for the district's operations until July 2, 2013, at which point the Board remained intact but ongoing operations of the district were assigned to a court-appointed receiver. Board members were not compensated. The Treasurer's salary was set by the Board. Members of the Board and personnel at December 31, 2013, were:

Ted Seek, President
Gerald Duvall, Vice President
Joe Gualco, Director
Bob Vedder, Director
Ida Cold, Director

Rodney Meyer, Treasurer

Receivership

The United States District Court for the Western District of Missouri placed the district into receivership and named Scott Totten, an employee of the Department of Natural Resources, as the receiver on July 2, 2013. Under this order, all responsibilities, functions, duties, powers and authority of the district Board were transferred to the receiver.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, Missouri Real Estate Commission

Background	The Missouri Real Estate Commission was established in 1941. The Commission is responsible for the examination, licensing, and regulation of persons and firms who engage in real estate business in the state of Missouri. At June 30, 2014, there were 39,568 licensed real estate brokers, salespersons, and brokerage firms. The Commission consists of seven voting members, six with at least 10 years of experience as real estate brokers and one voting public member. Commission members are appointed by the Governor with the advice and consent of the Senate and serve a term of 5 years.
Findings	The audit identified no significant deficiencies in internal controls, no significant noncompliance with legal provisions, and no significant deficiencies in management practices and procedures. No findings resulted from our audit.

In the areas audited, the overall performance of this entity was **Excellent**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John M. Huff, Director
Department of Insurance, Financial Institutions, and Professional Registration
and
Jane A. Rackers, Director
Division of Professional Registration
and
Missouri Real Estate Commission
Jefferson City, Missouri

We have audited certain operations of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, Missouri Real Estate Commission, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2014 and 2013. The objectives of our audit were to:

1. Evaluate the commission's internal controls over significant management and financial functions.

2. Evaluate the commission's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the commission, and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards

require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the commission's management and was not subjected to the procedures applied in our audit of the commission.

For the areas audited, we identified (1) no significant deficiencies in internal control, (2) no significant noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. No findings resulted from our audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, Missouri Real Estate Commission.

In-Charge Auditor:	Joyce Thomson
Audit Staff:	Nicholas Schafer, MBA

Division of Professional Registration
Missouri Real Estate Commission
Organization and Statistical Information

The Missouri Real Estate Commission was established in 1941 by an act of the 61st Missouri General Assembly. The Omnibus State Reorganization Act of 1974 transferred the Commission to the Division of Professional Registration. By Executive Order 06-04, the division moved from the Department of Economic Development to the reorganized Department of Insurance, Financial Institutions, and Professional Registration on August 28, 2006.

The Commission is responsible for the examination, licensing, and regulation of persons and firms who engage in real estate business in the state of Missouri. At June 30, 2014, there were 40,123 licensed real estate brokers, salespersons, and brokerage firms. New issuance license fees for brokers, salespersons, and brokerage firms were $80, $40, and $80, respectively, while biennial license renewal fees were $50, $40, and $50, respectively.

The Commission consists of seven voting members, with six members having at least 10 years of experience as real estate brokers and one voting public member. Commission members are appointed by the Governor with the advice and consent of the Senate and serve a term of 5 years. Members whose terms expire may continue to serve until a replacement is appointed. The Commission members at June 30, 2014, were:

Member	Term Expires
Sharon Keating, Chairperson	October 16, 2012
Charles Misko, Vice Chairperson	October 16, 2012
Doris Carlin, Member	October 16, 2010
Charles Davis Member	October 16, 2010
Twila Hillme, Member	October 16, 2011
Stephen Kenny, Member	October 16, 2013
Rosemary Vitale, Member	October 16, 2010

Commission members receive a $75 per diem compensation and expenses while performing their duties. The Commission appoints an executive director to perform the administrative duties of the Commission. Janet Carder serves as Executive Director. Eighteen other employees perform administrative duties and responsibilities.

Thomas A. Schweich

Missouri State Auditor

Lewis County

November 2014

Report No. 2014-103

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Lewis County

Sheriff Controls and Procedures	The Sheriff has not adequately segregated accounting duties for the fee account and does not perform adequate supervisory reviews. The Office Administrator is primarily responsible for accounting duties in the Sheriff's office, and the Sheriff does not document his occasional reviews of accounting records. The Office Administrator does not timely issue receipt slips for some monies received and does not always deposit receipts intact and timely. Deputies and jailers typically collect bond monies and transmit these monies to the Office Administrator for processing, but bond forms are not prenumbered, copies of bond forms are not always retained, receipt slips are not issued when these monies are received, and there is no documentation to support the transmittal to the Office Administrator.
Commissary Controls and Procedures	As noted in our previous audit, the Sheriff's office personnel do not prepare a monthly list of liabilities and do not maintain a record of commissary profits. At our request, the Office Administrator prepared a list of liabilities for the commissary account. The bank balance was $6,059 more than the list of liabilities, but there is no documentation to confirm this overage is commissary profits. The Sheriff does not submit commissary profits to the county treasury, as required by state law and, during 2013, spent $3,649 to purchase prison supplies, building repairs, and inmate medical services. The Sheriff's office also spent $11,782 during 2013 to purchase various items and telephone cards to sell in the commissary but did not maintain a running inventory of commissary items and telephone cards or conduct periodic physical inventory counts, so loss, theft or misuse could go undetected.
Public Administrator Controls and Procedures	Of the 35 cases requiring annual settlements to be filed with the court in 2013, the Public Administrator filed all 35 late, including 4 which had not been filed at all as of July 1, 2014. The Associate Circuit Court, Probate Division did not notify the Public Administrator of annual settlement requirements 40 days before the due date as required by law, and in some cases did not notify the Public Administrator until several months after the due date. The Public Administrator does not include real property as an asset on annual settlements, so the annual settlements are incomplete, does not file supporting documentation such as invoices with the Associate Circuit Court, Probate Division, and does not obtain adequate supporting documentation for some disbursements from ward bank accounts.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney does not adequately segregate accounting duties or perform and document adequate supervisory reviews of accounting records. The Prosecuting Attorney's secretary does not prepare bank reconciliations and lists of liabilities on a monthly basis. At our request, a bank reconciliation and a list of liabilities was prepared at March 31, 2014, and the bank balance exceeded the liabilities by $181. The Prosecuting Attorney does not adequately track, monitor, and collect court-ordered restitution. Certain cases are dismissed if defendants make a donation to the Law Enforcement Restitution Fund, but there is no authority under state law to require such a donation in exchange for dismissing charges.

County Sales Tax	State law requires the county to reduce property taxes for a percentage of sales tax collected. Lewis County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected, but the County Clerk has not adequately considered the excess tax collection from prior years when calculating the current year's rollback, and, at December 31, 2013, the reductions were not sufficient to offset 50 percent of sales tax monies by approximately $47,000.
County Procedures	The county lacks effective monitoring procedures for vehicle and equipment fuel use by the road and bridge department and Sheriff's office. The Sheriff does not have adequate procedures for reviewing invoices and does not submit sufficient supporting documentation to the County Clerk's office. The county paid a software vendor $8,010 between March and December 2012 to develop a property tax system, but the county did not solicit bids for this purchase and County Commission meeting minutes did not document discussions about the need for the purchase or the estimated cost. In addition, the county did not enter into a formal written agreement with this vendor.
Sunshine Law	The county has not adopted a policy regarding public access to county records, as required by the Sunshine Law.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 19

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Lewis County

We have audited certain operations of Lewis County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Lewis County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

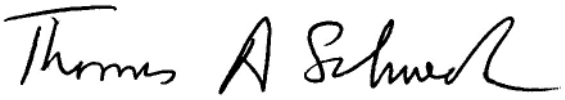
Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Lewis County.

An additional report, No. 2014-104, *Lewis County Collector and Property Tax System*, was issued in November 2014.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Jeannette Eaves, CPA
In-Charge Auditor:	Heather R. Stiles, MBA, CPA, CFE
Audit Staff:	Gina Henley, MBA
	Christopher A. McClain

1. Sheriff Controls and Procedures

Controls and procedures in the Sheriff's office need improvement.

During the year ended December 31, 2013, the Sheriff's office deposited approximately $200,000 for civil and criminal process fees, prisoner board billings, concealed carry weapon permits, bonds, and other miscellaneous receipts into the Sheriff's fee account.

1.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties for the fee account, and does not perform adequate supervisory reviews. The Office Administrator is primarily responsible for accounting duties in the Sheriff's office, including recording transactions, making deposits, disbursing funds, and preparing month-end reports and reconciling the fee account. Additionally, the Office Administrator is an approved signer on the Sheriff's fee account and only one signature is required.

The Sheriff does not document his occasional review of bank reconciliations or other accounting records. In addition, there is not adequate oversight of receipting, depositing, or disbursement procedures to ensure monies are properly and timely recorded, deposited, and disbursed.

To reduce the risk of loss, theft, or misuse of funds, proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement an adequate independent or supervisory review of bank and accounting records.

1.2 Receipting and depositing

Controls and procedures over receipting and depositing monies are not sufficient. As a result, there is less assurance monies received are deposited.

The Office Administrator does not issue receipt slips timely for some monies received, and does not always deposit receipts intact and timely. For example, 8 checks received for civil paper service fees dated between June 27, 2013, and March 17, 2014, totaling $344 were not recorded or deposited as of March 19, 2014. The Office Administrator does not issue receipt slips for monies received until the monies are included in a deposit. In addition, monies received for civil paper service fees are not recorded or deposited until the civil paper process is completed.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds going undetected, prompt receipting and recording of payments received and depositing intact and timely are necessary.

1.3 Bonds

Controls and procedures for receipting and recording bond monies are not sufficient.

Deputies and jailers typically collect bond monies and transmit these monies to the Office Administrator for processing. However, bond forms are not prenumbered, copies of bond forms are not always retained, and receipt slips are not issued when these monies are received. In addition, there is no documentation to support the transmittal to the Office Administrator.

To reduce the risk of loss, theft, or misuse of bond monies, and provide assurance bond monies are accounted for properly, procedures to account for bond forms and transmittal of bonds to the Office Administrator should be established.

Recommendations

The Sheriff:

1.1 Adequately segregate accounting duties or ensure independent or supervisory reviews of accounting records are performed and documented.

1.2 Issue receipt slips for all monies when received and ensure deposits are made timely and include all monies on hand at the time a deposit is prepared.

1.3 Issue prenumbered bond forms for all bond monies received and account for the numerical sequence of bond forms. The Sheriff should also ensure the transmittal of bond monies between staff is documented.

Auditee's Response

The Sheriff provided the following written responses:

1.1 The Office Administrator must oversee all bank reconciliations, accounting records, billing, payroll, civil process, sex offender registration, scheduling, dispatching and many other responsibilities. Therefore, the Sheriff's office cannot achieve what the audit team recommends at this time due to limited staff and budgetary concerns. As the Sheriff, I have face-to-face contact with the Office Administrator and regularly review the office budget and funds. I receive a monthly disbursement sheet from the Office Administrator and monthly reports from the County Clerk and County Treasurer. Since I cannot hire additional staff to create a separate independent review, I will continue to serve as the substitute office manager when other staff members are not able to work.

1.2 The Office Administrator has accounted for all monies that have been sent for the service of civil process through a QuickBooks program. The Sheriff's office has served as many as 1,500 papers in a twelve month period. In order to simplify billing, the person or

entity requesting service is not billed until the document is finally served. Therefore, there are not two separate bills for the service fee and mileage fee. The Office Administrator will continue to create an invoice and will show a prepayment in the QuickBooks system at the time the civil document is received. Special priority will be placed on any document service where prepayment has been made and service will be completed within one week instead of the current priority status of thirty days.

Sheriff's office personnel will be encouraged to receipt and deposit monies as soon as possible after receipt.

1.3 I disagree that the controls and procedures for receipting and recording bond monies are not sufficient. During my fourteen year tenure, I am proud to say the jail staff and Office Administrator have never lost a bond. There are several natural control points in place that deter loss and/or theft. When the defendant posts bond, he/she signs a three page bond form that is also signed by the jailer. If a family member or third party is involved they also sign the bond form. A copy of the bond form is given to the defendant and placed in the defendant's jail file. The form also includes the amount of bond received and the next scheduled court appearance. Upon release, the jailer also documents the type of release and the amount of the bond received in the jail management computer system. The money and form are then received by the Office Administrator who then documents the bond in a separate receipt book. The money is deposited and a check and bond form are given to the appropriate court.

I will contact the software vendor to determine if the jail management system can generate a listing of all bonds posted.

As Sheriff, I will ensure all of the above protocols will continue to be followed and that extra care will be placed on the jail staff to properly document the type of release.

2. Commissary Controls and Procedures

Controls and procedures over the commissary items and telephone cards need improvement. During the year ended December 31, 2013, the Sheriff's office received approximately $18,700 from inmates for commissary operations.

2.1 Commissary account

As noted in our previous audit report, improvement is needed in the Sheriff's handling of the commissary. Reconciliation procedures for the commissary account are not adequate and commissary profits are not remitted to the county treasury.

Liabilities

Sheriff's office personnel do not prepare a monthly list of liabilities to reconcile to the available cash balance for the Sheriff's commissary account. Records of commissary profits are not maintained, making it difficult to determine the actual amount of profits maintained in the account.

We requested the Office Administrator prepare a list of liabilities for the Sheriff's commissary account as of December 31, 2013. The list of liabilities totaled $178 while the reconciled bank balance was $6,237, resulting in an overage of $6,059; however, there is no documentation to confirm the remaining $6,059 is commissary profits.

Without a record of commissary profits, the Sheriff cannot reconcile liabilities to cash balances to detect possible errors. Monthly reconciliations of liabilities and individual inmate accounts to the reconciled bank balance are necessary to ensure the bank account is in agreement with accounting records and to detect and correct errors timely.

Commissary profits

The Sheriff maintains amounts assumed to be profits from commissary sales outside the county treasury and uses these monies to purchase items for the benefit of prisoners and the Sheriff's office.

During 2013, the Sheriff used commissary monies totaling $3,649 to purchase prison supplies, building repairs, and inmate medical services. The County Commission did not approve these purchases, and the Sheriff's office did not handle these purchases through the normal county procurement and budget process. Profits from the sale of commissary items represent accountable fees and should be turned over to the County Treasurer. There is no statutory authority for the Sheriff to make disbursements from accountable fees.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

2.2 Commissary items and telephone cards

Sheriff's office commissary procedures need improvement. During the year ended December 31, 2013, the Sheriff's office spent approximately $11,782 from the commissary account for various items and telephone cards to sell in the commissary. However, the Sheriff's office does not maintain a running inventory of commissary items and telephone cards or conduct periodic physical inventory counts. As a result, records and procedures are not sufficient to account for these items or monies collected, and loss, theft, or misuse may go undetected.

To ensure commissary items and monies are accounted for properly, a detailed inventory ledger is necessary, along with the implementation of periodic physical count and reconciliation procedures.

Recommendations

The Sheriff:

2.1 Prepare a monthly list of liabilities for the commissary account, compare it to the available cash balance, and promptly investigate and resolve differences. In addition, maintain complete and accurate records that allow for the tracking of profit and loss on all commissary sales. The Sheriff should work with the County Commission and County Treasurer to establish the Inmate Prisoner Detainee Security Fund and ensure existing and future commissary profits are deposited to this fund.

2.2 Maintain inventory records of commissary items and telephone cards and reconcile the records to purchases, sales, and periodic physical inventory counts.

Auditee's Response

The Sheriff provided the following written responses:

2.1 I am proud of the jail staff for successfully completing hundreds of transactions over the past several years. It is clear that the Sheriff's office is not missing any commissary funds. This commissary fund currently has approximately $6,000 in profit in the account, which has been maintained by the Sheriff's office. All commissary items are logged through a computer system or written log. This fund can only be used for inmate purposes. This fund has been used to pay for jail toilets, jail sinks, jail supplies, jail mattresses, jail uniforms, etc. This has saved the taxpayer several thousands of dollars since the commissary fund was created.

As Sheriff, it is my responsibility to be aware of any changes in laws affecting the office and duties of the office of Sheriff, and I did not know the inmate commissary law went into effect on August 28, 2013. I will work with the other elected officeholders to create the Inmate Prisoner Detainee Security Fund beginning January 2015. This should resolve the majority of concerns of the audit team. Commissary profits will be turned over to the County Treasurer for deposit to the Inmate Prisoner Detainee Security Fund. Beginning in 2015, we will reconcile inmate monies and commissary profits to the cash balance monthly.

2.2 We will maintain an inventory list of telephone cards and items received from our commissary vendor and will reconcile to physical counts periodically.

3. Public Administrator Controls and Procedures

Public Administrator controls and procedures need improvement. The Public Administrator acts as the court appointed personal representative for wards or decedent estates of the Associate Circuit Court, Probate Division, and was responsible for the financial activity of approximately 43 wards or estates during the year ended December 31, 2013.

3.1 Annual settlements

The Public Administrator has not timely filed complete and accurate annual settlements in compliance with state law. In addition, the Associate Circuit Court, Probate Division does not timely notify the Public Administrator prior to the deadline for the annual settlement or follow up on annual settlements not filed by the required date.

For each ward or estate the Public Administrator is the personal representative, the Public Administrator is required to file an annual settlement with the Associate Circuit Court, Probate Division on the anniversary date of the date of letters, which reflects a detailed list of assets held, as well as financial activity for the previous year. Of the 43 cases, 35 required the filing of annual settlements with the court during 2013. We reviewed these settlements and determined the Public Administrator filed all 35 of them late. For 4 cases, the Public Administrator filed the settlement within 30 days of the date due. However, for 19 cases, he filed the settlements approximately 1 to 5 months late and for 8 cases, he filed the settlements more than 5 months late. As of July 1, 2014, settlements for 2013 had not been filed for 4 of these 35 cases.

The Public Administrator does not list real property as an asset on annual settlements, and therefore, the annual settlements do not provide a complete listing of all assets. The Public Administrator indicated he records real property in inventory records when obtained; however, he does not include real property on the annual settlement until the sale of the property.

Additionally, the Associate Circuit Court, Probate Division did not notify the Public Administrator of the annual settlement requirement 40 days before the settlement due date for any of the cases requiring filing of an annual settlement during the year ended December 31, 2013. In some cases, the Public Administrator received notification approximately 2 to 4 weeks before the due date; however, in other cases, the notification occurred several months after the due date.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. In addition, Section 473.557, RSMo, requires the clerk of the court to notify the conservator or guardian (Public Administrator) of the deadline for the annual settlement. Timely and accurate settlements are necessary for the

court to properly oversee the administration of cases and reduce the possibility that errors or misuse of funds will go undetected.

3.2 Supporting documentation

The Associate Circuit Court, Probate Division does not perform sufficient reviews of the activity of cases assigned to the Public Administrator. The court reviews annual settlements submitted, but the review of disbursements is limited to verifying the accuracy of amounts reported by reviewing canceled checks. The Public Administrator did not file supporting documentation such as invoices with the Associate Circuit Court, Probate Division when filing annual settlements.

Without such documentation, it is difficult for the court to assess the validity and reasonableness of costs charged to and paid by wards of the Public Administrator. The court should consider requiring such supporting documentation to be filed along with annual settlements.

3.3 Disbursements

The Public Administrator does not obtain adequate supporting documentation for some disbursements from ward bank accounts.

Adequate supporting documentation was not available for the following disbursements from the various wards bank accounts during 2013:

- Checks totaling $5,751 (approximately $500 per month) were issued to a ward as a personal spending allowance; however, documentation to support these allowances was not sufficient and the ward did not sign a receipt indicating monies had been received from the Public Administrator.

- A check totaling $560 was issued to a mail order company for clothing. The Public Administrator had no documentation to support this expense.

To ensure payments are valid and proper, the Public Administrator should maintain adequate supporting documentation for disbursements.

Recommendations

3.1 The Public Administrator ensure complete and accurate annual settlements are filed timely. In addition, the Associate Circuit Court, Probate Division should notify the Public Administrator of annual settlement deadlines timely and follow up on settlements not filed by the required date.

3.2 The Associate Circuit Judge establish procedures to adequately monitor the activity of all cases assigned to the Public Administrator, and require adequate supporting documentation to be filed with the court.

3.3 The Public Administrator ensure disbursements are supported by adequate documentation.

Auditee's Response

The Public Administrator provided the following responses:

3.1 I do not believe real estate is required to be included on annual settlements; however, I understand the auditor's recommendation and will begin including real estate on annual settlements. I understand some of the settlements were not filed timely and will establish procedures to ensure they are filed more timely in the future.

3.3 I will continue to keep records for all disbursements. The missing receipt noted was an isolated payment. I will either obtain endorsed checks for personal spending or implement other procedures to document the ward's receipt of these personal spending monies.

The Associate Circuit Judge provided the following written responses:

3.1 The Court will provide timely notices to the Public Administrator according to the law. The Court will require the Public Administrator list a total value for real estate held as per the inventory and last preceding settlement.

3.2 The Court has and will continue to require canceled check vouchers for expenditures. In addition, the Court will require supporting documentation when appropriate as determined by the Judge and the Probate Division Clerk.

4. Prosecuting Attorney Controls and Procedures

Prosecuting Attorney's office accounting controls and procedures are not sufficient and do not provide assurance that monies collected are accounted for properly. The Prosecuting Attorney's office processed approximately $58,000 in bad check and court-ordered restitution during the year ended December 31, 2013.

4.1 Segregation of duties

The Prosecuting Attorney does not adequately segregate accounting duties or perform and document adequate supervisory reviews of accounting records. The Prosecuting Attorney's secretary is responsible for all accounting duties, including recording transactions, making deposits, disbursing funds, and preparing month-end bank reconciliations for the fee account. The Prosecuting Attorney indicated he reviews monthly bank reconciliations; however, our review of the reconciliations indicated this review is not documented.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of

duties cannot be achieved, periodic supervisory reviews of accounting records should be performed and documented by the Prosecuting Attorney.

4.2 Bank reconciliations and liabilities

The Prosecuting Attorney's secretary does not prepare bank reconciliations on a monthly basis. As of March 31, 2014, the secretary had not prepared bank reconciliations for the fee account since August 2013. In addition, the secretary does not prepare monthly lists of liabilities, and therefore, liabilities are not reconciled to the cash balance in the fee account. Upon our request, the secretary prepared bank reconciliations through the month of March 2014, and prepared a list of liabilities at March 31, 2014. The reconciled bank balance of $3,653 at that date exceeded identified liabilities by $181.

Preparing monthly bank reconciliations is necessary to ensure accounting records are in balance and to identify errors timely. In addition, regular identification of liabilities and comparison to the reconciled cash balance is necessary to ensure bank and book records agree, and cash is sufficient to meet liabilities.

4.3 Tracking procedures

The Prosecuting Attorney has not established adequate procedures to properly track, monitor, and collect court-ordered restitution due from defendants. As of April 30, 2014, court-ordered restitution totaled approximately $278,000.

The secretary records restitution payments in the Prosecuting Attorney's accounting system; however, the system is not set up to alert the secretary when restitution payments are due or a defendant's probationary period is nearing completion. We reviewed 6 cases with court-ordered restitution due, and noted one case where no restitution payments had been made for approximately 9 months and the secretary did not follow up with the probation officer until after our audit began.

Adequate procedures for tracking court-ordered restitution are necessary to facilitate monitoring amounts due, provide information to the court, and improve accountability.

4.4 Deferred prosecution

The Prosecuting Attorney defers prosecution on certain non-traffic tickets by requiring defendants to make a donation (up to $300) to the county's Law Enforcement Restitution Fund. Once the agreed upon amount has been paid by the defendant to the Law Enforcement Restitution Fund, the Prosecuting Attorney dismisses the case. During the year ended December 31, 2013, the Prosecuting Attorney deferred prosecution on 29 cases and collected $6,550 in donations to the county's Law Enforcement Restitution Fund for these cases.

There is no authority for the Prosecuting Attorney to require a donation to dismiss charges filed on these tickets. Section 50.565, RSMo, provides for the deposit of certain assessments and payments into the county law enforcement restitution fund, however, this statute relates to a court ordering an assessment after a plea or finding of guilt.

Recommendations

The Prosecuting Attorney:

4.1 Adequately segregate accounting duties or ensure independent or supervisory reviews of accounting records are performed and documented.

4.2 Prepare formal bank reconciliations monthly and reconcile bank balances to monthly lists of liabilities ensuring any differences between accounting records and reconciliations are investigated and resolved. Additionally, after sufficient efforts are made to resolve discrepancies, any remaining unidentified monies should be disposed of in accordance with state law.

4.3 Develop procedures and records to adequately track court-ordered restitution.

4.4 Reevaluate the practice of requiring donations to the county Law Enforcement Restitution Fund to defer prosecution.

Auditee's Response

The Prosecuting Attorney provided the following responses:

4.1 It is not feasible to segregate accounting duties within the Prosecuting Attorney's office. Procedures will be developed to ensure a documented review of accounting records is performed by myself or the Assistant Prosecuting Attorney.

4.2 Bank reconciliations are being completed monthly by Prosecuting Attorney's secretary and a documented review is now being performed by myself. Additionally, a list of liabilities is being reconciled to reconciled bank balance monthly. We are working to identify the unidentified balance.

4.3 A report of court-ordered restitution is printed on a quarterly basis and reviewed by the secretary. We will contact the software vendor to assist with the development of a more efficient method to monitor court-ordered restitution due.

4.4 The practice of requiring a donation to the Law Enforcement Restitution Fund for deferred prosecution will be reevaluated. Consideration will be given to requiring this donation be made to

an allowable county fund that does not directly or indirectly benefit the Prosecuting Attorney's office.

5. County Sales Tax

Property tax reductions were not sufficient to offset 50 percent of sales tax monies received by approximately $47,000 at December 31, 2013, and property tax reduction amounts were not accurately calculated. The County Clerk has not adequately considered the excess tax collections from prior years when computing the current year's rollback. As a result, the county is noncompliant with state law and additional or increased property tax levy rollbacks will be required in future years to offset this liability.

The following table presents the cumulative liability resulting from the insufficient sales tax reductions.

		Year Ended December 31,			
For Sales Tax Reduction		2013	2012	2011	2010
Required property tax revenue reduction	$	136,281	139,093	146,642	137,648
Actual property tax revenue reduction		128,758	126,707	142,595	125,478
Amount not sufficiently reduced		7,523	12,386	4,047	12,170
Prior years insufficient reduction		39,534	27,148	23,101	10,931
Total insufficient property tax revenue reduction	$	47,057	39,534	27,148	23,101

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Lewis County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet a 50 percent reduction requirement and in the following year calculate any excess property taxes collected based upon actual sales tax collections.

Recommendation

The County Clerk should consider the prior year's excess property tax collections when computing the current year's rollback. In addition, the County Commission and County Clerk should develop a plan to correct for the accumulation of prior years' insufficient property tax levy reductions.

Auditee's Response

The County Commission and the County Clerk provided the following response:

We reduced the property tax levy for 2014 to rollback one-half of the tax surplus. We plan to reduce the property tax levy for 2015 to rollback the additional surplus if possible.

6. County Procedures

Controls and procedures over disbursements need improvement.

6.1 Fuel use

The county has not established effective monitoring procedures for vehicle and equipment fuel use by the road and bridge department and Sheriff's office. During the year ended December 31, 2013, fuel purchases totaled approximately $110,000 for the road and bridge department and approximately $29,000 for the Sheriff's office.

Logs of fuel dispensed from bulk fuel tanks are not maintained for road and bridge department vehicles and equipment. Additionally, mileage and fuel logs are not maintained for the road and bridge department or Sheriff's office vehicles and equipment.

Procedures for maintaining and reviewing fuel usage logs and reconciling the information to fuel purchased and related records are necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improper amounts, and decrease the risk of theft or misuse of fuel occurring without detection. Logs should provide sufficient details to enable the county to effectively monitor vehicle and equipment use and fuel costs.

6.2 Disbursements

The Sheriff does not have adequate procedures for reviewing invoices and does not submit sufficient supporting documentation to the County Clerk's office. The Sheriff's office submits the summary pages of monthly statements received from vendors to the County Clerk's office for payment. However, additional information regarding individual transactions is not submitted.

The Sheriff's Office Administrator reviews and approves disbursements made by the office. The Office Administrator indicated he obtains verbal approval from the Sheriff for any unusual purchases, but does not obtain documentation of the Sheriff's approval. Monthly fuel billing statements are forwarded to the Deputy Sheriff for review. The Deputy Sheriff indicated he reviews the fuel invoices and reconciles the invoices to a fuel report from the office's computer system, but does not document this reconciliation. Our review of a monthly billing statement from a convenience store indicated pizzas purchased for the DARE program had been incorrectly coded as a fuel purchase.

The County Clerk and County Commission rely on county officials and department heads to verify the accuracy and appropriateness of the amount billed. However, the County Clerk's office does not require the Sheriff to sign or initial invoices and attach applicable supporting documentation to invoices submitted for payment. Other county officials approve invoices and submit additional documentation to the County Clerk's office.

6.3 Bidding and written contracts

Between March 2012 and December 2012, the county paid a software vendor $8,010 for the development of a property tax system used by the County Clerk and County Collector to bill and collect property taxes. The county did not solicit bids for the purchase of the system. In addition, minutes prepared for County Commission meetings did not document discussions regarding the need to purchase a new property tax system or the estimated cost of a new system. According to the County Clerk, the software vendor indicated this program could be developed for less than $4,500, and therefore, the county did not solicit bids for the purchase. It is not clear how the county evaluated software vendors or why the county selected this vendor to develop the system. Additionally, the county did not enter into a formal written agreement with the vendor for the development or implementation of the system.

Section 50.660, RSMo, provides bidding requirements. Routine use of a competitive procurement process for major purchases ensures necessary services are obtained from the best-qualified vendor at a reasonable cost and all interested parties are given an equal opportunity to participate in county business.

Further, Section 432.070, RSMo, requires government contracts to be in writing. Written contracts, signed by the parties involved, should specify the services to be performed and the manner and amount of compensation to be paid, and are necessary to ensure parties are aware of their duties and responsibilities and to prevent misunderstandings. Proper monitoring and oversight of project costs are necessary to ensure all county funds are properly disbursed.

Recommendations

6.1 The County Commission require mileage and fuel use logs for all vehicles and equipment and review logs for reasonableness. In addition, maintain bulk fuel inventory records, and develop procedures to reconcile fuel use to fuel purchases, and investigate any significant differences identified.

6.2 The Sheriff review and approve all disbursements and submit adequate supporting documentation to the County Clerk's office. In addition, the County Clerk's office should ensure all disbursements have been properly reviewed and approved prior to payment.

6.3 The County Commission ensure a competitive procurement process is used for applicable purchases of goods or services in accordance with state law and adequate documentation is maintained to support the selection process. The County Commission should also enter into a written contract with the software vendor and ensure the amount charged agrees with the contracted amount.

Auditee's Response

The County Commission and County Clerk provided the following responses:

6.1 We will consider this recommendation. Bulk fuel tanks do not have meters and we are not sure if it would be cost effective to add meters to current tanks or to replace current tanks.

6.2 The Deputy County Clerk is transferring to the Sheriff's office as the Jail Administrator. She is familiar with disbursement requirements of the County Clerk's office, which should help with documentation issues.

6.3 The County Commission anticipated this purchase would be less than $4,500. The County Commission's practice is to solicit bids for all expenditures exceeding $4,500. The Commission will contact the software vendor and obtain clarification for amounts charged in 2015.

The Sheriff provided the following written responses:

6.1 Each deputy is required to log into the law enforcement computer system and report every fuel stop. The deputy is required to log where the fuel is being purchased, how much is being purchased and how many gallons are being purchased. Generally, fuel is the only thing to be purchased unless authorized by the Sheriff or his designee. $29,000 was spent on fuel last year which was $4,000 below what was authorized by the County Commission. The $150 for DARE pizzas was a transaction that was approved by the Sheriff due to a lack of pizzas for a DARE culmination in which local businesses and the Sheriff's office normally pay for pizzas for sixth grade students who have successfully completed the DARE curriculum. The purchase should have been coded differently but the Sheriff is allowed to make purchases as he sees fit.

6.2 The County Clerk does an excellent job of requiring supporting documentation for all requests for purchases made by Sheriff's staff. There have been many occasions that the County Clerk has asked for more documentation regarding all types of purchases. The Sheriff's office has always honored her request. Since the audit shows there have been no abuses, I do not believe the terminology used is appropriate. I agree to provide the itemized copies of the cell phone bills and fuel bills instead of just the primary invoice which come from the cell phone company and fuel vendors.

7. Sunshine Law

The county has not adopted a policy regarding public access to county records, as required by the Sunshine Law. A formal policy regarding access to county records establishes guidelines for the county to make the records available to the public. This policy should establish a contact person, an address to mail requests for access to records, and a fee schedule for document retrieval and research. Section 610.023, RSMo, lists requirements of making records available to the public and Section 610.026, RSMo, establishes the fees for copying public records.

Recommendation

The County Commission establish written policies and procedures regarding public access to county records.

Auditee's Response

The County Commission provided the following response:

We will develop a written policy and procedures to address public access to county records.

Lewis County
Organization and Statistical Information

Lewis County is a county-organized, third-class county. The county seat is Monticello.

Lewis County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 39 full-time employees and 13 part-time employees on December 31, 2013.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Wayne Murphy, Jr., Presiding Commissioner	$	31,470
John Campen, Associate Commissioner		29,410
Jesse Roberts, Associate Commissioner		29,410
Brenda Gunlock, Recorder of Deeds		44,561
Sharon Schlager, County Clerk		44,561
Jules V. (Jake) DeCoster, Prosecuting Attorney		52,785
David T. Parrish, Sheriff		49,260
Kim Porter, County Treasurer		44,171
Larry Arnold, County Coroner		12,882
Brett B. Bozarth, Public Administrator		44,561
Denise M. Goodwin, County Collector (1) (2), year ended February 28,	12,833	
Robert E. (Bob) Veatch, County Collector (1) (3), year ended February 28,	30,113	
Craig Myers, County Assessor, year ended August 31,		44,269
Carson W. Lay, County Surveyor (4)		

(1) Robert E. Veatch served as County Collector until October 28, 2013. Denise M. Goodwin was appointed the Lewis County Collector and sworn into office on December 23, 2013.
(2) Includes $4,063 of commissions earned for collecting drainage district taxes.
(3) Includes $406 of commissions earned for collecting drainage district taxes.
(4) Compensation on a fee basis.

Financing Arrangements

The county has entered into 3 lease-purchase agreements for road and bridge equipment (including a motor grader, tractor, and truck). Principal

and interest payments are made from the Special Road and Bridge Fund. The final payment for the lease-purchases is scheduled to occur in 2019. The remaining principal outstanding at December 31, 2013, was $212,776. Interest remaining to be paid over the life of the agreements totals $18,275.

Missouri State Auditor

Lewis County Collector and Property Tax System

November 2014

Report No. 2014-104

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Lewis County Collector and Property Tax System

Background	Section 52.150, RSMo, requires the State Auditor to audit the office of a County Collector after being notified of a vacancy in that office. A vacancy occurred in the office of the County Collector of Lewis County on October 28, 2013. A successor was appointed and sworn into office effective December 23, 2013. The scope of our audit included, but was not necessarily limited to, the 2 years ended February 28, 2014.
County Collector Controls and Procedures	Despite similar concerns noted in our 3 prior audits, significant weaknesses continued to exist throughout the former County Collector's time in office, and weaknesses continue to exist in the current County Collector's office. The County Collector's office does not always use the actual date of receipt when recording payments and does not account for the numerical sequence of receipt numbers. The County Collector lacks adequate procedures for receipting and depositing monies and does not reconcile receipts to deposits and disbursements, causing differences to go undetected and uncorrected. The County Collector does not deposit receipts intact, does not timely prepare bank reconciliations or lists of liabilities, lacks adequate procedures for the collection and recording of non-sufficient funds checks, and has not segregated accounting duties.
Property Tax System Controls and Procedures	As noted in our prior audit, the County Collector does not prepare timely annual settlements. The former County Collector did not prepare annual settlements for the year ended February 28, 2013, and the year ended February 29, 2012, and, as of August 1, 2014, the current County Collector had not finalized the annual settlement for the year ended February 28, 2014. Controls over property tax additions and abatements are not adequate, there is no independent comparison of property assessment changes made by the County Assessor to changes made in the property tax system by the County Clerk, and the County Collector is able to enter additions and abatements in the computer system.

In the areas audited, the overall performance of this entity was **Poor**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

1. County Collector Controls and Procedures 4
2. Property Tax System Controls and Procedures 8

Organization and Statistical Information 10

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
County Collector
Lewis County, Missouri

We have audited the County Collector and Property Tax System of Lewis County. Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. In addition, we did additional work and expanded the audit period in fulfillment of our duties under Section 29.230, RSMo. On October 28, 2013, a vacancy occurred in the office of the County Collector of Lewis County. A successor was appointed and sworn into office effective December 23, 2013. The scope of our audit included, but was not necessarily limited to, the 2 years ended February 28, 2014. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant property tax functions.

2. Evaluate the county's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the County Collector and county management and was not subjected to the procedures applied in our audit of the County Collector and Property Tax System.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owing to the county or the former County Collector. For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the County Collector and Property Tax System of Lewis County.

An additional report, No. 2014-103, *Lewis County*, was issued in November 2014.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Jeannette Eaves, CPA
In-Charge Auditor:	Heather R. Stiles, MBA, CPA, CFE
Audit Staff:	Gina Henley, MBA

1. County Collector Controls and Procedures

Despite similar concerns noted in our 3 prior audit reports, significant weaknesses continued to exist throughout the former County Collector's time in office. The current County Collector worked in the office prior to her appointment as County Collector, but was not responsible for setting policy and ensuring audit recommendations were implemented. We expanded our audit work past the vacancy date to satisfy requirements of our scheduled audit. The current County Collector has continued to use the property tax system and some procedures established by the former County Collector, so weaknesses continue to exist. Accounting and reporting procedures do not provide assurance all property tax receipts and disbursements are accounted for properly. As a result, loss, theft, or misuse of funds could go undetected for a significant period of time.

The County Collector's office processed collections totaling approximately $6.9 million during the year ended February 28, 2014, and $6.5 million during the year ended February 28, 2013.

1.1 Receipt dates and payment number sequence

The County Collector's office does not always use the actual date of receipt when recording payments and does not account for the numerical sequence of receipt numbers (payment numbers) assigned by the computerized property tax system.

The computerized property tax system sequentially assigns a payment number for all monies received through the County Collector's office. However, the system allows users to backdate payments received in the system, resulting in payment numbers being out of order. For example, if a mailed in payment is postmarked with a date prior to the month it is entered into the computer system, the County Collector can backdate the date of receipt in the system to the postmarked month for the payment. In addition, payment numbers can be deleted from the system after a receipt has been printed without an audit trail. These control weaknesses allow for possible manipulation of receipt data.

To ensure all monies received are properly recorded and deposited, and reduce the risk of loss, theft, or misuse of funds, consideration should be given to modifying the software program to ensure an audit trail of changes made in the property tax system is maintained and adequate controls are in place to allow the County Collector's office to account for the numerical sequence of payment numbers.

1.2 Receipting, depositing, and disbursing

The County Collector does not have adequate procedures for receipting and depositing monies and does not reconcile receipts to deposits and disbursements, causing differences to go undetected and uncorrected.

The County Collector does not deposit receipts intact. The County Collector and the Deputy County Collector can each have separate work sessions open

at the same time and can select which payments to include in deposits. The County Collector indicated the property tax system was designed to allow each user the ability to select which payments received each session will be included in a deposit so that the office can hold postdated checks for taxpayers when necessary.

Receipts are reported on the tax register based on the receipt date entered into the property tax system rather than the actual date of receipt and the monthly tax register is used to prepare the monthly disbursement settlement. Payments backdated to a prior month or postdated to a subsequent month will not be included in the current month's tax register or distributed. We noted a payment received in April 2013 and backdated to March 2013 for $792 was not included in the tax register for March 2013 and therefore, was not distributed as of August 1, 2014. The current County Collector was not aware payments backdated to a prior month were not included in monthly distributions until we identified this issue. If the County Collector performed regular reconciliations between receipts, deposits, and the tax register, this difference would have been identified.

To ensure all monies received are properly recorded and deposited, daily tax registers should be generated and reconciled to collections and deposits and all monies received should be deposited intact.

1.3 Bank reconciliations

We noted the following concerns during our review of the former and current County Collector's bank reconciliations.

- The former County Collector had not prepared bank reconciliations or prepared lists of liabilities since January 2008. The current County Collector opened a new bank account on November 1, 2013, and since that date the old account has not been used for routine activity. The balance in the former County Collector's bank account on February 28, 2014, was $54,604; however, without a corresponding list of liabilities the County Collector does not know what the account balance should be or how the monies should be distributed.

  We reviewed the former County Collector's records and identified liabilities of $37,847 and excess distributions of $16,132 at February 28, 2014, resulting in a $32,889 unexplained difference between the bank balance and total liabilities.

- The current County Collector does not reconcile the new bank account timely. As of August 2014, the current County Collector had not performed bank reconciliations or identified liabilities for 5 months.

Timely preparation of monthly bank reconciliations is necessary to ensure the bank account is in agreement with accounting records and to detect and

correct errors. In addition, without regular identification and comparison of liabilities to the reconciled bank balance, there is less likelihood errors will be detected and the ability to both identify liabilities and resolve errors is diminished. Also, maintaining a dormant bank account with unidentified funds increases the risk of loss, theft, or misuse of funds. The County Collector should attempt to identify and distribute funds held in that account. Various state laws address the disposition of unidentified funds.

1.4 Non-sufficient funds checks

The County Collector does not have adequate procedures in place to ensure non-sufficient funds (NSF) checks are collected, adjustments are made to the distribution of tax collections, and NSF checks are reversed in the property tax system to reflect amounts still owed by taxpayers. As a result, the County Collector's office may be unaware additional tax is due.

The County Collector's office does not reverse NSF checks in the property tax system to indicate the taxpayer's check was returned and payment is still due from the taxpayer. In addition, adjustments are not made to deduct NSF check amounts from monthly disbursements of tax collections to the county and other political subdivisions. Restitution for NSF checks may not be received until several months after the receipt was initially collected and, in some instances, restitution may never be received. As a result, the office needs records to track the repayment status of NSF checks.

Without adequate procedures for the collection and recording of NSF checks, the County Collector's office cannot ensure amounts due from taxpayers are properly tracked.

1.5 Segregation of duties

The County Collector has not segregated accounting duties. All employees receive and record monies in the property tax system and are responsible for preparing deposits for receipts they collect. The former County Collector did not review employee deposits or compare receipt records to deposits to ensure all monies receipted were deposited. The current County Collector stated she performs undocumented reviews of some deposits prepared by office staff.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the County Collector should implement an adequate documented supervisory review of the accounting records.

Recommendations

The County Collector:

1.1 Work with the computer software vendor to establish controls to account for the numerical sequence of payment numbers assigned by the computerized property tax system, maintain an audit trail of

changes made in the property tax system, and prevent the editing of payment transaction information after a receipt slip has been printed.

1.2 Ensure daily tax registers are printed and reconciled to daily collections and deposits. In addition, deposits should be made intact.

1.3 Reconcile bank balances to a list of liabilities monthly, and ensure any differences are investigated and promptly resolved. In addition, the County Collector should attempt to identify and distribute funds held in the dormant bank account, disburse any remaining unidentified balance in accordance with state law, and close the account.

1.4 Ensure a policy is established for the collection of NSF checks and accounting records accurately document the status of accounts involving bad checks.

1.5 Segregate accounting duties to the extent possible or ensure a supervisory review of accounting records is performed and documented.

Auditee's Response

The County Collector provided the following responses:

1.1 I am working with the software designer to address the control issues noted. The system has been updated to include an audit trail for changes made to tax records, including any deposits or payments deleted from the tax system. Controls have been added to the tax system to allow penalties and interest to be assessed as of the date the payment is postmarked and the payment included in the current day's receipts. Additionally, the system has been updated to enable office staff to run a payment report by the date posted to account for all payment numbers. We are also keeping copies of all deleted payments and deleted deposit records.

1.2 We now deposit intact at the end of each day. All checks are included in one deposit and separate deposits are prepared for cash collections for each drawer. Separate deposits may be prepared for check collections for each drawer when the office is busy. We are now reconciling total daily deposits to the daily tax register and are noting any differences.

1.3 As of August 2014, I am diligently working on reconciliations. I will distribute identified amounts included in the dormant account and

turn the balance in the account over to the County Treasurer as unclaimed property upon completion of the audit.

1.4 We have established a policy for the collection of NSF checks and have implemented a spreadsheet to track these checks. If a NSF check is not settled within 10 business days, the NSF check will be turned over to the Prosecuting Attorney's office for collection. We will void the transaction in the tax system at the time the check is turned over to the Prosecuting Attorney and will make a notation in the tax system. I will reverse the payment amount off the settlement sheet until payment has been received and will then include it as an adjustment.

1.5 I am now depositing all checks collected by all employees. I also review and initial cash deposits prepared by employees. Additionally, I will spot check employees cash drawers randomly. Daily, I ensure all transactions collected have been deposited.

2. Property Tax System Controls and Procedures

We identified significant weaknesses in controls and procedures over the county's property tax system.

2.1 Annual settlements

The former County Collector did not prepare annual settlements for the year ended February 28, 2013, and the year ended February 29, 2012. Additionally, as of August 1, 2014, the current County Collector has not finalized the annual settlement for the year ended February 28, 2014.

To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector file timely annual settlements. Section 139.160, RSMo, requires the County Collector to settle accounts with the County Commission by the first Monday of March.

A similar condition was noted in our prior audit report.

2.2 Additions and abatements

Controls over property tax additions and abatements are not adequate. There is no independent comparison of property assessment changes made by the County Assessor to the related changes in the property tax system made by the County Clerk. In addition, the County Collector has the ability to enter additions and abatements into the computer system.

The County Assessor's office records changes to property assessments on manual forms. These forms are forwarded to the County Clerk's office, where additions and abatements are entered into the property tax system and

sequentially numbered orders of assessment changes are prepared for County Commission approval. However, the County Clerk does not generate a monthly report of additions and abatements that can be reconciled to individual court orders approved by the County Commission. Errors made by the County Clerk when entering some property tax additions and abatements into the system were not detected timely, contributing to the delay by the current County Collector in preparing the annual settlement for the year ended February 28, 2014.

The lack of independent verification and approval of assessed valuation changes made by the County Assessor and tax book additions and abatements entered by the County Clerk significantly increases the risk of intentional and unintentional errors and omissions to the property tax books. Because the County Collector is responsible for collecting tax monies, good internal controls require she not have system access rights to be able to alter or delete tax rates, assessed values, and property tax billings.

Recommendations

2.1 The County Collector should prepare and file timely annual settlements.

2.2 The County Commission should ensure all tax book additions and abatements are properly recorded, approved, and charged to the County Collector. The County Commission should also ensure property tax system access rights are limited to only what is needed for users to perform their job duties and responsibilities.

Auditee's Response

The County Collector provided the following responses:

2.1 I filed the annual settlement for the year ended February 28, 2014, in September 2014. I will file future annual settlements in a timely manner.

2.2 Since I need to be able to create files to add drainage districts, payment in lieu of taxes, and forest crop land records, I have requested the software designer update the tax system to allow me access to those records only.

The County Commission and County Clerk provided the following response:

2.2 The County Commission will ensure changes made to property assessments by the County Assessor's office agree to respective assessment changes made in the property tax system. In addition, the software designer has been contacted and asked to remove the County Collector's access in the property tax system for additions and abatements with the exception of drainage districts, payment in lieu of taxes, and forest crop land.

Lewis County Collector and Property Tax System
Organization and Statistical Information

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29).

Robert E. Veatch served as County Collector until October 28, 2013. Denise Goodwin was appointed the Lewis County Collector and sworn into office on December 23, 2013.

The County Collector received compensation of $30,113 for the period March 1, 2013, to October 28, 2013. During the year ended February 28, 2013, the County Collector received compensation of $47,285. Compensation was in accordance with statutory provisions.

Thomas A. Schweich

Missouri State Auditor

Village of Country Club

November 2014

Report No. 2014-105

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Village of Country Club

Street Repair and Funding

Village streets are in poor condition, and village officials have not established a separate fund for, nor have they separately tracked the balance of, restricted street monies. During the 6 years ended December 31, 2013, the village received $456,000 in motor vehicle-related fees from the state and $293,000 in sales tax revenue. The Missouri Constitution limits state motor vehicle-related revenues to road and street purposes, and it is unclear whether the sales tax is restricted to street improvement. The village deposits these revenues in the General Fund and does not identify or restrict the unspent portions. In response to residents' concerns, the village prepared spreadsheets, with assistance from its independent auditor, to show how these restricted revenues were spent. Only $213,000 of the nearly $750,000 was clearly spent on street-related expenses. The balance (over $530,000) appears to have been allocated in an unallowable and/or unreasonable manner. For example, 65 percent of salaries, fringe benefits, insurance, training, and other costs related to the police department are allocated to these restricted revenues, and other expenses were allocated with no justification for the percentages used or how they were street-related. Complicating matters, the village did not retain the original ballot supporting passage of the 1/2 cent sales tax from April 1999, so it is unclear what the voters actually approved. Minutes from one board meeting indicate the sales tax was to be restricted for road improvements, but minutes from another meeting make no mention of such a restriction, and the ordinance signed by the Board does not contain a restriction. The proposed ballot language published in the newspaper in January of 1999 does not mention a restriction, but the language published in March and April of 1999 says the tax is to be limited to street repairs. Finally, the village should develop a formal annual maintenance plan for village streets.

Wastewater System

As of December 31, 2013, the village had spent $150,164 from the General Revenue Fund to pay wastewater treatment plant project expenses, but the village does not have a payment plan or time frame for repayment of this loan. Village officials did not properly monitor construction costs and overpaid a contractor $25,664, and the Board did not approve a change totaling $146,455. The village has not developed adequate procedures regarding handling and accounting for delinquent wastewater accounts, and the delinquent account balances continue to grow monthly. Village ordinance states the village will contact the provider to shut off services if bills are more than 30 days past due, but the village has not initiated shut off procedures for any delinquent customers nor attempted to collect on the $116,973 in amounts delinquent over 30 days as of January 31, 2014. The village adds a $10 surcharge to wastewater bills but does not track these monies ($51,443 in 2013) and cannot determine if they are spent for sewer maintenance in accordance with the village ordinance.

Disbursements	The village does not have a written contract with, or charge a fee to, the local fire protection district for services provided, and does not have written contracts with some service providers. The village has not always solicited bids as required by village ordinance and paid some disbursements electronically without Board approval. The village did not obtain adequate documentation to support some disbursements, including $596 per month to reimburse the Police Chief for health insurance, $500 to reimburse the Police Chief for ammunition, and $2,500 to a home owners' association for road repair. Procedures were not adequate to prevent duplicate payments, late fees and finance charges, and unnecessary payment of sales taxes on purchases.
Accounting Records and Procedures	The Board has not segregated accounting duties, and there was not adequate independent oversight of the work of the Village Clerk. The Village Clerk kept inaccurate records, did not perform bank reconciliations, and did not maintain a running balance of accounts. There is no independent review of the credit card statements or supporting documentation to ensure purchases are reasonable, and the village needs to improve its receipting and depositing procedures.
Budgets	The 2014 and 2013 budgets were missing elements required by law, and the village did not hold a public hearing on the adoption of the budgets. The Wastewater Treatment Plant Fund was budgeted as part of General Fund operations for 2014, and no budget was prepared for this fund in 2013.
Ordinances and Sunshine Law Issues	The Board Secretary or a Board member did not sign some minutes, and no one prepared minutes for some committee meetings. Some topics discussed in closed meetings were not allowable or were not subsequently disclosed in open meetings. In a closed meeting, the Board voted to change the village hall office hours, approved a pay increase for a police officer, and retroactively recognized the Police Chief as a full-time employee. The Board also voted and approved a settlement agreement with an employee in a closed meeting and did not subsequently make the settlement agreement public.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 20

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Chairperson
and
Members of the Board of Trustees
Village of Country Club, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Village of Country Club. We have audited certain operations of the village in fulfillment of our duties. The village engaged Troutt, Beeman & Co., P.C., Certified Public Accountants (CPAs), to audit the village's financial statements for the year ended December 31, 2013. To minimize duplication of effort, we reviewed the report of Kevin G. Hudson, CPA, for the year ended December 31, 2012, audit, since the year ended December 31, 2013, audit had not been completed. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the village's internal controls over significant management and financial functions.

2. Evaluate the village's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the village, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the village's management and was not subjected to the procedures applied in our audit of the village.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Village of Country Club.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Robert McArthur II
Audit Staff:	Amanda Messick

1. Street Repair and Funding

The village has not used available restricted monies to adequately repair its streets and did not retain the original ballot language for a 1/2 cent sales tax leading to confusion as to the proper use of these monies. In addition, the village has not developed a formal maintenance plan.

1.1 Restricted street monies

Village streets are in poor condition and village officials have not established a separate fund for, nor have they separately tracked the balance of, restricted street monies. We observed village streets in various states of disrepair, noting numerous potholes, cracking and crumbling pavement, and several areas where water pooled during heavy rain. During the 6 years ending December 31, 2013, the village received almost $750,000 in revenue from motor vehicle-related fees from the state (approximately $456,000) and sales tax (approximately $293,000). The motor vehicle-related fees are restricted by the Missouri Constitution to road and street related purposes, and it is unclear whether the sales tax revenue is legally restricted (see section 1.2), although based on the village officials actions, it appears the intent was to restrict the sales tax. These monies are deposited in the General Fund and the unspent portions are not identified or restricted.

After residents expressed concerns, village officials consulted with their independent financial statement auditor and prepared spreadsheets for 2008 through 2013 to show how these restricted revenues were spent. These spreadsheets documented only $213,000 in disbursements that were clearly street related, including $78,000 for street repairs, $111,000 on snow/ice removal; and $24,000 for streets signs, street lights, and auto repairs/maintenance. All or a percentage of various other disbursements were then listed in the spreadsheet to justify how the remaining monies (over $530,000) was spent. Some items and amounts allocated on these spreadsheets raised concerns and do not appear allowable and/or reasonable.

These spreadsheets were prepared to demonstrate that motor vehicle-related fees and the sales tax revenues have been spent for street related purposes, but adequate documentation was not maintained to support how the percentages were determined and if they were reasonable. The Village Clerk, Police Chief and Deputy Chief, with assistance from the village's independent auditor, determined percentages to allocate for various village costs, based on estimates of their workload, rather than based on actual time and examining the use of services and supplies by various funds. These costs included employees' salaries, police vehicle operating and maintenance, payroll taxes, several types of insurance, mowing, and legal fees, among others. The percentages allocated ranged from 20 percent to 100 percent. For example, the spreadsheet for 2013 shows 65 percent of salaries, fringe benefits, insurance, training, and other costs related to the police department were allocated to these restricted revenues. Numerous other disbursements were allocated with no justification for the percentages used or how they were street related. In an attempt to justify the large

amount of general law enforcement expenses allocated to these restricted revenues, the state representative for the district in which the village is located requested assistance from the Attorney General's office regarding the use of the constitutionally restricted motor vehicle-related fees received by the village. The response provided does not support the uses of these funds in the manner the village has been using them.

To ensure restricted monies are spent appropriately and disbursements are allocated to various funds in proportion to the benefits received, the village should ensure the allocation of costs is reasonable and supported by adequate documentation. Article IV, Section 30, Missouri Constitution, requires motor vehicle-related revenues apportioned by the state of Missouri be expended for street purposes only. In addition, in March 2013 the Attorney General issued a letter concluding "the motor vehicle fuel tax monies may not be used for law enforcement purposes in general. Only that portion of law enforcement engaged in keeping the roads controlled, regulated, and in good order may be funded with these monies."

1.2 Sales tax

The village did not retain the actual ballot language supporting the passage of a 1/2 cent sales tax voted on during the April 6, 1999, election. Without this information it is unclear what the voters actually approved. This problem has led to debates amongst village officials and citizens related to the proper use of these monies (see section 1.1).

During our review, we noted the December 8, 1998, meeting minutes document the Board of Trustees (Board) approval of a 1/2 cent sales tax for road improvements. However, the meeting minutes from January 12, 1999, indicate Ordinance No. 327 was passed approving the 1/2 cent sales tax and the ballot language, but the minutes provided no indication the sales tax was to be used for road improvements. In addition, the ordinance signed by the Board does not restrict the sales tax revenues for road improvements.

We also reviewed an initial affidavit of publication of the ordinance and proposed ballot language published in the local newspaper on January 21, 1999. There was no indication these revenues would be restricted. However, another affidavit of publication of the proposed ballot language published in the local newspaper on March 25, 1999, and April 1, 1999, has a restriction on the 1/2 cent sales tax for street repairs.

Current village officials indicate they believe the Board's intent at that time was not to restrict the tax for road improvements and they provided the official ordinance as evidence. Village citizens contend they voted on the tax because it was to be used for street repairs as evidenced by the second published proposed ballot language. Spreadsheets showing allocations of restricted street revenues prepared by village officials (see section 1.1) included these sales tax revenues, indicating the Board's intent to spend

these funds on street-related purposes. The Board did not seek a legal opinion on the potential restrictions on these sales tax revenues and it is unclear if the current Board intends for these revenues to be restricted. Because it is unclear what ballot language village residents voted on and approved, it is not known if use of these monies is restricted.

The Secretary of State's office provides guidelines on record retention. It is the responsibility of local governments to maintain and manage records to ensure their preservation, especially records of a permanent nature.

To resolve the dispute, it is imperative the Board evaluate and make a decision regarding the sales tax monies. The Board needs to seek the opinion of legal counsel, solicit citizen input, and determine how these sales tax monies will be used in the future. These actions and decisions should be documented and the Board should ensure future use of the sales tax monies is consistent with decisions made.

1.3 Street maintenance plan

The village has not developed a formal annual maintenance plan for village streets. As indicated in section 1.1, village streets are in very poor condition and a relatively small amount of money has been spent to repair/replace village streets since 2008. As of April 2014, the village had selected an engineering firm to evaluate the condition of the roads and assess the improvements needed.

A formal maintenance plan should be prepared in conjunction with the annual fiscal budget and include a description of the streets to be worked on, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information. The plan should be included in the budget message and approved by the Board. In addition, a public hearing should be held to obtain input from village citizens.

A formal maintenance plan would serve as a useful management tool and provide greater input into the overall budgeting process. A plan provides a means to continually and more effectively monitor and evaluate the progress made in the repair and maintenance of streets throughout the year.

Recommendations

The Board of Trustees:

1.1 Determine the balance of restricted street monies and establish a separate fund or a separate accounting of these monies as required by state law. In addition, if disbursements are to be allocated to the Street Fund, the methods used for the allocations should be supported by adequate documentation.

1.2 Seek a legal opinion regarding restrictions on the uses of the sales tax, solicit citizen input on the issue, and determine how these monies will be handled in the future. In addition, ensure permanent records are properly retained and preserved.

1.3 Establish a formal annual maintenance plan for village streets.

Auditee's Response

The Board of Trustees provided the following written responses:

1.1 We agree and the village is in the process of implementing the recommendation. Fund reports were created and are in use for 2014.

1.2 We agree and will implement this recommendation.

1.3 We agree. The process to implement this recommendation began in February 2014 after concerns were expressed by the auditors.

2. Wastewater System

The village has not developed a repayment schedule to repay its General Fund for expenses paid during the construction of the new wastewater treatment plant. Village officials also did not approve all construction change orders and overpaid a construction contract. In addition, adequate procedures have not been developed to collect delinquent customer wastewater accounts.

The village began construction of a new wastewater treatment plant in 2011. The original bid for construction of the plant was $3,625,376. The plant became fully operational in April 2013. The village contracts with an outside vendor for operation and maintenance of the wastewater plant. In addition, the village contracts with the city of St. Joseph to perform wastewater billings and collections. The village remains responsible for pursuing delinquent customer accounts.

2.1 Loans

It is unclear when the General Fund will be reimbursed for funds paid on behalf of, or transferred to the Wastewater Treatment Plant (WWTP) Fund, to pay for wastewater treatment plant project expenses.

On March 9, 2010, the Board approved resolution 2010-001 stating it would reimburse the General Fund for wastewater treatment plant project disbursements. Up to that point the General Fund had paid $113,852 in wastewater treatment plant expenses. Since then an additional $36,312 in wastewater treatment plant expenses have been paid from the General Fund, including $21,000 in February 2013 to make a wastewater treatment plant debt service payment. As of December 31, 2013, $150,164 had been spent on wastewater treatment plant disbursements from the General Fund. The village does not have a payment plan or time frame for repayment of the

loan from the General Fund to the WWTP Fund. Village officials indicated the village plans to repay a portion of the loan with any monies remaining in the wastewater treatment plant construction account. As of January 31, 2014, approximately $57,000 remained unspent in this account.

The village should develop a plan to repay the entirety of the General Fund loan in accordance with the Board approved resolution.

2.2 Construction disbursements and change orders

Village officials did not properly monitor wastewater treatment plant construction expenses, resulting in an overpayment to a contractor. In addition, the Board did not approve a change order made to the initial construction contract for the wastewater treatment plant project. These changes resulted in additional costs to the project.

The village twice paid $25,664 for construction change orders No. 5 and No. 6. The Board approved these change orders. The total value of the construction contract with all change orders was $3,881,708, but the contractor was paid $3,907,372. Village officials were unaware of the overpayment until we discussed the issue with them. In addition, the Board did not approve change order No. 3, totaling $146,455.

Proper monitoring of project costs is necessary to ensure village funds are properly disbursed. In addition, the Board should approve change orders for all significant changes to construction contracts to ensure any additional disbursements represent valid and appropriate costs to the district.

2.3 Delinquent accounts

The village has not developed adequate procedures regarding handling and accounting for delinquent wastewater accounts. As a result, a significant amount of wastewater fees have not been collected since collection began in August 2013 and the delinquent account balances continue to grow monthly. Wastewater billings currently exceed $50,000 per month.

Village Ordinance No. 476 states the village will contact the provider to shut off services if bills become more than 30 days past due. However, the village has not initiated shut off procedures for any delinquent customers nor attempted to collect on these delinquent amounts. As of December 31, 2013, accounts delinquent for over 30 days totaled $103,463. As of January 31, 2014, the delinquent balance had grown an additional $13,510, to $116,973 and included 174 of the 505 active accounts, or 34 percent. In addition, there were another 81 inactive accounts with delinquent balances totaling over $26,000.

To help maximize utility revenues, procedures should be developed to ensure adequate steps are taken to collect delinquent accounts.

2.4 Restricted surcharge

The village has not established a separate fund for, nor have they separately tracked the balance of, the restricted surcharge added to wastewater bills. By

ordinance, the village adds a $10 surcharge to wastewater bills. These surcharges are currently comingled with other wastewater revenues in the WWTP Fund. The balance of unspent surcharges is not tracked and the village has no mechanism to determine if the surcharge collections are spent for sewer maintenance in accordance with the village ordinance. During the year ended December 31, 2013, the village collected $51,443 in surcharges.

Village Ordinance No. 476 states the surcharge is imposed for the purpose of establishing an "Operations, Maintenance, and Replacement Fund" to be maintained in a separate checking account for this purpose.

Recommendations

The Board of Trustees:

2.1 Develop and implement a loan repayment schedule for amounts due to the General Fund from the WWTP Fund.

2.2 Request reimbursement of the overpayment to the construction contractor. In addition, the Board should ensure adequate monitoring of project costs is performed and documented on future projects and change orders are approved.

2.3 Follow village ordinance shut off procedures for delinquent wastewater accounts and establish policies and procedures regarding the collection of delinquent accounts.

2.4 Determine the balance of restricted wastewater monies and establish a separate fund or a separate accounting of these monies as required by village ordinance.

Auditee's Response

The Board of Trustees provided the following written responses:

2.1 We agree and will implement this recommendation with advisement from our bond counsel.

2.2 We agree. The process to implement the recommendation began in March 2014 after this was brought to our attention by the auditors. As of September 2014 reimbursement has not been received and this matter has been turned over to the village attorney for resolution.

2.3 We agree. The village is in the process of implementing this recommendation.

2.4 We agree and will implement this recommendation.

3. Disbursements

Weaknesses exist in controls and procedures over disbursements.

3.1 Written contracts

The village does not have a written contract with, or charge a fee to, the local fire protection district (FPD) for services provided for the district and does not have written contracts with some service providers.

- The village does not have a written contract with the FPD for services provided and does not require the FPD to reimburse the village for any expenses. The Village Clerk maintains the FPD's bank account, handles all its accounting duties (including preparing disbursements and financial reports), posts FPD meeting notices, and prepares district meeting minutes, etc. The village pays the clerk's salary for time spent performing these duties for the FPD. The Village Clerk does not track the amount of time spent performing these duties. The FPD has a separate Board and is considered a separate political subdivision. According to the Village Clerk, the FPD had revenues exceeding $80,000 for the year ended December 31, 2013, and had a bank account balance of $98,741 as of December 31, 2013.

- The village does not have a contract with the Andrew County Circuit Court to process the village's traffic tickets. The village paid $3,338 for this service during 2013.

- The village does not have a contract with a mowing company receiving payments of approximately $3,900 during 2013.

- The village last had a written contract in place with its attorney through December 31, 2009. Currently, the village is billed a $500 monthly retainer for "reviewing, processing, and litigating any and all Village of Country Club court matters each month," plus $100 per hour for additional services. The village spent $11,975 during 2013 for attorney's services.

Clear and detailed written contracts, including reporting requirements and provisions to allow for proper monitoring, are necessary to ensure all parties are aware of their duties and responsibilities, prevent misunderstandings, and ensure village monies are used appropriately and effectively. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

3.2 Bidding

The village has not always solicited bids as required by village ordinance. The village did not solicit bids for computers costing $4,532. In addition, the village has used the same attorney for legal services for approximately 25 years without conducting a competitive selection process. As noted in section 3.1, the village paid $11,975 for legal services during the year ended December 31, 2013.

Section 135.020 of the village ordinances, requires supplies and contractual services to be bid when the estimated cost exceeds $2,500 and contracts to be awarded to the lowest responsible bidder. In addition to being required by village ordinance, the routine use of a competitive procurement process for major purchases ensures the village has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in village business.

3.3 Board approval

The village paid some disbursements electronically through its bank's bill payment system without Board approval. The Board generally reviews and approves disbursements during Board meetings by reviewing a list of disbursements prepared by the Village Clerk, however, there were instances where electronic payments were not included in the list and approved by the Board.

Payment of invoices without documented approval from a Board member increases the risk of paying for goods or services not actually received. To ensure disbursements are appropriate, including electronic payments, the Board should require complete and accurate financial information be provided for its review and approval.

3.4 Supporting documentation

The village did not obtain adequate documentation to support some disbursements.

- The village reimburses the Police Chief $596 per month for his cost of health insurance through his former place of employment because it is less expensive than village provided insurance. The Police Chief gives the village a self-made invoice each month to document the amount owed. The village does not obtain any other documentation to ensure the amount being billed to the village is correct. In addition, Internal Revenue Service (IRS) regulations provide that when an employer gives an employee money to pay for health insurance without requiring proof of payment of premiums, the amount is a taxable fringe benefit. The payments to the Police Chief were not reported on his W-2 form.

- The village reimbursed the Police Chief $500 for the purchase of ammunition without any external documentation showing the purchase date or amount paid.

- The village gave a local homeowners' association $2,500 for road repairs but did not obtain documentation supporting the work performed or its completion.

To ensure obligations were actually incurred and amounts paid were proper, all disbursements should be supported by paid receipts, itemized vendor invoices or other detailed documentation with payment information clearly indicated. In addition, proof of payment of the Police Chief's health

insurance should be provided or the amount should be reported as a taxable fringe benefit on his W-2 form in accordance with IRS regulations.

3.5 Duplicate payments

Procedures used to review and mark invoices to prevent duplicate payments need improvement.

- The village received 2 invoices for the same vehicle repair service. The invoices were for 2 different amounts but had the same invoice number and date. The village paid both invoices on December 9, 2013, without noticing they were for the same service. The vendor identified the error and issued a refund to the village.

- For 3 of 30 (10 percent) disbursements tested the check number and/or date paid was not noted on the invoice.

A thorough and documented review of disbursements as well as documentation of payment of invoices by canceling the document upon payment reduces the possibility of duplicate payments.

3.6 Late fees, finance charges, and sales tax

The Village Clerk does not ensure bills are paid timely resulting in the village incurring late fees and finance charges. In addition, the village does not ensure all vendors are notified of the village's sales tax exemption status resulting in unnecessary expenses.

For 9 of 30 (30 percent) disbursements tested the invoice was paid past the due date. In addition to these late payments, there were invoices where the current balance was paid on time but the invoice showed there was a past due amount or indicated the prior month's payment was made after the due date. Because of the errors, we reviewed additional disbursements focusing on utility, phone, and credit card billings. For the year ended December 31, 2013, we identified 38 payments with late fees and financing charges totaling $175. We also noted the village paid sales tax of $1,968 in bills we reviewed that should not have been paid.

To prevent unnecessary late fees and finance charges, procedures should be in place to ensure bills are paid timely. In addition, sales tax should not be paid on purchases since the village is tax exempt.

Recommendations

The Board of Trustees:

3.1 Enter into written agreements defining services provided and benefits received.

3.2 Solicit bids and proposals as required by village ordinance.

3.3 Ensure all invoices are reviewed and approved by appropriate officials prior to payment.

3.4 Obtain adequate supporting documentation for all disbursements. Also, the Board should ensure health insurance reimbursements to the Police Chief are properly reported under IRS regulations.

3.5 Ensure all invoices are adequately reviewed, and the payment number and payment date is recorded on all invoices to prevent duplicate payments.

3.6 Implement procedures to ensure bills are paid timely and all vendors are aware of the village's sales tax exempt status. In addition, the village should attempt to recover any unnecessary sales tax paid.

Auditee's Response

The Board of Trustees provided the following written responses:

3.1 We agree. The village is in the process of implementing this recommendation.

3.2 We agree and have already implemented this recommendation. The village joined the State of Missouri Cooperative Procurement Program in February 2014 and will follow its guidelines for future purchases.

3.3& 3.5 We agree. These recommendations were implemented in May 2014 after the auditors notified us of their concerns.

3.4 We agree. This recommendation was implemented in January 2014 after the auditors notified us of their concerns.

3.6 We agree. This recommendation was implemented in February 2014 after the auditors notified us of their concerns. The Village Clerk reviewed village invoices for any additional sales tax paid and the village has already requested and received refunds of approximately $3,000 from various vendors.

4. Accounting Records and Procedures

Village accounting records and financial reports provided to the Board are not always accurate, bank reconciliations are not performed, there is no Board review of credit card purchases, and the village's receipting, recording, and depositing procedures are in need of improvement.

4.1 Segregation and oversight

The Board has not segregated accounting duties and there is not adequate independent oversight of the work performed by the Village Clerk. Had reviews been performed, many of the errors noted in section 4.2 would likely have been identified. The Village Clerk is responsible for all record keeping and accounting functions of the village and has access and authority

to make electronic bill payments through the village's bank accounts. Adequate independent reviews of her work are not performed.

One person performing all record keeping and accounting functions does not allow the segregation of duties necessary for a proper evaluation and review of financial transactions. The current procedures jeopardize the system of independent checks and balances needed for good internal control. If segregation of duties is not possible, periodic independent or supervisory reviews, including a comparison of financial records to the reconciled bank statement, should be performed and documented.

4.2 Accounting records

The Village Clerk's accounting records contained inaccuracies, resulting in errors on monthly finance reports provided to the Board.

- Revenues of $44,376 received December 27, 2013, are excluded from the year-end finance report for the WWTP Fund because the bank statement for this account runs monthly from the 19th to the 18th. All disbursements made from December 18, 2013, through December 31, 2013, were also not recorded in the finance report until January 2014. The Village Clerk matches the finance reports to the bank statement so she did not include activity for December 18, 2013, through December 31, 2013, in the report.

- Revenues of $54,404 received from the Andrew County Collector before the end of 2013 are excluded from the year-end finance report for the General Fund because this payment was not deposited until January 9, 2014, and not recorded in the accounting records until after the deposit. The revenue should have been recognized in the December 2013 finance report.

- We noted a payment of $1,290 for wastewater treatment plant construction expenses was paid on October 8, 2013, from the General Fund but was recorded in the WWTP Fund. We also noted a check for $40, written on January 25, 2013, for police training and an electronic payment for $212 made on April 29, 2013, to the Family Support Division were not recorded in the General Fund financial records. Finally, a fuel payment from the general bank account on July 3, 2013, for $758 was incorrectly posted to the General Fund financial records as $576.

Accurate and complete financial information is necessary for the Board to make informed decisions and to provide residents with reliable information about village finances. Inaccurately recorded transactions also make it more difficult to detect loss, theft, or misuse of funds.

4.3 Bank reconciliations

The Village Clerk does not perform bank reconciliations for any of the village's 6 bank accounts and does not maintain a running balance for these accounts.

A monthly bank reconciliation helps ensure bank and book balances are in agreement and errors are detected and corrected timely. Maintaining a checkbook balance would also aid in preparing the monthly bank reconciliation and monitoring the bank balance.

4.4 Credit cards

Controls over credit cards need improvement. The village has one credit card account with cards issued to two employees and the Board Chairperson. There is no independent review of the credit card statements or supporting documentation to ensure purchases are reasonable and for village purposes. Village employees indicate they obtain verbal approval from a Board member prior to making a purchase. Credit card purchases totaled $2,529 in 2013.

The Board should perform a review of all credit card purchases to ensure expenses paid are necessary, reasonable, and adequately documented.

4.5 Receipting and depositing procedures

Receipting and depositing procedures need improvement.

Receipt slips are not always issued for payments received. Receipt slips are generally written for walk-in payments only. In addition, receipt slips do not always document the method of payment received, and the composition of receipts is not reconciled to the composition of the deposit. Furthermore, receipts are not always deposited timely.

For example, we noted two checks received by mail from the Andrew County Circuit Court dated June 28, 2013, totaling $1,575 were not receipted and not deposited until July 29, 2013. Also during the month of July 2013, village personnel made 6 deposits on July 29 and 30, 2013, totaling $10,447 and made no other deposits during the month. In addition, payments from the Andrew County Collector were not deposited timely.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected and accounting records will contain errors.

Recommendations

The Board of Trustees:

4.1 Segregate accounting duties to the extent possible and ensure a documented supervisory review of the accounting records is performed.

4.2 Ensure accounting records are accurately maintained.

4.3 Ensure monthly bank reconciliations are prepared for all bank accounts and running checkbook balances are maintained.

4.4 Review credit card usage and require adequate documentation be maintained and reconciled to billing statements.

4.5 Ensure receipt slips are issued for all monies received and the numerical sequence of receipt slips is accounted for properly. The method of payment should be documented and the composition of receipts reconciled to the composition of deposits. Additionally, the Board should ensure receipts are posted to the accounting system and deposited timely.

Auditee's Response

The Board of Trustees provided the following written responses:

4.1-4.4 We agree. These recommendations were implemented in May 2014 after the auditors notified us of their concerns.

4.5 We agree. This recommendation was implemented in January 2014 immediately after the auditors notified us of their concern.

5. Budgets

Village budgets are not complete and prepared in compliance with state law. In addition, public hearings were not held concerning their adoption.

- The 2014 and 2013 budgets did not contain a budget message, actual receipts and disbursements for the 2 preceding years for comparison purposes, or amounts related to the debt of the village. In addition, beginning available resources and estimated ending available resources were not included in these budgets but are needed to present a complete financial plan for village finances.

- A budget was not prepared for the WWTP Fund in 2013, the plant's first year of operation, and in the 2014 budget, the wastewater treatment plant activity was included in the General Fund budget.

- For the 2014 and 2013 budgets, village officials did not hold a public hearing to obtain resident input.

Section 67.010, RSMo, provides requirements for the information to be presented in the annual operating budget. A complete and well-planned budget, in addition to meeting statutory guidelines, can serve as a useful management tool by establishing specific expectations for each area of village operations and provides a means to effectively monitor actual financial activity. In addition, obtaining input from village residents through a public hearing when adopting budgets can help residents better understand decisions made.

Recommendation

The Board of Trustees prepare complete budget documents for all village funds in accordance with state law and ensure a public hearing is held to obtain input from village residents.

Auditee's Response

The Board of Trustees provided the following written response:

We agree and will implement this recommendation when preparing the 2015 budget.

6. Ordinances and Sunshine Law Issues

Weaknesses exist in the documentation of minutes for Board and committee meetings. Items discussed in closed meetings were not always allowable or subsequently disclosed in open meetings as required by the Sunshine Law. We identified some problems regarding compliance with village ordinances.

6.1 Meeting minutes

Weaknesses exist in the documentation of minutes for Board and committee meetings.

- The number of votes on a given issue was inaccurately recorded in several instances. For example, at its May 14, 2013, meeting, the Board reviewed varying proposals from a vendor for a phone system. The Board meeting minutes indicate the motion to select one of proposals carried 5-0, but only 4 Board members attended the meeting.

- The Board minutes do not document a vote at the June 11, 2013, meeting when a bill was introduced to change workers' compensation insurance companies. The Village Clerk reviewed her handwritten notes for this meeting and determined a vote took place approving the bill 5-0. During this meeting, minutes indicate there was a motion to adjourn but no one is listed as making the motion, there was no second to the motion, and no vote recorded.

- The July 9, 2013, Board meeting minutes list the monthly bills to be paid but there is no motion or vote recorded to approve their payment.

- The September 10, 2013, Board meeting minutes indicate a bill was introduced and accepted to amend the sewer rate charge. The bill was approved but no vote was recorded, only a notation that the motion carried. In addition, the monthly bills were listed for payment, but there was no motion or vote recorded to approve their payment.

We also noted two instances where the Board Secretary or a Board member did not sign meeting minutes. In addition, no one prepared minutes for some committee meetings. For example, the Personnel Committee did not keep minutes for 6 of 7 meetings held during 2013 and the minutes for the meeting held October 2, 2013, do not show who attended the meeting or if

any motions or decisions occurred. The minutes include only a list of topics discussed.

Section 610.020, RSMo, requires meeting minutes be maintained as a record of business conducted and to provide an official record of board actions and decisions. The meeting minutes should be accurate and signed by the Board Secretary as preparer and by the Board Chairperson or another Board member to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the meetings. In addition, Section 610.010, RSMo, defines committees appointed by and reporting to public governmental bodies as subject to Sunshine Law requirements.

6.2 Closed meetings

Some topics discussed and voted on in closed meetings were not allowable or were not subsequently disclosed in open meetings in accordance with the Sunshine Law.

- On July 23, 2013, the Board voted to change the village hall office hours. The change was not documented in the open minutes. In addition, the Board approved a pay increase for a police officer and decided to retroactively recognize the Police Chief as a full-time employee and made him eligible to receive 3 weeks of vacation. There was no documented discussion of personal information regarding either employee which is necessary for these discussions to be closed.

- On March 19, 2013, the Board voted and approved a settlement agreement to terminate an employee. The village did not make public the settlement agreement.

Section 610.021, RSMo, lists the topics that may be discussed in closed meetings and requires the results of votes related to certain decisions made in closed meetings to be made public within specified timeframes or after conclusion of the action authorized by the vote.

6.3 Ordinances

Village ordinances are not complete and organized. The village has not adopted ordinances regarding the Village Clerk's job responsibilities, work hours, compensation, etc. Section 80.240, RSMo, provides that the Board appoint certain officials, prescribe their duties, and fix their compensation. Compensation should be set by ordinance. In addition, while ordinances appear to have been codified in 2004, the ordinances are maintained in a file folder and there is no up-to-date official ordinance book. An index of all ordinances passed and rescinded by the village is not maintained.

Since ordinances represent legislation passed by the Board to govern the village and its residents, it is important ordinances be current, complete, and organized. The lack of an ordinance index also makes it more difficult for the village to determine which ordinances are active or have been rescinded.

Recommendations

The Board of Trustees:

6.1 Maintain complete and accurate minutes for all open meetings.

6.2 Ensure meeting minutes publicly disclose the final disposition of applicable matters discussed in closed meetings. In addition, only allowable topics should be discussed in closed meetings.

6.3 Establish, by ordinance, certain officials duties and compensation. The Board of Trustees should also ensure ordinances are maintained in a complete, well-organized, and up-to-date manner, new ordinances are passed when appropriate, and an index of all ordinances passed and rescinded is established.

Auditee's Response

The Board of Trustees provided the following written response:

6.1-6.3 We agree and are in the process of implementing these recommendations.

Village of Country Club
Organization and Statistical Information

The Village of Country Club is located in Andrew County. The village was incorporated in 1953. The village employed three full-time employees and one part-time employee on December 31, 2013.

Village operations include law enforcement services, utilities (wastewater and trash), street maintenance, and planning and zoning.

Chairperson and Board of Trustees

The village government consists of a five-member board of trustees. The members are elected for 2-year terms. The chairperson and clerk are appointed by the board from the trustees. The members of the Board of Trustees at December 31, 2013, are identified below. The Board of Trustees members receive no compensation.

Kent Shipley, Chairperson
Charles Owen Compton, Clerk
Marvin Ed Chrisman, Vice-Chair
Bill Schellhorn
Allen Ashelford

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Dallas County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Dallas County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2013, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by Nichols, Stopp & VanHoy, Certified Public Accountants, is attached.

To the County Commission and
Officeholders of Dallas County, Missouri

We have audited the accompanying financial statements of Dallas County, Missouri, as of and for the years ended December 31, 2013 and 2012, which collectively comprise the County's basic financial statements and the related notes to the financial statements as identified in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law, which practices differ from accounting principles generally accepted in the United States of America. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to error or fraud.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Dallas County, Missouri, using accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the "Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles" paragraph, the financial statements referred to in the first paragraph do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Dallas County, Missouri, as of December 31, 2013 and 2012, or the changes in its financial position for the years then ended.

Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of the funds of Dallas County, Missouri, as of December 31, 2013 and 2012, and their respective cash receipts and disbursements, and budgetary results of these funds for the years then ended, on the basis of accounting described in Note 1.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated September 22, 2014, on our consideration of Dallas County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Dallas County, Missouri's internal control over financial reporting and compliance.

Note 1 - Summary of Significant Accounting Policies

Organized in 1841, the county of Dallas was named after George M. Dallas, who served as Vice President under James K. Polk. Dallas County is a county-organized, third-class county and is part of the Thirtieth Judicial Circuit. The county seat is Buffalo. Dallas County's government is composed of a three-member county commission and the following separately elected Constitutional Officers: County Clerk, Collector, Treasurer, Circuit Clerk, Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note I, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Dallas County, Missouri and the Dallas County 911 Board.

Dallas County's operations include tax assessments and collections, state/county courts, county recorder, police protection, transportation, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include only the primary government of Dallas County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Dallas County's legal entity. The Dallas County 911 Board is controlled by a separately elected board, and is also included under the control of Dallas County.

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of Dallas County, Missouri, and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission, an elected county official, or the 911 Board. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation bonds and obligations under capital leases) and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If Dallas County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Dallas County adopts a budget for each governmental fund.

On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget included estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

During our audit we noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The County did not prepare a budget for the Special Election Fund in 2013 and 2012. Also, the 911 Board Fund had expenses exceeding their budget in 2012.

Note 1 - Summary of Significant Accounting Policies (continued)

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property included within Dallas County's boundaries for the calendar year 2013 and 2012, respectively, for the purposes of County taxation, was as follows:

	2013	2012
Real Estate	$ 107,570,230	$ 107,209,423
Personal Property	30,734,479	31,063,844
Railroad and Utilities	14,969,218	13,387,361
	$ 153,273,927	$ 151,660,628

The tax levy per $100 assessed valuation of tangible taxable property for the calendar year 2013 and 2012, respectively, for the purpose of County taxation, was as follows:

	2013	2012
General Revenue Fund	$ 0.1702	$ 0.1709
Special Road and Bridge Fund	0.2647	0.2647

The County also receives sales tax collected by the State and remitted based on the County’s sales tax rate to the total sales tax collected in the County.

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in Dallas County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Note 1 - Summary of Significant Accounting Policies (continued)

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

Dallas County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2013 and 2012, the carrying amount of Dallas County's deposits was $1,032,398 and $1,204,724 and the bank balance was $1,097,694 and $1,245,932, respectively. As of December 31, 2013, 100% of Dallas County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2013, as follows:

Deposits	$ 1,032,398
Investments	-
Restricted Cash	-
Total Deposits & Investments as of December 31, 2013	$ 1,032,398

The carrying values of deposits and investments shown above are included in the financial statements at December 31, 2012, as follows:

Deposits	$ 1,204,724
Investments	-
Restricted Cash	-
Total Deposits & Investments as of December 31, 2012	$ 1,204,724

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Dallas County's investment policy does not include custodial credit risk requirements. Dallas County's deposits were not exposed to custodial credit risk for the years ended December 31, 2013, and 2012.

Note 2 - Deposits and Investments (continued)

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to Dallas County or its agent but not in the government's name. Dallas County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of Dallas County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Dallas County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by Dallas County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). Dallas County has no policy in place to minimize the risk of loss resulting from over concentration of assets in specific maturity, specific issuer or specific class of securities. Dallas County's deposits were not exposed to concentration of investment credit risk for the years ended in December 31, 2013 and 2012.

Note 3 - Interfund Transfers

Transfers between funds for the years ended December 31, 2013 and 2012 are as follows:

	2013		2012	
Fund	Transfers In	Transfers Out	Transfers In	Transfers Out
General Revenue	69,551	332,400	62,688	392,000
Special Road and Bridge	-	33,280	-	33,000
Assessment	111,000	-	113,500	-
Road and Bridge Capital Improvement	-	32,292	-	29,040
Law Enforcement Sales Tax	216,100	-	231,000	-
Jury	5,300	-	7,500	-
Election Services	480	-	2,976	-
Special Election	-	4,459	40,000	3,624
Total	$ 402,431	$ 402,431	$ 457,664	$ 457,664

Note 4 - County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees. The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than (1,000) one thousand hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government.

It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Section 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994. The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Pension Benefits:

Beginning January 1, 1997, employees attaining the age of sixty-two may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar amount, targeted replacement ratio formula, and the prior plan's formula). A death benefit of $10,000 will be paid to the designated beneficiary of every active eligible member upon his or her death. Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement at age fifty-five with reduced benefit is allowed. Any member with less than eight years creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions. The County Employee's Retirement Fund issues audited financial statements.

Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO, 65102, or by calling 1-877-632-2373.

Funding Policy

In accordance with State Statutes, the Plan is funded through various fees collected by counties and remitted to the CERF. Eligible employees hired before February 2002 are required to contribute 2% of their annual salary, while employees hired after February 2002 are required to contribute 6% of their annual salary in order to participate in CERF. During 2013 and 2012, the County collected and remitted to CERF, employee contributions of $73,264 and $70,298, respectively, for the years then ended.

Note 5 - Prosecuting Attorney Retirement Fund

In accordance with state statute Chapter 56.807 RSMo, Dallas County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. Dallas County has contributed $7,752 and $7,752, respectively, for the years ended December 31, 2013 and 2012.

Note 6 - Post-Employment Benefits

Dallas County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Dallas County.

Note 7 - Claims, Commitments and Contingencies

Litigation

Dallas County is involved in pending litigation as of December 31, 2013. The extent of the liability, if any, cannot be determined at this time.

Compensated Absences

The County provides employees with up to three weeks of paid vacation based upon the number of years of continuous service. Upon termination from county employment, an employee is reimbursed for unused vacation and overtime, if applicable. These have not been subjected to auditing procedures.

Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs maybe questioned as not appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Landfill

The County sold a closed solid waste disposal area in 2012. At December 31, 2013, the County is not aware of any obligation, however, any future obligations or liabilities related to improper closure of the solid waste disposal area are unknown.

Note 8 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

Note 9 - Subsequent Events

The County has evaluated events subsequent to December 31, 2013 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through September 22, 2014, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 10 - Long-Term Debt

Capital Lease Obligations

In 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of four new John Deere 772G Motor graders at a cost of $936,949 plus accrued interest of $18,186. The agreement includes interest of 3.3%, and requires annual payments of $78,308 ending June 1, 2018, with a balloon payment of $688,000.

Although the agreements provide cancellation of the leases if the County should fail to appropriate funds at the annual renewal dates, the County does not foresee exercising its option to cancel.

The following is the changes in long-term debt for the year ended December 31, 2013:

Capital Lease Obligations	Balance December 31, 2012	Additions	Retirements	Balance December 31, 2013	Interest Paid
John Deere Motor Graders	$ -	$ 955,135	$ -	$ 955,135	$ -

The following is the 2013 future minimum payments for all capital leases:

Year Ending December 31,	Principal	Interest	Total
2014	$ 47,827	$ 30,481	$ 78,308
2015	49,430	28,878	78,308
2016	51,085	27,223	78,308
2017	52,796	25,512	78,308
2018	753,997	12,313	766,310
	$ 955,135	$ 124,407	$ 1,079,542

Notes Payable

In 2012, the County entered into an agreement to purchase land at 305 North Ash Street, Buffalo, Missouri at a cost of $125,000. The agreement requires a payment at the signing of $50,000, the second payment of $25,000 is due on or before January 1, 2014, and the remaining balance of $50,000 is due on or before January 1, 2015. The agreement has no stated interest rate.

In 2011, the County entered into an agreement to finance the purchase of four Peterbilt Dump trucks at a cost of $288,000. In 2013 the County refinanced the loan. The new agreement requires monthly payments of $5,271 ending September 4, 2014 and one payment of $126,999 due October 4, 2014, which includes interest of 3%.

Note 10 - Long-Term Debt (continued)

The following are the changes in the notes payable for the year ended December 31, 2013:

Notes Payable	Balance December 31, 2012	Additions	Retirements	Balance December 31, 2013	Interest Paid
Land	$ 75,000	$ -	$ 25,000	$ 50,000	$ -
Peterbilt Dump Trucks	228,195	-	57,176	171,019	6,070
	$ 303,195	$ -	$ -	$ 221,019	$ 6,070

The following are the changes in the notes payable for the year ended December 31, 2012:

Notes Payable	Balance December 31, 2011	Additions	Retirements	Balance December 31, 2012	Interest Paid
Land	$ -	$ 125,000	$ 50,000	$ 75,000	$ -
Peterbilt Dump Trucks	278,826	-	50,631	228,195	5,238
	$ 278,826	$ 125,000	$ 100,631	$ 303,195	$ 5,238

The following is the 2013 future minimum payments for the notes payable:

Year Ending December 31,	Principal	Interest	Total
2014	$ 171,019	$ 3,729	$ 174,748
2015	50,000	-	50,000
	$ 221,019	$ 3,729	$ 224,748

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission and
Officeholders of Dallas County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Dallas County, Missouri, as of and for the years ended December 31, 2013 and 2012, and the related notes to the financial statements, which collectively comprise Dallas County, Missouri's basic financial statements and have issued our report thereon dated September 22, 2014.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Dallas County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Dallas County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Dallas County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify deficiencies in internal control, described in the accompanying schedule of findings and responses that we consider to be significant deficiencies: 13/12-2 and 13/12-3.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Dallas County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of

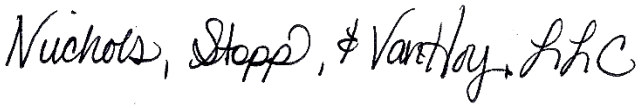
noncompliance or other matter that is required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and responses as item: 13/12-1.

Dallas County, Missouri's Response to Findings

Dallas County, Missouri's response to the findings identified in our audit is described in the accompanying schedule of findings and responses. Dallas County, Missouri's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.



Creve Coeur, Missouri
September 22, 2014

The County of Dallas
Buffalo, Missouri
Schedule of Findings and Responses
For the years ended December 31, 2013 & 2012

Financial Statement Findings

13/12-1 ***Condition:*** During our audit, we noted the County did not prepare a budget for the Special Election Fund, and the 911 Board Fund had expenses exceeding budget.

Effect: Missouri statutes requires Counties to prepare an annual budget and expenditures are not to exceed the budget. Due to not preparing a budget in the Special Election Fund and exceeding budget in the 911 Board Fund the County is in violation of Missouri Revised Statutes.

Cause: Oversight

Recommendation: We recommend that the County adopt a budget for all funds, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: The County will comply with your recommendation for the 2015 budget regarding the Special Election Fund.

With respect to the 911 Board Fund, management of the 911 Board will review actual expenditures as compared to budget and amend the budget as necessary.

13/12-2 ***Condition:*** Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal control.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: We will develop internal control documentation.

13/12-3 ***Condition:*** During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate fraud risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

Cause: Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze, and manage these risks.

Management's Response: The Commissioners & officials will perform a risk assessment.

The County of Dallas
Buffalo, Missouri
Follow-Up to Prior Audit Findings for an Audit of Financial
Statements Performed in Accordance with Government Auditing Standards

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by Dallas County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2010.

Prior Year Financial Statement Findings

10-1 Segregation of Duties

Condition: Because of a limited number of available personnel, it is not always possible to adequately segregate certain incompatible duties so that no one employee has access to both physical assets and the related accounting records, or to all phases of a transaction.

Criteria: Duties should be segregated so that no one employee has access to both physical assets and the related accounting records, or to all phases of a transaction.

Effect: Risk is present that errors or irregularities in amounts that would be material to the basic financial statements may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Recommendation: We realize that because of limited resources and personnel, management may not be able to achieve a proper segregation of duties; however, our professional standards require that we bring this lack of segregation of duties to your attention in this report.

Response: The limited number of available personnel prohibits segregation of incompatible duties.

Status: This in no longer considered a material weakness.

10-2 Reconciliation of Interfund Transfers

Condition: Some transfers between funds were recorded as revenues in the funds receiving the transfer and as expenses in the funds making the transfer. Transfers between funds are used to (1) move receipts from the fund that statute or budget requires to collect them to the fund that statute or budget requires to disburse them, and (2) use unrestricted receipts in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

Criteria: Transfers between funds should be recorded in separate transfer accounts instead of being recorded in revenue and expense accounts.

Effect: Expenses and revenues are overstated as a result of transfers being recorded in revenue and expense accounts.

Recommendation: Transfer accounts should be established and used when funds are transferred among funds. In addition, at year-end, the County Clerk should perform a reconciliation to ensure that the total of transfers in and transfers out equals zero.

Response: The County will implement procedures to properly record interfund transfers.

Status: Management has corrected this issue.

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Eleventh Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
City of New Melle, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-032, *Eleventh Judicial Circuit, City of New Melle Municipal Division*, issued in May 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the municipal division about the follow-up review on those findings.

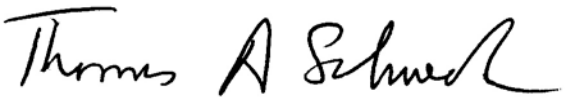
2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the municipal division, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. However, the City of New Melle Police Department discontinued operations upon the resignation of all police personnel effective June 7, 2014; and on October 23, 2014, the city entered into a contract with St. Charles County for law enforcement services. The municipal division was discontinued effective October 31, 2014. Fines and court costs will be collected through the St. Charles County courts, but the City of New Melle City Clerk will collect amounts due on existing cases. This report provides the status

of the recommendations prior to dissolution of the municipal division. Recommendation numbers 1.2 and 2.1 were not evaluated because the municipal division was dissolved before the recommendations could be implemented.

Our work was primarily conducted after the Police Department had discontinued operations, and during the time period the city was making decisions regarding the dissolution of the municipal division. As part of the AFTER work conducted, we spoke with the Court Administrator and the City Finance Director regarding the status of the recommendations and requested various records and supporting documentation; however, most of the requested information was not provided. We also spoke with the Mayor and the City Clerk regarding the status of the Police Department and the municipal division; and previously spoke with the former Chief of Police regarding implementation of recommendations during our audit exit conference in April 2014. This report is a summary of the results of this follow-up work, which was substantially completed in August through October 2014.



Thomas A. Schweich
State Auditor

1.1 Accounting Controls and Procedures - Unaccounted for bond monies

Our review of municipal division receipts and Police Department bond records determined two cash bonds totaling $415 received by the Police Department in 2012 were apparently not deposited; and as of November 2013, these monies had not been deposited into the bond account. The former Court Administrator indicated she did not have a record showing receipt of these bond monies or related information provided by the Police Department, and Police Department personnel could not locate any other records related to these bonds. Despite various audit procedures performed, we were unable to determine the disposition of these monies.

Recommendation

The City of New Melle Municipal Division investigate all shortages and undeposited receipts, and review current records to determine whether there are additional unaccounted for monies.

Status

In Progress

The Court Administrator indicated she continued to review old court records, but was unable to determine what happened to these missing receipts. She indicated she had not identified any additional unaccounted for monies, but the review process was not completed due to the poor court records.

1.3 Accounting Controls and Procedures - Receipts

The municipal division lacked procedures to ensure all monies received were receipted, recorded, and deposited properly. For all types of receipts, adequate documentation was not maintained when individuals made payments on behalf of a defendant and deposit tickets did not adequately detail the receipts included. In addition, many receipts were handled by employees of both the municipal division and the city before deposit, and there was often no documentation to support the transmittal of monies from one employee to another.

The City Clerk did not issue receipt slips for all monies received through the violation bureau. Generic receipt slips were issued only for cash receipts or upon request by the payor, and receipt slips were not issued in numerical sequence. The former Court Administrator did not record some violation bureau receipts in the municipal division's computer system and some court receipts were not recorded timely.

The Police Department and the former Court Administrator did not issue receipt slips for some bond monies received. Generic receipt slips were utilized by both the Police Department and the municipal division, and the method of payment (cash, check, or money order) was not always accurately indicated on receipt slips. The former Court Administrator did not always issue receipt slips immediately when monies were received and in sequential order, and some receipt slips were issued after the monies had been deposited. The former Court Administrator did not record several

bonds received from other entities in the computer system immediately when received. Some receipts were not deposited intact or timely, and some receipts were not deposited.

Recommendation

The City of New Melle Municipal Division work with the City of New Melle and the Police Department to ensure official prenumbered receipt slips are issued immediately and in numerical sequence for all receipts. In addition, the method of payment and instances when an individual makes a payment on behalf of a defendant should be properly indicated on receipt slips. The municipal division should work with the city to document transmittals of monies between employees, ensure receipts are deposited intact and timely, and ensure itemized listings of deposits are prepared. The municipal division should also ensure all receipts are recorded in the municipal division's computer system timely.

Status

Implemented

The Court Administrator indicated she implemented a procedure to ensure all receipts were entered in the municipal division's computer system immediately when received, and that any instances when an individual made a payment on behalf of a defendant were properly documented. The city purchased official prenumbered receipt slips to document court receipts received in the violation bureau. The Court Administrator indicated deposits were made on the day monies were received and individual receipts were listed on deposit tickets.

1.4 Accounting Controls and Procedures - Bond forms

Police Department personnel did not issue bond forms in sequential order or account for the numerical sequence of bond forms issued, and did not maintain a complete log of bond forms issued.

Recommendation

The City of New Melle Municipal Division work with the Police Department to issue bond forms in sequential order, account for the numerical sequence of all bond forms, and maintain a complete log of bond forms issued.

Status

Implemented

The Police Department purchased new prenumbered bond forms and implemented a bond log; however, the Court Administrator indicated no bonds were received after the department developed these procedures.

1.5 Accounting Controls and Procedures - Bond disbursements

The former Court Administrator did not disburse several bonds to the city or issue refunds timely, and some bonds associated with closed cases had not been disbursed.

Recommendation

The City of New Melle Municipal Division ensure bonds are disbursed to the city or refunded in a timely manner.

Status

In Progress

The Court Administrator indicated no bond monies were received after the audit. She indicated she continued to review the bond bank account to account for and disburse monies in the account; however, the review process was difficult due to poor records.

1.6 Accounting Controls and Procedures - Bond records and reconciliations

The municipal division did not maintain a bond ledger indicating the date and amount received, related case, and date of disbursement. The city did not maintain an adequate book balance in the accounting system for the bond account, and bank reconciliation procedures did not include a comparison to book balances maintained by the former Court Administrator or an investigation of differences noted. Also, the former Court Administrator did not ensure bond account activities were accurately recorded in the bond account check register, and therefore a complete and accurate book balance was not maintained. In addition, the municipal division did not prepare a list of open bonds or reconcile open bonds to the reconciled bond account balance.

Recommendation

The City of New Melle Municipal Division maintain a complete bond ledger to account for all bond activities, and work with the City of New Melle to ensure all bonds are accounted for properly.

Status

In Progress

The Court Administrator implemented a bond ledger to account for bond activities; however, no bonds were received. She indicated she continued to review the bond bank account to account for and disburse monies in the account; however, this review process was difficult due to poor records.

2.2 Municipal Division Procedures - Ticket accountability

Neither the Police Department nor the municipal division adequately accounted for the numerical sequence and ultimate disposition of traffic tickets issued.
